

# ESSEX COUNTY, N. J.,

ILLUSTRATED.

A SOUVENIR,

IN WHICH IS PRESENTED A BRIEF SKETCH OF THE EARLY SETTLEMENT OF ESSEX COUNTY, SHOWING ITS STEADY GROWTH AND DEVELOPMENT AS AN INDUSTRIAL CENTRE, WITH THE NATURAL AND UNSURPASSED ADVANTAGES ITS LOCATION OFFERS TO THOSE WHO ARE SEEKING FOR DESIRABLE MANUFACTURING SITES, OR ELEGANT HOME LOCATIONS. PROFUSELY ILLUSTRATED WITH VIEWS OF, AND IN NEWARK, THE LEADING CITY OF NEW JERSEY.

DESIGNED BY PETER J. LEARY.

## Acknowledgments.

• •

Photographs represent every studio in this city, and are principally by WILLIAM F. COSE, Esq.

Engravings by the HAGOPIAN PHOTO-ENGRAVING CO., 3 Great Jones street, New York City, THE SCHULZ PHOTO-ENGRAVING CO., and SEEBECK BROTHERS, Photo-Engravers and Electrotypers, of Beekman and William streets, New York City.

The review is written by Dr. M. H. C. VAU.

Composition, Press Work and Binding by L. J. HARDHAM, 243-245 Market street.

## Preface.

THE OBJECT of the designer in presenting this Souvenir is to attract the attention of those who are seeking for desirable homes or manufacturing sites, to the natural and unsurpassed advantages, as well as to some of the characteristic features of Essex County, N. J. A Newark mechanic himself, he felt a personal pride in producing a work above reproach that would bear inspection and meet with the approval of his fellow-citizens. The projector, during the prosecution of the work, was received and shown the utmost courtesy by all classes of the people, to whose generosity and material assistance its completion is mainly due. The illustrations present natural and life-like views of the Streets, Parks, Churches, Charitable Institutions, Academies, Colleges, Schools, Public Buildings, Newspapers, Manufacturing Plants, Stores, Residences and portraits of some well-known and highly respected citizens. A brief historical sketch is given and an account of the wonderful growth and development of the numerous interests that in the past have, and are now, contributing to make the County of Essex great, wealthy and famous. We trust that the succeeding pages may be found filled with useful and interesting information adapted to the object in view.

DR. M. H. C. VAIL,  
EDITOR-IN-CHIEF.

# HISTORY OF ESSEX COUNTY, N. J.

LANDING OF THE EARLY SETTLERS AT NEWARK, ESSEX COUNTY  
N. J., MAY, 1666.

**E**SSEX County, an integral part of New Jersey, a State which was one of the Original Thirteen colonies, and at this present 1866, a member of the grandest confederacy of free and

independent States that ever existed since the Great Architect tossed out from his fingers this earth of ours, fixed its orbit and sent it spinning round the great central sun, marked its bounds amid the rolling oceans, bidding the tides come and go, and that part quite insignificant when extent of territory is considered but mightily increased in magnitude when population and wealth are thought of. Sometimes she has been, and not always inappropriately either, when the grandeur of the two above-named reasons are combined with her marvellous manufacturing interests, called the "State of Essex." Indeed, this was always so. In her early life Essex County could boast a territory surpassing some of our quite pretentious States, but with much of this she parted when the counties of Union and Bergen were erected out of her territory.

"God tempereth the wind to the shorn lamb" is an old adage and, in its application to Essex County, a truthful one, since her growth in the directions of population and wealth have been truly wonderful, presenting evidences on every hand of the vouchsafement by the Almighty in the bestowal of his richest blessings in such rare profusion.

To be sure, her natural advantages may have had much to do with her prosperity and greatness, being situated at the wide open door of the Western World's greatest commercial metropo-

lis, and immediately upon the line of direct railroad communication with Philadelphia, the second commercial city on the western continent, and within a few hours of the rich coal fields and oil regions of Pennsylvania and Ohio, and the iron and zinc mines of New Jersey. The beautiful Passaic River which laves its eastern boundary, giving a water-way to the ocean, whence the raw materials are brought to the docks in Newark and the manufactured products, made famous the world over by the rare skill of the mechanics, artists and workmen of Newark, Orange, etc., are sent forth on the white wings of commerce to the busy markets in almost every clime and wherever flies the stately flag. The pure mountain water coming down by its channel, meeting and marrying the salt sea flood, after making the wild leap at the falls in Paterson, and riding from thence on the ebbing tide's chariot away on to the sea.

Then it is protected from the cold blasts, which come careening down in winter from the north and the west by the picturesque Orange Mountains so beautifully stretching along its western border. Is it any wonder that the salubrity of its climate with its balmy sea air, dew-moistened by Old Ocean's inexhaustible supply resulting from the sun-influenced evaporations, should induce the soil so lavishly fed by nature and resting on its rare brown stone foundations to yield so marvellously in garden productions as to have encomiums showered by tongues of other and distant nations.

Although the "scouts" sent out by the sturdy New England farmers did not bring back wine trophies to vie with their Israelitish exemplars, but merely reported that their Eden was on the west bank of the Passaic so called by the Indians.

Several desultory efforts and as many failures succeeding to effect a permanent settlement of the beautiful and attractive region, on the soil of which the flag of old England had been

the old world. It was a hardy and honest people, a people of the hills and valleys, of the mountains and the plains. They were a people of the soil, a people of the sun and the rain, a people of the wind and the fire. They were a people of the North, a people of the South, a people of the East and the West. They were a people of the North and the South, a people of the East and the West. They were a people of the North and the South, a people of the East and the West.

It was a people of the soil, a people of the sun and the rain, a people of the wind and the fire. They were a people of the North, a people of the South, a people of the East and the West. They were a people of the North and the South, a people of the East and the West.

FIRST SETTLEMENT.

AS soon as the first settlement of the beautiful Upper Merik region had been made, but 'twas not until Robert Treat and his hardy band of honest farmers, coming with them more honor and less greed for gold, that the permanence resulted. To establish homes and to make a settlement where true liberty might reign and where under the same flag they could worship God after the dictates of their own conscience, these farmers came. Religious liberty was what they sought, and this they gained, for if the record speaks the truth, and in our research we find no reason for its gain-

THE FIRST SETTLEMENT ESTABLISHED AT Eagle Rock, Essex County, N. J., 1669.

...of the soil, a people of the sun and the rain, a people of the wind and the fire. They were a people of the North, a people of the South, a people of the East and the West. They were a people of the North and the South, a people of the East and the West.

saving to or do men worship with more freedom, more honesty or more unselfishly.

Although armed with a land grant and broad invitation of Gov. Carteret, when they had but just kissed the soil and had won a God's blessing on their El Dorado, another and more potent power, an Huguenot quite strange, bade them refrain from their purpose to dig and to delve, but, said the Indian, for "you see nothing in the red man." "If you are ready to buy, I will sell to you." It didn't take these honest farmers very long to answer the raised question and express a readiness to buy.

Robert Treat and his companions, being men of business and no great fools, were not long in making the bargain for a "title clear" to the possessions of their choice, and when they

had doled out in the strictest sense of honor, the purchasing price, consisting of what in our days would be considered modest and unextravagant. Part of the price paid was barter, as all the cash that passed consisted of but eight hundred and fifty fathoms of wampum (Indian money), or bits of shell on a string; and just here we may say, although the transaction took place in the month of May, when the early spring flowers were in bloom, we may infer from the character of some of the goods sought, that the Indian let his memory dwell on the cold blasts from the seaward, which swept across the sea-moorland from the ocean, and the chill winds that swooped down from the mountains to the northward in the months of the winter.

That there might be no misunderstanding as to the limits and bounds of the lands they had bought, the first surveying party of Essex County was organized and immediately set about its work. These hardy pioneers built better than they

spot where the chief man stood, and it was pointed out as "way-an-da," or away over yonder, a compass of a certain bearing and little index finger including the same. If they were on the bay, brook and river, they served a course of the magnetic needle of the theodolite, and the surveying was noted down on a bit of prepared skin, which was also a rough map made by the white scribe and appearing to be for the purpose. On this was shown, to the satisfaction of the chieftain and the captain, the metres and so on. Four or five days after, the distances were measured, the trees marked by the axe-man who followed after, the blazes of the Indian, long-headed and wily pointing out the places.

GEOGRAPHY AND TOPOGRAPHY.

ESSEX County was one of the original sections of the State of New Jersey, and was erected into a county in 1675, but it was not until the 21st of January, 1769, that its bound-

VILW OF NEWARK, ESSIX COUNTY, N. J., EAST OF BROAD STREET, 1790.

knew, for little thought they when racing and chasing with the fleet-footed savage, along the river bank, across the hills and up the mountain rugged side to the top of the ever beautiful Orange Mountains, to the point now known as Eagle Rock, that here they halted and established the first surveying station, and that the vast arena over which the eye could then sweep, would, in less than three centuries, be inhabited by nearly a half million of people and become one of the garden spots of the world, might be properly surveyed.

Here they lunched on the rare native fruits and choice bits of dried meats from the loins of the fleet-footed deer or the old mountain bear, and washed it down with a "drop of the creature" to brighten the mind and waking the conceptions that their bargaining was fair, and the selling and buying was done on the square. Be it known just here, and in sorrow be it said, the yearning of the Indian was for "fire-water," nearly all his transactions beginning and ending in liquor.

The luncheon being finished, the party stepped to the pinnacle of the rock, a blaze of the tree with the axe marking the

aries were definitely fixed by an act of the legislature. Its area was then much greater than at the present time. It comprised the territory then designated on the maps as Elizabethtown and Newark, and was covered by the Counties of Middlesex (or a part of it), Union and Morris, as well as the territory within its bounds of to-day, which is abutted and bounded as follows, viz: on the north-east by the County of Passic, along its eastern border range, the territory of Bergen and Hudson counties and Newark bay, the Achter Cull of the great navigator and discoverer, Hendrick Hudson; on the south-west by Union county, and along its north-west, the fair fields, which were once her own territory, but now the County of Morris.

Her topography is delightful, unique and truly inspiring to any one who may look upon the diversity of its character, with the two beautiful mountain ranges stretching like ribbons along its westerly border, and known under the appellation of the Orange Mountains, first and second, with other names of local significance, all of which, with hundreds of nooks and crannys, with purling streams and sylvan dells, her invitations for men

the land of the Delaware Indians, and when the latter, through the efforts of the English, were driven from the Delaware Valley, the land was granted to the first settlers.

The first settlement was made in 1682, and the first English settlement in 1683. The first Dutch settlement was made in 1684, and the first German settlement in 1685.

The first English settlement was made in 1682, and the first Dutch settlement in 1684, and the first German settlement in 1685. The first English settlement was made in 1682, and the first Dutch settlement in 1684, and the first German settlement in 1685.

forming the County of Morris, but when the first English settlement was made in 1682, and the first Dutch settlement in 1684, and the first German settlement in 1685.

both rising from the ocean and at the same time strongly from the Delaware bays. The water is very pure and is said to be good for all kinds of ailments.

VIEW OF NEWARK, EAST OF MULBERRY STREET, IN 1812.

spectre-like, flit their cars here, there and everywhere over the Essex domain.

As the greater part of the territory going to make up the county of Bergen was included in the grants, of which Essex was the coveted part, a few words as to the settlement at Bergen, which preceded that of the Connecticut farmers by a few years, will not be out of place.

Nearly all writers on the subject of the early settlements of the county, make mention of troubles with the Indians, "difficulties and complications often leading to collisions," says a local writer, which was followed in not a few instances by a complete wiping out of the settlement.

As English or German speculators, who were in pursuit of gold through the open channel of trade with the red men and could control influence enough to reach the king, would bring over a little band under the wildest sort of promises and then leave them in the wilderness to perish at the hands of the savages. On the return of the speculators with another set of dupes a year or two afterwards, no vestige of the former settlement would be found, if settlement, indeed, it could be called.

For years these barbarous proceedings were carried on until, as before mentioned, men came to seek homes in the New World, subdue wildwood and till the soil, men whose hearts were liberty-loving and who, while they loved the precious metals, they bartered when necessity demanded or business transactions made a specific call. Historians, so far as we are able to trace, give the first place in the order of early settlements to Bergen, but whether the honor of learning the art of fraternizing with the

COTTAGE AND TABLE, N. J., DECEMBER, N. J.

VIEW OF NEWARK, ESSEX COUNTY, N. J., IN 1719.

Indians belongs to the Dutch or Dane (so that the settlers might live in peace side by side with their red neighbors), writers are not agreed. But one thing is certain, that an insignificant trading post established about 1616 which, being managed with a business-like astuteness, grew in importance until, about the tenth year following, the station planted on the hill where Bergen now stands became a permanent settlement.

THE IROQUOIS AND DELAWARES.

THE long-existing feuds between the Indian tribes, the efforts to subdue one and the other led to no little suffering of the settlers. At the period of our Connecticut farmers' coming there were, all told, in the region about twenty kings, but from this we have no right to infer that their numbers were large, since the record gives an account of a king who had but forty subjects, and of another pair of kings who held authority over twelve hundred between them. "The Indians," says Dr. Veshlage, "in this part of the general stock of the Delawares or Lenni Lenapés, who were fierce and war-like," and relates as an evidence that they swooped down on the more peacefully inclined, and that arrow-heads and many other articles of flint have been found even in the past few years. The Delawares, he states, were eminent for valor and wisdom and held a prominent place in Indian history, but on the rise of the Iroquois power they lost their independence and fell under the suspicion because many of them applied themselves to agriculture. A tribute was exacted from them every year in order to show an acknowledgement of subordination.

The Iroquois gloried in the haughty manners in which they showed their superiority, and never spoke of the Delawares only as "women." The shrewdness of the Iroquois was fully developed when they kept a small band of their warriors in several parts of the conquered territory.

While Hendrick Hudson traded with the Indians, yet when he sold the Iroquois, he valued each article, and the Delawares were getting the best of the night, and thus turned the scale against them, he fell from the exalted position of the pure and good.

THE ACREAGE OF ESSEX.

ALL told and so tersely and truthfully said by Professor George H. Cook, the late scholarly State Geologist, reaches a total of 77,021, and having a distribution among the towns, as follows: Belleville, 5,062; Bloomfield, 8,070; Caldwell, 17,020, of which 2,617 is low meadow lands enriched by the overflow of the river, produce immense quantities of fair grass, which finds a market in the cities of Orange and Newark; Clinton, 5,229; East Orange, 2,304; Livingston, 11,354, 333 of which is also low meadow land, and as does that of Caldwell, borders the Passaic river, which forms their westerly boundary, as well as that of the County of which they are a part; Millburn, 6,234; Newark, 9,129, with a few acres additional taken from East Orange; of Newark's acreage, about 4,282 are tide-marsh lands; Orange, about 1,800; South Orange, 6,118; West Orange, 3,725; Verona, a new township erected from the easterly edge of Caldwell, and containing about 4,000 acres, more or less. These above-named townships (in order in number), with the cities of Newark and Orange, the boroughs of Vailsburg, Glen Ridge and Caldwell, the villages of South Orange, Montclair, Irvington and Bloomfield, constitute the political divisions of Essex County.

GEOGRAPHY AND TOPOGRAPHY.

NO county in the State of New Jersey, and few indeed, in any of our sister states, is more happily situated and derives a greater benefit, industrially and commercially speaking, from her geographical position. As given on the map ought

over the history of the brown stone interests of Essex County it has been found that quarries have been opened as early as 1700, and stone taken therefrom to construct the substantial old farm houses, mills, etc., which remain to this day, showing evidences that give warrant of qualities good for another century. Long before marble came into vogue here as a material from which to make grave-stones, tablets and monuments, brown stone was used.

Quarries for getting out these stones were worked in several townships, beginning at Newark and extending as far north as Franklin and including Belleville, Bloomfield and Orange. The Belleville quarries, which are located on the west bank of the Passaic river, now the town of Franklin, are about one-quarter of a mile from the Avondale station, on the Newark and Paterson railroad. The first opening was made in or near this place for the purpose of procuring stone for building, more than a century and a half ago. Since 1857 they have been vig-

almost faultless with even surfaces and a remarkably geological fact that, in the past ages, there had been a great deal of slipping down, as the strata would indicate. It will be remembered that the strata trembled and shook so severely during the earthquake of several years ago, really destroying the buildings and doing injury all along the sea, that many of the strata were tilted the trouble being generally supposed to be a slipping of one stratum over another, with its top tilted in the direction of a sort of general contraction, and not of a general expansion. But as we have no business in this field of geology, we will not dwell on every fact established, but will avoid the geological details, and dwell on in the great laboratory of nature, the results of reasoning out of the wheel and the wheels of the world, where it belongs, or, in short, in the hands of a competent and more willing to cope with it.

VIEW ON BROAD STREET, LOOKING SOUTH FROM MARKET STREET IN 1840.

orously worked. The production has been greatly increased since that time. From three to five hundred men are employed steadily in quarrying the blocks and in dressing the stones in yards nearby. Cook's Geological report for 1881 (and probably the last ever made by that eminent scholar) says: "The workings move in a generally westward direction, extending from within a few rods of the river road into the gently rising ridge. All of them descend below the tide level of the river. The overlying earth is glacial drift, containing much red sand-stone and in places, imbedded sands and gravel." One fact has been made patent to every quarryman, viz.: That the deeper he goes the better the stone, the quality improving with the increasing depth of earth and consequent increase of pressure to which the stone is subjected. He also says that what is termed the "dip" of the strata is toward the northwest and at an angle of from 10 to 11 degrees. The Professor is said to have been

A fact which grows sterner as the width of the strata comes where the stores of wealth lie packed and enormous quantities as to be, and remain for ever, and years incalculable, and as the depth from which the stone increases the more Herculean-like, becomes the work of man, and of the great blocks from their beds to the surface, without the least assistance from gravity, all the workings resting on the "dip." In moving the stone, mighty derricks are used to just lift the blocks. These are run by steam engines, and must be sound in every part. A well-tempered plane, or flay anywhere pointing to danger and disaster, as certain as the magnetic needle to the pole. The best United States scholar placed the value of the stone quarried in a single year from one quarry, at a quarter of a million, including the selling price of the light grey stone at one dollar per cubic foot, and the fine grained reddish colored sand-stone, suitable for building.

TRAP ROCK.

NEXT in importance to the brown stone which adorns, beautifies, and enriches the dwelling houses and business places of the fortunate possessors of the hills and mountains of Essex County, comes the trap rock, which makes durable and smooth the sidewalks and pathways, the streets and avenues, where the wheels of the citizens may roll, bringing comfort to their feet. It was first seen upon the fact which had long been made manifest, through accident. The accident made itself manifest in this wise. Through the outcropping of this peculiar material in places where highways in course of time were opened for the purpose of giving the settlers access to places where the farms were springing up in different sections of the county. These highways or public roads, when opened, were sometimes worn as 'twas said, and sometimes not. Here it was where the fact occurred that these roads or public highways crossed these

FIGURE 11. — FEELETON, NEWARK, FROM CHAMBER STREET, IN 1840.

strange outcropping of trap rock and showing no evidence of necessity for its use, but which gave abundant evidence, in the course of time, of the great value of this peculiar kind of rock material for paving, by the wonderful durability and smoothness of which it was so covered to possess. To this material Essex County is indebted, to a great extent, for the wide, comfortable road avenues of which she boasts to-day. That she is not unjustly so must right to boast, one has only to take a ride or walk on these avenues, and conviction will follow with rapidity.

To the debt of gratitude is due the men who have been found to open the quarries, get up the stone crackers, attach the machinery, and furnish to the road builders stone in all quantities, and whose long experience has proved the most available. While it is true of the men who have delved in the Orange Mountain quarries in search of the quality of stone the

most desirable for the uses and purposes set forth in the order from unknown parties or from wherever it may have emanated.

Among the quarrymen there has ever been a generous rivalry, and the orders for the largest consumers of the broken "trap" has led to a business competition which has driven the price per ton down with each new call for competency bidding, the fortunate winner often securing the prize on a big quantity and fine quality with a margin of only a half dollar or less on the ton to secure the contract. Many have travelled far and crossed the ocean to reach and enjoy such a sight as the Giant's Causeway presents. A similar wonder can be seen any time in O'Rourke's trap rock quarry, on the face of the First Orange Mountain.

ESSEX COUNTY ROADS AND AVENUES.

THE exact time when the roads and avenues in the county of Essex were laid out is involved in considerable obscurity, but certain it is that the fine wide streets known as Broad and Market streets, in the settlement of Newark, were the first roads laid out by the early settlers of the county. The first road on record that was laid out by the Commissioners of Highways is in the Essex County road book, and bears date December 3d, 1698, and refers to a road in Elizabethtown, which at that period formed a part of Essex County. In 1705, a road was laid out connecting the towns of Newark and Elizabethtown. High Street was laid out as a legal road in 1709, although it had been used for a highway previous to that date. In 1717, several roads had been laid out on the Newark "Neck" to enable the farmers to get in their salt hay, and the old Ferry road was extended to Hudson County, with the old-time rope ferry boats to convey passengers and freight across the Passaic and Hackensack rivers. In 1806, the Newark and Pompton Turnpike Company was incorporated. This thoroughfare ran from North Broad Street, now Belleville Avenue, in a northwesterly direction to Bloomfield, which at that time was in the town of Newark; thence to Craneston, now Montclair, and over the First Mountain, through Caldwell to Pompton Plains. This road is now Bloomfield Avenue and is under the care of the Essex County Road Board, within the county limits. In 1811, the Newark and Morristown turnpike was laid out, extending the old South

THE OLD PLANK ROAD FERRY-HOUSE.

Orange road which was in existence years before. The principal roads and avenues running through the county, connecting its cities, towns and villages, are all fine and broad avenues, well paved and under the care of the Essex County Road Board.

This Board had its origin in the far-sighted and public-spirited Llewellyn S. Haskell, the founder of Llewellyn Park, West Orange. Some years after he had completed that beautiful park, Mr. Haskell conceived the idea of making all of Essex County one grand park with Newark as a centre. His idea was to take the principal thoroughfares leading out from Newark, grade and pave them so as to make easy and pleasant drives and then connect them by lateral roads. In pursuance of this plan, Mr. Haskell procured from the legislature of 1868, a law incorporating the Essex County Road Board. The first members of the Board were Llewellyn S. Haskell, William H. Murphy and Francis McGrath. The law was found to be defective and a supplement was passed in 1869, increasing the number of commissioners to five. The first commissioners so appointed were A. Bishop Baldwin, of South Orange, William H. Murphy, of Newark, Jesse Williams, of Orange, George Peters, of Newark, and Robert M. Henning, of Montclair. Mr. Murphy soon resigned, and Mr. Timothy W. Lord, of Newark, was appointed in his place. To these five citizens is due the credit of the magnificent system of county roads in charge of the Road Board, which form in Essex County a system of drives that is unequalled anywhere in the vicinity of New York. The avenues in charge of the Road Board are, Frelinghuysen avenue, extending from Astor street, Newark, to Elizabeth; Springfield avenue, from the Court House in Newark, through Irvington, South Orange and Millburn, to the Morris county line; South Orange avenue, from Springfield avenue, Newark, through Vailsburgh and South Orange, and up to the county line; Central avenue, from Broad street, Newark, to the Valley road, West Orange; Park avenue, running from Bloomfield avenue, Newark, to Llewellyn Park, West Orange; Bloomfield avenue, from Belleville avenue, Newark, to the county line in Caldwell, and Washington avenue, from Belleville avenue, Newark, through Belleville and Franklin, to Passaic.

BALDWIN HOMESTEAD, AN OLD NEWARK LANDMARK.

## SLAVERY IN ESSEX COUNTY.

THE first slave brought into the colony was a negro, named John, who was purchased by a Dutch merchant, and sold to a farmer in the town of Newark. He was the first of a race which, in the course of the century, grew to a large number. The first slave who was brought into the colony was a negro, named John, who was purchased by a Dutch merchant, and sold to a farmer in the town of Newark. He was the first of a race which, in the course of the century, grew to a large number. He was the first of a race which, in the course of the century, grew to a large number.

few slaves, passed acts of emancipation and set their negroes free. Very different was it where the burden of labor fell on the shoulders of him who had been purchased for the purpose.

Out of this situation of affairs grew the slavery question—the differences between the free and the slave states, and finally led up to the late civil war. At first the slaves did not speak English, and they practiced many wild African customs. Some of them were fierce and the people became afraid of their peculiar manœuvres. Great harshness was used in many places to subdue them. Egg'leston reports one of these in New York City, in 1712, when twenty-four negroes were put to death. In 1749, an uprising of them in South Carolina led to a battle, in which the negroes were routed. By a reference to the record it will be found that Queen Anne gave encouragement to the Royal African Company of England, of which the Duke of York was president, offering as a bounty for each able African slave introduced, sixty-five acres of land, as a further inducement and to encourage and make their inhumanity more inhuman.

VIEW OF NEWARK FROM THE TOP OF FRANCIS STREET, IN 1875.

It was the quantity of slaves raised for exportation to the West Indies to be brought. About the same time the planters of the colony in South Carolina created a great demand for slaves. The institution, odious though it was, had become a source of profit. Even New Jersey failed in the hour of her independence to derive large profits to be derived from slave labor. She refused to free. Nor did Essex County offer any inducement to their introduction, even an original Puritan colony, where men were free and independent. Even New Jersey, when the breezes from Plymouth Rock came, failed to spread its religious influences broadcast, but rather to build a barrier against it. For till the Revolution, the colonies as New York, New Jersey and Pennsylvania, were slave lands, improvable, and it was not till after the Revolution, where they could be made use of as a source of profit. At the Revolution, the colonies which had

by keeping up a full supply of merchantable negroes at (mark the stain) reasonable rates.

One fact stands out prominently all through the conduct of this nefarious business—so long as England profited by the traffic in African slaves, she held out a liberal encouragement to those who had sunk so low in the scale of humanity as to become slave traders. Thus the stain sank deeper, until the pen, proving mightier than the sword, broke the galling chains asunder, and the proclamation of Abraham Lincoln set the slaves free.

The wealthy people of Essex County were not slow even though of good old Puritan stock to give countenance to the weakness for getting cheap labor through the channel of human slavery, and while they did not drain it to the very dregs as they did in the tobacco and rice growing colonies, no house of pretensions but had its servants from among those of whom Bryant sang:

Men from England bought and sold me,  
Paid my price in paltry gold.

Neither was their broad acres properly tilled without labor bought in the markets. When taken as a whole, slavery in New Jersey didn't pay, and while New York, Pennsylvania and others of the sisterhood early compelled their legislatures to pass acts abolishing the practice of purchasing and holding humans in bondage, New Jersey satisfied her conscience by acts of gradual emancipation.

In 1790, the census reported 11,423 slaves as held in New Jersey, the larger number of these being owned and used as house servants in the territory of the "State of Essex." Notwithstanding this situation of affairs, there were many who dared to raise their voices against the inhuman practice.

In 1804, public opinion had been so far swayed that an act of gradual emancipation was passed. This gave freedom to the

nearly all of whom, or descendants of them, were put to service as slaves, mostly in the southern States.

Many other features of the institution of slavery which would be of interest to our readers might be given, but the space will not permit.

### WATER SUPPLY.

THE water supply of Essex County is derived from the Passaic River, long or from whence, but is an old story. It is not to be found complete in all its details and rippling down the hill tops and down the mountain sides, when the bride affianced of farmer Josiah Ward, the 19-year-old daughter of Captain Swaine, had stepped ashore, thus winning the position of honor, and kissed the consecrating kiss which needed but the

VIEW IN NEWARK, N. J., LOOKING NORTHWEST FROM FREEMAN STREET.

men and women, but the masters were compelled, under the law, to maintain them as long as they lived. This act gave freedom to all children born in slavery, the boys at 25 and the girls at 21 years of age. A short time afterward an amendatory act was passed reducing the ages to 21 for boys and 18 for girls. There is now living in Essex County several of those whose freedom came through the workings of the amendatory part of the act. Mrs. Hannah Mandeville, the widow of Anthony, now in her 77th year, and still hale and hearty, is living in Newark, at No. 14 Hackett Street, where she enjoys the competency her good man left her, and is never happier than when rehearsing the history of her life.

Essex County has quite a large number of colored people,

wedded bliss to wake the bud of hope nestling snug in the blossom of good wishes now ready to bloom for the Connecticut farmers on the soil of Essex County. First, the Passaic river had started away back where the delicate squaw and the wee little Indian papoose (baby) had sipped the cool draught alongside the white lily pad where the wild deer raised no objections here and there covering a hiding-place for the wild duck, the wild goose and the plover, slowing down till she formed the pig and the little piece of meadow, that muskrats, the mink, and now and then a beaver, to take time by the forelock and get things in readiness to meet winter's cold selections, and then beckoned on by the rocky way, called Little Falls, in order to make preparations for the final leap at the great falls in

all the late improved pumping apparatus, and great reservoirs had been constructed to contain the combined energies of the entire apparatus. It began to leak out (not the water, but the fact) that the sewage from the great capital city was chiefly responsible for certain contaminations of the Passaic's once crystal fluid—which not alone could be seen, but which it was said had grown so strong as to be easily felt as the tides ebbed and flowed across the sill of its wide open door.

PEQUANNOCK.

WHILE it cannot be said that the great Pequannock water sheds, reservoirs, etc., belong in reality to Essex, yet it comes booming down the mountains and winding through the valleys until when it reaches the boundary line and opens its flood-gates of pure mountain spring water into the great receiving reservoirs near Belleville, which were closed to Passaic's polluted waters (late discovered) but stood with outstretched

ARTESIAN WELLS.

ALL over the county, in many a spot, a thing would never have been expected tapping mother earth, where beneath the sylvan brook and rest quiet lake, of pure water by the pretty-lured fishes which, with many shoot from one water cave to another and through seam and crevice, it reaches the sand and gravel, by nature formed, provides a home for the finny friends of man.

ESSEX COUNTY IN THE REVOLUTION.

TO the lot of a very few, indeed, of her sisters did it fall to play such an active part in the Revolutionary War. Her geographical position was such that the doors were left wide open to its ravages, and hers, from necessity, if from no other cause, could not remain anything but an out and out

VIEW ON WASHINGTON PARK AND WASHINGTON STREET, NEWARK, N. J.

arms to welcome Pequannock's supply to its embrace. As we reach the subject of water supply more in detail in another chapter of this book, the reasons which stand out boldly in proof of the fact that few cities (if any) in the republic are supplied with water answering all purposes to a greater degree than that which the Pequannock furnishes, will be given.

ORANGE GETS WATER.

THE bright little city of Orange, the second in size of the cities of Essex County, whose people made frequent and repeated demands for a better supply of water and this they finally procured. By building a dam across the west branch of the Rahway river, between the first and second Orange mountains, the waters of that sylvan stream were staid back till a sufficient amount was husbanded to meet the wants of the beautiful city.

patriotic and dangerous position. As soon as the town sounded and war, cruel war, was at her doors, the mass of her people, who were patriots to the core, and lovers of liberty and freedom of the most exalted type, they began playing the heaviest parts on the what proved a bloody stage. They had heard the shrill blasts of the trumpet of liberty which was echoing throughout the land, and the despicable stamp act of the mother country had fired the hearts of the lovers of freedom everywhere throughout the length and breadth of the colonies, and it found the children of Essex ready to snap asunder the ties that bound them to the mother country. Notwithstanding the fact of their loyalty to the king and a religious desire for peace, they were ready to take up arms in defense of their liberties and rights.

As in all other sections of the country, there were those who, from one cause or another, had a lack of patriotism or were open and avowed royalists or tories and cast the weight of their

died for the liberty which is such a precious boon to us to-day. That little New Jersey and her daughter, Essex, and the latter's sisters, the misses Mercer and Monmouth, nobly acted their part, we have only to revert to the imperishable pen pictures historians have painted and the many war scenes and bloody battle-grounds which dot their territory over and besprinkle their battle-scarred faces o'er and o'er.

From Trenton, in Mercer, where Washington pounced on the Hessians and convinced them by proofs irrefutable that there's virtue in the habit of quite early rising, for Washington had whispered to his generals and they in turn had said to the foot-sore soldiers under them, "When the cock crows for the dawning,"

Let's up and at 'em—  
Those plaguy old Hessians,  
And give each one of them  
A choice Christmas dressing.

County, where Parson Caldwell supplied the soldiers with muskets, his spirit of sorrow and indignation wantonly and cruelly murdered Caldwell in the door of the parsonage with the following epitaph by:

Not satisfied with the murder of Caldwell, a child, they proceeded to fire the little church to ashes. Having satisfied their blood-thirsty desire for a line of retreat for Staten Island, the American army fled giving fire all the way to the bay.

Some years ago, while Bro. Harte was putting up the old church and the battle-ground of Springfield, he put the following tribute to the memory of Caldwell and the battle of Springfield, in the following lines penned in his own peculiar style:

VIEW ON CLINTON AVENUE AND HIGH STREET, NEWARK, N. J.

Silently through snow and the bitter cold of a winter night, the patriot army took up the march, and when daylight was just breaking, Washington had crossed the Delaware, which was made wild by the winter's upbreking of its December ice, and the line of march taken for Trenton, four miles away. And yet the first that Cornwallis knew of the little trouble at Trenton was the thunder of Washington's guns at Princeton. Mercer having done her part, Monmouth was ready to support her, and right royally she did it, with Moll Pitcher to help her, as is so graphically and in sweet poesy told by Dr. Thomas Dunn English.

At Springfield, we touch what was then the soil of old Essex, where Parson Caldwell, when the battle was the thickest, rushed into his church and gathered up the books called Watts' hymns, and in a moment was out again and rushing from soldier to soldier, exclaiming as he ran: "Give them Watts, boys, give 'em Watts!"—they having exhausted their wadding; and the old church still stands to mark the spot, now in Union

Here's the spot. Look around you—  
About the hotel  
Lay the Hessians encamped—  
By that door on the right  
Stood the bold Jersey farmers, and here ran a wall,  
You may dig anywhere and you'll turn up a ball,  
Nothing more. Grass—spring, waters run, flowers bloom,  
Pretty much as they did a century ago.

Nothing more did I say?—Stay one moment. You've forgot  
Of Caldwell, the parson, who once preached the Word,  
Down at Springfield? What? No? Come, let me tell you  
A tale of the Jersey alliance. And 'ey give 'em the name  
Of 'Tis the rebel high priest? He stuck to the gorge,  
He loved the Lord God, and he hated King George.

He had cause you might say—  
When the Hessians that day  
Marched up with Knypwamun, they stepped on their way  
At the " Farms," where they lay, with a child in her arms,  
She came in the door—He was in the room,  
But God and the Lord—The landing crew  
Who fired it at her—Enough?—'Tis she lay,  
And Caldwell, the chaplain, her husband, away.

Church up in fire and smoke. The flames of this memorable structure illumined the horizon for miles around and alarmed the Lumm soldiers, who mistook the fire for a movement of the Americans. At all events, they beat a hasty retreat from Newark.

As they left the town they vented their malignity on one of the most prominent patriots of the place, Justice Joseph Hedden, Jr. This gentleman came of a family noted for courage and firmness. His father, Joseph Hedden, Sr., who lived to be ninety-six years of age, was wont to speak with pride of the fact that he had eight sons in the service of the country during the struggle for freedom. His son Joseph was a man of great nerve. By the proceedings of the State Council of Safety, we find that Mr. Hedden was chosen commissioner for Essex County for signing and inventorying of the estates and effects of

stands. She saw the academy building in flames and endeavored to quench the flames, even if a single soldier should have saved the building. Some one told her to get out, carrying off her brother. Over she ran and entered the academy house by one door while the soldiers were dragging her out of another. They had forced him from his sick-bed, and Mrs. Hedden was in her night-dress which was stained with blood. It appears the soldiers, whether from sheer brutality or eagerness to get on the retreat will never be known, as they dragged Mr. Hedden into the street with nothing but his night clothes on. In her efforts to prevent this and to get her husband properly clothed, Mrs. Hedden braved the bayonets of the cruel soldiers and was severely, though not dangerously, wounded in several places. Meanwhile, the soldiers with Mr. Hedden and other captives, started on the retreat, taking the

VIEW ON BROAD STREET, LOOKING SOUTH FROM MARKET STREET.

persons who "had gone over to the enemy." He was chosen in the place of Isaac Dodd, "who refused to act." The position, as may be readily imagined, was one that demanded in its occupant absolute fearlessness and firmness. So well had Mr. Hedden fulfilled his duties, that he was pointed out by the persons who had gone over to the enemy as a Newarker worthy of the bitterest persecution.

On the night of the 25th he happened to be at home—a rather rare family treat for an active patriot at the particular period we write of. As it was, but for the illness of Mr. Hedden, he would probably not have been at home. His house stood on Broad Street, near what is now Lombardy Street, facing the upper common, Washington Park. His married sister, Mrs. Elizabeth Roberts, lived on the other side of the common, about where the Second Presbyterian Church now

route down what is now Centre Street and along River Street to the old Ferry Road, now the Plank and trolley car road. While passing the Bruen property, the same which now forms the junction of Commerce and Market Streets, Eleazer Bruen is said to have had the coolness and daring to pass Mr. Hedden a blanket. The prisoner was marched to Paulus Hook—now Jersey City—at the point of the bayonet and thence across the ice bridge to New York, where he was ruthlessly thrown into the old sugar-house. In consequence of the cold and danger to which his captors delighted in exposing him on the night of the raid and the cruel treatment he received at the old sugar-house, Mr. Hedden's limbs mortified, and when it became apparent that he could not live long his friends were notified, and his brothers David and Simon were permitted to remove him to Newark. Here he was tenderly nursed till death came to

his relief on September 27. Like hundreds of others who gave of their fortunes and posited their sacred honor and gave their lives for the liberties we now enjoy, he lies buried in an unmarked and unknown grave.

As proof of his conduct and that of his men—for it is said that he was a man not lost to that that was human—Major Farnham, like many another who thought to thus assuage the gnawing bite of the gnawings of conscience, rushed into print and promulgated the assertion in King's *Royal Gazette*, a rose-colored statement of the affair which would lead their readers to believe that the British did, which caused so much needless misery of life and brought into many a household such suffering.

He was a firm friend of his country  
In the darkest times,  
Zealous for American Liberty,  
In opposition to British Tyranny,  
And at last fell a victim  
To British Cruelty.

"It is proper here to state," says Mr. Atkinson, "that the account given of Judge Hedden's martyrdom, widely different as it is from all versions heretofore published, is related on the authority of the martyr's grand-niece and nephew, with whom he had interviews."

For a number of years after the war the remains of the old

VIEWS IN NEWARK, N. J., LOOKING NORTH, SOUTH, EAST AND WEST, FROM THE PRUDENTIAL BUILDING.

of the day, was the result of a mistaken order. The effect of the colored article was such as to make the matter far more serious, and resulted in firing their hearts to increased love for their country, home and inside, and hatred of that British Tyranny which took many a long year to erase, even after the end of the war and the acknowledgment of independence by the American people. Upon Judge Hedden's grave-stone, Mr. Atkinson has truthfully said in his "History of Newark," that the order of which constitutes a matter of controversy—was cut the following inscription:

His name is recorded to the memory of Joseph Hedden, Esq., who departed this life on the 27th day of September, 1780, in the 22d year of his age.

Newark Academy were used by the children as a place for them to play "hide-and-go-seek;" and lessons not a few were taken among the smoke-begrimed timber and stone, which made love of country and blood-bought liberty the household gods of many an American citizen who found his incentives there.

#### JERSEY BLUES

THERE being no shadow of a doubt that the name "Jersey Blue," which has clung so long and with such tenacity to the New Jersey soldier, holding on even to quite an extent during the late war of the Rebellion, originated with the soldiers of Essex County, we cannot well forbear a line or two as to its origin. Washington's grand piece of strategy at Trenton,

which sent the British wheeling through the Jerseys and led up to the final episode of the war after, as we learned in our school days, a struggle which lasted "seven years nine months and one day," doubtless did much to discourage the British and shorten the war.

Long years after Cornwallis surrendered at Yorktown, it was a common saying (and believed to be truthful) that he made use of goods which had been the personal property of Washington, in packing his plunder, and which he was permitted to take away, glad to get rid of so much meanness under a commander and chief's uniform without any interference on the part of the grandest and most liberal of conquerors who, without let or hindrance, saw them go away. Our readers will pardon this departure from the thread of our story, so we will get back to where and to whom the honor belongs of furnishing the proud appellation of "Jersey Blue" to Essex County and indeed all New Jersey soldiers.

possess a peculiar charm to the British and in the service to which the word plunder clung. Capt. Littell, with his oddly-uniformed company, followed after. He had been a close student of strategy and the art of ambushing as well as the savage. Well acquainted with the country, he divided his little command, greatly inferior in numbers to the Waldeckers, and leaving one part behind and by a circuitous route with the other and a rapid march, soon placed himself in front of the enemy and boldly demanded their surrender. Not being able, owing to the nature of the ground and the approach of night, to determine the size of Captain Littell's force, the Waldeckers sought to make a retrograde movement. Instantly they were assailed in front and flank and soon becoming demoralized they surrendered, not having fired a shot. Thoroughly exasperated over the affair, the great inferiority of Littell's force becoming known, the British commander ordered out a large force of Hessians to wipe out the

VIEW ON PENNSYLVANIA AVENUE, NEWARK, N. J.

A dashing son of liberty, one Capt. Littell, was a central figure among the patriots. Bold, daring and honorable was this son of Essex and a stranger to fear. He is said to have been a handsome man and a great favorite with the ladies. A volunteer company which he commanded was presented by the fair daughters of Essex with a uniform of material for the appellation which time has thus far been unable to erase, with such marvellous appropriateness does it seem to have been applied; and little wonder, since the uniform consisted of "tow frocks" and "pantaloons dyed blue." Indeed it was not so much the color of the pantaloons or the tow frocks the Essex boys wore that fixed the appellation of "Jersey Blue," but it was their noble deeds in "flaxing" the enemy that made the name honorable and the color lasting. Two incidents, and this pretty narrative must give place to others. The very day Cornwallis moved out of Newark, a company of Waldeckers was dispatched towards Connecticut Farms—a section which seemed to

affront and disgrace. These were as quickly discomfited by Capt. Littell's "Blues," his skill and gallantry. After goading and injuring the enemy at several points, by an adroit move he led them into a swamp where he soon had them entangled and at his mercy when they, in pursuance of the brilliant and safe example set by the Waldeckers, also ignominiously surrendered, and this time it was the Hessians who had been given a taste of the metal of our "Jersey Blues" and the brilliant tactics of Captain Littell.

#### THE AFFAIR AT LYONS FARMS.

FULLY determined that Lyons Farms should not be without its share in the glory of the success they heard of as being consummated all around, three daring spirits—Wade, Carter and Morehouse—concocted a scheme for capturing a company of twenty-five Hessians camped in a house nearby. These fearless spirits fixed upon a night when they should

his companions then made a dash for the sea, pursued at the swiftest pace and baffled any pursuit which could follow soon after. The prisoners were taken to the Morrisburg jail to rest while their chagrin passed off it having been so cleverly outwitted and captured.

ESSEX COUNTY IN THE WAR OF 1861-5.

THERE are signs in nature which scientists consider infallible, which indicate the approach of great convulsions of earth and matter, disturbances of the elements which, though slight in themselves, bring forebodings of approaching changes resulting in disasters wide-spread. Then there are signs which point with unerring finger to the figures on the face of the swift revolving cycles of the years rolling on, which are none the less just as surely premonitions of disturbances among men, governments and nations which point to revolutions, changes and consequences just as certainly and are just as significant and freighted with results just as far-reaching.

That awful stillness pervading space and which, like the deep darkness which "can even be felt" preceding earthquakes, is a sign insignificant in itself but marvellously truthful, as it becomes the herald of a convulsion which may shake the earth from circumference to centre. In summer, when not a leaf is stirring or cricket chirping, and not a "breath of air," as saith the patiently-waiting sailor, is astir, it is easy indeed to divine that nature's leyden-jars are being charged as yonder dark cloud rolls slowly up the western sky in readiness for loosing the forked tongues of the lightning which, with might and power, tear great rents in the slow-moving clouds, waking the deep-mouthed thunders which in close pursuit of the zig-zag lightnings apparently on mischief bent, but which charms and satisfies when it lets loose the rain-drops to cool the parched earth.

So it was immediately preceding the great Civil War. When all the batteries of the North and South had been full charged by the work of hate and fury going on for years, an awful foreboding of war was easily felt in the solemn stillness surrounding the field of preparation in the land of the sunny South. The deep-mouthed dogs of war lay quiet, but in readiness for unleashing by a proclamation of war. The cup of dissatisfaction and brotherly discord had been filled to overflowing, and while the sweet-smiling angel of Peace held the chalice of love to lips that long refused to sip, then came the explosion. The spark long fanned, finally found life and reached the powder of Fort

MONUMENT IN FORT MONROE CEMETERY, ERECTED BY THE CITY OF NEWARK TO PERPETUATE THE MEMORY OF THE EARLY SETTLERS.

Monroe's cannon. One flash and the deepen outbreak thundered awake and unloosed every cog of war, both North and South. The beautiful flag which had floated in glory over a united and prosperous people was rent with English and French. Little they knew, who fired that first shot, of what they were dreaming. Little thought they who, with fearless aim, sent the ball speeding which should make that farrow, the one leading to the ploughing of the entire sunny land of their own beloved South and a literal sowing thereof with the besom of destruction, much less thought they

When in storm of storm and sea  
 "Old Glory" fell, "Old Glory" lay  
 The nation of the brave, who'll follow her  
 Would no longer reverence  
 Its ground of blue  
 Its stars and stripes  
 The flag of the free people of God

From no part of our country did there follow a more sorrowful thrill than that which was answered back to the howling sound of the flag, torn and mangled from Monroe's walls, than did that from the people of Essex County. Not that war between brother had begun, not that the peace was indeed broken; not that the promises of rivers of blood flowing from brother's bow, which could be plainly seen through the rents that shot made in our beautiful flag—nor that these cogent reasons combined that which did more to break the soul of hope and loose the flood-gates of despair, was the closing of our factories, the fulfillment of the promise set forth in the families of her terra firma, of mechanics and workmen.

At once, Essex County, as it by many a name, great manufacturing establishments

the "golden rule" of the Southern States, which were long and bravely defended in the first great struggle. Essex County long bore the title of "THE WORKHORSE OF THE SOUTH." The ties of business and friendship which were forming for years through the prosperity they enjoyed were now broken. Their growth very strong, and their power was broken as at that first shot of the great civil war. It was thought that they were strong enough

which was long being prepared for the mighty conflagration which finally blazed high on every hill-top of the South and swept over the southron's sunny land as with the besom of destruction. For many long years after the war had closed the question was asked, "Upon whose shoulders shall rest the responsibility for the untold sufferings, the almost irreparable loss, and the fearful devastation wide-spread?" But time has soothed the passions and healed the wounds and the question is no longer asked. With whom rests the responsibility of building the fearful holocaust? It is enough for our purpose that

**ESSEX COUNTY WAS LOYAL.**

It is safe to say that no State, not even Massachusetts herself, the hotbed of abolitionism, proved herself more loyal than did Essex County and New Jersey. No place answered the call for troops to meet the rebellion with greater alacrity, and

... a number of southern brothers made their way to the North receiving more than regrets for their

**VIEW ON MILITARY PARK AND PARK PLACE, NEWARK, N. J.**

bring prosperously together their self-wrought sufferings and the sufferings of their countrymen. Not while the blood of the Father, kept up its course through the veins of the Father's children of the Revolutionary Period; not while the great victory of Washington's military strategy and victory over the Hessian and British, and the triumphal march of His Majesty's army, were ever meeting the traitor Lee on the bloody field of the battle of Gettysburg. Not while the great victory of the battle of Gettysburg could be the cause of the death of every American heart, could the cause be lost to the cause to beat, respect, to liberty and union, the cause of the cause to fight. The southerners have hoped that the great victory of the battle of Gettysburg could be the cause of the death of every American heart. But they had counted the strength to be the cause of the death of every American heart. The cause of the death of every American heart. The cause of the death of every American heart.

when population is considered, few places indeed, if any, turned out a larger percentage of enlisted men—the record showing that out of a population of less than 700,000, nearly 100,000 men went to war, Essex County furnishing her full share. The exact figures as we find them recorded was at that time 676,000, and she sent to war of that number 98,806. When the martyred Lincoln sent forth his first call for men to defend the nation's capital, New Jersey was quick to respond. There was no hesitation. The first bugle note, the sons of the old "Jersey Blues" of the Revolution heard and heeded. Eager pledges of help went forth from every county, town, village and home. While men honestly differed as to methods, all purposes were the same and, couched in the language of another, it was "The Union forever, one and indivisible," and at all hazards and whatever cost, it must and shall be maintained. The flag which was brought out only on Independence day and other holiday occasions now fluttered in every breeze from all the public buildings, and with a singular unanimity of action householders

vied with one and the other to see who should first have the stars and stripes floating from their house-top. In every town and village, patriotic men gathered to give expression to their sentiments of loyalty to their imperilled government. The banks of the county opened up their coffers and willingly pledged their hoarded gold. As a sample of what the banks of Essex County did, we need but mention the \$50,000 which stood to the credit of the "Old Bank" (the Newark Banking Company), \$50,000 to the State Bank, Mechanic's and Newark City each with \$25,000, and the Essex County with \$20,000. Not alone came cash responses to the call for money from the banks, but other institutions and the wealthy among her citizens kept them company.

THE NEW JERSEY BRIGADE.

TO make use of the language of a writer of the days following the firing on Sumpter, "It was a carnival of patriotism all through Essex County and in fact all over New Jersey."

GENERAL THEODORE RUNYON.

ALTHOUGH he had never marshalled troops or "set a squadron in the field," it soon proved that no mistake had been made when the trying times came, the military judgment he displayed proved him the right man in the place. His previous experience, gained while endeavoring to place the state militia on an efficient basis, served a purpose satisfying to himself and proved a rich legacy to his country when dangers menaced, and the companies of militia which he enjoyed the benefit of his military order and sobriety, formed many a nucleus around which gathered the crowds of men who came forward to offer their services in the cause of their country and in defense of their homes and firesides.

Although General Runyon had not yet reached the forties in life's score, yet he was a man of large experience and was the possessor of a mind well disciplined and was a man of marked

PRESIDENTS OF THE UNITED STATES.

The shrill whistle of the ear-piercing fife and the rattle of the soul-stirring drum was heard everywhere. That first call for troops by President Lincoln on April 15, 1861, the people with one mind resolved to heed. With a full realization of the terrible danger with which they were menaced, the people responded with alacrity. The wave of enthusiasm which arose as the wave of the ocean arises and onward rolled with a power which no obstacle could check or overcome. New Jersey was asked for four regiments and from Essex County nearly a thousand of this quota came. So enthusiastic were the people, it required but a few days to fill the quota, and when they were mustered into service, the brigade organization was completed by the appointment of Theodore Runyon, of Newark, as Brigadier-General; Alexander V. Bonnell, as Brigade Inspector, and Captain James B. Mulligan, as Aid-de-Camp.

firmness of character. Few men in the state understood better the value of military discipline. He comprehended in a marvellous way the fearful gravity of the situation, and by his identification for years with the militia of the state, had natural title to the distinction of commander of New Jersey's volunteers, nearly every man of whom knew General Runyon, and felt that they had in him one who would look closely after their every want, and who all knew that there would be no needless rushing into danger; no needless exposure of person or ignorant orders with human sacrifice resulting.

On the 27th of April, 1861, this prominent Essex County lawyer, whose eloquence for years had electrified her courts and charmed her juries, was merged into the army general, his commission as brigadier-general of volunteers bearing the above date. The General then immediately took command, thus

bestowing upon Essex County the honor of furnishing the first general officer of the state. The task the General had accepted was no light one, but his experience with the militia had peculiarly fitted him for its accomplishment, and with the aid of the nuclei of veteran militiamen, he was not long in bringing "order out of chaos," and accomplishing the hard task of disciplining and equipping his brigade of three thousand men, many of whom had never seen a musket, let alone the exigencies of military drill, and few indeed but were totally ignorant of the rigors and discomforts they had to undergo in their approaches to the expected denouement of the bloody battle-field. But they were Jerseymen, and it was theirs to keep unsullied the reputation won by the famous "Jersey Blues" on

May 28, 1776, at the Battle of Red Bank. The General's orders to reach Washington were issued on the 29th, and the route taken by the army was a long and arduous one, involving the crossing of bridges and the carrying of heavy baggage, all of which were accomplished already in the field. To the Hon. J. H. M. Smith, of the Delaware & Pennsylvania Canal Company, is due the honor of the first successful attempt to transport the army by rail. In his orders, General Runyon directed the commandant at Annapolis on the 26th of September to send a full record of the General's operations to the War Department. To say on this page of *ESSEX COUNTY, N. J., ILLUSTRATED*

VIEW OF MARKET STREET STATION, PENNSYLVANIA RAILROAD.

the bloody fields of the revolution and under the eye of the immortal Washington. They were inexperienced, but yet possessed the spirit of war-worn veterans. It didn't take them long to get at an understanding of the necessity of subordination, and when the order came to break camp and move, the state had abundant reason to look upon their citizen soldiers, in company, regiment and full brigade, with pride and satisfaction.

War in earnest had begun, and that too in earnest before the flowers of May had begun their blooming, and our Essex County boys were not far from the terrible experiences which "war in earnest ever brings." The easy route by rail to Washington had already been cut in twain at Baltimore, and when General Runyon received his final orders on the 19th day of

TRAGEDY, that these orders to Essex County were not at Lawac, soldier, statesman, and now the nation's ambassador to the German empire, Theodore Runyon, closed with the following memorable words: "The honor of New Jersey we do not keep!"

Such marvelous speed was made with the fleet of the brigade's embarkation, that in less than twenty-four hours the little fleet, bearing its precious burden of New Jersey soldier boys left Trenton under the command of Captain R. F. Lopez. Such speed did these canal propellers make, they reached Annapolis on the night of the 4th. All along the route the troops were the recipients of the most hearty and friendly greetings, and all along the waterway they were met with abundant manifestations of the pleasure the people felt at their coming. As-

On May 22, orders were issued to him to occupy the Virginia shore of the Potomac and also the city of Alexandria. It was to participate in this movement that the New Jersey brigade struck their tents on May 23, and abandoned the camp on Meridian Hill. General Runyon was ordered to be at Long Bridge at two o'clock on the morning of the 24th. In leaving, marching orders the Second, Third and Fourth were provided with one day's rations. Unlucky to the moment of his order, General Runyon was on the ground. At the junction of the Columbia & Alexandria Railroad, where the engineers had staked it out, the boys began the work of throwing up a defensive work, and a lodgment had been made on the south side of the Potomac. The work of our Jersey boys didn't end here. The entire New Jersey brigade continued to work in relays of three hours until, with their brawny arms, a line of intrenchments and redoubts was completed, and to General Runyon's brigade of New Jersey soldiers belongs

order to pass a shell gun, and the command of the Long Bridge was taken by our own soldiers, and when closing to place our guns in position, reaching the capital, the following day, the footsteps of the thing."

It is reported of the Hon. Ben W. Wade, "Old Ben Wade," an emigrant of the time, and other civilians and non-combatants, who were to see the first great battle of the war, that he jumped out of his carriage on arriving at the troops of the New Jersey Brigade were still on the road checking the wild stampede of the northern troops, the disastrous route at Bull Run and exclaiming to the victorious southerners, and exclaimed: "Would to God we had more such men as these Jerseymen in the army, we would not have suffered this defeat."

VIEW OF NEWARK, N. J., IN 1862, LOOKING SOUTH-WEST FROM CLARK'S CHIMNEY.

the honor of completing the first regular work of the war over which "old glory" flew. The most important place in a strategic point of view was that held by the New Jersey troops, with our own Essex County First Regiment to the fore front.

We now approach the first great battle of the war, known as Bull Run, the name taken from a little stream running through the now famous ground.

A writer, in speaking of the battle, writes: "When the battle was fought and lost to the nation's troops, yet it was no fault of the first New Jersey brigade or of General Theodore Runyon. When all was disorder and dismay—when many others had left their posts of duty and skulked away under cover of the night that followed the battle, the Jersey brigade was found standing as a wall between the enemy and the capital. Amid the turmoil of defeat to our army, 'twas General Runyon who gave the

The venerable Monsignor Doane, of St. Patrick's Cathedral, who was chaplain of the brigade, had set up his altar in the little tent he was occupying on that Sunday morning of July 21st, 1861, and when about to begin the services of his church, one of the first shells fired by the enemy crashed through the tent and knocked down his improvised altar, causing him to suspend mass for the day.

#### AMBASSADOR RUNYON'S DEATH.

THE ink on the above brief account of General Runyon's life and career had not become fairly dry when through the cable came, under the great ocean, the sad announcement of his death at his Ambassadorial home in Berlin. A cloud of sorrow at the death of this great and good man quickly spread over his native land as the news of the great bereavement on

FORT RUNYON.

IN honor of the General who led the first New Jersey troops to the field, the great earth-work constructed by these same soldiers' civilian hands, was called Fort Runyon, a letter from the Adjutant-General of the army granting to the soldiers who built it, that distinguished honor.

The First New Jersey Regiment was almost exclusively Essex and was officered by Essex County men, its Colonel being Adolphus S. Johnson; its Lieutenant-Colonel, James Peckwell; Major, William W. Melles; Adjutant, Joseph Trauw; Quartermaster, Theodore L. Ketchum; Surgeon, John J. Craven; Assistant Surgeon, Edward L. Pearson; Sergeant Major, George H. Johnson; Drum Major, Nathan P. Morris; File Major, Elijah F. Lathrop, and fourteen musicians. Colonel Johnson will be remembered as Jail Warden for many years, and Colonel Peckwell, who afterwards became Sheriff of Essex

County. Many of the officers and men of the First, who went out under the three months' call, afterward returned to the army and won distinction on many bravely-contested fields. The writer of this well remembers seeing Colonel Johnson brought into Yorktown, after having been severely wounded, in the battle of Williamsburgh, whence himself and other Jerseymen had pursued Magruder's troops after his evacuation of Yorktown. If memory is faithful, 'twas in this same engagement where General Ward received such wounds as compelled him to carry an empty sleeve ever after. As a tribute to his worth as an officer and gentleman, he was made Postmaster of Newark, and held the position for many years, honored and respected by all who knew him.  
Among the host of gallants who heard the first call are the names of Captain John Brantzinghoffer, of Company A, Captain William O. Tampon, of Company B, Captain Thomas L.

Martin, of Company C, Captain Henry O. Beach, of Company D, Captain Martin B. Provost, of Company E, Captain Henry Bowden, of Company F, Captain Henry V. Sanford, of Company G, Captain William H. Reynolds, of Company H, Captain John H. Higginson, of Company I, and Captain Charles W. Johnson, of Company K, who each took out their company, in the old First Regiment, under the three months' call, are worthy, one and all, to have their names kept fresh and their memories green in the recollections of every citizen of Essex County. Not these alone, but all the commissioned, non-commissioned officers and men who went to the war, deserve to have their names recorded on the roll of honor, inscribed as those who took their life in their own hands, and many of whom laid it down in behalf of liberty and union.

A word or two to show how deeply the partisan was sunk in the patriot and how quickly and thoroughly party lines were erased, and these from the expressions of those holding pos-

sessions of defeat. Gen. Kearny, who was commissioned a Brigadier-General on July 25, 1861, and in August following was assigned to the command of the Jersey soldiers. When the news of his signing of the command of the Jersey Blues reached the Union army, upon cheer arose from regiment and company, and the boys made the welkin ring over the announcement. As Philip Kearny was born in New York city (which event took place in June, 1815), he was a Jerseyman by adoption, and the house in which he spent his earlier life is yet standing on Belleville avenue, in the City of Newark, as are the old room under which he played, and the mansion in which he lived at the time of his appointment stands among the pines on the beautiful high grounds just across the Passaic, in the town of Kearny, Hudson County, the town being named in his honor.

General Kearny had a penchant for military life and this he showed as a boy, and as manhood came this penchant grew

VIEW OF NEWARK, N. J., IN 1892, LOOKING NORTH-WEST FROM CLARK'S CHIMNEY.

itions of honor and trust, must suffice. Moses Bigelow, a democrat of the olden school, who was Mayor of Newark at the breaking out of the war, in a message to the Common Council, said: "I regard the union of these States as indispensable to the liberty, peace and prosperity of our people and the great source of happiness at home and honor and respect abroad. When compared with the question of its preservation, the transitory issues of party should be regarded as mere dust in the balance."

Henry A. Whitney, an Alderman, also a democrat, in offering a series of resolutions in Council, said: "It is the high duty of every citizen to ignore all past political issues, and rally under the banner of the stars and stripes in defense of the Union."

#### GENERAL PHIL. KEARNY.

IT was in this engagement that Gen. Philip Kearny won his laurels in the internecine war, for indeed, it was he, on coming up with his Jersey boys, snatched victory from the

After passing through Columbia College he studied law for a while, but his intense liking for military life led him to seek and obtain a lieutenant's commission in a regiment of dragoons, in which Jefferson Davis was a captain. In 1839 he was one of three United States' officers sent to France to pursue, by permission of the French government, a course of instruction at the Military School of Gannoy. He soon tired of the confinement which his student life imposed, and joining the French army he went to Africa. He was attached while on this service to the Chasseurs d'Afrique and in two engagements distinguished himself. When he came back home in '41 he was made an officer on the staff of General Scott, who had a high admiration for his character and was ever desirous of having him near his person.

All through the Mexican war he gave abundant evidence of rare skill as a soldier. Those who knew him will remember the empty sleeve he carried, and what masterly dexterity he exhibited in horsemanship, and with what skill he handled

...As it may wonder that this Essex County boy should win  
the title of "Fighting Phil Kearny," when fear he never felt, and  
that danger aimed at him he never knew, and 'twas a burning  
stain.

That he he did not have the right,  
Where slain might conquer might,  
To die in the cruelest of the fight.

The penalty is paid for being too brave, and the poet had  
abundant reasons for saying:

...of the Black Guard of night at Chantilly  
He had him from sight of brave men and tried  
Four feet sped the bullet that clipped the white plume,  
The flower of our knighthood, the whole army's pride.

Kearny had faults like all other mortals. Those prominent  
were his impetuosity and his impulsiveness. Had he sent some  
unparoled soldier to the Chantilly reconnaissance, his name,  
instead of Grant's (a writer has said), might have stood on the  
pages of history as the great captain of the age.

SUCH IS FATE.

WHEN he died New Jersey mourned his loss and honored  
his memory. He was given a splendid military funeral  
in Newark. A bronze monument erected to his memory adorns

NEWARK, N. J., IN 1845, LOOKING SOUTHEAST FROM HIGH STREET.

...New Jersey. His spirit was such it  
... "Take the men, charge  
...under hisness."

Military Park and another stands in the Library at Trenton.  
The body of this great soldier, Gen. Philip Kearny, who posses-  
sed the faculty of making the warmest of friends and the  
most implacable of enemies, sleeps in the church-yard of old  
Trinity, in the city of New York.

COL. ISAAC M. TUCKER.

LIKE none of other brave spirit, Col. Isaac M. Tucker's body  
sleeps in an unknown grave on the field where he fell as  
brave men do fall; if tall they must, with their face to the  
foe. The losses soldiers bore for this ideal officer caused  
them to make frequent and persistent attempts to recover his  
body, but all proved failures.

As it has ever been, the New Jersey soldier, wherever engaged,  
is found in the thickest of the fight, it seeming to be his fate to  
be at the point of greatest danger. So it was with Col. Tucker,  
his note at the bottom of page 64 of Shaw's excellent work,  
we find the following tribute: "In personal courage, fertility  
of resource, and readiness of apprehension, Col. Tucker had  
no superior."

Col. Isaac M. Tucker's memory is cherished by all who knew  
him, not only for his war record but also for the high qualities

of citizenship which he possessed and the true manliness of the man who fell while rallying his men, in the thick of the fight, around the "colors, our glorious stars and stripes," and who cried out, as some of his men were carrying him to the rear, "Never mind me, go ahead and give it to 'em." Although space forbids, we cannot refrain from paying the tribute of a nation to a few others of the many brave men—undaunted spirits who laid down their lives or lived to feel the pang of wounds received. Among the latter was

**MAJOR DAVID A. RYERSON.**

Who is yet going out and in among us, having recovered from the terrible wound he received when he, too, was rallying his men around "Old Glory," his good sword flashing high. As the Major fell with his face to the foe,

**CORP. JAMES MARSHALL**

Seized the colors and defiantly bore them away and when too closely pressed, tore them from the standard and buried them out of sight. Major Ryerson is, at this writing, engaged in practicing his profession of law, and gives promise—so greatly improved is his health—of living long to do honor to the profession he loves and rehearse the story of the Chancellorsville fight.

**CAPT. SAMUEL F. WALDRON**

Who had seen service with Walker, "the grey-eyed man of destiny," in the swamps of Nicaragua, and who earned the title of "female honor protector" at Guadalupe Church. There the women had assembled, and to protect them against the assaults of the vile natives and his own beastly comrades, he placed himself in the doorway of the church and promised to "shoot down like a dog" the first man who attempted to pass. Capt. Waldron had long been assistant, under Principal

Leake, of the Third Ward public school of the city of Newark. The writer well remembers the quiet little man with sparkling eyes seated in his tent at the head of Military Park engaged in enlisting men for Company I, of the Thirty-third Regiment, and as he marched away as the modest Captain saluting him in the front of his rank and saying what proved a last farewell. Although a man, physically

SETH BOYDEN, INVENTOR.

VIEW OF SPRINGFIELD AVENUE, NEWARK, N. J., LOOKING WEST.

speaking, not of giant proportions, he proved a target for the bullet of a Southern sharp-shooter who sent a ball through his heart while he was bravely moving his company forward. The shot which

Stilled the pure heart  
Whose every pulsation  
Was in sweet unison  
With the good and the true

Was fired from behind the very house which his company occupied shortly after their captain fell.

So highly was Capt. Waldron regarded by the regiment, a detail to accompany his remains to Newark was made, and Capt. afterward Major O'Connor was placed at its head. On their arrival in Newark, his old friend Dr. M. H. C. Val immediately set about the work of honoring him with a military funeral. Through the assistance of others, the project was soon brought to a successful conclusion and his funeral was conducted in old Trinty Church, Dr. Windyer performing the rite and reading the service. After the services at the church, which were largely attended, the remains, encased in a rosewood coffin (provided by Capt. William W. Hullish, then as now, sexton of the church) and wrapped in the American flag, was laid away in Fairmount Cemetery, Company A. Capt. John Brintzinghoffer, of the old First Regiment, leading the long procession of followers and mourners and firing the military salute over his grave.

**GEN. WILLIAM WARD.**

Who assumed command as Lieutenant-Colonel after Trawm resigned, and led the old Eighth Regiment afterward in several desperate fights until, at the battle of the Second Bull Run, while marching at the head of his regiment, he was pierced with five musket balls. One of these shattered his left arm which, though the surgeons believed him to be in a dying condition, was amputated. The wounds in his body were of such a serious character that he lay for several months in hospital before he could be removed to his home. It took a year and a half of the best skill of the surgeons and the kindly intentions of mother nature to so far heal his wounds as to enable him to get about. Gen. Ward was elected City Clerk of

of the New Jersey Militia, 1812, was four to one. General Porter, of the native city, Gen. Ward, of the State of New York, and the British were, without exception, defeated, and the victory was proclaimed by the Hon. W. H. Edwards.

The gallant record of Gen. Ward, the General as he had a popular name, was the appointment by Gov. Parker as President of the Board of Management on his conduct and services, and as Judge of the Court of Inquiry to investigate the conduct of the British Agent of Company E, The 1st Regiment, N. J., Cavalry.

Gen. Ward's last day in Newark, January 30, 1824, and consequently the day of his birth, score, and ten on the 30th of January 1824. Mr. McClellan's other well spent life continue to give pleasure to his admirers, which always comes to the good and true, and it is "a happy life."

It is a good, but good nature which permeated every fibre, as a soldier of the New Jersey soldier was always finding vent, and probably was this so when the boys were ordered out on picket duty. A single example of the methods they employed in reaching the enemy (Reb): As they were doing duty, marching to and fro along picket line, the work becoming monotonous and the boys were getting short, our Essex boys shouted to the rebel pickets, "Hello, Johnny, I say, hello!" "Hello, hello, again, Yank," shouted Johnny. "Have you any good news?" questioned our Jersey Yank. "I just have," answered Johnny, "and I do want some salt and pepper so bad." "What," called the Essex boy, "some of the same we gave you at Gettysburg?" "Oh, get out. What do you say for a trade?" "Come along," they responded in unison, and the trade was made. Such occurrences, we are informed, were quite common along many days on picket lines.

#### GENERAL GEORGE B. McCLELLAN

NO more fitting subject could be found for a conclusion of what we have had to say of the part Essex County took in the years 1861 to 1865 than a short sketch of General George B. McClellan, who, when driven from the command of the Army of the Potomac, found an asylum in New Jersey and filled up the hours of his enforced idleness in bringing into play his skill as an engineer and in beautifying the landscape of the county. He had selected on the brow and summit of the Orange Mountains, near that culmination of their rare beauty, Eagle Rock. It goes without the saying that George B. McClellan was a master in the engineering art.

Although not a native to the manner born, Essex County can call him an adopted son, for it was on her soil that the heart stone of his home lay, surrounded by his household gods, and where, now, since the bugle note will never wake him to a morning, he sleeps the sleep that knows no waking, in New Jersey soil, and where the spot is marked by a beautiful monument erected over his tomb in the cemetery near Trenton by loving hands of those who stood near him during the hours of his greatest trials, and where the battle was the thickest, bravely bled his undying hands.

On almost every page of American history is found enrolled the names of her children who have contributed by their virtues and valor, on their character and worth, to throw a halo of glory around and over each, and forming a constellation of stars in the few parallels. Among these, and leading the list, are Washington, Lincoln and Grant, Sherman, Hancock, and McClellan, the latter, while a resident of our county, was the first to draw the sword to take up the Government of the State. We might continue to read from the roll of our heroes, who earned the right as citizens of New Jer-

sey, to be partakers in the honor of wearing the famous Jersey Blue. A word or two as to some of the characteristics of the home of him whose banner waved in victory over the field of Antietam, and who led the Union hosts through the wilderness and huddled back the enemy from Malvern Hill, and whom the soldiers under him loved as the "apple of their eye," and who bore the favorite cognomen of "Little Mack," will not be out of place.

To get all the charm possible out of this enforced idleness McClellan filled in the time by converting the grounds of his mountain home into a landscape, beautifully located, where Nature's largeness quickly felt the touch of his own master hand, and grew and expanded till it became the pride of his own heart, and a rare exemplification of all that is lovely in artistic surroundings and the added endearments of home. As an example of villa home loveliness, few places the writer has ever visited could excel the home surroundings of George B. McClellan at the time he was called away to take up the Governorship of the State in which was his adopted home.

Whether this educated soldier, a thorough West Pointer as he was, really enjoyed the new life, even though eminent as it was, certainly is a secret that was well kept. All who knew him intimately could not remain long in his company without discovering a peculiar, far-away look that beamed from his eyes. As he discoursed of the present there ever seemed a restlessness to reach out after the past, and then should something perchance come up of the "gone by," he seemed to regret it and had little power to restrain the welling tear or to hide the suffused eye, which told all too plainly how tender was the great loving heart within.

On one occasion, when visited by the writer, he was found amid the wealth of flowers and sweet shrubs of the grounds which he loved and regretfully left for the reception room, to which we had been invited. After a few moments of general talk the conversation turned on the subject of our *quest*, a college friend whom we had learned had held the post of a lieutenant colonel on the General's staff while the latter was in command of the Army of the Potomac. As the General reached across the centre table and drew toward him a large album filled with photographs, his eyes became suffused with unbidden tears in answer, apparently to our inquiry in regard to him. After a moment's hesitation he turned a page or two, and placing his finger on Colonel Coburn's photo, turned the book to us and with quivering lip said: "Do you remember him?" "I do," was the reply. There was but little change, although more than a decade of our young years had gone by and thus we supplemented with the remark, since they had parted we had heard that Colonel Coburn had been ordered West, and there had sickened and died. "Yes, he's dead," replied the General. "I loved him dearly, and I am told that the separation took such deep hold that the poor fellow really died of a broken heart." Light-hearted as the General naturally was, so much did the first Trenton order affect him that even after the soothing effect of the second order to Trenton, he, too, died of something akin to a broken heart.

In the presidential campaign of 1864 the great Democratic party of the nation made George B. McClellan their candidate for President. During the campaign which ensued, George B. McClellan, at the request of Major Edward H. Wright, visited Newark, and became the Major's guest at his father's home.

Dr. M. H. C. Vail, the writer of this sketch, made the address of welcome, to which the General made a happy response. An informal reception was held at the senatorial mansion, where a very had opportunity to grasp the hand of one who held a warm place in the affections of the people.

# THE CHURCH HISTORY OF ESSEX COUNTY.

SO PLEASANTER duty does the writing of "ESSEX COUNTY, N. J. ILLUSTRATED" present, than that which her church history imposes. Although her church edifices as a rule do not vie in architectural grandeur with those temples of worship which in New York and Philadelphia are the pride of their people, and even though their spires do not reach so far heavenward as Old Trinity and others, yet in number and scattering capacity they present blessed church privileges to the people, when territory and populations are considered, in greater proportion, perhaps than either. Brooklyn City, which for many years carried the banner with the inscription "The City of Churches," the same may now be said of the capital city of Essex County, Newark. She, too, is entitled to carry the banner inscribed with the same device.

With a population of less than 250,000, more than 200 churches open wide their doors and extend a hearty welcome to all who may come and worship at their religious shrines. It is pleasant, again, to be able to indite the fact, apparent everywhere, that that blessed spirit of love which calls every man his neighbor, permeates church society through and through and is rapidly driving out every vestige of illiberalism and denominational prejudice which have all too long been the bane of Christianity and acting as a clog to its spread and progress. The church people of Essex County have fully learned the beautiful lesson which toleration instils and can easily divine the mighty difference between the rich, mellow fruit which grows with such luxuriance on the denominational tree, and the bitter abortions which dwarf and destroy under the appellation of denominational prejudice. The beautiful truth so lovely and so inspiring is everywhere being learned that the fruit of tolerance is indeed sweet to the heart, while the fruit of intolerance, though fair to look upon, turns to bitter ashes on the lips that continue to sip, at the same time the glamour which so long hid from view the fact that there is no denominational dividing lines

is being rapidly torn away and that these names which have long been music to Christian ears, Methodist, Presbyterian, Baptist, Roman Catholic, Episcopalian, etc., are to be used to an entrance in the home over there, when the only appellations in truth are afterward never spoken, and the exhortation, "my brother, my sister in Christ" is only heard.

"In heaven above where all is love,"

is being rapidly torn away and that these names which have long been music to Christian ears, Methodist, Presbyterian,

Baptist, Roman Catholic, Episcopalian, etc., are to be used to an entrance in the home over there, when the only appellations in truth are afterward never spoken, and the exhortation, "my brother, my sister in Christ" is only heard.

## FIRST PRESBYTERIAN CHURCH

THE church history, proper, of the County of Essex dates back to the year 1667, when the little congregation at Branford, Connecticut had resolved to join their brethren of Milford, who shortly before that period had cast their lot in Newark, on the Passaic. Dr. Stearns, the historian of the Old First Presbyterian Church, says: "Indeed the Old Church in Branford, organized there twenty years earlier, has probably transported bodily with all its corporate privileges and authorities. Its old pastor was conveyed hither at the expense of the town; its deacons continued his functions without any sign of reappointment; its records were transferred and it immediately commenced church work, and its pastor was invested with his office and salary on the new spot without any ceremony of organization or installation."

Although several of the members had been left at Branford, they had no regular church organization until several years afterwards. Mr. Pierson, the pastor, was a strong as well as a godly man. His influence upon the new community was very great and largely determined its character and career. He was a learned man, still fond of his books and study in these wilds. Just to think of it! His library numbered four hundred and fifty volumes—a goodly library for the most refined centre of the new world, and of magnificent proportions for a clearing in the woods. Earnest, eloquent, godly, patient and devoted, he was beloved and esteemed not only by his own little flock, but by all the great and strong leaders of New England.

If it were indeed true that there really is a fish in the sea called Lucerne, whose tongue doth shine like a torch, then it is but a trifling stretch to say that its illuminating power might be transferred to the human organ, and then as a natural sequence, the tongue of the first parson of the First Presbyterian Church of Essex County might easily have been reached.

The church, as first settled, was on the Congregational order, and that of the most primitive and distinguishing type. In 1716, or shortly after, its form of government was changed

FIRST PRESBYTERIAN CHURCH.

INTERIOR OF FIRST PRESBYTERIAN CHURCH DURING EXTENSIVE CELEBRATION.

the church and the congregation. The service was held the first of the month, and the first of the month of the year.

important to the church, and thus it continued for the first forty years. It is a monument, or simple slab, even, marks the spot where the first pastor sleeps, is to be regretted. Even though the spot where he lies buried is unmarked, yet his memory is sound, and the spirit of the church still moves on.

The second minister to officiate in the First Presbyterian Church was a graduate of the first, a graduate of Cambridge. A few years after his father's death he was removed from his pastorate and returned to Connecticut, from whence he was called to the Presidency of Yale College, which office he held out a short time before 1791.

The Rev. John Pringle, at the age of forty-two, was called as the third minister of the church, and continued to be the pastor for about ten years. After his removal from the pastorate he returned to the New York, and lived a number of years, and honored by the State in 1778, one of the top of the year 1778.

About 1791, Rev. John Waldron, a Baptist minister in the mission to the State of New York. His ministry in the church, extending over a period of but a few years, when he died in the year of '96. In 1795-6, Rev. John B. B. was accepted as the

fifth minister. Mr. Bowers remained but ten years when he was dismissed, says the record, for reasons no longer known. During his pastorate the congregation built a new church, of which stone was the material, a church which it was said was the first in respectability and elegance in the colony.

Not long, however, were this congregation of devoted Christian people permitted to enjoy their seating in the beautiful structure, since the legal fraternity were not long satisfied with glances alone, but after it had been newly covered and repaired in 1756, it passed into the hands of the County officials, and became the Essex County Court House.

After the dismissal of Rev. Mr. Bowers a long vacancy occurred, during which a Mr. Buckingham officiated a few times, and it is said occasioned some excitement. At length, on Oct. 21, 1719, Rev. Joseph Webb was ordained here, and installed

the students under the care of Mr. Burr of New Jersey. On the permanent location of the college at Princeton Mr. Burr was called to preside over it there.

On June 28, 1759, Mr. Alexander McWhorter, a graduate of the college of New Jersey, who had studied under the famous William Tennent, of Freehold, was called on when he preached his first sermon, the people "At once fixed their eyes on him as the object of their united choice." Mr. McWhorter was ordained at Cranbury, North Carolina, on July 4, 1759. When the Commissioners from Newark appeared to request of the Presbytery his appointment as stated supply among them, their prayer was granted at once and the same summer he was installed as the eighth pastor of this church. In 1764-5 a great revival was enjoyed in this church and many were converted. In 1766, Mr. McWhorter being in feeble health traveled and

PARK PRESBYTERIAN CHURCH.

as the sixth pastor of this church by the Presbytery of Philadelphia, the Rev. Joseph Magee, Rev. Jonathan Dickerson, Rev. John Pierson and Rev. Robert Orr officiating at his ordination. For a few years (observes the venerable historian) tranquility reigned in the town, all were harmonious and all were avowed Presbyterians, but contentions arising, some persons became dissatisfied and invited the services of an Episcopal clergyman. Not long after this Mr. Webb requested and obtained his dismissal. Sad to relate, shortly after this himself and son were drowned while crossing the river at Saybrook, Connecticut. In 1737-8, Rev. Aaron Burr the seventh minister was settled here. He was the father of the once celebrated Col. Aaron Burr, once the Vice-President of the United States. In 1747, the college of New Jersey was instituted and Mr. Jonathan Dickerson, was appointed its first President. The following year he died, and the trustees placed

was entirely restored, not the only one who has since journeyed that way to recover. In 1778 Mr. McWhorter received a degree of Doctor of Divinity from Yale College, and in 1779 Dr. McWhorter, who had won world-wide fame as a minister of the gospel, was called to Mecklenburgh County, North Carolina, and placed in charge of the Presbyterian Church at Charlotte. Soon after his settlement there, the British army, under Lord Cornwallis, entered Charlotte. The Doctor and his family fled, his house was plundered, and nearly all his property, his furniture and his library were destroyed. In the summer of 1780 he returned to the North and engaged to teach at Abington, in Pennsylvania, for the winter. The people of Newark hearing this, invited him to pay them a visit. He did so in February, 1781. In April they sent him a regular call. He returned with his family and though never regularly installed again, he officiated as pastor till his death in 1807.

The church was organized in 1837, and the first pastor was Dr. George C. Stearns, who served until 1848. He was succeeded by Dr. Jonathan F. Stearns, who served until 1883. The present pastor is Dr. D. R. Frazer, who has served since 1883. The church has a membership of about 100 members. It is a member of the Newark Board of Christian Churches and is affiliated with the Synod of the Middle States. The church has a fine organ and a choir. It holds services on Sunday at 10:30 A. M. and 7:30 P. M. The church is located at the corner of Park and Belleville streets.

SIXTH PRESBYTERIAN CHURCH.

Dr. Eddy, who served from 1835 to 1848, when a call was made to Dr. Jonathan F. Stearns, Oct. 28, 1849. Dr. Stearns, the thirteenth pastor, continued to minister the affairs of this church until 1883, when he was succeeded by the present occupant of the pulpit, Dr. D. R. Frazer, who up to the present time (1871) has conducted the affairs of this church on the higher lines of Christianity, with marvellous acceptability, and with entire satisfaction as the fourteenth of the pastoral line, to all who drink from the fount of his learning at the foot of the First Church pulpit. Few men have a higher standing in the Presbyterian Church, and the name of Frazer is known and honored wherever the Gospel is preached.

PARK PRESBYTERIAN CHURCH

**D**URING the year 1848, sixty-one members of the First Presbyterian Church organized a religious society under the title of the "Park Presbyterian Church of Newark, N. J." The first pastor of the church was the Rev. Ansel D. Eddy, D. D. Among the original and charter members are the names of many who are well known in this city, as Stephen Dodd, James H. Clarke, Humphreys, B. Dunham, Richard Hall, Maria E., and Sarah E. Seating, George C. Dodd, Edward A. and Amanda Crane, Ezra Bolles, Benjamin F. Harrison, Charles D. Crane and many others.

Among its earliest elders were Stephen Dodd, Oms Boyden, Peck and Hall, David C. Dodd, Terah Benedict, Lewis C. Grover, Stephen R. Grover and William Ashley.

The session, in later years, has included Francis K. Howell, James S. Higbie, Stephen J. Meeker, Dr. Edward P. Nichols, Albert H. Baldwin, Edwin J. Ross, Joseph A. Hallock, Albert F. Freeman, James Mawba, William J. Kusing, Aaron King, Alexander Beach, Edward N. Crane, Elias F. Morrow, Edward L. Sill, Edward B. and George H. Denny, Hugh Hadcow, Asah W. Osmon and others.

Rev. Dr. Eddy was succeeded in the pastorate by Rev. Henry A. Rowland, D. D., Rev. James G. Hammer, D. D., Rev. Joel Fuller, D. D., Rev. Prentiss De Veuve, D. D., the last named of whom was influential in securing the removal from Park Street to the present site of the church, in Belleville avenue, corner of Kearny street.

PARK PRESBYTERIAN CHURCH.

The corner-stone of the new building was laid May 22, 1872. The dedication sermon was by Rev. William Adams, D. D., October 6, 1874. Dr. De Veuve resigned the pastorate in March, 1879.

In 1879 a unanimous call was extended to Rev. J. Clement French, D. D., who had been pastor of the Central Congregational Church, of Brooklyn, for fourteen years, and of the Westminster Church, of that city, for five years.

Dr. French was installed as pastor of Park Church in October, 1879. At that time the membership was 164.

apartments, were complete and dedicated to service on that day.

Dr. French is still the pastor, and will complete his twentieth year of service in October, 1897.

#### SIXTH PRESBYTERIAN CHURCH.

WE FIND the efforts leading to the organization of the Sixth Presbyterian Church somewhat hard to trace. It appears that Rev. S. S. Potter began services in this neighborhood March 5, 1848. On March 28 he was invited to preach for

ST. PAUL'S M. E. CHURCH.

From the first the seating capacity of the edifice was too small for the attendance. In 1884 it became absolutely necessary to enlarge the building. On Sabbath morning, April 20, \$18,000 were subscribed for this purpose, afterwards more. Work was at once begun. The chapel, Sunday-school rooms and the rear of the auditorium were taken down.

On April 20, 1885, the church building increased in its seating capacity to about 800, and changed in all its interior architecture and adornments, a new chapel, Sabbath-school rooms, primary department room, bible class rooms, study and other necessary

a term of six months at a salary of \$100 for the whole time. It is curious to find that when this term of service had expired a meeting was held to raise the money which resulted in a total of \$35. But the ladies came to the rescue and helped out the balance with a donation visit. Mr. Potter's term of service was during the cholera epidemic and he writes that he had four or five funerals a week.

The church was organized by a Committee of Presbytery, October 1, 1848, in a little school hall in Union Street, near Lafayette Street. The committee consisted of Rev. Drs. Condit

The church is unique in its arrangements and entirely modern. It is heated throughout with hot water and the gallery is seated with upholstered opera chairs. The building is so arranged that all the parlors can be turned into the church and the speaker can speak to over one thousand people. The church is very popular in the community and never has to close, summer or winter, for lack of a congregation. On the outside is a tablet bearing this inscription: "This church is conducted in the interest of the people outside of it." There are no pew rents, the church being supported by the systematic and voluntary offerings of the people. The effort is to create the right kind of spiritual atmosphere, to bring the Christ life and love and feeling into the church. The church has a well equipped Boys' Brigade—the first organized in the city. The Christian Endeavor Society was the first organized among Presbyterians here and the second in order of time in the city.

The names of those who have served the church as ruling elders are as follows: David Joline, Aaron C. Ward, Lemuel F. Corwin, Horace J. Poirier, J. Sandford Smith, John D. Wood, Isaac Ogden, John C. Wilkinson, Wm. K. Parkhurst, Job Haines, Joseph A. Hallock, Wm. K. Barton, Henry L. Ogden. The present officers are: Elders.—Joseph Clark, Henry R. Williams, Alvin V. Decker, Wm. H. Preston, Wm. McKenzie, Abram I. Thompson. Deacons—Josiah Duncan, Wm. H. Davis, Thomas Thompson. Trustees.—Alvin V. Decker, president; Abram I. Thompson, secretary; Ernest C. Reock, treasurer; Lott Southard, M. D., Clarence M. Hedden, Fred. L. Eberhardt, Theodore T. Lawshe, Joseph W. Clark, Wm. H. Davis.

### SECOND PRESBYTERIAN CHURCH.

IN the former part of the year 1810, a number of individuals residing in the upper part of the town of Newark, and members of the first Presbyterian congregation, being impressed with the importance of having a Second Presbyterian Church, adopted incipient measures for the accomplishment of this object. A year before this, at a meeting of the members of the First Church, it was evolved, that it was "advisable for this society to build another meeting-house;" but no successful movement was made, till the time above mentioned, for the establishment of a second church. On the 18th of June, 1810, the corner-stone of the church edifice was laid with appropriate

THIRD PRESBYTERIAN CHURCH.

religious services by Rev. Samuel Whelpley. The building was dedicated to the worship of God September 30, 1811.

At a meeting of the congregation, held January 12, 1811, the following persons were elected Trustees, viz: James Hedden, Joseph T. Baldwin, David Doremus, John N. Cumming, Marcus B. Douglass, James Conley and Theodore Fringhuysen, who took the oath of office April 22, of the same year.

At another meeting of the congregation, held January 23, 1811, of which Rev. James Richards, D. D., was moderator, a call was made out to Mr. Hooper Cumming, to take upon him the pastoral office among them. In April following the congregation was taken under the care of the Presbytery of Jersey, and on October 3 of the same year, Mr. Cumming was ordained to the work of the Gospel ministry, and installed pastor of the Second Presbyterian Church. Rev. Stephen Thompson preached the sermon, from I Cor. i. 21; Rev. James Richards, D. D., presided, and gave the charge to the minister, and Rev. Amos Armstrong, D. D., addressed the people.

The church was organized in October, 1811. At a meeting of the members of the church held November 6, 1811, when a sermon was preached by Dr. Richards from Hebrew xiii. 1, the following persons were elected to the office of ruling elders, viz: Nathaniel Douglass,

THE NEW YORK AVENUE REFORMED CHURCH.

REV. J. C. DENINGER.

Joseph L. Keen and Aaron Ward, the first two were also chosen and set about to perform the duties of exhorters.

At the organization of the church there were ninety-three members, 27 of whom were dismissed and recommended by the First Presbyterian Church. The whole number of persons who have been connected with the church is two thousand eight hundred and thirty-eight. Of these, one thousand five hundred and seventy-eight were received on certificate and one thousand two hundred and sixty on examination. At the present time, the whole number in communion with this church is six hundred and twenty-eight.

In November, 1895, the Rev. Thomas Reed Bridges assumed charge of the pastoral office, and is now the pastor.

REV. CARL HENSK.

EMANUEL M. E. CHURCH (GERMAN)

THIS church was founded in October, 1844, by the Rev. J. C. Sauter, who was sent to Newark by the New York Conference of the Methodist Episcopal Church. At first he held his services in the Franklin Street Methodist Church, and in a school house in Bank Street. Here he met with much opposition. While preaching the word of God on the second floor, a noted German freethinker held forth on the floor below. Prayer and class meetings held in private houses were frequently disturbed. Yet the good man met with more success, and in October, 1845, the young society bought the old Baptist Church in Market Street, opposite the depot of the present Pennsylvania Railroad, for \$2,500. When Rev. J. Sauter was transferred to another field of labor in 1847, he left a membership of eighty-five. A few prominent citizens of Newark took quite an interest in the new enterprise. When

the Society was incorporated (1845) Messrs. David Wood, Wm. B. Douglas, Cornelius Walsh and Dennis Osborne, together with three German brethren—Leonhart Meyer, Louis Hugin and Christoph Stieringer—constituted the first Board of Trustees. Not all the successors of Mr. Sauter were as fruitful as he. Indeed, his immediate successor had to be deposed from the ministry. In 1848 the Rev. J. Swahlen, the first convert under the labors of Dr. Wm. Nast, was sent to Newark to repair damages, but he too was followed by an unworthy man who, however, was speedily removed.

A list of succeeding pastors and the dates of the beginning of their labors may not be uninteresting: C. Hoeyener, 1850; J. Sauter, 1852; F. G. Gratz, 1854; Wm. Schwartz, 1855; C. H. Attenbach, 1857; J. Sauter, 1858; H. Kastendieck, 1859; J. F. Seidel, 1860; T. W. Dinger, 1862; H. Kastendieck, 1864; C. Jost, 1866; T. W. Friend, 1869; P. Quattlander, 1872; H.

Kastendieck, 1875; J. C. Deninger, 1878; J. W. Friend, 1881; G. Abele, 1884; L. Wallon, 1887; P. Quattlander, 1892; A. Flammann, 1897.

In 1871 the property on Market Street was sold for \$20,000 and the present edifice erected on the corner of Mulberry and Walnut Streets, at a cost of \$33,000, including the building lots. An excellent cut of the building will be seen on another page.

The membership of the church is at present comparatively small. Very few of its original members remain, and the young people have been and are drifting away, seeking their church homes in English-speaking congregations. Indeed, this church has been, to a large extent, a nursery for other churches. There are scattered all over Newark in the English-speaking Methodist,

REV. J. F. SEIDEL.

REV. N. MOKRO.

Presbyterian and other churches, those who have once been members or Sunday School scholars of this church. Some twenty years ago the writer of these lines took pains to trace, as far as he could, those who went out from this society and joined others, and to his own surprise found that the number was very large, that if brought together they would fill any church building in Newark. Still the society is free from debt, self-supporting and gives annually from \$800 to \$1,000 to the various benevolences of the church.

### THIRD GERMAN PRESBYTERIAN CHURCH

**T**HE Third German Presbyterian Church was organized Monday, March 30, 1863, in the Lecture Room of the Sixth Presbyterian Church on Union Street, opposite Hamilton. In the same year the congregation bought lots corner Ferry and Madison Streets, where their first chapel and parsonage were erected.

The Rev. Geo. C. Seibert, Ph.D., D. D., was the first pastor, viz.: from October, 1863, until October, 1872. The Rev. Oscar Kraft succeeded Dr. Seibert, and remained until March 17, 1874, when the St. Stephen's Church was formed from part of the membership, with whom the Rev. O. Kraft went.

In the spring of 1875, the Rev. Julius H. Wolff was called, and was installed as its pastor on the ninth day of June, 1875, who is still the pastor of the church. Under his administration, the old property corner Ferry and Madison Streets was sold, and a new site corner Hamburg Place and Ann Street was purchased in 1882.

In 1883 the new church, as shown in the illustration, was erected, with a seating capacity of 450.

THIRD GERMAN PRESBYTERIAN CHURCH.

In 1884 the parsonage was built, and in 1891 the first story of the Lecture Room was added, which was completed in 1895.

The church has now, (1897) 200 communicants, a flourishing Sabbath school with 400 scholars, and a thrifty Ladies' Aid Society and a Young Peoples' Aid Society.

The property represents an actual expense of thirty-one thousand dollars.

### ST. PAUL'S M. E. CHURCH

**I**N all probability, no church in Essex County has exercised a wider range of usefulness from the moment of its organization than St. Paul's M. E. Church, her history dating back to February, 1853, when she began her career with a roll of one hundred and twenty-two members. Of these, many were leaders in business and social life, and all were devoted Christians, Methodists, *per se*, and followers of Wesley, the divine. Full laden with affiliates of love and with an audacity of effort which would brook no delays, a brilliant promise of success was present from the start. As above stated, the church organization did not take place until February, 1853, but from a charming little tributary work from the pen of Mrs. A. F. R. Martin, entitled "A Glance Backward," we find the following facts: "Forty-two years ago May, 1806, a band of Christian workers, talking together, considered the subject of organizing a new church, and before they parted *this church* was successfully begun. For when did ever earnest disciples 'consider' a noble work without successful issue?"

From that night, interest in the project never flagged, the workers never halted in their purpose. A few months afterward the property on which this church stands was selected, and the first payment made. Two months later work on the chapel was begun.

The enthusiasm of the little band continued unabated, and the work went forward rapidly. Another two months passed, and

from lips which had been touched with live coals from the Altar Sacrificial.

And who, we ask, can say, we may when we mention the names of such bright particular pulpit stars as Schaffer, Corbit Cox, Lore, Arndt, Heston, Vail, Baker, Hanton, Wilson, Dashiell, Meredith, Tiffany, Sims, Todd, Baldwin, Boyle, Parson, and Bakeragan, all of whom have filled the pulpit of St. Paul's, if it was not their burning words falling on the ears of the tens of thousands, who were irresistibly drawn within the influence of their religious field, while the dynamo of their power was sending volt after volt of gospel truth, against the citadel of sin, leading them to fall down like the jailer of old and cry out, "What shall I do to be saved?" This had much to do in giving to St. Paul's the good name and fair fame enjoyed to-day. Speaking of these men Mrs. Martin says: "Seven of them have passed on at the master's summons, 'It is enough, come up higher.'"

It memory serves us right, 'twas under the preaching of Dr. Dashiell, that he who was a tower of strength to St. Paul's for the closing years of his grand Christian life, General Theodore Kinyon, our late Ambassador to Germany, was brought to the foot of the cross.

Mrs. Martin says: "Dashiell, a tower of strength, with his magnetic presence attaching all to him, and binding them with golden bands of friendship forever." Also she says, Corbit, the fearless warrior, who would take the kingdom of Heaven by storm. Continuing, Tiffany the elegant, "as pleasant songs at morning sung, the words dropped from his tongue, strengthened our hearts." Space will not permit more, but with such an array of energy, brilliant to "cast the net," it is little wonder that a multitude of fishes should be enclosed. Among those who have acted well their part, and have contributed of their worldly goods, mental love and of their influence to make the church what she is, we have only room to mention Ambassador

FIRST CONGREGATIONAL CHURCH.

Imyon, who, with the beloved Dashell, has been called up higher. It will be remembered that General Runyon's Bible Class had no superior under his influence.

Ex-Judge J. Franklin Fort, who for a score of years was Superintendent of the Sabbath School, Franklin Murphy, Esq., a tower of strength in deeds of beneficence, Mrs. A. F. R. Martin, from whose sketch we have quoted, Mrs. E. B. Gaddis, and many others whom it would be our delight to take record of in "ESSEX COUNTY, N. J., ILLUSTRATED." In the membership of St. Paul's, there is material abundant for a band and army devoted to the spread of truth, the upbuilding of Christ's kingdom on earth.

**REFORMED DUTCH CHURCH**

THE Reformed Dutch Church, which stands on Springfield Avenue, corner New Street, is one of the oldest in the village, having been in existence when the village was known as Clintonville. On the afternoon of June 23, 1839, the Clintonville Sabbath School was organized in the school room belonging to Alvah Sherman. At the time of organization the scholars numbered about fifty, and the following officers were elected: Patron, Isaac Watkin; Superintendent, William M. Summers; Librarian and Secretary, Alvah Sherman. Public worship was held regularly on each succeeding Sunday in the same building, when there was volunteer preaching by well-known ministers.

At a meeting of the Reformed Church Classis of Bergen, N. J., held Tuesday, January 14, 1840, a petition for the organization of a Reformed Dutch Church, and signed by sixty-seven of Irvington's then best known citizens, was presented. The

GRACE EVANGELICAL ENGLISH-LUTHERAN CHURCH.

petition was received with much favor by the classis, and the request was granted. On Sunday, February 2, 1840, the Reformed Dutch Church was organized, with William Ashley and Isaac Watkins as elders and William Summers and Abraham Baldwin as deacons. Services were held in the school room of Alvah Sherman and the first sermon was preached by Rev. J. Garretson, of Belleville. Rev. John A. Staats, of New Brunswick, was installed first pastor of the church, December 10, 1840, and he remained with the church for one year.

The first church building was erected in 1842, and was dedicated Wednesday, December 28, of the same year, at which time the installation of Rev. John L. Chapman took place. Rev. Mr. Chapman, who has since died, preached in the church until 1849, when he resigned. He was followed by Rev. James M. Bruen, who preached until 1852, and who was succeeded by Revs. James Devine and A. McKelvey, and in 1861 the late Rev. Henry Veshlage was chosen and remained until his death, which occurred in March, 1894.

Since the death of Rev. Henry Veshlage a number of able ministers have preached to the congregation on trial, but a choice was not made until July, 1895, when a unanimous call was extended to Rev. David H. Christensen, of Milford, N. Y. Rev. Mr. Christensen was born at Andes, Delaware County, N. Y.

CENTENARY M. E. CHURCH.

REV. O. H. KRAFT.

In 1884 he graduated from the Delaware Literary Institute, in 1889 from Hamilton College at Clinton, N. Y., and in 1892 from Auburn Theological Seminary. He then accepted as a charge the pastorate of the Milford, N. Y., Presbyterian Church, which he held at the time of his call to Irvington. Mr. Chrestensen is an intrepid mission worker and spent the entire summer of 1890 in North Dakota doing Sunday School mission work.

During the summer of 1891 he preached at Andoy, N. Y.

The church at present is in a very united and prosperous condition and with their new pastor and a new two-manual pipe organ, they expect to build up the church to its standing of former years. It is proposed to make the musical services a special feature, as there are some very fine trained voices in the choir.

REV. CHAS. HASTINGS DODD, D. D.

THE GERMAN UNITED EVANGELICAL ST. STEPHENS CHURCH

THIS church is located on the corner of Ferry Street and Henning Place, and was organized on March 17, 1874. Rev. O. H. Kraft was their first minister. Services were held in Mr. Reckert's carpenter shop on Van Buren Street, until the church was erected and dedicated, on Dec. 13, 1874. The cost of the building was about \$28,000.

Rev. O. H. Kraft left the congregation through the summer of 1878, and followed a call of St. Marcus Congregation, in Buffalo, N. Y. His successor is Rev. R. Katendahl, who was at that time pastor in his first congregation in Illinois. Under his leadership the congregation grew slowly but surely, and counts at present a membership of more than four hundred families. The trustees are, C. Eggert, J. Scheel, P. Schuckhaus, Ph. Metz, C. Hummel, T. Schoutz and J. Stüchl. The elders are J. Walt, Ph. Kaufmann, G. Fey, G. Wetzel, H. Geppert; organist, and Ludwig Wagner, sexton, filling their place as long as the church has stood.

SOUTH BAPTIST CHURCH

IN TRACING briefly the rise and growth of the South Church, it is but just at the outset to say, that it originated in no selfishly factions or partisan spirit, but in profound and sacred convictions of duty, and in an honest, earnest purpose to extend the kingdom of the Lord Jesus, and advance the views which Baptists hold. With the movement the Mother Church was in fullest sympathy from its inception till its success was perfectly assured. Those who remained in the old home on Academy Street and those who went out to set up house-keeping on Kinney Street counseled over the enterprise together, prayed over it together, gave of their means for starting it together, and when the time came for separating they went apart, not as contentious children who could not abide under a common roof, but as loving members of a single family, invoking on each other the best of blessings. We mention this simply as an illustration of Christian large-heartedness, and "to the praise of the glory of His grace."

On the evening of February 18, 1850, thirty-seven brethren and sisters, bearing a general letter of dismission from the First Church, met in that house of worship to organize what was then named and is still called, the South Baptist Church, of Newark. By rising they formally entered into fellowship, and then proceeded to elect officers and adopt a covenant and articles of faith.

At a subsequent meeting, eight others were received as constituent members, making a total of forty-five; and on the first Tuesday of March public recognition services were held. Henry C. Fish offered the prayer, F. L. Magoon preached the sermon, Henry V. Jones gave the hand of fellowship, and Simeon J. Drake delivered the charge. Of these honored brethren, the preacher of the sermon only remains to share in the conflicts

REV. A. FLAMMANG.

REV. F. NIEBUHR.

and conquests of the militant church. At the time of the recognition, Dr. Hague had already been called to the pastorate and the sanctuary on Kinney Street was well under way. The lecture room of the new house was occupied on the 14th of April, and on the 18th of July the finished structure, free from debt, was set apart to the worship of the Most High. Three years of abundant prosperity were vouchsafed, during which the membership grew to more than 200, and then, greatly to the regret of his people, the first pastor went his way.

In March, 1854, Dr. O. S. Stearns, now a professor in the Theological Seminary at Newton, Mass., was called to the vacant place, but before a year had passed the brethren at Newton Center, coveting earnestly the best gifts, were seeking to allure the pastor to that field, and presently their persuasions prevailed and the South Church again was shepherdless.

In the autumn of 1855, Dr. James L. Hodge succeeded to the charge. Some gracious ingatherings were enjoyed, and the general interests of Zion were well maintained. Two years, however, brought the relation to an end, and now for eleven months there was a dependence on supplies.

In October, 1858, Dr. E. M. Levy, of Philadelphia, began his labors—labors which extended over a period of ten years, or double the time covered by any other pastorate. During this term the church edifice was remodelled and beautified, the organ purchased and revival mercies extensively enjoyed.

Dr. John Dowling came next, and remained for three and one-half years. He gave to the South Church about the last pastoral service of a life which was abundant in labors, fruitful in results, and is fragrant in memory still.

Dr. George A. Peltz was Dr. Dowling's successor. He ministered to the flock acceptably till the close of 1875, when he resigned, to give himself more exclusively to Sunday School work.

In the spring of 1876, Dr. Charles Y. Swan took the charge. A strong spirit overestimated and so overtaxed the frail body that housed it, and amid displays of saving grace he was laid aside, and after months of wasting, bravely borne, he was not, for God took him.

In November, 1880, Rev. T. E. Vassar, D. D., became pastor, remaining with the church seven years and laboring with great efficiency. He was succeeded by Rev. John English.

CHRISTIAN CHURCH, IRVINGTON.

The present pastor (1897), Rev. R. M. Luther, D. D., assumed this relation June 1, 1891. The official list of the church, May, 1897, is as follows: Pastor, R. M. Luther, D. D. Deacons—Jerome Taylor, John C. Boice, Thos. S. Stevens, N. A. Merrit, Arthur W. Palmer, Jephtha D. Runyon. Trustees, Caleb H. Earl, Samuel O. Baldwin, S. O. Nichols, Wm. F. Utter, J. D. Runyon, Walter Drake. Clerk of the Church, Sayres O. Nichols.

THE NEW YORK AVENUE REFORMED CHURCH.

THE New York Avenue Church was first organized as the Second Reformed Church in 1847, and its first house of worship was built at the corner of Ferry and McWhorter Streets, the next year.

In the year 1888 the church removed to the chapel already completed on the new site at the corner of Pacific Street and New York Avenue.

The corner-stone of the new church was laid October 6, 1891, and on December 5, 1892, the present house of worship was dedicated as the New York Avenue Reformed Church. The following is a list of the pastors of this church: Rev. Gustavus Abeel, D. D., 1850-1865; Rev. Matthew B. Kiddle, D. D., 1865-1869; Rev. Cornelius Brette, D. D., 1870-1873; Rev. F. V. Van Vranken, 1873-1880; Rev. John A. Davis, D. D., 1880-1889; Rev. A. J. Sullivan, 1890-1891; Rev. John S. Allen, 1892.

The present pastor began his work in October, 1892, with a new church but a heavy debt of some \$15,000. This debt was raised, and the Christmas bells of 1895 rang in a free church.

The church is a model of architectural grace and is finished in pressed brick, trimmed with brown stone. It has a large auditorium with a seating capacity of over 700. The acoustic qualities are perfect.

The founder of this church, through whose efforts it was established, was the Hon. William H. Kirk, who for nearly fifty years was an officer and leader in the work of this church.

Foremost among the supporters of this church is Mr. Joseph S. Mundy, to whose generous gifts the success of the church is largely due.

The church, through the Richard's Trust Fund, maintains an industrial school on Clover street.

TRINITY REFORMED CHURCH.

In 1850, a Sunday School was organized by Mr. Thomas Webb, in his tannery house, a building then standing on Lower Ferry Street. Soon after, the school was removed to a Union chapel erected at the corner of Bowers and Ferry Streets. A number of the teachers were members of the Second

EMMANUEL LUTHERAN.

DUTCH REFORMED CHURCH.

Reformed Church then under the pastoral care of Dr. G. Abeel. The Union enterprise not proving a success, the Second Reformed Church assumed its support and care. In 1859, a frame chapel was removed from McWhoiter Street to a lot on Ferry Street, given by Miss Elizabeth Richards, a teacher in the school, who took a great interest in its success. At her death a generous bequest of some two acres of land to the Second Reformed Church, for church purposes, made permanent the enterprise. In Oct., 1869, a petition with twenty-five names signed thereto, was presented to the classis of Newark, asking for the organization of the East Newark Reformed (Dutch) Church. The Classis appointed as a committee for that purpose, the Rev. Drs. G. Abeel, E. P. Terhune and elder Aaron Baker. On October 27, 1869, the organization was effected and its first consistory with two elders, Nelson Jacobus and G. L. Van Emburgh, and two deacons, Nathaniel Richards and J. H. Joroloman ordained. On Dec. 15, 1869, the Rev. I. P. Brokaw, a graduate of the New Brunswick Seminary, was ordained and installed pastor.

At the meeting of the general Synod in this city, June 1870, the corner-stone of the present structure was laid. In the early spring of 1871, the church was finished and dedicated. The congregation has been ministered to by seven pastors: Revs. I. P. Brokaw, C. R. Blauvelt, C. H. F. Kruger, Theodore Shatter, D. Chas. Preyer, R. P. Millekin and J. N. Morris (1897), the present incumbent. Two of these Revs. C. H. F. Kruger and R. P. Millekin, died in its pastoral service. By consent of the Classis the name has been changed, and the church is now incorporated under the name of Trinity Reformed Church. Its present membership is nearly 200, and its Sunday School, superintended by Mr. Wm. Jacobus, numbers over 400. The primary department, under the direction of Mr. William Jacobus, forms a promising feature of the church work. The societies are Ladies' Aid Society, Young Peoples', S. C. E. and King's Daughters.

EMMANUEL REFORMED EPISCOPAL CHURCH.

EMMANUEL REFORMED EPISCOPAL CHURCH

THE church was organized under the preaching of Bishop G. D. Cummings, of Pennsylvania, a pulpit orator of remarkable power. His first sermon was preached in Association Hall, to a large congregation assembled from nearly all the churches in Newark, but more especially from the Protestant Episcopal denominations. The congregation increased rapidly, many of the Episcopal brethren leaving the mother church, and casting in their lot with the reformed. The writer of this article well remembers the occasion, when the eloquent man held forth, and himself listened to the foundation sermons, upon which was established this now large and influential church. It is a little more than twenty years ago, when Dr. Howard Smith was settled as pastor over the little flock, which had gathered around the standard set up by the Bishop. On Oct. 11, 1876 the corner-stone of their first church was laid at 76 Halsey Street, and the church was opened for service March 4, 1877. Here the congregation worshipped and grew in membership and in strength, until the little church became too small and inconvenient. The fare-

REV. ROBERT C. STEPP.

William Scott, J. C. Green, J. H. Watson, and E. W. Hamner. The Emmanuel Reformed has had but four rectors, Rev. Dr. Hanson, Sr.; Rev. E. B. England, Rev. John Dennis, M. D., and the present rector (1870), Rev. Geo. Savary. Bishop W. R. Nicholson, of the Synod of New York and Philadelphia, formerly rector of Trinity Church, preached the dedicatory sermon. The fellowship meeting of the latter occasion was most interesting, and was attended by a large number of the Congregational clergymen of Essex County.

The new church building which appears among the illustrations is built from the drawing furnished by Philip Henry and Walter G. L. Ward, the architects employed. The building is of the new revival style of architecture, and is constructed of Eldon lime stone, with the base of Belleville brown stone. A lofty bell-tower surmounts it upon which is to be placed a spire. It has a seating capacity in the main auditorium of four hundred, and a gallery accommodating one hundred. The

cell was taken of the old church on February 19, 1875, and the site sold to Hahn & Co. On June 22, 1893, they laid the cornerstone of their beautiful and commodious new church building at the corner of Broad Street and Fourth Avenue. The Emmanuel Reformed Church building cost about \$2,000, and stands a monument to the zeal and perseverance of church membership, as devoted as any in the city of Newark, or county of Essex.

With such determined Christian spirits at the helm, and such careful business men to manage its financial affairs, it is little wonder that the congregation is practically out of debt. The building committee consisted of Rev. John Dennis, M. D., George C. Miller, G. W. Douglas,

REV. DAVIS W. EISK.

Sunday School rooms are separated by sashes, which can be slid back thus doubling the seating capacity. In the basement is a dining room and kitchen furnished with all the modern cooking utensils. The heating is done on the direct radiation plan. Fresh air from outside is furnished every twelve minutes, by a large fan driven by a dynamo. Electricity will be used to light the church, as well as to furnish power for the great organ. The Rev. Dr. Savary, a man of eloquence and pulpit power, continues to occupy the sacred desk and is the idol pastor of a devoted and working congregation.

SECOND GERMAN BAPTIST CHURCH.

IN June, 1863, through the efforts of the Rev. J. C. Hasselhuhn and several members of the First German Church on Mercer Street, the Second German Baptist Church was founded. A private dwelling house in the twelfth ward was rented, and a Sunday School was started with 100 children, 16 teachers and

officers. The good work progressed, and with the aid of the City Mission Board, a neat little chapel was erected corner Niagara and Patterson Streets, and the services of Rev. A. Transch were engaged. After three years of faithful labor, he was succeeded by the Rev. J. C. Kraft, who was called to the church in 1867. Under his pastorate, and with the advice of the City Mission Board, the congregation was organized as an independent church on April 28, 1875, Rev. J. C. Kraft becoming the first regular installed pastor. He worked earnestly for the success of the church and during the eleven years of his pastorate did much to uplift those committed to his care. He was succeeded by the Rev. John Jaeger, a student at the Seminary of Rochester, New York, who

REV. J. C. KRAFT.

REV. DAVID H. CHRISTENSEN.

labored with the church for nearly two years. In 1884, Rev. William Schuff took charge, and labored for about eleven months. He was followed by the Rev. A. Brandt, who served the church faithfully for the period of seven years. In January, 1863, the church extended a call to Rev. C. Schenk, the present pastor, under whose able management the new and elegant brick church edifice, which appears among the illustrations, was erected and dedicated December, 1895. Rev. C. Schenk is untiring in his efforts to promote the welfare of his people. There is a Young Peoples' Society connected with the church, and a Sunday School, over which Mr. William Pfennig is the Superintendent. The present trustees are August Buermann, John P. Gerber, Philip Reuter, William Pfennig and John Gerner.

GRACE ENGLISH LUTHERAN CHURCH

**T**HIS Church, as its name indicates, was organized chiefly for the children of German Lutherans, though its work is not confined to them. But its special object is to reach that large number of English-speaking Germans and their children, who otherwise must be deprived of the Gospel as taught in the Lutheran faith.

The church was organized in 1888, and for years worshipped first in the old Library Hall, and then at 870 Broad street. Finally the congregation grew bold enough to attempt to secure a property of its own, and so came into possession of the beautiful and churchly structure on Mercer street, near High street. The church was dedicated May 19, 1895.

Since the congregation has been in its new building, the work has been very successful. Rev. M. S. Waters is the pastor of the church. He came to Newark from Indiana, taking charge of the work June 3, 1893.

SECOND GERMAN BAPTIST CHURCH.

ST. JOHN'S FIRST GERMAN EVANGELICAL LUTHERAN CHURCH

**T**HE oldest of the German churches of Newark is the above named church. Already in the year 1827, attempts were made by the Evang. Lutheran Ministerium of the State of New York to organize a congregation in Newark; but this was not accomplished until October 10, 1833, when Rev. Dr. F. W. Geissenhaimer, of New York, organized St. John's, with thirty-one communicant members, in a hall on Harrison street, which then constituted that portion of Halsey street between Market and William streets. The young congregation was served by the Revs. L. Smith and Phil. Merkle until December, 1835. About two months later, Rev. Prof. Winkler became the pastor of St. John's. During his time the services were held in a hall corner Market and Beaver streets. Rev. F. G. Maschop succeeded him as pastor in Newark. Under his pastorate the congregation built a new church and parsonage on Mechanic street, the consecration of which took place on November 10, 1840, being the 357th anniversary of Dr. Martin Luther's birth.

Things went on smoothly and prosperously until the year 1845, when, through the domineering ways of the pastor and his adherents, disturbances were raised in the congregation leading to a law-suit, which lasted fully ten years, finally being decided in the year 1855, in favor of those members of the congregation remaining true to the New York Ministerium. The interest of the gradually diminishing congregation was faithfully looked after by the Hon. Frederick Frelinghuysen, the late United States Secretary of State. In order to defray the expenses of the law-suit, the congregation had to sacrifice its whole property.

Already, in the year 1853, Rev. Maschop had resigned. His successor, Rev. L. Seybold, endeavored to stimulate the stricken congregation unto new zeal and courage, but he had a hard task before him. After two years' service he severed his connection with his flock, which extended a call to Rev. H. Raeger. He occupied St. John's pulpit only five months, when he entered new obligations in New York City. The congregation remained vacant only two months.

In March, 1856, Rev. C. A. Ebert was installed. Through his efforts the congregation thrived to such an extent that the

ST. JOHN'S GERMAN EVANGELICAL LUTHERAN CHURCH.

REV. E. J. FELT.

The Irvington Episcopal Church is very bright and airy.

IRVINGTON METHODIST EPISCOPAL CHURCH.

ABOUT 1820, Rev. Edmund S. Jones (afterward Bishop) was called from Orange, where he was then residing, to begin to hold services according to the usages of the Methodist Episcopal Church, in the old brick academy on the corner of Irvington. The organization of the church was completed in 1845. It was associated with the church at Model, in Orange Hilton, N. J., and the charge was known as "Irvington and Middleville" until 1867, when Irvington was separated. In the following year, however, the two churches were again united, and this union continued until 1891. Since that time Irvington Methodists have not been connected with any other congregation.

From the organization of the Church in 1845, the Rev. John

1891

preservation of building on Hesse street, opposite Cedar street, could be paid in 1887. Rev. Felt resigned in 1867 and Rev. Plaf. Krug became his successor. He labored until 1892, until his resignation, which occurred January 1, 1893, when he had celebrated his 25th anniversary as pastor of St. John's, October, 1892.

On April 1, 1893, the present pastor, Rev. G. Doering, took possession of the charge. After purchasing a new pipe-organ in 1894, at a cost of \$2,000, the congregation was able to wipe out the remaining church debt of \$4,000 on May 1, 1896. About 350 communicant members contribute toward the maintenance of the Church, assisted by four energetic societies and a self-sustaining Sunday School with 175 scholars enrolled. It may well be said: "The future of St.

REV. LOUIS S. OSBORN.

P. McCormick became pastor. He was succeeded in 1846 by the Rev. Robert Given, and in 1847 Mr. Given was followed by the Rev. Martin Herr. The Church in Irvington was originally built by the Episcopalians. It was sold at Sheriff's sale in the spring of 1847. It was bought by a Mr. Day, the holder of the mortgage, and at the suggestion of Bishop Jones, the property was purchased from Mr. Day by the Rev. Martin Herr for \$1,000. The building was repainted, somewhat remodeled and subsequently rededicated by Bishop Jones.

In 1848, the Rev. George Hughes, now editor of the *Guide to Holiness*, became pastor and remained for two years. He was succeeded in 1850 by the Rev. David Graves. The following year the Rev. James M. Freeman (now Dr. Freeman, the well known author and editor) preached in Irvington. The Rev. John Faull became pastor in 1852 and was succeeded in 1853 by the Rev. John White. The following year the Rev. J. C. Blain was appointed, and was succeeded in 1855 by the Rev. John B. Vincent (now Bishop), who remained two years.

The Rev. Matthias F. Swain succeeded Dr. Vincent in 1857, and the next year John F. Hurst (now Bishop) became pastor and remained two years. In 1859, the Rev. Henry A. Buttz (now President of Drew Theological Seminary) was appointed preacher-in-charge. He was succeeded in 1860 by the Rev. Edwin Day. The Rev. William M. Lippincott came in 1861, remaining two years. He was followed in 1863 by the Rev. Charles R. Snyder. The next year the Rev. John Scarlett was made pastor, continuing his labors until 1866, when he was succeeded by Rev. Henry M. Simpson (now Chaplain at Dr. Strong's Sanitarium, Saratoga Springs, N. Y.)

The Rev. Robert B. Collins was appointed pastor in 1867, remaining two years when he was succeeded in 1869 by the Rev. Jesse S. Gilbert, A. M., the author of several works of

REV. GEORGE SAVARY.

value. The Rev. Hamilton C. McBride (now a distinguished revivalist) came in 1870, and during his stay the present parsonage was projected.

In 1871, the Rev. William I. Gill, the author of several philosophical works, became preacher-in-charge, and remained for three years. During his pastorate the parsonage was completed. He was succeeded in 1874 by the Rev. James O. Rogers, who remained until 1877. His successor was the Rev. William R. Kiefer, who remained until the spring of 1879, when the Rev. Joseph W. Dally was placed in charge, his pastorate continuing until 1882.

Succeeding pastorates have been as follows: 1882-85, Rev. J. F. Andrew; 1885-88, Rev. J. W. Young (now Secretary of Committee on Apportionments of the Missionary Society); 1888-93, Rev. S. K. Doolittle; 1893-95, Rev. Elbert Clement; 1895-96, Rev. E. N. Crasto; 1896, the present pastor, Rev. E. S. Jamison, A. M., Ph. D., was put in charge.

### FIFTH BAPTIST CHURCH.

PROMPTED by a love toward God and the extension of His cause, some ten or twelve brethren of the two Baptist churches in our city, met on Dec. 1, 1851, and held an initiatory meeting of a movement that resulted in the formation of the Newark Baptist City Mission. This Society in April, 1852, began its labors by organizing two missions, one of which was in that part of the city known as the 5th ward lying east of the New Jersey, now the Penna. Railroad. Thus begins the history of the Fifth Baptist Church, with Revs. C. W. Waterhouse, Thos. G. Wright and D. T. Morrill, as missionaries successively. This mission growing in interest and numbers, a Council of Baptist churches was convened on March 26, 1855 as a result of which, the mission was then regularly organized into a church, with 55 constituent members and Rev. D. T. Morrill, as pastor.

Notwithstanding the disturbed condition of the times preceding the Civil War this noble sacrificing band, together with the help of generous friends and the blessing of God, succeeded in erecting a very commodious edifice, and dedicating it on April 21, 1858. The general revival of 1857-8 resulted in one hundred and thirty joining the church by baptism. There have been other revivals since, nearly as large. The total member-

FIFTH BAPTIST CHURCH.

ship from March 26, 1855, to May 1, 1896, has been 1,305; present membership, 320. The church property is in a good state of preservation having been extensively remodeled in 1872, and again in 1896.

While this church has not been free from the various vicissitudes incident to the church militant, yet they rejoice in having had no disruptions to mar its record and weaken its power. They have been signally blessed in having as under-shepherds, men of marked intelligence, purity and power, as follows: Rev. D. T. Morrill, 1855-69; Rev. D. C. Hughes, 1869-74; Rev. G. A. Smonson, 1874-82; Rev. H. B. Waring, 1883-90; Rev. C. E. Lapp, 1890-95; Rev. T. A. Hughes, 1895—. The labors of these brethren have resulted in developing a constituency, which has contributed to the strengthening of all the other Baptist Churches in the city, and outside, and still continues to be a strong centre of influence and power.

### CENTENARY M. E. CHURCH.

THIS Church owes its name to the fact, that it was organized in 1860. The cornerstone was laid by Bishop Janes, November 28, and dedicated by the Rev. James Ayers, July 14, 1867. The Rev. A. M. Palmer, then city Missionary, was the first pastor. He was succeeded by the following: Revs. John O'Brian, April, 1868-9; H. C. McBride, 1869-70; R. B. Collins, 1870-73; E. E. Chambers, 1873-75; Charles R. Barnes, 1875-78; Chas. S. Colt, 1878-80; Joseph H. Knowles, 1880; Stephen L. Baldwin, 1880-81; Chas. E. Little, 1881-84; David B. F. Randolph, 1884-87; Warren L. Hoagland, 1887-92; and Winfield C. Snodgrass, the present pastor.

FIFTH BAPTIST CHURCH.—INTERIOR VIEW.

## TRINITY CHURCH

To the thought that the village and city of Newark, the white top of "Old Trinity in the Park," might seem to gimmer in a host of interesting memories. It marks the spot where on the borders of the city it erected their first place of worship over one hundred and fifty years ago. It is a reminder of the trying times of the Revolution, for the more hot-headed of the local patriots visited a share of the general resentment of the people against their oppressors on the church and its parishioners on account of the latter's association with the Church of England. The hostile demonstrations went so far as to necessitate the closing of the church and the retirement of its pastor, the Rev. Isaac Brown, from the town. Subsequently the edifice was used as a hospital for the sick and wounded of the continental army, during which period a portion of the church records were displaced or lost.

Previous to the pastorate of the Rev. Dr. Henderson, the use of the church building was graciously granted to the Catholics of St. John's parish, for the holding of a lecture, which was delivered by the Rev. Dr. Power, of New York, for the benefit of their church.

The record of Trinity Church, pastors and officers, is truly Christian, and it will serve as a beautiful object lesson to all good citizens as long, no doubt, as the city endures. The parish is the outgrowth of the work of the Association for the Propagation of the Gospel, the oldest Protestant Missionary Society in existence, which was, at that time under the jurisdiction of the Bishop of London. The religious services were conducted by the Rev. Mr. Brook, of Elizabethtown, who had charge of all the Episcopal missions within a radius of fifty miles of his station, and who began his labors in 1704.

The Rev. Mr. Brook was succeeded by the Rev. Mr. Vaughan (1729), under whose ministrations the first church building was erected for the parish (1743-44). The Rev. Isaac Brown, a graduate of Yale College followed the Rev. Mr. Vaughan (1744), and his faithful ministrations extended over a period of thirty years. He founded at Second River, a mission which is now known as Christ Church, Belleville.

After the troubles incident to the Revolution the parish was reorganized under the rectorship of the Rev. Dr. Ogden, 1778. The following townsmen were elected officers: Uzal Ogden, James Nuttin, John Robinson, David Rogers, Benjamin

TRINITY CHURCH.

Johnson and Ebenezer Ward. The church building was renovated and refitted for divine worship, and Dr. Ogden fulfilled a successful ministration of twenty years.

He was succeeded by the Rev. Joseph Willard, by whose efforts the present church edifice was erected 1809-10. The Rev. Dr. Louis P. Bayard became rector in 1811, and during his seven years of care the membership of the parish showed a marked increase. In 1830, the Rev. Matthew H. Henderson, A. M., succeeded to the rectorship, and worked faithfully for more than twenty-five years in advancing the interests of the parish.

Then followed: the Rev. Dr. Edmund Neville, 1857; the Rev. Dr. John C. Eccleston, 1862; the Rev. Dr. Watson Meier-Smith, 1866; the Rev. Dr. W. R. Nicholson, 1872; the Rev. Dr. William Willberforce Newton, 1875; and the Rev. J. Houston Eccleston, 1877. The Rev. J. Sanders Reed was appointed rector in 1885, and during his five years of incumbency he did much towards establishing the Girls' Friendly Society, the first organization of its character in the State, and other parochial agencies, which are effective for promoting the interests of the parish.

In 1890, the Rev. Louis Shreve Osborne, the present incumbent, began his labors in "Old Trinity." Since his advent the church edifice manifests great improvement, internal and external. He is a man endowed with a genial and kindly nature, and the grace of human sympathy, qualities that never fail to impress strangers as well as his own people.

Many of Newark's honored citizens have worshipped at the shrine of "Old Trinity."

TRINITY CHURCH, INTERIOR VIEW.

ST JOHN'S R. C. CHURCH.

IN 1824 the Rev. Gregory D. Pardow, of New York, organized under the patronage of St. John, the association of Catholics who founded St. John's Church. It was designated St. John's Roman Catholic Society of Newark, N. J. The first trustees were Patrick Murphy, John Sherlock, John Kelly, Christopher Rourke, Morris Fitzgerald, John Gillespie and Patrick Mape. The founder of the Church labored faithfully with the parish for eight years, and through his energy, tact and zeal, insured its success. He was followed by the Rev. Matthew Herard, October 7, 1832, and the Rev. B. Rafferty, October 13, 1833.

On November 3, 1833, the Rev. Patrick Moran was appointed pastor. He was eminently fitted for the place. He possessed good judgment, a refined and correct taste, and an educated mind. Under his able management, the affairs of St. John's advanced rapidly, and his sterling qualities won for the congregation the confidence of their non-Catholic neighbors. Father Moran soon had a library of 850 volumes in circulation. He organized church societies, literary, temperance and benevolent associations. He erected a school-house and arranged for the free instruction evenings of such as could not attend the day school. But his chief source of pleasure and pride was in his Sunday School, which he raised to a high degree of excellence. Connected with it was a teachers' association, which was a model of its kind.

The late Most Rev. James Roosevelt Bayley, D. D., Archbishop of Baltimore, who was appointed first bishop of Newark, selected Rev. Patrick Moran of St. John's, to be his vicar-general. After his death, which occurred July 25, 1866, the following was successively rectors of St. John's Church: Rev. James Moran, nephew of the deceased rector, November, 1866; Rev. Louis Schneider, November, 1867; Rev. Thomas M. Killeen, who built the new rectory adjoining the church, November, 1868, and did much for St. John's; Rev. Patrick Leonard was rector in December, 1878. Rev. Louis Gambos-

ST. JOHN'S R. C. CHURCH.

ville, who personally and with great care and labor re-wrote the church's record of births and marriages from the foundation to his time, and who was the second incumbent to die (January, 1892); Thomas E. Wallace, administrator, from January, 1892, to February 27, 1892, and February 1892, Rev. J. P. Poels, the incumbent. The assistant rectors were Rev. Fathers Guth, 1837; Farrell, 1838; Bacon, 1838; Donahue 1845; Hanahan, 1846; Callan, 1848; Senez, 1849; Conroy, 1852; McGuire, 1853; Tubberly, 1854; Casted, 1858; McCloskey, 1860; Byrne, 1861; Moran, 1863; Wiseman, 1867; Rolando, 1867; Nardiello, 1876; Wielan, 1878; Corrigan, 1879; White, 1882; McGahan, 1892; Lanning, 1893, and Dooley, at present. Rev. Father Poels, who is now rector of St. John's, is a man of great executive ability, and most zealous; and people who love the first Catholic church in Newark and cherish its memories, may rejoice that the parish has come under his care, for it already shows many signs of improve-

INTERIOR VIEW OF ST. ALOYSIUS CHURCH.

the Italian community. His contribution has been significant in the development of the church's religious affairs and in the growth of the parish.

The church's history is closely tied to the history of Catholicism in Newark. The "rectory" of all the churches of the city was established in 1850. It has since then brought forth several zealous pastors who have worked to propagate the faith, and among them were the Rev. Most Rev. Michael Augustine Conroy, D. D., A. M., of New York, the late Very Rev. John H. George, of Newark, its first vice-president of Seton Hall College, Rev. George W. Corrigan of Paterson, and the late Most Rev. John J. Boerckel.

#### CHURCH OF OUR LADY OF MT. CARMEL

THIS Church, formerly the Second Reformed, was purchased for the use of the Italian Catholics of the city, by the Rev. and the land of the Rt. Rev. Bishop Wigger, and the energetic and energetic Father Conrad M. Schlotthofer, D. D., became its first rector. He was succeeded by Rev. Father Ahl, a convert from Mohammedanism, who was a zealous and faithful priest, but he died within a year of his appointment to the care of the parish.

The present incumbent, the Rev. Father Ernest D. Aquila, is a graduate of the Seminary of Termoli, Boario St. Catherine, Alexandria, Egypt. He also studied at the Seminary of Saint Joseph, Syracuse, Assi Minor. Besides being learned in his sacred profession, especially as to canon law, he is an accomplished musician, having taken a seven years' course in music at Naples, Italy. He is especially proficient with the piano, flute, organ and organ.

His sister is a valued assistant to the reverend Father in his school, as she has drawn about her a class of sixty-five of the children of the parish, whom she daily instructs in the elements of education. In this laudable work she is fortunate in having the assistance of Miss Victoria Richmond, a daughter of Dr. John B. Richmond, who gives her services three times a week to the school on instructing the children in English. Miss Richmond is a gifted and accomplished linguist and has acquired a wonderful proficiency in the Italian language in a short space of time.

Under Father D'Aquila's rectorship, the Church of our Lady of Mt. Carmel shows great improvement, both in the character and growth of the attendance of devout worshippers and in the improvements and embellishments which have been wrought in the edifice itself. The most indifferent observer cannot fail to note that the workers are in love with his work, and that he is animated

FATHER AQUILA.

CHURCH OF OUR LADY OF MT. CARMEL.

in all of his undertakings, with the spirit of the Master. A novel feature of the services of the church consists in that they are conducted in a modest way, after the Italian style of elaboration and display. This feature is attractive to the parishioners, as it recalls the life in their beautiful fatherland, and revives an interest in the religious observances of their youth, which perhaps under the asperities of existence in a new world, was beginning to wane.

Father D'Aquila began his labors in America by organizing the Italian parish of St. Anthony in Elizabeth, and erecting a church of the same name. In addition to his charge in this city, he has also erected the Church of St. Michael the Archangel, in Orange, for his countrymen, which has furnished another illustration of his successful management of religious affairs.

The accompanying illustration of the church edifice shows it to be a pleasing structure architecturally, from an exterior point of view, and its very central location bids fair to make it in the course of time, a very large and prosperous parish. The interior arrangements of the church are excellent, and quite suited to the needs of the present congregation. Until the establishment of the Church of Our Lady of Mt. Carmel, in 1860, the eastern section of the city afforded no accommodation for the many who resided there of Italian birth, and the Catholic faith.

The prosperity and ever growing condition of the parish is good evidence of the need of such a church, and under the able management of the present pastor, the future should have much to state.

The church will have its effect for good among the Italian speaking people of the entire city in making them good Christians, and thereby better citizens. Father E. D'Aquila has entered into a field of great usefulness, and he has the well wishes of the community in the performance of his good works.

ST JAMES' CHURCH.

THIS Church which, with its ornate and artistic interior and its beautiful and imposing exterior, is without doubt one of the best edifices dedicated to divine worship in Newark, is a monument to a life's enthusiastic devotion to God's work, that of the late Father Gervais, and to the unassuming but effective work of his successor, the Rev. Father Cody.

St. James' parish was organized in 1853. Through the efforts of the Rev. Father Senez, at that time rector of St. Patrick's Cathedral, the site was purchased. The Rev. Father Allaire was put in charge of the new parish, and on June 18, 1854, the corner-stone of the old brick church, which is still standing, was laid by the most Rev. James Roosevelt Bayley, first bishop of Newark. This building was completed under the Rev. James Callen, who succeeded Father Allaire, and was dedicated the following November. It was of three stories, and the upper one was reserved for school purposes. Father Callen, was succeeded by the Rev. Father Gervais, (1861). Father Gervais was a man with a character pronounced and original almost to eccentricity. His mission was to build grand and costly structures for the glory of God, he certainly carried it out with an energy and a success, and in an adverse condition that were extraordinary. Up from midst the humble homes of hard working wage-earners, rose imposing structures—church, hospital and convent—as if from under a magician's hand.

And the inspirer of these great works was going about in worn out shoes from door to door of his flock, collecting funds for his enterprises, or was assisting in the manual labor of the builders. In July, 1863, the corner-stone of the present commodious church building, which is built of dressed brown stone from the old quarries on Eight Avenue, this city, was laid, and three years later, June 17, 1866, in the presence of the largest concourse of people that had ever assembled in that section of the city, it was dedicated to divine worship, most Rev. Archbishop Bayley officiating at both events.

The strain of his responsibilities proved too great for Father Gervais, and July 24, 1872, he went to his reward. The Rev. Father M. E. Kane, his assistant, took charge of the parish until the appointment of the regular pastor, the present incumbent, Rev. Father Cody, (January, 1873). Under the latter's able management the unfinished buildings which cover the entire

block bounded by Elm, Jefferson and Madison Streets, the hospital with its appointments and the church with its graceful and massive steeple have been completed. A chime of ten bells (the largest weighing over three thousand pounds) which is judged to be the finest in the State has been placed in the church tower. In addition to this noble instrument a still greater one

ST. JAMES' R. C. CHURCH.

has been built in the church, in the grand organ, which is also the finest in New Jersey. The brown stone buildings which cover the rest of the block, now constitute the rectory, the parish school which has an attendance of 1,200 children and is absolutely free, a convent for the sisters of charity, and a hospital, which was opened in the fall of 1896. Since the advent of the Rev. Father Cody, all the affairs of the parish have prospered. Church societies are numerous and large, the circulating library of the church contains over 1,500 volumes, and in general the religious wants of the parish are studiously looked after.

Father Cody can have for the rest of his life, the proud satisfaction that he has brought to a glorious completion what might have been to his people, in less able hands, an unrealized dream.

REV. J. M. GERVAIS, (deceased).

REV. P. CODY.

REV. J. J. ...

When the people of the world are free to follow their own religious convictions, the world will be a better place. The sword, a symbol of force, is not the representative of the earth's true religion. The framers of the Constitution of the United States, recognizing the provisions of the Constitution as a broad and comprehensive declaration that no law shall be made in any State which shall establish any religion, and that the free exercise of religion shall not be prohibited.

REV. ...

But it is as if it were decreed that religious freedom was ever to be a necessary part of that personal liberty for which the early patriots struggled and fought.

Thus it was that America became a free and designated throughout the world as "the land of the free."

It is a common error to suppose that the American people are somewhat ignorant of their own religious history. The President of the United States, in his inaugural address, declared for the freedom of religion. The President's proclamation, signed on the 22nd of January, 1797, and removed from the Statutes at Large, is the country's solemn title to religious freedom. The proclamation's scope has been broadened and deepened by the requirements of a well-ordered and increasing civilization; and the people of this country, recognizing religious freedom as a necessary part of their own freedom, remain as long as they can, in the possession of it. Each year sees an influx of immigrants from every part of the world, who have somehow secured the right of their own opportunities, that here they may worship God as they see fit, and that they may do so without let or hindrance, and without any interference of any religion and deny the existence of any other religion. Hence it is that at the present time, in this city, perhaps a population of seventy-five thousand, there are to be found Christians of various denominations. They worship God in their own way, and the God of the Father, Son, and Kingdom bows

down to his little gods in the Joss house, and the faithful Moslem sends up his prayers to Allah when and where he pleases. Each has his own peculiar form of worship, and carries it out peacefully, without interference from the other. The wonderful diversity of religious worship is nowhere more strikingly illustrated than in this great industrial city of Newark, whose complex population of perhaps two hundred and fifty thousand souls includes people from every land under the sun. Here in this great manufacturing centre of the new world, where the operations of trade and industry assume grand proportions, and millions of money is invested in vast business enterprises, the few are engaged in a mad pursuit of greater wealth, the toiling masses follow the unchanging treadmill of labor, yet at the end of each six days the clink of the hammer and the buzz of the saw is stilled, and the doors of the factories, shops and banks are closed.

Then with the coming of the day of rest, rich and poor alike are free to seek religious instruction as they may choose. There is no lack of opportunity, for there are numerous houses of worship and plenty of religious teachers. In no city in the country are there

to be found more devoted ministers; men noted at home and abroad for their scholarly attainments, broad philanthropy and faithful devotion to their labor in their various fields. Each sect or denomination have here and distinguished representatives, whose life-work would form a very interesting subject for comment, but this being an illustrated work, we are content in beautifying its pages with the life-like photos of a few of the many divines of Newark, whose names and services, as will be mentioned with the more ample and private facilities of the city, and few need have come here for morality and good citizenship.

REV. ...

REV. W. L. WISEMAN, S. J. L.

ST. BRIDGET'S CHURCH.

THE parish of St. Bridget was founded in 1887 by the Rev. Michael J. White, who was assigned to the task by the Bishop of the Diocese of Newark, Rt. Rev. William Wigger, D. D. Father White was at that time an assistant priest in St. Patrick's Cathedral. He entered upon his new field of labor and for the first time offered up the holy sacrifice of the mass in the chapel now used as a school-house, on Sunday, April 3, 1887. The corner-stone of the neat and elegant structure which appears in the illustration was laid by Bishop Wigger on Sunday, October 18, 1891, and through the untiring and energetic efforts of Father White the church was completed and, in the presence of the Governor of this State, Hon. Leon Abbott, the Mayor of the city, Hon. Joseph E. Haynes, with other State and city officials and a large congregation, was solemnly dedicated to divine worship by the Rt. Rev. Bishop Wigger, on Sunday, June 12, 1892.

ST. ALOYSIUS' R. C. CHURCH, COR. BOWERY AND FREEMAN STREETS.

Father White is an accomplished and highly educated clergyman and possesses good judgment. He established religious and benevolent societies in the new parish and surprised some of the older stewards in the vineyard with his rapid success in his new field of labor. After the death of Rev. Father Holland, of St. Columba's parish, Bishop Wigger transferred Father White to the rectorship of St. Columba's Church, in September, 1896, and there is no doubt but that his administration in the new field assigned to his care will be characterized with the same zeal and energy displayed in building up the former parish of St. Bridget's.

The Rev. Father Carroll, who was formerly an assistant in St. Mary's Church, of Elizabeth, has been called by the Bishop of the Diocese to continue the good work commenced in the new field, and from all indications the new rector of St. Bridget's will fulfill the expectations of his superior.

new charge. Under his enterprising guidance matters had taken such a bright look that in October, 1879, he purchased eleven city lots, and in May of 1880, contracts were made for the building of the new church. Work went ahead at a surprising rate and the corner-stone was laid with appropriate ceremonies on June 20, 1880. It is a handsome edifice of Belleville brown-stone, Gothic in style and in dimensions is 65 feet wide and 137 feet long. Father Fleming died in January, 1892, after eighteen years of continuous labor, admired as a man, and beloved as a Priest. His successor was Rev. M. A. McManus. He is still in charge and carrying to successful issue the good work inaugurated by the founder of the parish.

ST. ALOYSIUS' CHURCH.

NOTHING of the venerableness of great age clings about St. Aloysius'. Even the young men and women of the parish have seen the digging of the church's foundations, the erection of the superstructure and the establishment of the various church societies. It is as young as they are. They have grown with it and are closely identified with its progress. They can recall the time when the ground on which the church stands was almost part of the meadows, and when the only building of a character that spoke of Catholicity was old St. Thomas' school.

In July, 1879, Rt. Rev. M. A. Corrigan, then Bishop of Newark, appointed the Rev. Father Fleming pastor of the new parish formed from the north-east end of St. James' parish. By actual count resulting from a house-to-house visitation of the parish, Father Fleming found that he had 1,487 souls under his

REV. M. A. MC MANUS.

REV. FATHER FLEMING, DECEASED

NOTHING BUT THE CHURCHES OF ESSEX COUNTY. NOT  
 HERE TO ATTEMPT to do more than as excepting the charita-  
 ble institutions which have been established in a report held  
 than heretofore. It is true. When the first settlers came on foot  
 Connecticut, and made it a part of the plot of the plot  
 of ground upon which now stands the great industrial city of  
 the Western Hemisphere, the organization of the organiza-  
 tion, and the little town of Newark, from whence they  
 were left without a church, except in name, until after  
 several years of distress the people of the town joined  
 hearts and hands, and established a new church. Here in  
 Essex County, then, blossomed and steadily grew the trans-  
 planted church, and, among the stately oaks by the side of  
 the Passaic, the people first stepped according to the dictates of  
 their own consciences, there being none to molest or make them  
 afraid. We make no quotation fearlessly enough, for certainly  
 it has been any fear on the part of the fearless settlers of  
 this new-born county and now matchless city, their church  
 members would have doubtless hastened to write it down. As  
 the reader no doubt understands how relentlessly some of the  
 sects and classes had been molested, and how they had been  
 made afraid, let us with that we have little to do in the work in  
 hand.

That the reader may have some satisfactory idea of how the  
 churches have grown and prospered, our artists have taken no  
 little pains in satisfying the collar that his true spiritual view  
 has been carried out, by the transference to these pages, illustra-  
 tive pictures of several of our churches. The old First  
 Church, as it is now denominated, is rightly named, when it is  
 understood that it was the first indeed. It will not be under-  
 stood though, we trust, that the First Church building was  
 shipped over from Connecticut, but the congregation only, and  
 it was they who constructed the first place of worship or  
 church building, on the site selected by that eminent divine,  
 Rev. Dr. Abraham Pierson, Deacon Ward and Judge Treat.

Away back in 1668 the first meeting-house was built and  
 made to serve the purpose, not alone as a place of divine  
 worship, but a place for the transaction of all public business,  
 as well. The little structure, with a frontage of about thirty-  
 six feet and with a chancel in the rear, was a mere nite of a  
 single story, compared with the imposing structures with  
 massive walls of marble or Essex County brown-stone, with  
 towers reaching heavenward, in which their descendants  
 are now seated, the pictures of which adorn this

ST. BRIDGET'S CHURCH, PLANE STREET.

book. For comparative purposes it might as well be stated,  
 that when in 1666 there was a single church in Essex County,  
 there is now more than two hundred places of worship, wherein  
 people gather in acknowledgment of the fact that we are all  
 children of one great Heavenly Parent, to petition his omni-  
 science and sing his praises. It must not be forgotten that the  
 early Essex church furnished from its divines the first presi-  
 dent of Yale, Dr. Pierson, and the first president of our own  
 Princeton, Dr. Burr, the memories of both of whom are revered  
 by those great institutions of higher education.

It may be said by some who wish to detract from their  
 glories of the past, that in the early day, when the churches of  
 Newark, the capital city of Essex County, furnished the presi-  
 ding officers to these now world-renowned educa-  
 tional institutions, they were in their infancy. We answer, yes, that is true, but there is an old  
 adage, beautiful, and contains just as much truth  
 when applied to the early conduct and growth of  
 colleges and institutions of learning, as well as to  
 the ideal tree, "Just as the twig is bent the tree's  
 inclined." The truth should be told at all times,  
 and while we take to it naturally, we cannot per-  
 mit our recollection of the two college incidental  
 facts to sever us. We are in somewhat the condi-  
 tion of our Quaker friend, when he declared, with a  
 merry twinkle in his eye, when speaking of the foot-  
 ball record of these colleges: "It is my candid  
 opinion that both have gone a trifle crooked," but  
 he thought he could stand it. So can we.

While the Quaker may have gotten close up to  
 trouble, we have the way open to get out, since col-  
 lege athletics have been introduced into the college  
 learning curriculum since those good old first  
 presidents handled the twig; and if it has grown a  
 trifle crooked through the influence of the heroic

ST. JOSEPH'S CHURCH, WALLACE PLACE.

atter-day football game, we can be excused by falling back on the two prominent facts. When college athletics were first introduced as a leading classical study, "Old Eli" had not a spot on his cheek, neither was he bald, and the "Tiger" hadn't any stripes at all. After all, Presidents Pierson and Burr are not the only college officials which have gone out to other fields from the Essex County band of clergy, for few places indeed have been honored by the presence of a more eloquent and better learned body of pulpit orators, than have from year to year sown the good seed, and it would be a trifle strange if from among these some had been called, and the same is true that not only the few but many have been called away to the field of the stranger and to pastures new.

To no pleasanter task could the pen of the writer be called than the work of naming the divines who have thus gone forth from among us, and of tracing their career and describing the battles they have fought and the victories won. To whatever field our clergymen have gone—whether educational or ministerial, whether in obedience to the command of the Master, "Go ye into all the world and preach the gospel to every creature," as missionaries to the heathen who are continually repeating "How could we believe, having never heard, and how understand without a preacher?"—they have fought the good fight and such victories won as to not alone satisfy all, but to delight the close, warm friends they left behind them.

As it is no part of our duty to sing the praises of one and hoist him high on the feathers of our pen, but alone to do equal and exact justice to one and all, we shall, after calling attention to the results of illustrative work among the churches, say a few words by way of admonition where injustice has usurped the place of justice, where and how we think to the best of our judgment (not always infallible) there would be a fine place to let fall again the "scourge of small cords," sparing not any, whether standing in the pulpit or, Becket-like, clinging to the horns of the altar or sitting in the soft-cushioned pews away up or well toward the front.

We are sincere in the belief that we make no mistake in the declaration that never before since book-making began, has there been introduced into any one volume a larger number of correct photos, illustrations of educational institutions, school-houses and churches than can be found between the lids of the

ST. BENEDICT'S CHURCH, SCHOOL AND RECTORY, ON NIAGARA, KOMORN AND BARBARA STREETS.

book now being perused. As they number so few, indeed, who would question the propriety of the combination the writer has taken the liberty of keeping the schools and churches intact; therefore, no further harm, if any, can accrue from its continuance. Taken as a whole, while the educators in the public and parochial school-rooms, the pulpits and Sabbath schools may not be any better prepared for the work than their brethren engaged in like callings in other places, we feel fully justified in challenging the world to produce their superiors.

When we approach the pulpit we know that not an injustice is done to a single individual anywhere, when the statement is made and placed upon record that for advances in learning, for depth of piety and for pulpit eloquence, taken as a whole, the clergy of Essex County are equal to the best. Did they always have their way, the thunder of that mighty eloquence which is kept at bay for reasons best understood by the possessor thereof would be much oftener heard, and while the lions in sheep's clothing would do a little less of that quiet roaring that, we regret to say, keeps so many hungry souls away from the sanctuary, for the reason that the wool in the soft coat so many wear is all exhausted and there is not enough left to make garments fit for those poor souls who hunger and thirst

mostly outside of the beautiful influences of the Christian religion, who believe or profess to believe, that our Christian ministers can and ought to do everything, even to the impossible work of making all evil doers go and work in the vineyard of the Lord. Now, while we wait for the coming of him who will soon right every wrong in and about his beautiful temples, as we are positively certain the great majority of our ministers of the gospel are now doing, and to assist in holding up their hands, we will extend to them, without regard to creed, denomination or belief, the best wishes of ESSEX COUNTY, N. J., ILLUSTRATED.

CHARITABLE INSTITUTIONS OF ESSEX COUNTY

**A**LTHOUGH the writer and author should use up the farthest reaching vocabulary that he could command and make the work replete with racy and readable sketches of men and things, making use with all his power of the dragnet for the procurement of material of the highest interest with which to fill its space, the work would not and could not be well done without giving its readers a glance, as they turn its pages, of those mighty institutions for good which stand with wide-open doors, in which tarry disciples of the "man of sorrows and who was acquainted with grief," and who, in His name, are calling, calling to the sick and afflicted, the poor and the needy, to come and accept their offerings of healing balm and the contents of bounty's hand.

Even though our artists are showing samples of their work at every turn, and speaking pictures of factories and public school buildings should speak of their skill and grandeur from every page, yet would the book be and remain an unfinished production had not the artists transferred to its pages beautiful and representative pictures of the great eleemosynary institutions which dot the surface of the county and its mighty industrial capital city over with the grandest and best ever planned for sweet charity's glorious purposes.

As space permits and such a tribute is due, we cannot do better than pay it in passing, since to the architect's genius and the photographer's and the engraver's skill we are indebted for the beautiful representative pictures which add so largely to the attractive and instructive character of the work. To the noble men and pure-hearted Christian women who have worked out the opportunities and by their untiring efforts in the uprearing of these beautiful institutions, a deep debt of gratitude is due, and so long as the writer and collator of this work have the power, the tongue of praise shall never be stilled nor stilled till the debt is cancelled, so far as it is possible for us to meet such a benign and beautiful purpose. While the majority of our institutions of charity are young in years, they have a majesty of purpose which makes them old when speaking comparatively of the work they have done. In everything we say or do these ought to be somewhere, so as to be easily seen or so adroitly concealed among a purposely entangled verbiage as to require the acute sense of a sleuth hound to search it out.

As a reason for the youthfulness of our charitable institutions, is our close proximity to metropolitan New York, whose gates were ever wide open and the doors to her charitable institutions had no bolts but what were ready to spring back at our call. And thus it was that not until the necessity became all too glaring, so that every one who ran could read the handwriting

FOREST HILL PRESBYTERIAN CHURCH.

on every wall, that our time had come. The writer remembers well the first "quiet hospital talks" which took place among several gentlemen who make old Trinity their church home. The venerable building in which they worship, now occupying the same ground where it stood when the British officers and soldiers led their forces in and out, occupying the church as a stable--so generous were their natures and such reverential care did they take of our churches--using the pews as stalls, the rector's dressing-room and the vestry parlor for the storage of forage stolen from our farmers, saddles, harness and war paraphernalia, etc.

Among these were the Rt. Rev. Bishop Odenheimer, the rector, Cortlandt Parker, Dr. William T. Mercer, Judge Young, J. D. Orton, Judge Gifford, W. W. Hulfish, Daniel Dodd and others whose names cannot be recalled at this time. In short, from these "quiet talks" grew the first hospital in New Jersey, the unexcelled St. Barnabas', the story of whose struggles, failures, successes, hopes and triumphs will ever fill an exclusively interesting page in New Jersey's historical books. As before said, St. Barnabas' was the first working hospital established in New Jersey under legislative authority. The work was begun in 1865 in a small house on Wickliffe Street. The hospital became an incorporated institution on the thirteenth day of February, A. D. 1867. The incorporators were, that Bishop beloved, the saintly William Henry Odenheimer, and the rectors and certain laymen selected from among the several Episcopal churches of Newark city. The charter declared the purpose of the incorporation to be the nurture and maintenance of sick, aged and infirm and indigent persons, and of orphans, half orphans and destitute children; the providing for their temporal and spiritual welfare, and the providing or erecting a suitable building or buildings in which to carry on the proposed work.

Not long afterward a gentleman bequeathed to the incorporation the beautiful lots where St. Stephen's Church now stands, at the junction of Clinton and Elizabeth Avenues. In June, 1870, the trustees purchased the finely located property, corner of High and Montgomery Streets. Here the work has been carried on ever since. A beautiful photo of St. Barnabas' graces page 143.

IRVINGTON M. E. CHURCH.

St. Michael's Hospital, shown on page 71, was established on page 71, and its location is given on page 71. It is situated in the State of New Jersey, and is one of the oldest and largest hospitals in the State. It is situated in the city of Newark, and is one of the largest hospitals in the State. It is situated in the city of Newark, and is one of the largest hospitals in the State. It is situated in the city of Newark, and is one of the largest hospitals in the State.

It had to its credit, on January 1, 1867, 13,866 patients treated. St. Michael's is the largest hospital in the city, and has a capital of \$1,000,000. It is situated on the corner of High Street and Central Avenue, and has three hundred beds. The Sisters of Mercy, who have charge of the hospital, has a large endowment, and is one of the largest hospitals in the city. It is situated in the city of Newark, and is one of the largest hospitals in the State. It is situated in the city of Newark, and is one of the largest hospitals in the State.

Among the hospitals of Essex County none stand higher on the roll than the German Hospital, which is presented in the illustrations on page 230, and like the other institutions of similar character, though young in years carries the honors of its parent. It was incorporated February 15, 1868, and is managed principally by the generous portion of the German American citizens of Newark, and has ever been conducted on the broadest principles of relief to the unfortunate, without regard to creed or clime.

St. James' Hospital, shown on page 74, was to have been opened in the fall of 1896, but on account of the directors having been unable to secure a corps of sisters to undertake the management, it was postponed until this is accomplished.

MR. J. M. H. HALL, R. R. BOARDMAN

the best thinking and more charitably disposed among our citizens decided it not unwise that another hospital where the sick and injured might obtain relief should be established. Fortunately the county asylum buildings which had been erected on city property were vacant and apparently waiting for just such a blessed purpose and innovation. So as the people's representatives in the Common Council were ripe for the movement, the die was soon cast and the City Hospital established (see page 138.)

This beneficent institution was opened for patients in 1882, and incorporated in 1883. Since that time its doors have been wide open to the indigent sick of all nationalities. The hospital is managed by the Board of Health, who meet once a month. From the Board of

ST. PETER'S R. C. ORPHAN ASYLUM, ON LIVINGSTON STREET.

The Home of the Friendless, on South Orange Avenue, corner of Bergen Street, is another of the charitable institutions, a view of the buildings of which our artist has transferred to page 141, which is doing a marvellous work for good. It being of a three-fold character, its work takes on a wider range than the generality of charitable institutions. While the little ones are provided with home, food and raiment by the goodly women who never tire in doing the work of the Master, are gathering the little unfortunates in the fold they have provided in the beautiful home.

Never behind in good works, the city of Newark has marked an era in her progress by the establishment of a hospital, where the sick and afflicted may go and seek rest, and take deep draughts from the overflowing cup of healing balm, which will be held to their lips by the devoted hands of trained nurses, directed by the skill and understanding of the wise, pure and self-sacrificing among our best physicians and surgeons. Although Newark was blessed with several good hospitals, yet

REV. JOSEPH F. UCHIL.

Directors a visiting committee of three members is selected to look after the executive work during the intervals.

One of the noblest charitable institutions in Essex County, is the Eye and Ear Infirmary, located at No. 60 Stirling Street. A view of the building is shown in the combination on page 72. The hospital was founded in February, 1880, for the gratuitous treatment of the poor.

The Hospital for Women and Children is situated on South Orange Avenue, in close proximity to the Home of the Friendless. (see page 141.)

St. Mary's Orphan Asylum was founded in 1857, on Central Avenue, then Nesbit Street, next to St. Patrick's Cathedral, by the most Rev. Bishop Bayley. In 1861 the orphan girls were removed to the house corner Washington and Bleeker Streets, where they remained until the orphanage was complete at South Orange, in 1865. Since then several buildings have been added. In 1870 a four story building was erected as an industrial school, to which the orphan girls are transferred when they are old enough to be taught domestic economy, shirt making, ladies' undergarments, dress making, etc. They receive daily, three hours tuition in English and become self-supporting. Children are received between the age of three and fourteen. At this age the boys are either sent to relatives or placed with responsible parties to earn a livelihood. At present there are one hundred and sixty boys, and one hundred and fifty-four girls, making a total of three hundred and fourteen in the house. While the asylum is under the protection of a Board of Directors, at the head of which is Rt. Rev. Bishop Wigger, of this diocese, the institution is managed by the Sisters of Charity, fifteen in number.

ST. MICHAEL'S HOSPITAL, ON HIGH STREET AND CENTRAL AVENUE.

who have devoted their lives and talents to the service of God's helpless little ones. A photo is presented on page 142.

Away back in 1848 the Newark Orphan Asylum, an organization for the relief of orphan children was effected, thus making it the oldest orphanage in the county of Essex. A photo of the buildings will be found on page 72. It is situated at 323 High Street, corner Bleeker.

The Foster Home, a charitable institution, was organized March 28, 1848, but a few days after the Newark home. It is situated at 284 Belleville Avenue, and receives children up to their tenth year.

The Kreuger Pioneer Home was organized in 1889, its object being to provide a home for unfortunate and indigent men, and was founded by one of Essex County's wealthy citizens,

Judge Gottfried Kreuger, whose honored name the institution bears. A photo of the home is presented on page 222.

On page 70 may be seen a photo of St. Peter's Orphan Asylum and Kindergarten, which is located at 21 Livingston Street.

Among other Charitable and Benevolent Societies, are the Newark Female Charitable Society, at 305 Halsey Street, founded 1803. (see page 139); Boys' Lodging House, 144 Market Street; St. Vincent's Home for Working Boys, on Centre Street; Home for Incurables, corner court and Shipman Streets; House of the Good Shepherd and Home for the Aged, under the care of the Little Sisters of the Poor, on Eighth Street between Central and Sussex Avenues. These eminently pious and holy women commenced their charitable work in this city in 1878 and by their zeal and untiring efforts, have succeeded in establishing a large and comfortable institution, where the aged and destitute of both sexes are provided for. A view of the home is shown on page 72, and though struggling with a large debt they trust in God, and rely upon a generous people to aid them in supplying the many wants of such a large charity. Where true piety and woman's virtue leads the van, no wheel of progress which is touched by them shall cease revolving.

# EDUCATIONAL INSTITUTIONS OF ESSEX COUNTY.

THE sincerity of the love and respect which the author of *ESSEX COUNTY, NEW JERSEY, ILLUSTRATED*, bears to the public schools and the public school system thereof, makes our approach to these subjects the more difficult and trying, since along with our duty goes hand in hand the fear we entertain of doing even half-way justice to these themes. The first thought, as we lift

the pen to write, is to ask the reader, as he scans what we have to say for and on behalf of the public schools, a kindly forbearance for any appreciable shortcomings in our efforts to grapple successfully with this grandest of subjects, which can find a place among the leaves of this book; every page of which bears record of marvellous growth and wonderful prosperity of the county delineated. When we consider Essex County, geographically speaking, is it any wonder, we ask, that her schools have few equals, and when we make the declaration that there are no superiors, the fear that we shall be charged with egotism, finds no resting-place in our composition.

Situated in one of the loveliest regions in the world, with a climate as equitable and health-giving as any in the United States, the cold winds of the winter months which come howling down from the north and west meet and mingle with the breezes from old ocean tempered with salt, make her winters delightful, and ere those cold waves which have a wonderful habit of careering over the broad and beautiful prairies of the far away Dakotas and the broad savannas of Illinois, Kansas and Iowa, prepared for the journey by the frost king amid the bold rockies, the snow-capped mountain peaks of the Cascade and coast ranges, and which linger for weeks hesitating to cross the Alleghanies, holding high carnival among the coal mines and oil wells of the Keystone, of the Arch the hills, valleys and farm lands of the Empire state, and dallying with those delilahs

OLDEST SCHOOL-HOUSE IN NEWARK, NOW THE BOY'S LODGING HOUSE.

of the midland belt, the great lakes, are shorn of their locks of hoar frost, lose far more than half of their strength, and ere they are ready to swoop down upon this region with a promise (by telegram from Chicago, St. Louis or St. Paul) to close down on the mercury, and give all the east an extended general freeze-up, its strength has died out under the genial influence of the warm exhalation from the gulf stream, and seldom has a reign of more than three days in length. More oft, the fizzle en route has been so complete, that scarce time is remaining to close up the pools and bid malaria depart, ere they take up the home journey, giving kisses of love when ready to depart and waving back an adieu while they go ricocheting back to the safe retreat of the Teton peaks, while the region (including Essex County) for fifty miles in all directions from New York's City Hall Park, knowing how fitful are his promises, are compelled to keep on the alert for even a *freeze-up* of enough rain drops to set the sleigh-bells ringing and three days in succession good sleighing.

Then, with a climate unsurpassed and a territory with double rock-ribbed environments, we approach the pleasant duty of giving a sketch of the public schools, with no small degree of personal pleasure, and with no fear of overdrawing the pictures of the educational institutions, or overstating the beneficent results accruing therefrom to the people. Since the first establishment of the free public schools a mighty change has been wrought in their

ELIZABETH AVENUE SCHOOL.

has not been able to do so, and that the system is not perfect. To the people of the county it is suggested that they should not only support the public schools, but also the private schools, and that they should not only support the public schools, but also the private schools, and that they should not only support the public schools, but also the private schools.

After the war, the public schools were not only supported, but also the private schools, and that they should not only support the public schools, but also the private schools, and that they should not only support the public schools, but also the private schools.

tion advantages under its wise provisions and unquestioned good management, is the grandest and best ever devised. The rich have learned this one grand fact, that when their children are sent to public schools to rub against their neighbor's children, that they become acquainted and are ready to rub up against the world, and to stand the rebuffs in a far better manner than when kept isolated. Many of our leading business men, lawyers, physicians and divines, now glory in the days they spent in the public schools. Education for all who will receive it, is the motto to-day, and few indeed are there who are not ready to exclaim, "Long may the banner of free schools wave."

Outside of the city of Newark and Orange, there are about forty schools in which all the children can, if the parents so will

MORTON STREET SCHOOL.

and so started that it is better to have no school at all than to have one that is not supported. It was hard to see a man who had the rich and the poor, and who had the rich and the poor, and who had the rich and the poor, and who had the rich and the poor, and who had the rich and the poor.

it secure an education. Not alone are the elementary branches taught, but connected therewith, are high schools, where those pupils who have passed the grammar departments can have the advantages of an academic education, and be fitted for college if so desired.

During the years 1891-2-3 the writer of this was County Superintendent of Public Schools, and is proud to bear evidence as to the high character of the schools and teachers. Educated men and women, as pains-taking and self-sacrificing as any body of teachers in the land, and in devotion to their calling, they remain unchallenged. Elmer T. Sherman, now a resident of South Orange, is acceptably filling the office of County Superintendent. The schools in the city of Orange are under the care of Mr. C. B. Curtis, and are in a high state of efficiency. In the city of Newark, where the veteran educator and efficient

officer, William N. Barringer, Ph.D., has been the Superintendent for more than a quarter of a century, the public school interests are well and carefully adjusted, and closely looked after, and all their interests closely watched. Her schools are under the direct care of a local legislative body, known as the school board, or Board of Education, consisting of thirty gentlemen. Each of the fifteen wards of the city has two representatives in the board, each elected for a term of two years.

Although there is a general determination among the people, and this is transferred to their representatives, to eschew politics entirely, yet the footprints of the party in power is seen when the officers of the Board are elected. The board as constituted at present consists of the following: William A. Gay, *President*; R. D. Argue, *Secretary*; Samuel Gaiser, *Ass't Secretary*; William N. Barringer, *City Superintendent*; Geo. W. Reeve, *Supt of Erection and Repairs*; 1st Ward, James A. Backus, James N. Arbuckle; 2d, Hugh P. Roden, Charles W. Menk; 3d, Charles L. Ill, George Saupé; 4th, J. W. Read, Miles F. Quinn; 5th, M. B. Puder, Charles Clark; 6th, R. W. Brown, Edward Zusi; 7th, H. M. Woolman, Charles M. Myers; 8th, John K. Gore, J. William Clark; 9th, A. N. Lewis, Walter T. Crane; 10th, David B. Nathan, Elmer E. Horton; 11th, William A. Gay, William L. Fish; 12th, J. J. Kronenberger, Thomas J. Simmott; 13th, Henry Ost, Henry P. Schott; 14th, Geo. F. Brandenburgh, Charles H. Sansom; 15th, Walter H. Clark, Walter H. Parsons.

A full roster of the teachers in all the schools of the fifteen wards can be seen by a reference to the Board's annual report, copies of which can be obtained of the Clerk of the Board or any of its members. There is not a question of a doubt but that the efficiency of the city's public schools is equal to any in the United States. The school age is fixed by statute at from six to twenty-one years of age, although very few enjoy the privileges after they have passed the age of seventeen. The writer once asked a young lad of sixteen why he did not go to school. His reply was, "Oh I'm too big." Of course he meant in stature. As a commentary on his answer, we should not

SUMMER AVENUE SCHOOL.

hesitate to say, that some plan should be adopted by which young men and girls under twenty-one at least, should not think nor feel themselves too big for education getting. In the night schools we find the glorious exception. In this grandly beneficent institution we often find both men and women striving to learn to read and write, some having passed the meridian of life. One of the most interesting occasions of our necessary school visitations, was met at a night school in Montclair, where we found a class numbering quite half a hundred of men and women, undergoing instruction, some of them with hands so stiffened with age and hard labor that the handling of pen or pencil was an extremely difficult operation. Yet so strong was the motive for progress, and so bright was the goal to their vision of learning to read and write, they would laugh at their own clumsiness, and no mistake, however glaring, would act as a bar, or dampen their ardor, or cause them to flag for a single moment in their dogged perseverance. Could some of the

youth who persistently refuse the advantages offered to secure the delightful boon of a good education, have been placed in the presence of some old colored man or woman who had wrought in the cotton fields or cooked the hog and hominy in the sunny South all the years of their early life, and were engaged in the arduous task, with clumsy fingers, of learning to write or learning to read, with mental faculties long since dulled by the avarice or brutishness of others, we doubt not it would act as a balm for his wounds and likewise cure his desire for longer continued acts of truancy.

Such have been the advances made in the methods of instruction, that the child takes learning as it were by intuition. The Kindergarten, an exotic, to be sure transplanted from the German fatherland, deals with the buds of our manhood and womanhood. Instead of the compulsory sitting on the hardest of benches and the wearisome dangling of tired little legs with the formal *A B C ter die* instruction from the stern master and scientific handler of the birchen rod, and oaken rule, the little buds are taught to sing and play their lessons through,

CENTRAL AVENUE SCHOOL.

THE NORMAL SCHOOL

THE daily city Normal School was organized in 1879. For many years it had been maintained as a Saturday Normal School, holding its sessions every Saturday morning, and was attended by those already appointed as teachers and striving by this method to acquire some professional training, and was a most praiseworthy effort. It was felt by some of the friends of the public schools that better work could be done only as the result of more methodical and longer training. It was, accordingly, organized as a daily school in October, 1879, under the principalship of Miss Jane E. Johnson, with a class of thirty pupils, all graduates of the High School, and three teachers.

The curriculum was limited to mental and moral science, which were the only text-books in use. Its only library was a Webster's Dictionary, unabridged, and a Geographical Gazetteer. Miss Johnson supplemented the curriculum by lectures upon English history and botany.

At the present time there are about seventy pupils and a corps of five teachers. The course has been extended to two years—a junior and a senior year. Pupils who seek admission must be graduates from our excellent High School, or must pass an equivalent examination, as a condition of admission. The course of study is strictly professional. Psychology, Logic, Civil Government, Political Economy and Pedagogy form a part of the curriculum. The academic branches are taught under the department of method, *i. e.*, the better way of presenting and developing these subjects

in the class-room to the pupils of the schools. Music, drawing and natural science receive marked attention through the entire course. Lectures on the history of education—the theories and the great teachers of the world, are given every week.

A small but well chosen library of books of reference—a working library—has been gradually accumulated. During the junior year the pupils

spend eight weeks in observation and practice teaching in the Training Department, under the supervision of well-trained teachers. In the senior year they spend the same time in the class-rooms of the grammar schools, observing and teaching in the daily work of the schools and under the skilled care and direction of the principal and his teachers. The results of this

THE NORMAL SCHOOL, MARKET STREET.

practice work is reported from each school and recorded. It is an important factor in their graduation.

The Normal School has advanced steadily since its organization, and has become a most important factor in our educational system. Since April, 1894, it has been under the care of Principal Joseph Clark, who has been identified with our public schools for more than forty years.

Principal Joseph Clark was born in Syracuse, New York, of New England ancestry. He received his education in the Fayetteville Academy, an institution of considerable note in that part of the State. He came to Newark in the fall of 1848. In 1851 he was appointed as assistant teacher in the Lafayette Street Public School. In 1854 he was promoted to the principalship of the Lock Street (now Wickliffe) School, and in 1857 he was transferred to the Lafayette Street Public School.

During his long service in the schools of the city he has been closely identified with the interest of the Fifth Ward, and has been a prominent factor in the lives and character of a large number of those who are now our respected and influential citizens. He has been prominently connected with the Sixth Presbyterian Church, and in the Sunday-school and Church has always taken a prominent place.

Among the many able and well-known citizens who have become identified with the educational interests of this city, those who know Principal Joseph Clark best, declare that a more genial companion, a truer friend or a larger hearted man is not within the circle of their acquaintance.

JOSEPH CLARK, PRINCIPAL.

## HAMBURG PLACE SCHOOL.

THE school building which was the first one on the site was of the design of 1852-1853. It was completed by the year 1853. At the time of its completion it had the appearance of a school building.

For a number of years the school was in charge of the Rev. W. Fort, who was a member of the Board of Education. In October, 1853, the building was completed and the number of classes was increased to eight, the full capacity of the house.

Rev. W. Fort became the principal of the school on Nov. 1, 1853. At that time there were about 400 pupils in attendance.

Four years later the building was enlarged by the addition of six class-rooms. In 1857, 1858, and the rooms were filled with large-sized classes.

The school has never suffered for lack of pupils. Year after year portions of its territory have been assigned to other school districts. In 1850 the school authorities were obliged to take measures to furnish more accommodations for the locality in which this school is situated. In Sept., 1867, Ann Street School was ready for the admission of pupils. This new building contained eight rooms, and in a very few months every seat was occupied.

When the term opened in Sept., 1865, Hamburg Place School was again crowded. More pupils than ever sought admission. By Jan. 1, 1866, four more rooms had been made ready, and when the winter term began these rooms were at once filled from the overflow pupils in the fourteen other classes.

The growth of the section of the city in which Hamburg Place School is situated has been very great during the last ten years, and this fact largely explains the demand for increased school facilities. The territory that furnished about 400 pupils in 1852, required accommodations for about 1600 in 1895, and points out the reason why Hamburg Place School has become one of the largest Grammar schools in the city.

The Principal of this school, Fred. W. Fort, was born in New Providence, N. J. He is a son of Jacob P. Fort, a Methodist preacher, and for many years a well known member of the Newark

HAMBURG PLACE SCHOOL.

Conference. His uncle, George F. Fort, was the Governor of the State of New Jersey in 1852. For a number of years, some member of the family has been prominent in either the social, religious or political history of the State.

Owing to the fact that his father never lived in any locality for more than two or three years, Mr. Fort received his early school instruction in several of the different towns and villages in the northern part of the State. At the age of fourteen, he entered Pennington Seminary, and after two years graduated from that institution prepared to enter college. Mr. Fort found it necessary to take charge of a country school after graduating from the Seminary, in order to provide means for continuing his education. During a portion of this time he received "a dollar a day and boarded around."

In 1871, Mr. Fort entered Wesleyan University, Middletown, Conn. After devoting two years to study he was obliged to leave college for a year, that he might by teaching secure the money needed to meet the expenses for the remainder of his college life. Returning to college, he was able to complete the course and graduate with the class of 1875. His scholarship was good while a student, and at graduation he received "Special Honor" in Chemistry.

Mr. Fort has always been a great admirer of athletic sports. He was a member of the class "nine," the class boat crew, and in 1875 belonged to the college crew and participated in the great Regatta on Saratoga Lake.

After graduating, Mr. Fort decided to enter the profession of teaching. Since that time he has been in charge of three different schools in this State. Two years were spent in Summit, six in Linden, and the balance of the time in charge of Hamburg Place School of Newark.

While at Summit he was largely instrumental in arousing the people of that beautiful town to the fact that a large and commodious building was absolutely necessary. He acted as the Secretary of the several public meetings, and was much gratified when, by an almost unanimous voice, the people decided to erect the handsome building which is now the pride of that community. Mr. Fort has been Principal of Hamburg Place School for nearly fifteen years.

FRED. W. FORT.

THIRTEENTH AVE. SCHOOL

THE Thirteenth Avenue Public School is admittedly one of the largest and handsomest of the more modern buildings of Newark. The plot of ground upon which it stands is considered one of the most desirable locations in the city for a public school, and was secured by the Board of Education in 1887. The same year the erection of a building containing nine class-rooms was commenced. It was intended to have the house ready for occupancy Sept. 1, 1888, but owing to delays on the part of the builders it was not opened till Nov. 19th of that year. Within three years it was found necessary to enlarge the building in order to keep pace with the growth of the school, consequently in 1891, eight class-rooms were added, making seventeen in all.

The building is of brick and contains the most modern systems of heating and ventilation. Beside the regular class-rooms, wardrobes, etc., there are eight rooms for the accommodation of the teachers, a cozy and handsomely furnished office for the use of the principal, and large and commodious courts thoroughly heated by steam and capable of accomodating the entire school at recess or intermission during stormy and cold weather. From roof to basement the building is a model of cleanliness and neatness and is a source of *much pride and gratification to its patrons.*

A plan is already on foot to acquire an adjoining plot of land with the intention of once more enlarging this great building, by an addition of from six to nine more class-rooms. Should this be accomplished, Thirteenth Avenue will be one of the largest school buildings in the State of New Jersey.

Albert B. Wilson is one of the youngest school principals of Newark. He was born at Bridgeport, Conn., in 1861, and attended the public schools of that city from his sixth to his fifteenth year, when he entered the *Golden Hill Institute*, then one of the best known private educational institutions in Connecticut. After a four year's course here, he graduated in 1880 and at once entered upon his work as a teacher, which he has followed ever since. In 1890 he completed a course in the History and Philosophy of Education, at the University of the City of New York.

Mr. Wilson came to Newark in 1887, as Vice-Principal of the Chestnut Street School. He re-

THIRTEENTH AVENUE SCHOOL.

mained here from Sept., 1887 to Nov., 1888, when he was asked to organize and open the new Thirteenth Avenue School, as its principal. This position he has now held for nine years and during that time has seen the school grow from 250 pupils with six teachers to over 1000 pupils with seventeen teachers.

Mr. Wilson comes naturally by his love for his profession, both his father and mother being at one time teachers in New York and his father for over thirty years a principal in Bridgeport schools.

A visit to Thirteenth Avenue and an investigation of the building and school will well repay anyone interested in the educational system of our city.

Principal Wilson is one of Newark's most progressive educators. He carries with him the warm affection of his pupils as well as the high regard of the people and the co-operation of the Board of Education, in advancing the educational interests of those entrusted to his kind care.

He is a very genial, pleasant and accomplished gentleman, a natural-born teacher, and the thorough discipline of the school and the rapid advancement of the pupils under his charge give testimony of our statements of him.

At the Thirteenth Avenue School he has the most hearty respect and co-operation of his teachers. The whole corps are deeply interested in, and very proud of their school. Thoroughness is the inspiration and the aim of the system, and the watch-word of the teachers. It is intended that the pupils shall know perfectly from root to branch, the subjects taught, and such is the discipline and efficiency of the system that even the dullard and the laggard cannot but choose to learn. In music, the Thirteenth Avenue School is unusually proficient.

Albert B. Wilson is an active reformer in the educational field. He seeks for a culture of all the faculties of body and mind, a man of great executive ability and an able and progressive educator. To him has been imparted that peculiar gift of nature which is vouchsafed to few; that is, the faculty of inspiring others with the belief when teaching that he not only has a perfect knowledge of what he teaches but knows just how to impart it to others.

It is just such a school as the Thirteenth Avenue School is, through Mr. Wilson's efforts, which has given the City of Newark its advanced place as an educational centre.

The accompanying cut is a perfect and life-like photo of Prof. Albert B. Wilson.

Since Mr. Bissell came to Newark, he has spared neither time nor effort to place the school under his charge in the very best condition possible. The discipline is characterized by persistent firmness always tempered with wise diplomacy, and suspensions occur only when necessary for the good of the majority. In the lower hall off the Grammar boys' play-court, hangs the only rule which they are expected to observe: "Let's all be gentlemen." The standard of scholarship is high enough to make the securing of special honors a positive credit to faithful pupils. Principal Bissell truly believes that the present system of marking is one of the best ever devised, if properly used. He is also heartily in favor of the honorary system, but believes that it will work incalculable harm if not used with great discretion. Since the honorary system went into effect in 1888, Burnett Street School has sent, upon an average, one-third of its sixty-five or seventy graduates to the High School each year as "honorary" pupils. According to reports received from the Principal of the High School, very few of these pupils fail to sustain a "fair" standing, and a goodly number continue to do "honorary" work. Such results prove conclusively the wisdom of maintaining a high standard. In Burnett Street School the marks placed upon the pupils

...of the school, ...

W. H. BISSSELL.

monthly cards always represent *accomplishment* - not *intention*. The marks are not given simply to fill up certain spaces on the cards, nor to please parents; but they are given as *reliable statements of what the pupils have done*. Any other record is considered a gross fraud practiced upon parents and pupils.

In Sept., 1894, the teachers of the Grammar department suggested to Principal Bissell the advisability of organizing among the pupils a society whose object should be two-fold, first, the exaltation of gentlemanly and ladylike conduct; second, the suitable rewarding of such conduct through entertainments of an educative nature held at stated periods. Mr. Bissell heartily "seconded the motion," and the result was the establishment of the "Loyal League." Many names were proposed for the new organization, but none seemed so suitable as the one chosen, conveying, as it does, the meaning of the society's motto—"He conquers who overcomes himself." The membership badge is a ribbon with the word "Loyalty" stamped upon it in silver letters. The 8th year colors are two shades of purple; 7th year, two shades of yellow; 6th year, two shades of red; 5th year, two shades of blue. Each grade has four members upon the committee, and these, with the teachers, wear white badges.

The condition of membership is very simple. Any pupil who is rated "excellent" or "good" in deportment for any month is a member of the Loyal League during the month immediately following. The percentage of membership is always large.

The monthly cards are distributed on the first Monday of each month, and the entertainments occur on the Friday following. The badges are worn at the entertainments and on the other Friday afternoons of the month.

The monthly entertainments have been held regularly, and have been much enjoyed by the pupils and teachers and their friends. They have been so discreetly prepared and conducted that they have in no way interfered with the regular scholastic work of the school. Many friends and former pupils have kindly assisted, and the pupils who have taken part have certainly reaped benefit in many ways.

The League publishes a very neat and interesting eight-page

MILLER STREET SCHOOL.

school paper twice each year—a holiday and Easter number. A plan very similar to that of the Loyal League, but necessarily modified, is in successful use in the primary department.

Since Mr. Bissell assumed charge of the school in 1886, the School Library has grown from 37 volumes to fully 1,000 volumes. In December, 1887, the school held a large fair in Oraton Hall and cleared \$491.25, which was used towards supplying the school with a circulating and reference library. The success of this fair was due to the earnest and hearty co-operation of all the teachers and pupils. In April, 1892, a "Class Fair" netted \$135, which was used to purchase a circulating library specially for the primary pupils. The Reference Library contains about 100 well-selected and much used books.

The school entertainments are always of a high order. Those which have been held during the past ten years have netted about \$1,300, all of which have been used to the school's benefit.

The regularity and punctuality of the pupils speak well for them and their school. The cases of tardiness during the present principalship have been as follows: 1886-87, 180; 1887-88, 35; 1888-89, 17; 1889-90, 32; 1890-01, 41; 1891-92, 19; 1892-93, 19; 1893-94, 30; 1894-95, 35; 1895-96, 30.

The average during the last nine years has been only 29, against 180 during the first year.

That punctuality is not secured at the expense of attendance is evident from the fact that the average percentage of attendance in all the classes is usually *above 95 per cent.*

The good work accomplished by the Burnet Street School is in no small measure due to the loyalty and efficiency of its corps of teachers. It is also true that the school has been very fortunate in having as commissioners, gentlemen who have given prompt and intelligent consideration to all matters pertaining to the school's welfare.

These illustrations represent the Chestnut Street School, opened September, 1860; enlarged 1870; class rooms, 15; Principal, David Maclure. Miller Street School, opened June, 1881; enlarged 1887-88; classrooms, 14; Principal, J. Wilmer Kennedy.

CHESTNUT STREET SCHOOL.

EIGHTEENTH AVENUE  
SCHOOL.

ONE of the many schools of which Newark may well be proud, is the Eighteenth Avenue School. It is located in the southwestern part of the city. Its grounds are bounded by three streets, so that the building stands in an open space, thus providing ample light to each classroom—an advantage greatly to be desired.

The first building was erected in 1871, and consisted of eight classrooms. In 1873 it became necessary to enlarge it, by the addition of a building in the form of a large T, which, surmounted by two turrets, added to the architectural beauty of the present structure. This made a school of nineteen classrooms, none too large to meet

the demands of the rapidly increasing population of the old Thirteenth Ward. The pupils and patrons of its early days purchased a large bell, which is hung in a belfry, and its tones call the children from far and near to each session of the school. This has been of the greatest advantage in reducing to almost a minimum the number of cases of tardiness.

The Eighteenth Avenue School has been fortunate in having for its principals men of character as well as intellect. Of these, when the school was but an intermediate school, Principals Smith, Schulte, Kennedy and Maclure were promoted to grammar schools.

The school was opened as a primary school. It soon advanced to an intermediate school, having no grade higher than the sixth year. It was necessary for pupils wishing to enter the High School, to be admitted to a grammar school for the remaining two year's course. The Eighteenth Avenue School was an intermediate school when Henry J. Dougherty, the present principal, assumed control. Through his untiring efforts, with the hearty co-operation of his teachers, the grade

of the school steadily advanced and in 1891 the first graduates of Eighteenth Avenue School entered the High School.

It has been the custom for each graduating class to leave a class memorial. The classroom has many beautiful tokens of its former inmates, which serve as an inspiration to those who are still treading the path of learning in the

EIGHTEENTH AVENUE SCHOOL.

old familiar place. The graduates have formed an alumni association, which is in a flourishing condition. Thus, a bond of friendship has been cemented between the present pupils of the school and those who have passed out from their alma mater. The school has good reason to mention the alumni with pride and gratitude.

From time to time, the school has held very successful as well as pleasing entertainments. The funds derived therefrom have been judiciously spent. As a result of these investments, the school can boast of a fine library, containing several sets of encyclopedias, histories, books of reference and works of standard writers, which are of interest to pupils and teachers alike.

Since the observance of Arbor Day by the public schools of the city, many trees have been planted in the playgrounds and on the streets bounding them, so that shade and beauty are thus provided. The front lawns are kept in good condition during the season, and flowers in beds and urns add much to the good appearance of the building.

An annex on Livingston street, with its entrance on the Eighteenth Avenue School grounds, was built in the early part of 1894, and the two buildings, which may properly be considered one school, have a seating capacity for 1,280 pupils.

In October, 1891, the school was opened as an evening school, holding sessions during five months of each year. Many parents are compelled to take their children from the day schools as soon as they have reached an age when they can earn something. The evening school offers advantages to this class of pupils.

During the summer of 1895, the Eighteenth Avenue School opened its doors for six weeks as a summer school. The attendance was good for the entire term, which shows the appreciation felt by those living in the vicinity of the school. No national holiday ever passed without appropriate exercises by the school on the day preceding such holiday.

That patriotism has been instilled in the hearts of the pupils of the Eighteenth Avenue School is evinced from the following fact: The first memorial left to the school by the first graduates of the school was Old Glory. The stars and stripes were cut by the boys of '91, and the girls sewed together that emblem which is the pride and glory of every true American heart.

HENRY J. DOUGHERTY.

**SOUTH MARKET STREET SCHOOL.**

IN the year 1855, the city of Newark expended \$100,000 for a large amount of money in the construction of a school-house. The South Market Street School was one of the buildings erected at that time. This building, one story in height, was constructed of brick, and was well considered in its day as a school building, and kept up with all the latest and accessible apparatus and fixtures of a first-class school building. It was intended to accommodate three hundred and fifty pupils. During the two score years of the existence of this school, many of the graduates of its classes have become prominent citizens of Newark.

Mr. Edward W. Clark, the first Principal of South Market Street School, a man of sterling character, remained a number of years. His able successor, William Johnson, also remained at the head of the school a number of years, and ably conducted the efficient and popular methods of his predecessor. J. Newton Smith was the next Principal. For the past sixteen years the school has been in charge of Mr. William P. B. Crick.

The school accommodations furnished by this old building are no longer sufficient to become inadequate for the growing neighborhood. More than double the original number of seats have been crowded into the house and filled, and pupils are turned away for want of room.

**HAWKINS STREET SCHOOL.**

THE Hawkins Street School was erected in 1887-88, and was first opened on January 3, 1889. It first opened with five class-rooms occupied, and continued with that number clear and a half, being during that time an annex to South Market Street School.

In September, 1891, another class-room was opened and Mr. Caprice S. Giffin was appointed Principal of the school. The following September another class-room was opened, and the school has since continued with seven class-rooms occupied. There is yet one unoccupied room.

The ground floor of the building is occupied by the Principal's office and reception room, the boiler room and two large courts, one each for the boys and girls. The second and third floors are each occupied by four class-rooms, and reception

SOUTH MARKET STREET SCHOOL.

rooms for the teachers. The class-rooms are large, well lighted and ventilated, and each capable of seating sixty pupils. Each room is provided with a cloak room, and cloak rooms, courts and the class-rooms are all heated by steam. The building and site are valued at \$30,000.

**THE "FRANKLIN" SCHOOL.**

IN reviewing the steps that have led up to the establishment of the "Franklin" School as we know it to-day, the data at hand for the earlier stages is so meagre that no attempt is made to go into detail. Suffice to say, that when Newark was no more than a town, and only the three R's were taught in the schools, the custom prevailed of naming them in honor of noted men. Therefore, one located in what is now known as the Fourth Ward of the city, was named in honor of our illustrious Franklin.

The site of this school was purchased by N. J. C. R. R. Co., and the money turned over to the municipal authorities to be set aside for the purpose of locating a school bearing the same name in another portion of the city. After a number of years, when it became apparent to the Board of Education that the school accommodations of the Eighth Ward was inadequate to meet the wants of this section of the city, the present site on Fifth Avenue was purchased; however, not without some

WILLIAM P. B. CRICK.

CAPRICE S. GIFFIN SCHOOL.

friction in the Board of Education, as other sections of the city made a strong fight for its location. Therefore, this money held in reserve by the Board of Education was spent in purchase of this site.

An eight-room building was built on the above site, and what was known as the Franklin Public Primary School was organized in September, 1880, with the following corps of teachers: T. T. Collard, Principal; Miss Amy Simpson, Miss Ida J. Morrison, Miss F. A. Haring, Miss E. Klotz, Miss M. A. Baldwin, Miss J. Dettmer, Miss M. G. Haskell, Miss E. L. Sayre. In April, 1895, Miss Abbie P. McHugh was made Principal, and Mr. Collard was transferred to North Seventh Street School.

It soon became apparent that an eight-room building was too small to accommodate the school population, and hence the necessity for an enlargement of the building. This was brought about largely through the efforts of the School Commissioner of the ward directly interested in this school, Mr. Moses J. DeWitt. The addition made consisted of eight classrooms, a fine assembly hall and court. Therefore, the present building is equipped with 16 classrooms, two large commodious courts, and an assembly hall that will seat 500 people or more.

Upon opening the schools in September, 1895, the Board of Education decided to make the "Franklin" School a grammar school, thus really transferring the grammar department of Webster Street School, leaving the latter a primary school. Also the Bloomfield annex, a two-room primary school, was abolished, and pupils transferred to the "Franklin" primary. This necessitated changing the teachers from the Webster St. grammar and Bloomfield Ave. annex to the "Franklin" School, which was done before the opening of school in September.

Upon opening of school it was not known just how many of the sixteen classrooms would be occupied, but in a day or so it was evident that every classroom would have to be used, as over 900 children applied for admission the first week of school.

The following is the corps of teachers: Grammar Department - Principal, A. G. Balcom; V.-Principal, Abbie P. McHugh; Assistants, Belle M.

THE "FRANKLIN" SCHOOL.

Gore, Anna L. Garrabrant, May Woodruff, Jessie B. Mikels, Amy Simpson, Claribel Gogl, Juliet Dettmer. Primary Department - Vice-Principal, Annie E. Curtis; Assistants, Caroline Y. Haulenbeck, H. Isabel Smith, Ada E. Sargeant, M. Fannie Braekm, Mary G. Haskell, E. Louise Sayre, Florence A. Haring.

#### WALNUT STREET SCHOOL.

THIS school, located in the Tenth Ward, is a Primary School. The building was erected in 1862 and remodeled in 1877. It contains eight classrooms and a teachers' and principal's room. It is heated by steam, and although small, is a comfortable building.

This school has for its principal, Miss S. Fannie Carter; Miss Carrie C. Hutchings is head teacher. The assistants are the Misses Laura C. Delano, Elizabeth Rodamor, Florence J. Farmer, Abbie J. Hoppaugh, Mattie M. Miller, Agnes Geppert and Carrie M. Welcher.

WALNUT STREET SCHOOL.

A. G. BALCOM.

OLIVER ST. SCHOOL

THE OLIVER STREET SCHOOL was established in 1821, and was the first school in Newark. It was originally a one-story building, but was enlarged in 1850, and again in 1880. The school is now a three-story building, and is one of the best in the city. It is under the management of the Newark Board of Education.

The present principal is A. H. Hays, who was appointed in 1898. He was previously principal of the Oliver Street School, and of the Newark High School. He was also principal of the Newark Normal School, and of the Newark Commercial School. He was born in Newark, N. J., in 1845, and is a graduate of the Newark Normal School, and of the Newark Commercial School. He is a member of the Newark Board of Education, and of the Newark Normal School.

of Newark; Hattie J. Clark, now Mrs. Charles W. Connell, of Newark; Annie O. Hoppaugh, now Mrs. D. G. Maclay, of Fargo, N. D.; M. Melissa Harrison, now Mrs. Frank Gibson of Newark; Ida M. Hatcher, M. Adelaide Healey, Ruth L. Hampson, now Mrs. F. C. Nettleship, of Newark; Annie L. Rogers, now Mrs. Stewart; Mary E. Maclay, E. Belle Ludlow, Lizzie D. Tucker, now Mrs. C. Hopwood, of Newark; Alice Dod, now Mrs. Ketchum; Belle Kirk, now Mrs. Folsom, of Kearney, N. J.; Daisy M. Law, Fannie Symons, A. M. Beyer, now in High School; Florence G. Carter, now Mrs. Egner, of Newark; L. Edna Freeman, and Sarah C. Moore; also the following who are deceased: Mrs. H. M. Willis, and Emma Hobbs.

The graduates from the school number seven hundred and fifty-two, and are scattered from one end of the country to the other. All the professions are represented by them, and our boys and girls are to be found in every walk of life. Twenty-six of them are in the Newark High School, and three are represented in the present faculty of the school. Connected with the school is a fine library consisting of over nine hundred volumes. This is the largest grammar school library in the city. More than fifteen hundred dollars has been expended in books and charts since it was established. The books and magazines are in constant circulation, and furnish families of the ward much useful reading. All this money, save one hundred dollars given by the state, has been raised by the pupils and teachers. The value derived from the school library can hardly be estimated; as an educational factor, it is second only to the teacher.

The patrons of the school take special pride in its welfare. This is shown by the large number yearly graduated to the High School and by its liberal contributions to its library and other improvements. The walls are decorated with many fine pictures and the front yard is one of the best kept in the city.

OLIVER STREET SCHOOL.

OLIVER ST. SCHOOL

SOUTH STREET SCHOOL

IN the report of Superintendent Barringer for 1875, attention was called to the overcrowded condition of the schools of the Tenth Ward; and, in the same year, a building was rented in Thomas street, near Hermon. January 3, 1876, two rooms were opened, with Mrs. Carrie A. Hallock in charge. In September, 1876, Miss Eunice A. McLeod took Mrs. Hallock's place and continued as Principal until the South Street building was completed. Still, the accommodations were insufficient for this section, and in 1882 a site was bought corner of South and Hermon streets. In 1883-4, additional appropriations were made and the building begun.

In September, 1884, the school was formally opened by Superintendent Barringer and Commissioners John L. Armitage and Seymour Tucker, with Principal W. J. Kennedy in charge. During the first year there were 470 pupils and seven teachers. Two of these teachers, Miss Mary M. Parker and Miss Mary D. Kirkpatrick, were from Thomas Street School, and two, Miss Hannah Moore and Miss Mary E. Bedell, were from Garden Street School. Miss Hannah Moore was appointed first Vice-Principal. September 1, 1886, Principal Kennedy was succeeded by Mr. J. L. Terwilliger, of Washington, N. J. Principal Terwilliger was transferred September 1, 1889, and Lewis W. Thurber, of Paterson, was appointed.

April 1, 1892, the School was changed from Primary to Intermediate, and remained so till September 1, 1892, when the class of Intermediate schools was abolished and South Street School was changed to Primary.

Mr. Thurber remained Principal until April 1, 1894, when he was transferred to Lafayette Street School, and Mr. K. S. Blake, of the Normal School, succeeded him. Mr. Blake was Principal only four months, and was then followed by Mr. E. K. Sexton, of Closter, N. J., who took charge October 11, 1894.

The school has had a slow growth since it started, and now contains ten classes and an enrollment (1896) of 635 pupils.

In 1887 a summer school was established and continued till 1891, with an enrollment of about 140 pupils.

In 1895 an evening school was started, with Principal Sexton in charge. It contained four classes and an enrollment of 173 pupils.

Credit is due to the Commissioners who have represented this section of the city in the Board of Education, for its present school accommodations.

SOUTH STREET SCHOOL.

CAMDEN STREET SCHOOL.

THE Camden Street School was built in 1884 and opened in September of the same year. This building has fourteen class-rooms, is very well located and is a well-arranged and very convenient house for school purposes. The faculty of the school consists of Mr. Arnold Voget, Principal, Miss Laura B. Sayre, Vice-Principal, Miss J. V. Enders, Head Assistant, and the teachers, Miss L. E. Hill, Miss L. A. Hill, Miss M. Leonora Stevens, Miss Carrie Kaiser, Miss Jean A. Dearie, Miss Anna Anderson, Miss Edith Burgyes, Miss Griselda Ellis, Miss Frances C. Force, Miss H. Louise Crane, Miss Mabel Burnett, Miss Madeleine Boylan.

The following is an extract from the report of City Superintendent of Public Schools, Wm. N. Barringer, for 1895:

In a prosperous and growing city the demands of the public schools are constantly increasing. The many and continually extending advantages for homes and business offered by our beautiful city are bringing many families and business interests here.

Of course, among the influences that help to build up a community, none are more effective than good schools. Merely to keep them up to the present standard is not sufficient. Progress in the course of study and in methods of teaching must be constant and up to date. The accommodations in the way

Superintendent's attention from year to year has been ... more given to the question, how to elevate and ... the efficiency of the public school system of our city? ... by considering and using only the means ... school-room accommodations and the various ... required in the proper instruction of pupils. As we ... and again repeat, the one great necessity in ... of schools is the thoroughly trained, competent ... This is the way out of all difficulties that beset the ... problem.

... education and training of our teachers it can hardly ... but that we are moving in the right direction. There has been more interest and activity among the teachers ... preparation for the class-room and personal contact with the ... than during any time in the past. While some have ... to catch the spirit, the body as such has made right and ... progress. Here is the key to the whole subject. Teachers deeply interested, competent and thoroughly trained ... put our schools in the way of rapid and sound progress. This competency and training means much more than mere surface preparation in methods and simple devices. First, it means large natural fitness by quick intelligence, great tact and aptness, paired with ample scholarship and good habits of mind and body, with the devotion and persistency of the genuine student.

... meetings of the teachers for

CAMDEN STREET SCHOOL.

... educational purposes with the principals, the Superintendent, in grade meetings for special subjects, in the institutes, etc., have been unusually well attended and have resulted in permanent benefit to the profession. I wish just here to emphasize these gatherings. One of their chief benefits is, they keep alive, intensify and extend the professional spirit. They arouse and utilize the personal and mutual efforts of those who come under their influence. We hope to improve them and thus derive still larger benefits from them.

... The Superintendent's meetings with the principals, the principals with their class teachers, the Principals' Association, the Vice-Principals' Association, the Teachers' Institutes, the grade meetings by the drawing teacher and the music teachers, have all been held regularly. They were well attended and commanded the attention of all. The meetings are growing in interest and value from year to year.

... One of the troublesome questions for every growing municipality is the difficulty of furnishing adequate facilities for the proper education and training of the children. This is not a local complaint; it is widespread throughout the country. It is not easy to understand why cities so generally fail to make early and ample provision for their schools. Wisdom would seem to say that sites should be purchased and buildings arranged for in advance of the crowded population which makes it so difficult and expensive to properly locate the school buildings.

... PRINCIPAL ...

... SUPERINTENDENT ...

NEWTON STREET SCHOOL

THE building is located at the corner of Newton Street and South Orange Avenue, and was erected in 1867. In 1871 the building was destroyed by fire. It was rebuilt, enlarged and reopened in 1873. Present value of property is \$50,000. This school has the largest grammar attendance of any in the city. At this writing, June, '96, there are ten grammar classes, and a total enrollment of 502. In both departments there are eighteen classes and 1081 pupils.

The following gentlemen have been principals of the school: Wm. H. Elston, Edwin Shepard, now principal of Oliver Street School; Clarence E. Meleny, now connected with the Horace Mann School of New York City, and Stephen S. Day, under whose supervision the school was elevated to the grammar grade eleven years ago. The present principal, J. L. Terwilliger, has held the position over five years, with a total experience of twenty-six years successful work in our little State. Of the excellent and faithful corps of teachers, Mrs. F. W. Smith, Vice-Principal, has taught in the school twenty-four years, and Miss Rebecca McClure, F. Assistant, twenty-two years, Miss Emma L. Hutchings Vice-Principal Primary, twenty-four years, Miss Anna A. Baldwin, has taught here over twenty-nine years, and Miss Duncan, twenty-two years. The school is popular, prosperous and well patronized.

NORTH SEVENTH STREET SCHOOL.

THIS school is located in that portion of our city known as Roseville. Bringing to mind the Roseville of to-day and the same place thirty years ago, strongly contrasting pictures will be presented. It was well named "A Village of Roses," and it is still true to its title.

In 1854, an enumeration was taken here, and two hundred and fifty children of school age were listed. Six years later the school was built; and of this first school as it stood in all its pride, a new structure, on the tenth of September, 1860, we will take a brief survey. On Roseville Avenue, just beyond Orange Street, back from a grass-covered road, bordered by a plank side-walk, two planks side by side, and surrounded by trees, stood the school-house. You know the style—straight front, straight sides, after the fashion of the architecture of our Puritan ancestors; two floors, three rooms each; this was the typical school-house which delighted our fathers.

It is necessary to dwell on the old school-building, for it was for many years known as the "North Seventh Street Primary School," having been moved from its original loca-

NEWTON STREET SCHOOL.

tion, in the year 1870, to the site on North Seventh Street. Then it was the school in the woods. Before the days when rules of the Board of Education became as inflexible as iron, many a pleasant afternoon did the children spend reciting their lessons under the trees, to the music of the birds, and many a nature lesson was learnt from dear Mother Earth herself.

Soon after the Roseville or Eleventh Ward School was built, the rumble and roar of guns and cannon was heard through the land, and our section of the city was selected upon which to pitch "Camp Frelinghuysen," and from this camp fronting Roseville Avenue, extending north beyond Fifth Avenue, south to Sixth Avenue, and east to the edge of what is now known as "The Park," marched our gallant soldier boys. It would greatly please the citizens of Roseville to have the memory of this event perpetuated by naming the new North Seventh Street School "The Frelinghuysen School."

The old school still exists and is in use. In the rear of the new building on Sixth Street you can visit it any day, and see many dear little bright-faced children there, struggling to climb the hill of knowledge, but so easily and gradually that a greeting of smiles and happy voices will be offered. But this building is soon to be a thing of the past, as its walls will not stretch and as many children are found on North Seventh Street alone as the whole ward originally contained.

The new building was opened in September, 1894, and was the cause of great rejoicing to the citizens of the northern portion of Roseville, as the grammar school children had been obliged to walk nearly a mile, much exposed to all kinds of weather, to attend

J. L. TERWILLIGER.

G. I. BRANDENBURGH, SCHOOL COMMISSIONER.

South Eighth Street School, then the only grammar school in the ward. This structure gives great pleasure, but the rapid growth of this part of the city makes more room imperative, and a much larger building, with an assembly hall is needed. The present building is so arranged that when such celebrations as the school is required to hold are in progress, but few of the old citizens see or hear what is going on.

This school, having obtained the sympathy and cooperation of the parents and citizens, with its attractive and intelligent children, and under the efficient management of a principal, able, kind and just, and pleasant teachers, will continue to be a credit, pride and honor to our city.

Present corps of teachers: Thomas T. Collard, Treasurer, Grammar Department—Elizabeth K. Arndt, Vice-Principal; Elizabeth Wyckoff, First Assistant; Kate Z. Gaston and Annie S. Burgyes, Assistants. Primary Department—Mary A. McNeil, Vice-Principal; Annie May Young, Mona M. May, Bessie C. Schuck, Ida M. Titus, Elizabeth G. Parnly, M. Anna Lentz, Lucasta C. Baldwin, Mabel Chandler and M. Elizabeth Nicols, Assistants. The illustration represents the new school, one of the most elegant erected by the Board of Education.

NORTH SEVENTH STREET SCHOOL.

To no part of this work has there been a purer devotion brought to bear than in the part devoted to schools. This arises not from the fact that the burden of our labor has been lightened, and by the assistance received from the pens of principals and others engaged in educational work, who, through the plan of the work have written themselves the articles contained in the preceding pages, and description of the school and school work of their own particular school or self-elected school work. To the larger number of these gentlemen, who entered upon the task with willingness and alacrity, the sincerest thanks of the editor are due and hereby extended. We trust also that they will receive it in the same spirit in which it is sent. Not because our burden of responsibility and labor has been lightened, but because circumstances give them opportunities for collecting facts and figures which we could not control, and which gives to the educational part of *ESSEX COUNTY, N. J., ILLUSTRATED*, a

truthfulness and reading interest, which no amount of care and research on our part could accomplish. It can be said of nearly every fact recorded and statement made, they have had personal cognizance.

Besides this, that sameness which to many readers would become tiresome, is broken, and instead of the narrative being humdrum, it becomes attractive

and the very reverse of tedious. It is an old saying and one that is ever trite, that "Vanity is the spice of life," and just here this comes in such interesting form as to make it replete with changes, which is so desirable to the thoughtful reader. Among the subjects of which we must needs treat in making it, there is but one which can be permitted to take precedence in any way, and that is the church, and these two go hand in hand, the church and the school.

For little more than three years it became the writer's good fortune to superintend the public schools of Essex County, not including the cities of Newark and Orange, both of which have city superintendents. During this period abundant opportunities were offered to study the educational interests of this county, and we will be pardoned if we appear charmed with its beneficence and apparently dwell all too long on the results accruing. By referring to the last annual report of Supt. Mathews, it is found that there was of school age in this county, nearly 90,000, for all of whom provision is made by the State for their education. Not all these accept the State's beautiful provisions. The percentage of those who do is large and rapidly growing. As compared with that number represented as attending the public schools two decades of years ago, the increased ratio is very promising.

The falling off in the numbers in attendance upon the select and private and parochial schools, seminaries and academies, is equal to one-half, and the

J. E. D. DOOLITTLE, SCHOOL COMMISSIONER.

J. R. NATHAN, SCHOOL COMMISSIONER.

GEORGE GRIMME, SCHOOL COMMISSIONER.

attendance upon the public schools has increased in like proportion. In the field of public school education, or to reverse the statement, education of the young in the schools of the State, there has been such mighty advance made in the methods of instruction, and such marvellous care is being exercised in the presentation of learning to the young, that we meet with very little danger of making a mistake in the statement of a belief, that it will require but the advances of a few more decades ere all private and select schools will be relegated to the past and the academies and seminaries, rich in the memories of men who handle the implements in the world's conduct, and hold the helms of the ships of state and are now held as the apple of the eye of men who honor every calling, and women who adorn the world and sanctify home-life by sweet affection and holy purpose, will be treasured as souvenirs only, and give place to the public high school—the educational institution

J. J. LEONARD, SCHOOL COMMISSIONER.

which has been fighting its way into public favor, and keeping even pace with the mighty advances in research and science.

That the reader may have the marvellous work of the public schools demonstrated to his entire satisfaction he has only to look into one of those beautiful institutions of learning which our artist has, by pen pictures and photos, charmingly transferred to these pages. There he will find all the conveniences which experience has proved as the best for educational purposes, the school-house Architect and Sanitary Engineer vying one with the other in the production of results both marvellous and satisfactory. The new, or township law, for the conduct and government of the public schools, has proven nearly all its originators and friends desired and expected. High School advantages under its wise provisions have been extended to children in the out-lying towns, where privileges had before been denied. Hundreds of young men and women desiring to enter college can now have that blessed privilege without spending a year or two or three of precious time in some academy or

seminary after graduating from the grammar school, or having to employ a tutor to fit them for college. Ambitious boys and girls need not under this law be barred out for want of funds to meet preparatory expenses, the State in its generosity providing all that is necessary in a financial way, to give the child of the laborer, mechanic or artisan an equal chance in the educational race.

Such a mighty advance has been made along the two important lines of school-house architecture and school sanitation, we cannot refrain another reference to these subjects. Much of the very best architectural talent in the land is now making school buildings a specialty, with results of a most satisfying character. Sturdy young America, with well expanded chest and highly developed muscle, is ready for riotous play as he slips from the school house door. Such marvellous changes being wrought through the scientific exercise gained in the well ventilated apartments and in the calisthenics taught. Not this alone but the wonderful growth and development of

body and brain through the influence of manual training which has become a part of the curriculum of study in the schools.

Few pupils there are indeed in these our beautiful days of rapid advancement, who need go forth into the world without a knowledge of the more common mechanical implements, and their skillful handling. It matters little what course the pupil leaving school, whether it be from the public high or grammar school or the private academy or parochial, may decide to take, if he does not select for himself or circumstances debar him or her from entering college, those hours of their school life will be found to have been spent to the very best purpose, during which lessons in manual training were inculcated, since their are few places in the busy world where such knowledge and skill may not be

J. I. MULLIN, SCHOOL COMMISSIONER.

A. BERG, SCHOOL COMMISSIONER.

used to advantage. Let the rest of the retired world be cast where'er it may, the knowledge gained in the machine shop, the carpenter department or carving room of the school, will find a blessed adaptation and practical application. The click of the nail hammer, the buzz of the hand or whirr of the circular saw, whose acquaintance had been made in the hours spent where manual labor was taught, instead of sending a chill of terror over the frame of him or her when first facing the stern realities of life, will wake the blessed memories of the hours spent amid those raw beauties of school life in which they had most fortunately been permitted to take part.

Then, how many of the young misses who have been privileged to taste and test the sweet realities of pie or cake manipulated by their own fingers, made deft by practice while having lessons in high art cookery inculcated in the pretty little kitchen to which they had been invited to retire when worn and torn over Greek roots or algebraic problems where not only the realities of the world are met face to face, where lessons are learned which will tend mightily toward leveling the rough road of the house-wife leading to the satisfying of "Ye Lords of Creation," and the vanness of his appetite ever seeking satisfaction. Again, from the sewing room of her school she carries into her home, boudoir or sewing room, a practiced hand that had learned to make and mend what God's prattling babes will take and mend, double bow knots of holy love.

It is immensely satisfying to us that our views of the past and hopes ever brightening of a glorious future for the public schools as recorded in the preceding words, are held and enjoyed by such of our people as are making their walk along the higher plane of school work, and have become the thoughtful themes of many an article in newspapers and journals. One of these we have taken the liberty of transferring to these pages unchanged, as it appeared in an edition of June 27, of *The Caldwell, N. J., News*, and from the pen of the veteran educator and popular superintendent of the Newark City Home

for Recreant Children, at Verona, Mr. C. B. Harrison its editor:

"The aim of public education has been to secure an intelligent citizenship. The Father of his Country in his farewell address counseled the support of institutions of learning for the dissemination of useful knowledge. The earliest ad-

WEBSTER STREET SCHOOL.

vocates of the free public school system claimed that every child upon American soil was entitled, by virtue of dependent childhood, to such culture as would qualify him for the exercise of the manifold "rights" of American citizenship. The idea of culture, however, among the practical statesmen and educators, during the early part of this century, was comparatively crude. The "three r's" were the sole stock in trade of the first of the free schools, and these were imparted quite as mechanically as the craft of the tradesmen. Arithmetic was a matter of blind formulas and rules; geography, purely descriptive, taxed the memory with technicalities and names; while English Grammar, introduced generally in the middle part of the century, with its etymology and syntax, afforded the only genuine mental exercise to which pupils were subjected in the school room. All in all, little effort was made to qualify pupils to use their intellectual powers on independent lines of thought.

The schools, during the closing years of the century, are apparently well advanced. A well defined effort to lead pupils to think is made in all the departments of the graded grammar school. Mathematics is to-day a

T. N. ARBUCKLE, SCHOOL COMMISSIONER.

A. PAGE, SCHOOL COMMISSIONER.

axioms and principles, and in tracing their application, the reasoning faculties are kept healthfully active. Geography is physical history, which treats of the "life of the inorganic," and unfolds causes and effects, in the march of the winds, in the distribution of heat and cold and of storm, and in the development of all forms of animal life. Grammar has advanced beyond the stage of inflection and parsing, and is now aptly a language study. In method and aim a great advance has been made.

"The limited introduction of manual training, during these last years of this present century, shows that public school training is perhaps now midway in its transition state. The quickening of the merely preceptive faculties and that special physical culture which confers power for rapid and accurate execution in the production of designs by the excise of handicraft, are very generally attracting the attention of educators, and as a result, we may expect the engraftment of manual training upon the school course. With all these however, the end is not reached. Man is a three-fold being, and intellectual and physical education fails to meet the demands of his nature. Without moral culture and refinement, no one is educated in the better sense of the term. Intellectual acumen and acquirement too often accompany moral degeneracy. Caligula was brilliant, but he was, from a moral standpoint, a leper.

"The moral faculties are said to be slow of development; but they are susceptible, and under methodical culture will ripen as auxiliary and regulating forces of the intellect. What is doing in this present age in the public schools is purely incident to intellectual training, and therefore lacks in method and scope. It may be fittingly characterized as experimental if not perfunctory. The question of moral education in the near future, will be pressing for solution. The differences among religious sects have heretofore negatived rational endeavors to include moral teaching in the public school course, but with the manifold demonstrations, in private and public life, of the futility of one-sided culture as a conserving agency, the demand for harmonious development will be resolutely made, and intelligently met."

Many a man who has already achieved distinction or has risen to stations of honor in the later days, has been moved to shout "excelsior" over his first inklings obtained in the school-room, of those certain branches which had been declared "innovations," and among these, that of forestry,

LAWRENCE STREET SCHOOL.

with one of its resultant victories, known, celebrated and enjoyed under the title of forestry. Indeed, it matters little where or in what field the pupil after leaving school may find his lot cast, or the exercise of whatever calling he may elect to pursue, the lessons in forestry he may have learned, can prove of inestimable value to his prosperity and well being, providing always, that he has the will power to put them into practice, or he does not prove recreant to the beautiful trust his *Alma Mater* bestowed when she said, "Go forth and fight the battle of life," bearing the banner with the strange device "Excelsior." Since the introduction of the ideal study of tree culture which carries with it tree and forest protection, ten thousand times ten thousand young tree shoots have grown into trees, with wide spreading branches under which the beast of the fields and denizens of the wood are enjoying shade from the mid-day sun, or shelter from the chilling blasts of winter, have been preserved, which, had it not been for the lessons learned in the school, would have been ruthlessly torn from the loving arms of their tender mother earth, (always prolific in her benefactions,) and trampled beneath swift flying feet engaged in the never flagging and never ending pursuit of the wordly fruits.

Scarce more than a

H. P. RODEN, M. D., SCHOOL COMMISSIONER.

C. W. MENK, SCHOOL COMMISSIONER.

quency of the forest fires. The industry of tree culture  
has been neglected for so long a time that less time has passed  
than it takes to grow a scientific course and its authoritative  
text-books for the use of the school room.

But the time has come when the pupil leaving school  
to enter the world of labor (at least in forestry study) is  
not ignorant of the value of trees, where each one goes forth  
with a firm conviction for the fight against the ruthless  
depredations of forest fires, and the beautiful trees of the wood

land. The forest fires that have resulted from the innova-  
tion of the modern machinery and the progress of achievements over  
the past few years, are a terror to all sections, which here-  
tofore have been attacked with relentless fury hill-top  
after hill-top, and down to the bottom the tree fruit of ages and  
centuries is being lost in a smoldering ruin to mark its path, is enough  
to awaken the devotion of love on the heads of those mighty  
trees. The men who have led the advance guards, who have won  
victory after victory over forest fires, is enough to establish their  
enduring fame. We now have the brightest of promises looming  
up in the near future that the fiend will be chained at their feet,  
with the key for its releasing intrusted to such hands only as will  
make use of the beautiful lessons learned in the school room, of  
the best methods of meeting and defeating its wild and reckless  
career, and the depriving of forest fires of tree fruit for its  
feeding and fattening and robbing of its greatest terrors.

Nearly, if not quite all, the states of this Union have  
enacted laws which authorize the Governor to set apart by  
proclamation a certain day which is usually selected from the  
closing April or May days, to be known and celebrated  
and enjoyed under the name, style and title of Arbor Day. The  
day thus set apart is usually accompanied by a recommendation  
in the proclamation, that it be observed as a day of thanksgiving  
to God, for the beautiful benefices of trees and plants, their  
planting, nourishment and protection, accompanied by instruc-  
tions from teachers and addresses and songs appropriate to the  
occasion by the pupils of the school.

That our readers may get a better understanding of Arbor  
Day in the public schools, we take the liberty of transferring to

these pages the following  
circular, and which was  
placed in the hand of every  
teacher.

Some of the county  
superintendents arranged  
a program not leaving it as  
we did to their own vol-  
ition and good judgment.

If there is one duty more than  
another and which is our

WARREN STREET SCHOOL.

worthy State Superintendent and Board of Education would  
impress upon their County Superintendents in the administration  
of the laws governing the public schools under their immediate  
supervision, it is the faithful observance of what is known as  
Arbor Day.

"That I may second their desires so far as in me lies, I would  
urgently request the principals and teacher of all the public  
schools under my care, to see to it, that the intent of the origi-  
nators and introducers of this important branch of education  
into our public school curriculum of study, shall not only not  
be neglected,

but shall be  
faithfully carried out and  
made as thoroughly im-  
pressive upon the minds of  
the young as is possible.  
The more practical you  
can make the exercises the  
better. By this I mean the  
introduction into the school  
room of as many of the  
accessories to the demon-  
strative plan of

H. M. WOOLMAN, M. D. SCHOOL COMMISSIONER.

W. H. WOODMAN, M. D.

struction, such as plants, shrubs and young trees, as possible. This, accompanied by a few short practical remarks on the nature and growth of the same, with their relation and value to the human race, will prove attractive and instructive. Arbor Day having been wisely and happily fixed at the season of the year when everything in nature is young, or clothed in the garb of youth, it makes a starting point for the study of the first easy practical lessons in Botany. What I would urge upon teachers, is, that wherever it is possible the pupils who are of the age to understand should be taken into the fields once a week; at least from now till the close of the term, and simple demonstrative lectures in elementary botany be given. To have the pleasure of looking upon their promising little ones romping over the fields by the side of their teacher, (veritable flocks with shepherds attending), will send a thrill of joy through the devoted parent's heart.

"As in the years gone by, I direct only, that there shall be a full and faithful observance of the day, and suggest the program of exercises to be carried out, leaving to principals and teachers the election of appropriate addresses, music and songs; then conclude the day's observance with the planting of trees and shrubs, the potting of plants and flowers; this I trust none will neglect. I hope you will make this an ideal Arbor Day, an oasis indeed in the history and conduct of the school under your care, to which you can turn in the future and truthfully say, well done! Having completed your exercises and taken that rest necessary for recuperation, which will necessarily follow the extra mental and physical strain, you will write out a concise report of your Arbor Day exercises, and send it to me not more than five days afterward.

Respectfully,

DR. M. H. C. VAIL,

County Superintendent.

"P. S.—Let me urge upon you the necessity of a careful guardianship of the trees, shrubs and flowers planted on Arbor

Day, as I have reason to fear that many beautiful representatives are destroyed soon after planting."

Another innovation, one which has proven of wonderful utility to public schools, and a desideratum long sought, is the beautiful system of education for the beginner, known as the Kindergarten-

ten. No visitor to the public school of this day fails to be charmed at the first step of his progress through the maze of departments and rooms, into each of which he is ushered on a tour of inspection, as first of all his or her attention is called to the little tots of from five to seven summers assembled in the kindergarten room, where in orderly play they wile the hours away, and besides education getting made easy they learn to adore the school. Few sights are more interesting than that which the kindergarten class presents while engaged in accomplishing the task of education getting. The kindergarten innovation is another of those moderns which have come to stay, and all the old fogies in the land with birchen rod and heavy hand, will never be able to drive it away.

As early as 1892, the State Superintendent of Public Instruction, Dr. Poland, was constrained in his annual report, while discussing this system of early instruction to pupils who are just passing through the susceptible age of "bib and tucker" to speak as follows:

"Among the most recent innovations witnessed in the public schools of the country, the kindergarten is perhaps the most important. As a system it aims to provide suitable tuition and training for children from four to six years of age, too young in general to enter upon the curriculum provided by most of our elementary schools. Without attempting an explanation of its distinctive aims and methods, I will say simply that it differs from the current

MONMOUTH STREET SCHOOL.

C. CLARK, SCHOOL COMMISSIONER.

M. B. PRUDER, SCHOOL COMMISSIONER.

to stress upon cultivating the child's powers and co-ordinating them. Not the least important, more important, fact in its development in the State of New Jersey is that the kindergarten in the State of New Jersey stands unrivaled. It has been tried and its workings have been proved. It is to be regretted that the kindergarten in the State of New Jersey has not had the time necessary to complete its normal school course of study, and that the kindergarten training itself is of almost negligible value. Its introduction would become an

directed to the uprooting of vicious habits acquired in these years of evil tuition in homes of ignorance, if not of vice, and in the baneful companionship of the sidewalks and gutter.

Remarkable as it may appear, however, the kindergarten is of hardly less value to the children of the rich than to those of the poor, the ignorant and the vicious. It provides a little cosmos wherein rich and poor meet on equal terms. It aims to cultivate besides the intellectual powers, the nice perceptions of right, justice and equality. At an age when distinctions of right and wrong, if not intellectually perceived, are nevertheless clearly felt and indelibly impressed, the child life is given a direction and impetus that will save it often the danger of subsequent contamination.

CHARLTON STREET SCHOOL.

to provide which is called upon to provide instruction for the whole period of the school age.

The success of the kindergarten, however, is not to be ascribed to its introduction in the foregoing sense, but to its remarkable adaptation to the needs and circumstances of the child to develop his powers that begin to display themselves at the kindergarten age.

New Jersey kindergarten is to be witnessed than that of little children, who, at an early age, deprived of pleasant homes and surroundings, spending the hours of the day upon the streets and in the tenements of our large cities. To these the kindergarten brings an inexpressible joy and of incalculable value. The kindergarten training of the elementary schools is

"It is my pleasant duty to report that the growth and extension of the kindergarten idea in the State of New Jersey, though somewhat slow, is none the less steady and hopeful. In thirteen of the twenty-one counties of the State it has gained a foothold.

"True, in a number of cases the kindergarten training introduced is not the true kindergarten, but what is known as mixed kindergarten, including more or less of ordinary primary instruction; but in all the counties mentioned it is recognized as a part of the school system. The whole number of children in attendance at the date of this report (1897) was 4,300. This, however, is an excessive estimate, since it includes besides those who are being taught in the kindergarten proper many in the so-called mixed kindergartens, wherein the principal

stress is laid upon the ordinary elementary school instruction. A careful estimate of the number of children attending the real kindergarten would not exceed 1,500, it is likely.

"The minimum age at which children are received into these kindergartens is five years. The State law, which fixes the school age at five to twenty years, inclusive, prohibits the attendance of children of a lesser age. In order, therefore, to encourage the establishment of more kindergartens, and to enable them to accomplish their best service, some legislation is needed.

"As to the cost of the kindergartens now being maintained, no satisfactory statistics are at present attainable. It is encouraging to know that in the cities and school districts where the kindergarten has been longest in operation, it is most highly appreciated."

Although, as above stated by the learned doctor, there were kindergarten classes established in but little more than half the counties of our State, and in less than half the schools in those counties where this beautiful institution had gained a foothold, had this scion of educational royalty been grafted, to-day the school without the kindergarten instructor surrounded by the happy wee's of the human race, is the rarest kind of an exception.

SOUTH EIGHTH STREET SCHOOL.

TWELFTH WARD GERMAN AND ENGLISH SCHOOL.

**T**HIS school was founded Dec., 1858. The building is a two story brick structure, 70 x 30 feet, situated at the corner of Niagara and Elizabeth Streets, on a plot of ground 100 x 90 feet, and is valued at about \$12,000. It contains three class-rooms and a kindergarten, and prepares the children for entrance to the High School. The present number of pupils being two hundred, the charges are eighty cents per month for each child in the kindergarten, and one dollar per head for those in the higher classes.

Where three children of one family attend school at the same time, the third is admitted free. A collector is appointed by

the School Association to collect the money. The present principal, Mr. Eugene Rahm, is a thoroughly educated gentleman and a musician, having been connected with the school for the past four years. He is ably assisted by Miss Carson and Miss Farrington as teachers of English, and Miss Marie Zehnder, who has charge of the kindergarten. The Men's Society connected with the school, is composed of 370 members who are all well known and enterprising citizens. The quarterly dues are seventy-five cents. The present officers are: J. Burkhard, President; J. Spubler, Vice-President; J. Goldbach, Treasurer; H. Rabke, Secretary; Fr. Lembach, Financial Secretary. The Ladies' Association has a membership of 130. Their dues are fifteen cents per month. The officers are: Mrs. M. Sobbe, President; Mrs. A. Burkhard, Vice-President; Mrs. C. Burkhard, Treasurer; Miss M. Zehnder, Secretary. The school is in a flourishing condition and free of debt.

FOREST HILL SCHOOL.

THE NEWARK STREET GERMAN AND ENGLISH SCHOOL.

**T**HIS school was founded on April 24, 1853. The building is a two story high frame house with a little tower on its center. The lot is 60 x 100 feet. The value of the property, including the school furniture, amounts to \$6,500. The school has two classes and rooms for the teacher's residence. The number of pupils vary between 70 and 90. The school money is sixty cents for each pupil. Dr. Fritz Kempf is the principal of the institution. Miss Emilie Temme instructs in the kindergarten. To the School Society belong 147 members. The yearly assessment of each member is \$1.20. The same amount is paid by the 41 members of the Ladies' Society. The Board of Directors are the following gentlemen: A. F. Burkhardt, President; Peter Vetter, Vice-President; Paul

George S. ... Treasurer; Arthur Br... Krieger, and Thomas Sage, ... Mis... President, Mrs. Ber... Secretary, and Mrs. ... Sauer, Treasurer. The school is ... two weeks.

GREEN STREET SCHOOL.

THIS ... Located in the ... of the city, was incorporated in 1850. It comprises a kindergarten, a primary and a grammar department. The rooms are ... and well ventilated. In a seven years' course the pupils are prepared for the public ... Besides the common English studies the German language and gymnastics are taught. A library of over 600 volumes is in the reach of the pupils. The tuition is exceedingly low. The faculty consists of nine teachers besides the principal, Director, H. von der Heide, Pd. M.

BEACON ST GERMAN AND ENGLISH SCHOOL

THIS school was founded by the "Deutsch-Englischen Schil-Verein" of the old sixth and thirteenth Wards, in 1851. Being attended by 300 pupils, it is the largest German and English School in New Jersey. About 75 of the children are in the kindergarten, where they are instructed and educated according to the principles of Froebel. The remainder is divided into five classes. The following studies are taught by seven teachers (including the director): English Language, Reading, Writing, Spelling, Grammar, Object Teaching, Composition, German Language, Arithmetic, Geography, History, Natural Science, Drawing and Music. The tuition amounts to \$12.00 per year. At the head of the school is the Board of Directors, elected by the School Society (Schulverein). The present Board consists of: Henry Schaedel, President, Philip Dilly, Vice-President; Dr. Edward Ill, Treasurer; August Goertz, Secretary; Fred Jacob, Financial Secretary; Dr. F. Ill, John Fisher, John Honning and John Conrad.

TWELFTH WARD GERMAN AND ENGLISH SCHOOL.

When we take into consideration the number of German-English Schools existing in Newark, we come to the conviction that the thought which the poet wished to impress upon the minds of the Germans of America, has sunk deep into their hearts. These people may drift apart in regard to religious or political views, but in one idea they extend hands; they provide schools in which the treasures of the German language are preserved for their children. Occasionally we meet with rare cases, in which wealthy Germans neglect the education of their children in the mother tongue, but it is singularly touching on the other hand to note how the greater part of the less fortunate class, are willing to make any sacrifice in order to grant their offspring an education in the German language. That this is true is proved by the fact that no less than fourteen German-English Schools exist in this city at the present time, in which over thirty-seven hundred children receive instruction in their mother tongue.

It certainly is to the interest of our German-English Schools, when our attention is occasionally called to it anew, and for this reason a few statistics about these schools will be here given.

ST. BENEDICT'S SCHOOL.

Situated at the corner of Komorn and Niagara Streets, was founded in 1862. The present building, erected in 1885, is three stories high, the first floor containing two class-rooms, and the second, three. Besides this, we find on the ground floor a play-ground large enough to accommodate 500 children, and two rooms in which the pupils hang articles of clothing. The third story contains a spacious hall, in which festivities are held. Another large play-ground adjoins the building. There are 450 children attending the school, who receive instruction in five different classes. The terms per month for each child in the advanced classes are ninety-five cents, in the lower grades sixty-five cents. The director of the school is the Rev. Father Leonard Walter. The teachers are Mr. Joseph Sauerborn and four Sisters of the St. B. Order.

They are the Misses Matilda Kupf, Hilary

NEWARK STEEL GERMAN AND ENGLISH SCHOOL

Wiest, Liboria Hartmann and Rosemary Malone. The society connected with the school has a membership of 230. The contributions made by the gentlemen toward the support of the school, are twenty-five cents per month. The ladies pay fifteen cents every month. The Board of Directors consist of the following gentlemen: Messers L. Peter, President; A. Steines, Vice-President; J. F. Wildemann, Rec. Sec'y; H. Martin, Cor. Sec'y; A. Bernauer, Fin. Sec'y; J. Bernauer, Treasurer, and J. Spangenberg, Porter. During vacation—July and August—the school is closed.

**THE GERMAN-ENGLISH PRES. DAY-SCHOOL**  
Was founded in the year 1854, and situated at No. 38 College Place. This two story building has a dimension of 80 x 45 feet; the entire property has a dimension of 100 x 150 feet. Connected with the school, is a hall 50 x 100 feet, containing a library and dressing-room. The property is valued at \$50,000. There are 240 children attending the school. The terms are eighty cents per month for one child. In the three class-rooms we find the following instructors: Prof. Gustave Fisher, Mr. E. Riethmann and Mrs. J. Geppert. The kindergarten is in charge of the Misses C. Brandley, L. Knoll and A. Anschuetz. The Board of Directors consists of the Messers Rev. J. A. Guenther, President; J. Franz, G. Weber, H. Staehle, C. Metzger and C. Wolf. The school is free from debt.

**ST. PETER'S SCHOOL.**

This school, begining with sixteen pupils March 8, 1885, is to-day one of the largest attended of the German-English Schools. The plans for the principle building, 146 x 80 feet, situated on Livingston Street, contains ten class-rooms, and a hall having a seating capacity for 800 persons. An adjoining building on Belmont Avenue contains five class-rooms, a hall for societies to hold their meetings in, and a dwelling place for the janitor. In the fourteen class-rooms, together with the kindergarten, upwards of eleven hundred children receive instruction. The rooms are divided into seven classes for boys, and the same number of classes for the girls.

The terms are fifty cents per month for each child. The poor receive an education free of charge at the expense of the parish. The school is under the direction and control of Rev. Father Stecher, and the Sisters of Charity.

**ST. AUGUSTINE'S SCHOOL.**

This school was founded in 1874. The two story building is situated in Jay Street near Sussex Avenue. Its dimensions are 74 x 32 feet, and is valued at \$12,600, including the building together with the four lots sur-

BEACON STREET GERMAN AND ENGLISH SCHOOL.

rounding it. There are four class-rooms for the accomodation of more than three hundred children. The school is in charge of Rev. Father Neidermeyer and the Sisters of Charity.

**BERGEN STRETF PAROCHIAL SCHOOL.**

In which instruction is given in German alone by Mr. Flocken. The school consists of one class, and is situated in the rear of St. Paul's Church. The school fees constitute the salary of the teacher.

**ST. ANNE'S SCHOOL.**

Situated at No. 376 South Seventh Street, is the youngest of her sister schools, having been organized September 1, 1889.

This school-house is 90 feet long and 46 feet wide and contains four class-rooms, in which 240 children receive instruction in eight different divisions, from five Dominican Friar Sisters. The director of this school is the Rev. Father A. M. Kammer.

**THE BLUM STREET GERMAN-ENGLISH SCHOOL.**

This school was founded in 1876. There are two class-rooms situated in the basement of the church.

The number of children attending the school, have in consequence of unfavorable circumstances in business within the last five years, been reduced from 60 to 35.

On account of this there is but one class-room. The terms per week are

Mr. Hockenjos, who died in 1891, bequeathed \$500 to the Green Street School; Mrs. Ottendorfer, of New York, presented Green and Beacon Street Schools, in the year 1883, with \$500 apiece. Mr. Joseph Hensler, Sen., presents the Twelfth Ward School \$50 annually, and during the past three years the amount was raised to \$100. Green Street School prepares her pupils for entrance to High School. St. Benedict's School prepares her boys for admittance to St. Benedict's College, which adjoins the school. In case the children in the highest divisions of the remaining schools, wish to enter public schools they are advanced to the highest grades in these schools.

Instruction in reading in German, as well as in English, is introduced by means of the Phonetic system, in the following schools; St. Benedict's, 10th Ward German-English, St. Peter's and Beacon Street. In the remaining schools reading is taught either phonetically in German or by the spelling method in

C. F. KRONENBERG, SCHOOL COMMISSIONER.

WAVERLY AVENUE SCHOOL.

THE Waverly Avenue School, erected in 1891-92, is a primary school of eight class-rooms, accommodating 480 pupils, and was opened October 20, 1892. The value of the site is \$9,000 and of the building and furniture \$25,000. The school is located on Waverly Avenue, between Bergen and Kipp Streets, and commands a fine view of the city, and of Newark Bay, Bayonne, Elizabethport, Staten Island, New York Bay and the Bartholdi Statue. This grand view is a daily inspiration to those whose good fortune it is to attend the school.

In reference to the organization of this school, the *Sunday Call* of August 28, 1892, contains the following: "Miss E. H. Belcher, who, for several years has acted as vice-principal of the Commerce Street School, was on Friday night put in temporary charge of the new Waverly Avenue School. She is to organize it, and then the teachers' committee will decide whether it needs a male principal. Miss Belcher is one of the most efficient teachers in the city, and is recognized as such throughout almost the entire teaching force. If she is able to satisfactorily organize the new school and place it on a smooth running basis, the question may justly be asked: 'Why is she not competent to continue in charge, and not surrender her post, when she has accomplished one of the most difficult parts of the work?' It is quite probable, however, that the teachers' committee will favor keeping her in charge of the school, for the first term at least, and most likely for the entire school year."

WAVERLY AVENUE SCHOOL.

Miss Belcher was appointed principal, May 1, 1893. The original corps of teachers was: Miss E. L. Melick, Miss C. D. Schieck, Miss L. Graham, Miss S. H. Vieser, Miss S. E. Mason and Miss A. B. Johnson. This was increased in the spring of 1893, by the appointment of Miss F. M. Burtchaell and Miss M. A. Willoughby. Afterward, Miss Johnson and Miss Mason resigned, and were succeeded by Miss M. E. Dunham and Miss A. B. Van Arnam.

In passing through the class-rooms, one is impressed with the happy spirit that pervades the entire school. At the same time, faithful work is done by both teachers and pupils. That this work has given satisfaction to those in authority, may be seen from the following letters, recently received:

"NEWARK, N. J., July 25, 1896.

"My dear Miss Belcher:

"I desire to express my great appreciation of your successful work as principal, in the organization, under very many and serious embarrassments, of the Waverly Avenue School. Few know the difficulties that surrounded the school at its opening. These were all promptly and effectually overcome, and all the class-rooms filled to the last seat. The school has been eminently successful in all respects. I cannot omit especially commending the discipline, as to its method and influence. These are of the highest order. The same can be said of the methods of instruction. I consider the school an honor to the city and the cause of education.

"With many good wishes I remain,

"Yours truly,

"Wm. N. Barringer, City Supt."

The President of the State Board of Education writes as follows:

"NEWARK, N. J., May 15, 1896.

"My dear Miss Belcher:

"In retiring from the City Board of Education, after many years of service, I want to congratulate you on your success as the Principal of Waverly Avenue School. Through the years of your faithful work, as a teacher and vice-principal, you had demonstrated the fact of your ability to take the supervision of a school, as principal; and I remember my gratification, when the Board of Education appointed you to your present position.

"I never could understand the reasoning that occasionally prevails among school authorities, that while a woman is invaluable to organize a new school, and put it in good working order a man is necessary as its permanent principal. Your success is an illustration of the error of such reasoning. I am gratified to have had a part in your first, as well as your permanent appointment to the principalship of your excellent school. Your work has given satisfaction to the patrons of the school and to the Board of Education. I wish you and your faithful assistants continued and increased success, and I remain,

"Very respectfully yours,

"James L. Hays."

The success that has been attained may be attributed to the perfect harmony existing between teachers and principal; to the co-operation of the parents and teachers; and to the ever helpful supervision of the Board of Education.

ST. JOHN'S PAROCHIAL SCHOOL.

THE PAROCHIAL SCHOOL

staid and elegant school edifice was erected. Father Gervais was a marvel in his day, and surprised the clergy and laity in successfully constructing the church school and hospital, which is an ornament to the city and a credit to the diocese of Newark. In 1873, the Rev. P. Cody, the present incumbent, was appointed rector.

Since the advent of Father Cody the affairs of St. James' parish have prospered. Under his able and wise supervision, the great undertakings of his predecessor have been brought to a successful completion.

The school which appears in the illustrations on this page, is one of the largest in the city, and demonstrates the fact, that Father Cody is an educator of practical experience. Under his direction, the immense brown-stone structure fronting on Madison and Elm Streets has been completed and fitted up with every convenience for school purposes. The school is now absolutely free, and the children of the humblest parishoner is recognized as the equal of the more fortunate.

The attendance has increased from two hundred and fifty, to nearly twelve hundred children, and sisters of charity have been placed in charge of the parochial school.

THE PAROCHIAL SCHOOL.

## ST. BENEDICT'S COLLEGE.

FOR fourteen hundred years the Benedictines have figured prominently in the history of the world as missionaries, civilizers and educators. St. Augustine, the first Archbishop of Canterbury, and St. Boniface, who converted the Germans to Christianity, were Benedictines. The Danes, the Poles, the Dutch and the Bohemians were evangelized by members of the same order. During the first thousand years of its existence - from the fifth to the fifteenth century - it gave to the church 24 popes and 200 cardinals; it had seen 7,000 archbishops of its rule and 14,000 bishops. In England the Benedictines occupied 113 abbeys and cathedrals, including Westminster Abbey and many others almost equally famous. In Scotland they numbered among their monasteries Iona, Lindores and Melrose. At one time the sum total of their houses footed up the magnificent sum of 15,000, so many refuges of art and letters, where protected by

tree have been planted in the virgin soil of Australia and New Zealand. In the United States there is not a section, east, west, north or south, without its large abbeys and numerous dependent priories. From New Hampshire in the East, to Oregon in the West; from the hyperborean regions of Minnesota to the sunny clime of Florida, there is scarcely a State or Territory without its lineal descendants of the "famous Monks of the West," engaged, as their fathers have been for over 1,400 years, in tilling the soil, teaching the rude and ignorant useful trades, accustoming the idle and roving to profitable industry, building schools and colleges for the education of all, but especially for the higher education of the children of the poor.

In this chain of Benedictine abbeys and colleges, St. Mary's Abbey and St. Benedict's College, of Newark, form a not undistinguished link. Here, as it is, and has been, in all places and times since the foundation of the order, the school or college is

ST. BENEDICT'S COLLEGE.

a religious halo, their inmates kept alive the sacred lamp of literature, when outside their walls the world was given up to rapine and civil war.

To quote the words of a writer in the *Westminster Review* for October, 1879: "It was the monks who proclaimed a more liberal sentiment than that of narrow nationality, and discouraged the pagan patriotism, revived in our own days, which consists in looking upon every foreigner as an object of suspicion or hostility. Monasteries opened their doors to all travelers and strangers. Monks brought to the councils of kings and nations a courage which did not recoil before any danger; they resisted the violence of the nobles, and sheltered the too feeble freemen from their attacks."

After centuries of decline, our own age has witnessed the marvelous rejuvenation of this ancient order. It is rapidly regaining its lost ground in Europe, and off-shoots of the parent

inseparable from the abbey. While a large amount of public and private ceremonies and prayers is included in the duties of a monk, it is also the aim of the "learned Benedictine" to be a man of science, a scholar and a schoolmaster. St. Benedict's College has been before the public for nearly thirty years - 1868 to 1897 - and has conscientiously and unostentatiously striven to carry into effect the intention of its founders. While instructing, with a preference, in those branches which pertain to a liberal education, the knowledge of which is indispensable to those who wish to enter the ranks of the clergy or embark in any professional career, it has not neglected the needs of those whose circumstances or inclinations induce them to prefer the commercial to the classical course. By all means in its power, it seeks to make its pupils Christian gentlemen, serviceable to their fellowmen, lovers of their country and faithful to their God.

THE NEWARK BUSINESS COLLEGE.

of the United States, and the United States is the only country in the world where a student can receive a practical education in the theory and practice of business. The student is not only taught the theory of business, but is also given the opportunity to practice it. The student is not only taught the theory of business, but is also given the opportunity to practice it.

It is a fact that the Newark Business College is the only school in the United States where a student can receive a practical education in the theory and practice of business. The student is not only taught the theory of business, but is also given the opportunity to practice it. The student is not only taught the theory of business, but is also given the opportunity to practice it.

teacher, and teachers, like poets, must be born such and not made such.

Another specialty of this school is business computation. Students are taught in this branch to foot rapidly and correctly long columns of from forty to eighty items, not by adding digit to digit, but by a system of reading groups of figures as one reads groups of letters constituting words. Also they are drilled in making extensions, that is in multiplying factors both of which are mixed numbers, as 27  $\frac{35}{4}$  lbs. at 16  $\frac{1}{2}$  cts. per lb. This operation is performed by simple division mostly by 2 and 4, and the answer is brought correct to the cent. Finally,

there is but one rate of tuition for any of all the studies, \$7.00 per month, on the principle of *Par aequo galis* *liberis est* *guarantee*.

M. M. MULVEY, A. M., PROPRIETOR.

ST. VINCENT'S ACADEMY, WALLACE PLACE, WARREN, CABINET AND BRUCE STREETS.

ST. VINCENT'S ACADEMY

**T**HIS institution, founded in 1869 by the Most Rev. Bishop Bayley for educational purposes, is under the patronage of the Rt. Rev. Bishop of Newark. The location is upon very high ground and is unsurpassed for healthfulness. It is easy of access; the Market, Bank and Warren Street cars pass the academy to and from the Oranges and the Market Street Station of the Penn. R. R. in Newark.

It offers superior attractions to parents who desire to give their children a useful as well as thorough education, and it will be the constant endeavor of the Sisters to instill into the minds of their pupils, principles of virtue and religion, to accustom them to a polite and amiable deportment, as well as to habits of order and neatness. The present large and extensive building, erected in 1888, is furnished with all the modern improvements requisite in a thorough course of study. Ample ground has been reserved exclusively for the necessary outdoor exercise of the pupils; besides, when the weather permits, they are obliged to take, daily, about an hour's walk, accompanied by one or more of the Sisters.

ST. MARY'S ACADEMY, WASHINGTON AND BECKER STREETS.

ST. MARY'S ACADEMY.

**S**T. MARY'S ACADEMY was at first known as the "Ward's Estate," and was purchased in 1850 by Rt. Rev. J. R. Bayley, first bishop of Newark. It was occupied by the Sisters of Charity, as their Mother House, until they removed to Madison, N. J., in 1861. After this the building was used as St. Mary's Orphan Asylum till 1865, when the Orphanage at South Orange was ready for the orphans. In the fall of 1865 St. Mary's Academy was opened. Part of the building was at this time a hospital. St. Michael's Hospital was not in existence then. In 1874 the old "Ward Mansion" was razed, and the present beautiful building was erected in its stead. St. Mary's Academy has ever stood among the first in the city, regarding numbers and success of its pupils. An excellent view of the academy building is shown in the illustrations on this page.

COLEMAN NATIONAL BUSINESS COLLEGE, 732 TO 740 BROAD STREET

COLEMAN NATIONAL BUSINESS COLLEGE

W

ITHIN THE CITY OF NEWARK, N. J., is situated the Coleman National Business College, which is one of the largest and most complete of its kind in the United States. It was founded in 1876, and has since that time been steadily increasing in size and reputation. The college is located on Broad Street, between 7th and 8th Streets, and covers a block of the city. It is a large, imposing building, and is one of the most prominent landmarks of Newark. The college is a well-known institution, and is attended by students from all over the United States. It is a place where students can receive a thorough education in business, and where they can learn the most up-to-date methods of doing business.

ment. The college has accommodations for about four hundred students, and its patrons come from all over the United States, where its graduates are to be found in almost every city and town. The building of the college is very complete, including all the necessary conveniences, and a large number of the best typewriting machines and ample facilities for equipping its students with all the necessary business training.

In the department of Stenography and Typewriting, only the best and most experienced teachers are employed, and it is a model school for learning the most complete and up-to-date system. While acquiring the necessary facility of writing, students are made familiar with actual business methods, and the success of the system under which they learn is indicated by the readiness with which graduates find employment. In fact, the success is the same in all the departments.

The Coleman National Business College is incorporated by acts of the New Jersey Legislature of 1876 and 1888. The original incorporators were Ex-Governor Marcus L. Ward, Ex-Mayor E. W. Reed, of Newark, Ex-United States Senator T. B. Peddie, Mr. Silas Merchant, President of the Merchant's Fire Insurance Co., Mr. S. R. W. Heath, President of the Equia's Insurance Co., and Mr. John P. Jackson.

The catalogues of this college are not only artistic gems of the most modern typography, but they contain matter of general information pertaining to Newark and the country at large which is well calculated to interest and instruct every one. This is typical of the superiority, vigor and originality of this live, up-to-date method of doing business.

NEWARK HIGH SCHOOL

THE Newark High School was opened January 3, 1855. Dr. Pennington, President of the Board of Education, in his address at the dedication, said: "The edifice is a large and imposing one, well planned and compares favorably with the most commodious buildings of the kind in this country."

When the building was opened in 1855 it was filled by pupils having the highest per cent. in scholarship and deportment in the various grammar schools, but this method of entrance was soon changed and for many years pupils have been admitted only on examination. For many years there was little Latin and less Greek taught, and there was no thoroughly systematized course of study. The first class that was prepared for college was in 1877, from which time it has sent boys and girls to college. There have

NEWARK ACADEMY, COR. HIGH AND WILLIAM STREETS.

entered the High School -1855 to 1890- 12,503 pupils, and the whole number of graduates has been 2,212.

The original lot cost \$5,000, and building \$20,000. The first principal was Mr. Isaiah Peckham, who served the public for twelve years. Then came Mr. Dunlap for three years and Mr. Lewis M. Johnson, for two-thirds of a year, and in the spring of 1871 came the present incumbent, Dr. E. O. Hovey. The number of pupils in the High school to-day (January 1, 1897) is something over 1,200; the number of teachers, 33. The school has so far outgrown the building that 220 boys and 270 girls are housed in annexes, but the new building is materializing and will be shown in the next edition of this book.

WARREN STREET SCHOOL.

NEARLY fifty years ago, James Seating, a generous-hearted man owning a large tract of land in the western part of the city, donated a plot at the corner of Wickliffe and School Streets to the city for school purposes. Here, in 1848, was built a plain two-story brick school-house, the third public school of Newark. At that time the male and female departments were under separate managements, the former on the top floor and the latter on the lower, each having an assembly room and two small recitation rooms. The school was afterward divided into six class-rooms.

In 1872 this school, not being adequate to the demands of the locality, the Central Avenue school was built and the school transferred to it and the old building closed. In 1873 it was again opened, this time as a primary school with a lady principal. In 1891 it was again found too small and a new school was built on Warren Street, west of Wickliffe.

The Warren Street school is of red brick with terra cotta and blue-stone trimmings. It is a three-story building having two large courts and the Principal's office on the first floor, while on each of the other floors are four large class rooms, with a wide corridor extending the length of the building, also a library and sitting room for the teachers. The building is heated and ventilated by the Fuller & Warren system. It is supplied with steel ceilings which, while very pretty, are not very satisfactory for school purposes. When the Warren Street

There is no one thing in which all New Englanders take a greater pride than in the glorious fact that it was but six years after the settlement of Boston, when Harvard College, one of the proudest institutions of learning in the United States, was established. So it was with the old first settlers of New Jersey, who not only brought with them their church establishment, with its glorious privilege of worshipping God after the dictates of their own consciences, but they carefully tended the scions, cultivated, watered and tenderly nourished them up into giant educational trees, and all now bearing most delicious fruit.

As we proclaim through the pages of this work, the stupendous fact that the institutions of learning of which Essex County can boast have few equals and no superiors in any county of this State, or any of her sisters, when the comparison is con-

WILLIAM N. BARRINGER, SUPL. NEWARK PUBLIC SCHOOLS.

PROF. L. O. HOVEY, PRINCIPAL HIGH SCHOOL.

finied to institutions of the same grade. This was made abundantly manifest by the grand exhibits made at Chicago at the international exhibition held there in 1893, in commemoration of the four hundredth centennial of the discovery of America by Christopher Columbus in 1492.

So far as we are able, no part of the educational interests of Essex shall be permitted to suffer, but the schools shall be all treated alike, and each shall be given its due share of exposition and attention. The beautiful illustrations of the public school buildings which have found place in this volume, show them to compare favorably with any structures, be they of stone, brick or wood, designed for school purposes, to be found anywhere. Since there is no subject which will find a place in this book of nearly so much interest as the public schools, we shall give them the first consideration. The public schools of Essex County, or the free schools, as they are usually termed, are conducted by the State, county and city in combination. The State assuming the prerogative right of looking after the best interests of its

citizens, has deemed the education of the masses as of paramount importance. To carry out its intent to educate the people or to make education free, they placed learning within the reach of all who will but exercise their right to reach out and take it. The State Board of Education or of Public Instruction consists of six members appointed by the Governor, eight members being taken from each of the two leading political parties of the eight congressional districts.

The chief executive officer is known as the State Superintendent of Public Instruction and has his office in Trenton. The next in executive authority are the County Superintendents of the several counties and the City Superintendents of the several cities of the State. The next in order come the city and township Boards of Education. The cities have two commissioners for each ward and the township boards have each nine members. The schools have each a principal and a corps of teachers large enough so that, as a rule, not more than forty children or pupils shall make up the class. Education getting

has been so simplified by officials and teachers during the early past that it seems no pupil shall fail to verily gorge himself or herself with the richest of the feast if his or her parents will it and the child desires it.

The introduction into the public school curriculum of the kindergarten for beginners, and manual training for advanced pupils in later years, have each done a marvellous work and have given pupils such glorious advantages as will not soon be forgotten. There is little doubt, since they play such a beneficent part in the work of education, but what these branches, which were at first termed innovations and had a hard struggle to get a permanent foothold, have come to stay. So beneficently inclined are the majority of those in charge that provision is made—for children whom circumstances have taken from the schools to become bread

of the State, in its secular and religious education, is a large number of them in the Church of England, and a smaller number in the Protestant Episcopal Church is an official acknowledgment to some extent, still prevails, and there is no doubt that it is to be an almost unpardonable sin to neglect the education of the children under the influence of the education of the State.

of the State, in its secular and religious education, is a large number of them in the Church of England, and a smaller number in the Protestant Episcopal Church is an official acknowledgment to some extent, still prevails, and there is no doubt that it is to be an almost unpardonable sin to neglect the education of the children under the influence of the education of the State.

The Board of Education of the city of Newark holds its meetings on the first Friday evening of each month, in the City Hall, at the City Hall, at the City Hall. The Board of Education is composed of the following members: President, William A. G. ...

Secretary, Robert D. Argue, who has his office in one of the education rooms at the City Hall, where he may be found every day from 8 A. M. to 5 P. M. Mr. Argue seems to be peculiarly well adapted for the place he fills so admirably. He attends all the meetings of the Board of Education and keeps a faithful record of all their proceedings. The Assistant Secretary of the Board is Samuel Gaiser, whose duty is to help Mr. Argue bear his burden. The Superintendent of Election and Repairs is Mr. George W. Reeve.

By a resolution of the Board of Education the school term of the year has been fixed at forty weeks, the schools opening generally on the first Tuesday of September and continuing till the latter part of June. A week or ten days is termed the short vacation during the holiday period. During the present school year, beginning September, 1896, and ending June, 1897, there has been an attendance of pupils num-

bering, as per roll kept, a little more than 30,000, about equally divided between males and females. In order that the teachers may have the advantages accruing from lectures on educational subjects, Teachers' Institutes are held on the third Saturday of February, April and November, the session extending from 9 A. M. to 12 M., and from 1.30 to 3.30 P. M. Besides these institutes designed and carried on for the special benefit of teachers employed in the city schools, there is the regular County Institute at which all the teachers in the county engaged in teaching in the public schools are expected to attend unless excused by the County Superintendent on presenting some good and sufficient reason why they desire such excuse for a non-attendance. These Institutes the teachers usually attend with alacrity, and especially is this the case when men who are thoroughly versed in educational matters and are qualified to instruct in the art of teaching and understand the true principals of pedagogy, are expected to occupy the speaker's platform. But it is not too frequent

compliments to the people, through the columns of the afternoon papers. Like Professor Hovey, Professor Sonn, is a scholarly gentleman, and the High School pupils are often heard to exclaim, "How could we do without him?" so attached have his pupils become to this excellent teacher of the higher branches of academic learning. The daily sessions of the High School begin at 9 A. M. and close at 12.15 P. M., and from 1 to 2.30 P. M. Newark conducts her own normal classes, thus fitting out her own teachers.

The Normal School is under the care of Professor Clark, who, for many years, filled most acceptably the place of principal of the Fifth Ward Grammar School. The High School was opened in its present quarters at 133 Washington Street on January 7, 1855, and during all these years, forty-two in number, two thousand and eighty five graduates have passed

HENRY P. SCHOLL, SCHOOL COMMISSIONER

children of Essex County are compelled by circumstances to close their school days when the course of study ends with the grammar school, this becomes the all-important in the mind of such as turn off at this point from their school life, and join the great bread winning brigade. While the great majority of the pupils who have finished the grammar school course show little reluctance at turning from the school-house door, and with alacrity take up the cudgel of life, seldom, if ever, thinking of the teachers and educators, and not knowing or caring whether there is such a thing as an *Alma Mater* and hardly, if ever, take a look into the book, there is yet the minority who leave its sacred precincts with tear-bedewed eyes, and who cherish every remembrance associated with their school life, and hold the grammar school diploma as the precious thing of life, and who spend all their leisure moments in pursuing the educational portion which they failed to reach, ere they, too, step out into the world, determined to use what they had learned, to their best advantage, and add thereto, in their leisure hours, all they possibly can to make themselves manly men.

It was not until 1886 that manual training was introduced into the public school curriculum. Among the many things incorporated therein, few indeed, if any, have proved of greater usefulness, and from which better results have accrued, than that branch of study known as manual training. On its introduction each district was left with the power to elect its own course. This course was continued until June, 1892. The State Board of Public Instruction directed the then State Superintendent of Public Schools, to prepare a course of study for the guidance of those schools which had incorporated manual training into their curricula, or might hereafter incorporate it. While Dr. Poland, the Superintendent, prepared the course with great care, having called to his assistance principals of such schools as had adopted it in their course of study, it was soon found that additions and changes were necessary, and as the Doctor honestly stated in his report, that the course as laid down was merely suggestive, since the course of study pursued "shall be approved by the State Board of Education."

He further said, this approval of the Board was the condition

ST. PATRICK'S PAROCHIAL SCHOOL, CENTRAL AVENUE.

precedent to the appropriation of any money for manual training purposes. But withal, the Board did not interfere, but gave to each school the widest range and largest latitude to carry out its own wishes, both as to number of manual training branches to be pursued and the amount and kind of instruction to be given. But in the exercise of this large liberty, each school had the good sense to keep close up to the course laid down in order that the purse strings might be easily unloosed when pay day came around. Among the schools of Essex County which first caught hold of the manual training innovation, as some of those who questioned the propriety of its introduction termed it, were Montclair, South Orange, Orange and East Orange, taking precedence in the order named. The following, appeared in the report of the County Superintendent to the State Superintendent of public schools for 1894.

"Again I am able to report progress in these beautiful lines of public instruction. Since my last report, East Orange has joined the ranks of the rapidly swelling army of schools, where the pupils have the wicket-gates to the realities of life, and the business of the world thrown open to them. No step backward is the motto in this county. As yet, Montclair is the only school where I am able to report the school kitchen open to the young misses, where they may take lessons in cooking and baking and good coffee making, but other schools are making ready the little bijou of kitchens where the young misses can wrestle with high art cooking. No one can fully understand the far reaching benefits of teaching along these lines till they come to a full realization of the fact how very few of the children from the common schools have opportunity to further pursue education. The kindergarten has come to stay. This I am pleased to report."

The love of trees, shrubs, plants, etc., which is springing up and truly nurtured among the pupils of almost every school, which the celebration of Arbor Day is begetting, is a beautiful result and well worth all the attention bestowed. The following is from our report of the same year we trust our readers will feel, as we do, its worthiness

ST. PETER'S PAROCHIAL SCHOOL, LIVINGSTON STREET.

ST. JOSEPH'S PAROCHIAL SCHOOL, WALLACE PLACE AND WARREN ST.

the district school, when he tried a term or two in the Troy Academy, where he was fitted for the sophomore class of Union College, but when he was not yet seventeen, a chance to make ten dollars a month and board (ground) included, he accepted instead.

This was a valuable experience, and young Barringer took advantage of every line of the same. His love for books grew, and he labored earnestly to become a school master indeed, and in three years he had made rapid advances in the higher branches of learning. Teaching seemed to come to young Barringer quite natural, and he was always ready to help on any movement for the betterment of the science of Pedagogy. He was one of the founders of the National Teachers' Association, and the New York State Teachers' Association. For awhile the Doctor studied medicine, showing such proficiency as led his acquaintances to believe that he would make his mark as a physician, but he abandoned all his bright medical promises for a teacher's life. For two years he had charge of two large Troy City Schools. While there he took a course in chemistry and physics in the Troy Polytechnic Institute, and holds to-day a scholarship in that noted institution, gained through the help he gave Professor Green in reconstructing the course of study.

From 1867 to 1877, Dr. Barringer held the principdship of the Chestnut Street School. When Mr. Sears resigned, Dr. Barringer was called to the post of City Superintendent of the Public Schools, and has held the office ever since. By virtue of his preeminence he is one of the Trustees of the great Public Library of the city of Newark. In 1872 Dr. Barringer visited the educational institutions of England, France and Germany, and brought greatly in the recognitions he received from educationalists abroad. The fair fame which the Doctor had earned as an educator, preceded him and prepared the way for that cordial reception which to him was awarded, as a representative of American Educators, and the Doctor has often and repaid him doubly well for the oil it cost.

NEWARK CITY SCHOOL

Few indeed are the number among us who seem to have been designed more surely for the road in which they are travelling, than the City Superintendent of Public Schools, William N. Barringer. For nearly a quarter of a century has this faithful servant gone in and out of the public schools of the capital city of the County of Essex, and always, so far as the writer has been able to discern, with satisfaction to pupils, parents and teachers, and honor to himself. When Mr. Barringer took hold of the city superintendency of the public schools of the city of Newark, he was no novice, but he came to the work with a fullness of years and compactness of character which eminently fitted him for the place. That he was prepared for the great work to which he was called by education and practical experience, none who knew him questioned, and the results of all the long years that he has heroically toiled, so that when his stewardship would end, he could hear the well done, and enjoy the blessed privilege of carrying the certificate of having been a good and faithful servant. Not alone did they who went in and out each day with William N. Barringer, come to a full understanding of his eminent qualifications for the post he held, or the solidity of his learning, but the facts were carried to Princeton College, New Jersey's grandest educational institution, which honored him with the title of A. M., and across the Hudson, and found a lodging place in the rich educational soil of Gotham, and they took root over there and bore for him the rich fruit of a Ph. D. from the University of the City of New York.

Now, at this time when the three score years and ten encircle his brow with its silver rim but not without his mind being as clear and physical strength all unabated, the honors and emoluments of his position are continued. While it is no part of our duty to eulogize where true worth does not commend it, we find all that is necessary when we reach the gentleman and scholar, Mr. U. W. Cutts, who for the past decade has been superintendent of the public schools in the city of Orange. That Mr. Cutts has such qualifications, which eminently fit him for school supervisor, none who know him will deny. While county superintendent of public schools, it became our duty, together with Superintendents Cutts and Barringer, to conduct examinations for the State scholarship. It was during these

GREEN STREET GERMAN AND ENGLISH SCHOOL.

examinations that it was learned how thoroughly they were devoted to the work, and how eminently worthy they were of the places they filled, and how well qualified for their calling.

Much of that musical taste found in the Orange public schools, is due to Superintendent Cutts, but we would not for one moment detract an iota, or attempt to, from others who it is well known have taken a deep interest in securing proficiency in this beautiful branch of learning. Indeed in nearly every school in the county of Essex, music is now taught, and in many of them the pupils are making such progress that many of the children on leaving school will show commendable proficiency. From one of Superintendent Cutts' late reports to the State officials, we learn that vocal music has been made a part of the regular course, and under a special instructor, and this has been going on for twenty years, and for the past few years the schools have adopted what is termed the tonic sol-fa system, which is receiving, in some places, very high commendation.

Connected with every Catholic Church there is the parochial or church school, where the children of Catholic parents are expected to get their schooling, especially in their earlier years, when those seeking higher academic or collegiate education are transferred to the Catholic academies, colleges and seminaries. As both St. Benedict's and Seaton Hall, and many others, are located in this county of Essex, the advantages of schooling under church influences for their children are unconstrained.

Patriotism is a branch of education which has come into the schools since the war of the southern rebellion, and in pursuance thereof, the stars and stripes, as one of the regulations, shall float from

TENTH WARD GERMAN AND ENGLISH SCHOOL.

YALESBURG PUBLIC SCHOOL.

The general address of our common school system has been largely supplied by foreign educators, is shown by the title of the original work of Hon. Francis Adams, Secretary of the National League of England, on the free school system of the United States, in which he says: "Although at first sight the name of a school district may appear to be an unimportant detail, it acts upon it, as the experience of the United States has proved, the efficiency of any school system depends upon it. The most formidable difficulty which the American school system encountered, is a result of this question. The name of a town in the United States as the District School. Where a district exists it is the subject of the most important and important of accident in amongst school superintendents."

Mr. Adams, however, after an extended trial of a district system, and the township plan, and the complete abandonment of the former system, if it can be secured by the most unanimous condemnation of school officers of all grades, would appear to be a question of expediency. The United States Commissioner of Education reported as follows: "The oldest American educational idea was that of Massachusetts, which looked to one school for every town containing fifty householders, with a grammar school where there were fifty more householders. A somewhat more, but more widely spread idea, was that of many schools in every township, a high school for every county, and a college for every State."

The township was the unit of the whole system, and in any thoughtful man are not being held, it ought not to be restored to the position, instead of being broken into numerous fragments, called school districts, which are now in vogue. These being invariable results of the two systems, the majority of the States are endeavoring to abolish the district, and substitute the township system. The force of the State superin-

WILLIAM A. GAY, PRESIDENT OF THE BOARD OF EDUCATION.

tendents is believed to be uniformly in favor of this change." Dr. Poland goes further and fortifies his advance by concise and easily understood statements as to its advantages. First, it equalizes school privileges. Under the old system the schools of the State have for many years presented the widest diversity, ranging from the most praiseworthy excellence to the most deplorable mediocrity.

The village and large graded schools have, as a rule, been constantly improving. The majority of ungraded rural schools, on the contrary, have gradually but surely deteriorated. This result is traceable to the absence of one or more of the following conditions: suitable buildings and appliances, efficient grading and courses of study, school year of necessary duration, properly qualified teachers and efficient expert supervision favoring local conditions. Under the old system this inequality of conditions was bound to exist, hence, anything like equality of privileges was out of the question. In

DR. HENRY J. ANDERSON, EX-PRESIDENT OF THE BOARD OF EDUCATION.

theory at least, the State guarantees to every child equal school opportunities. This guarantee has amounted to nothing in the past, so far at least as the rural schools are concerned. The State school moneys raised by uniform tax, have been distributed to the several districts of the State upon the presumption that they would be intelligently and economically disbursed, but evidence is not lacking that in scores, if not hundreds, of the small districts into which the State was formally divided, State school moneys have produced comparatively small returns.

By consolidating the school districts of a township and thereby unifying their administration, are making them a charge upon the taxable property of the whole township, and by opening them to all children residing therein, the first great step toward equality will be taken. Every child may then enjoy the best that the town affords. It equalizes school burdens. There is raised annually, by State tax, for the support of schools, an amount equal to \$5.00 per capita for each and every child of school age, five to eighteen years, residing within the State.

Of the amount so raised, there is returned to each county ninety per cent. The remaining ten per cent. is distributed among the poorer counties by the State Board of Education, in their discretion. Here there is the principle established of taxing the wealthier parts of the State for the benefit of the poorer.

PRESIDENT WILLIAM A. GAY.

No ward in the city of Newark is more fortunate in the representatives she has in the Board of Education than the Eleventh. One of her representatives, William A. Gay, Esq., having not alone the confidence of the people of the ward, in honoring him with an election to the Board in the first place, but also of the body itself, in awarding to him the distinguished consideration of its elevating Mr. Gay to the presidency. As our readers will understand, but a single member of the Board can reach the place, it is no light honor his having been selected for the exalted position. As well as the writer has been able to judge, there was no lack of tact and business acumen exercised when the selection of Mr. William A. Gay was made, as one among their number who should preside over their deliberations, guide and direct their movements and wear the honors of the first position within their gift. William A. Gay is one of those kind of men who have the faculty of making friends without an effort, and when once won they cling with magnetic tenacity, it mattering not how rapidly the wheel of life may turn or how great the changes, as in all public positions, places of honor and trust to which he has once been called, it is but his determined objection alone, to be awarded a recall or re-election when his first term shall have expired.

That Dr. Henry J. Anderson, the predecessor of President Gay, was a man in the right place, and was looked upon as an honorable, careful and painstaking presiding officer, since we ever found him in his place, and engaged in conducting the business of the Board, unselfish in all his appointments, and in order to carry out his determination to be non-partisan, he more often erred, if he ever erred, against the party where he had his own political affiliations. Excellent photos of President Gay and Ex-

HON. JAMES L. HAYS, MEMBER OF STATE BOARD OF EDUCATION.

LAFAYETTE STREET PUBLIC SCHOOL.

ST. PETER'S CATHOLIC HIGH SCHOOL, ON PRINCE STREET.

It is a common mistake to take hold of the classes in St. Peter's and attempt to find fault with the intrinsic merits of their early school training. A very common mistake it is to find fault with the advantages afforded by the systematic training which is found within the walls of St. Peter's, made high in the race of life.

**ST. JOSEPH'S PAROCHIAL SCHOOL.**

As the train passes the corner of Wallace Place and Warren Street, its attention cannot help but be drawn from being attracted to the masses of children in which, if he make inquiry, he will find a mass of the great primary educational interests of the diocese well maintained. St. Joseph's Church, their religious home, is the place to which we refer, being none other than the place containing St. Joseph's Parochial School, the largest Catholic school in the State of New Jersey.

Like all other schools under the care of the Catholic Church, every care is sought to be taken, not only to have the children thoroughly well educated in all the secular branches of learning, but also that the pupils under their instruction shall also be well rooted in general affairs, it being a common opinion of the Catholic Church that learning, both secular and religious in character, shall go hand in hand in the child's journey.

**ST. PATRICK'S PAROCHIAL SCHOOL.**

On Central Avenue, adjoining the St. Patrick's Cathedral, is located the parochial school of the cathedral. This institution is very large, as well as being very popular, being under the care of the Christian Brothers.

Many of the young men of Catholic parentage take great pride when they leave for promotion, or to take their place in the busy world, in saluting this school as their *Alma Mater*. The Sisters have charge of the primary department, where probably a greater number of children attend than any other parochial school in the city, except St. James'. St. Patrick's is the successor of St. Mary's Hall, which was formerly conducted on High Street, where the womens' department of St. Michael's Hospital now stands, and was founded by the venerable Father Senez, who at that time was pastor of St. Patrick's Church.

ST. MARY MAGDALEN.

In a little frame structure on Lister Avenue the Rev. Father Wiseman, with heroic Christian devotion, is meeting with marked success in his endeavor to build up a parish from the outlying districts immediately surrounding this church. By turning to page 67 of this book, the reader will see a photographic picture of the modest structure in which Father Wiseman is carrying out the beautiful injunction which the Master gave to St. Peter, of "Feeding my Sheep."

THE NEWARK FREE PUBLIC LIBRARY.

Never since the history of the world began has there been perpetrated, against the learning of mankind, a more heinous offense or a more dastardly crime, than was perpetrated by the Moslems after the capture of the renowned city of Alexandria, when the commander-in-chief of the capturing army of the infidel horde, wantonly committed to the flames the great

NEWARK TECHNICAL SCHOOL, ON HIGH STREET.

library of the city, which contained the greatest collection of books, pamphlets and manuscripts in the world. It was not the audacious crime alone of burning the library, of committing to the flames the literary treasures of all preceding ages, but the fact that many of the volumes which had been gathered at a mighty expenditure from all parts of the globe, many of which were of the greatest value and could not be replaced, there bring

no duplicates, when their precious contents had crumbled to ashes and had gone up in fire and smoke, amid the exultations of the savage hordes who made up the army of destruction and loot,

Which danced around this funeral pyre of history,  
Where the wreathing smoke left the world in mystery.  
The half million volumes of book lore furnishing the fuel,  
To feed the fire consuming, earth's beautiful jewels.

'Twas there, through this unheeded of Mahomedan dastardly,  
That Mahomet's deluded converts sought the mastery,  
Wading through blood, fire and smoke, to rob the world,  
And leave the flag of ignorance to the breeze untarled.

Among the black pages of history, and there are not a few, it would seem that there are none more wantonly and cruelly begimed or to compare with that one page whereon is written the history of the horror known as the sacking of Egypt's capital and the burning of the Alexandrian Library. For quite five centuries of time, the war which the followers of Mahomet waged was so relentless in character that historians tell us, that

MAIN ROOM OF THE FREE PUBLIC LIBRARY.

drawn from the treasury of the State, and committed to cultivate the sciences, arts, and professions, and to be supported by the State. It is a fact that the development of the State, and the progress of the school, would have been arrested forever had it not been for the establishment of the evening classes, which have since been supported by the State. # ESSEX COUNTY, N. J., AND ITS GOVERNMENT.

THAT the people of Essex County are, as a rule, quiet and law-abiding, has almost irrefutable demonstration in the fact that the present modest structure called a Court House situated at the junction of Market Street and Springfield Avenue, Newark, is now and has been for the past half century and more, of a capacity to hold all the litigants and lawbreakers when on trial who might assemble within its walls at any one time or for any other definite purpose.

This Court House, for which the people have a particular kind of reverence and which is venerated apparently above all other buildings, was built many years ago of sample brown stone from the quarries which have their outcroppings along the easterly border of the county—as more fully made manifest in an earlier chapter of ESSEX COUNTY, N. J., ILLUSTRATED—extending deep into the hillsides bordering the Passaic and extending from Eighth Avenue, in Newark, to North Belleville, or Avondale.

Its architecture, once seen, will make an impression on the stranger which will carry his thoughts back to the days of Alexander the Great and to the city he built at the mouth of the Nile, where these thoughts may revel in the architectural displays, evolvments from the genius of Egypt's bright sons. Whether the stone ever raised any objection to their being wrought into a style architectural so far away we know not, but this we do know—when the project of a new Court House is broached and the question warms to the height of a local contest, the old Court House wins the fight.

The building is two stories and attic and is surmounted with a unique belfry in which hangs the bell which has sounded the knell of prison fate to evildoers who, perchance, came over from the sister city of New York to try pastures green and fields that were fairer, and got

ESSEX COUNTY COURT HOUSE.

caught by our ever alert police. The lot of many a "smart" fellow who believed that his education was finished in the criminal schools, of New York City, where he had studied hard for years and where he had taken these lessons in outwitting the home police, until he felt that he had a right of putting into practice just across the Hudson where his teachers, whom he had been taught to look upon as themselves experts, feared to practice their own lessons. Yet, lo! the brightest of the schools find themselves foiled in their first and most carefully laid plots, and having been caught, are compelled to spend many years in the Jersey prisons in hard study again in learning how to make shoes and break stones scientifically.

Within the walls of this Court House—the style of architecture of which is so decidedly ancient that it gives an appearance to the visitor much more in harmony with that of ye very far distant olden times than of that which prevailed when it was built, little more than a half century ago, with the winged gods of the Egyptians in view as a model to go by—have been enacted many startling and pathetic scenes. Not in the number of these enactments is there reason to boast, but of the heart-breaking character of some and the utter hopelessness of others. The catalogue of heinous offences is short, indeed, against the majesty of the law and the quickness of the measure of the punishment meted out, has satisfied the leaders in crime that distance—when all things else are taken into consideration—lends enchantment, and the examples presented for their careful consideration by our generous-hearted judges, to the view.

If there was as much charm connected with the story of its building as about the selection of the spot of terra firma on which it stands, a few pages on that part of Essex's history would not be out of place, but it must be sufficient to say that the election

JUDGE ALBERT A. DEPUE.

EX-MAYOR JULIUS A. LEBKUECHER.

During all its palmy days no court house could have a better record made, and had the wizard Edison been ready with his novel device called the phonograph their voices to catch, or had this been the good fortune, the eloquence, the logic, and even the sympathetic tear, having been caught by the wizard's machine, would come forth at call of some young limb of the law who, having forgotten all, could have immediately at hand the sarcasm of William (Speaker) Pennington, the logic of a Bradley, who carried law lore in his head, and ever after the presidential wrestle between Tilden and Hayes, wore on his face presidential fate. Indeed, to the rescue hundreds might come to help out his eloquence and perhaps win his case if care enough was taken as the crank was turned to bring up the right man at the right time and in

EX-FREEHOLDER C. C. COURSEY.

the right place, for surely 'twould seem a trifle queer to here strike on the listening jurors' ear, rare bits of true eloquence as the time drew near, or one of those grand perorations of a Frelinghuysen, a Runyon or a Parker, when all that was wanted was what the forgotten alone could supply—that sympathetic tear so effective when seen by big-hearted jurors.

What Edison, the wizard, or Weston, the marvellous electrician, may do in this line in the future we know not, but will present a horoscope quite clear, and reserve for a closing chapter, for since patience is such a bright jewel we have reason to wait, since it has been whispered that one or the other will invent a machine which will not alone re-echo the evidence and pleadings then, perhaps, go further and try the whole case.

ESSEX COUNTY HOSPITAL FOR THE INSANE.

ESSEX County is widely known for the high standard of its charitable and penal institutions. The Hospital for the Insane is recognized as the model county insti-

FREEHOLDER JOHN J. HANLY.

(the director) reported the necessity of procuring a permanent site for the asylum. Finally, the South Orange Avenue site was selected, and in 1883 after public sentiment had gradually grown in favor of it, the new asylum was partially completed and ready for occupancy in 1884. The Camden Street building became much overcrowded, and over 300 patients were removed to the new buildings Nov. 9, 1894.

The Grand Jury, of which Leslie D. Ward was foreman, made a presentment during that year, advising better direct medical care of the county insane. At the September meeting of the Board, James E. Howell introduced a resolution changing the system of direct management, from that of warden to that of a competent medical officer as Superintendent, similar to the

tution of its class in the United States. The motive for its establishment was occasioned by the overcrowded condition of the only State asylum at Trenton, where in 1871, Essex maintained 110 patients. The Committee on Lunacy of the Board of Freeholders, then composed of D. J. Canfield, Wm. M. Freeman, Wm. Gorman, M. Smith and Wm. Cadmus, after vain efforts to secure entrance for Essex patients in asylums of adjoining States, reported in 1872, the necessity of establishing an asylum for the insane in the county. On the prompt action of the Board, the Camden Street site was secured, and \$15,600 was expended in buildings which were enlarged as the occasion required. The Camden Street site was ready for occupancy in August, 1872, and received as a transfer from the State Asylum fifteen patients, and nineteen from the Newark Almshouse, who had been temporarily cared for. Major John Leonard was appointed Warden and Dr. J. A. Cross, visiting physician.

In 1873 the Committee on Lunacy, composed of D. J. Canfield, Dr. D. S. Smith, T. H. Smith, D. M. Skinner and Edgar Farmer,

proceeded to act under the powers conferred upon it by Lord John Berkeley and Sir Philip Carteret in the first Constitution of New Jersey, to 'constitute all courts, together with the limits, powers and jurisdictions of the same.'

"On November 13, 1675, the General Assembly enacted 'that there be two of the aforesaid courts kept in the year in each respective county.' In the act, Newark and Elizabethtown were constituted a county, but the county was not named. The original boundaries of the county were fixed, and the name of Essex determined in 1682. The fees, the terms of court, the officers and the judges were all provided for with the greatest detail and nicety.

M. J. KEARNS, COUNSELLOR-AT-LAW.

same time, provided for a 'Court of Assize to be held in this province' annually in the town of Woodbridge, the fees being twice the fees of the County Courts. This was the original Supreme Court. It was provided that no appeal was to be taken from a decision of a County Court in any case in which the amount involved was under twenty pounds. When the Lord Proprietor's rights were sold to the twenty-four Proprietors in 1682, one of the articles in their 'Fundamental Constitution' was that all persons were to plead in any court, either for themselves or for their friends, but that no person was allowed to take any money for pleading or for legal advice. This was because of an act of 1676, which forbade Justices of the Peace to plead in court, except in cases in which they were either the complainants or defendants.

"The first real law for regulating the practice of law was passed about 1680, and was entitled 'An Act for Regulating Attorneys in this Province.' It laid a fine of twenty pounds upon Justices of the Peace, Sheriffs, Clerks of the Courts and others who should practice law in the courts, except in their

own personal behalf. It was proposed, in 1698, that a law should be passed, limiting the practice of the law for 'fee or hire' to such as should be 'admitted to practice by license by the Governor.' This law was not enacted because Jeremiah Basse, who was acting as Governor, who had been ordered by the Proprietors to have the law passed, was not legally the Governor and was very unpopular.

"In 1702 the government of the Province was turned over to the Crown by the Proprietors, and Lord Cornbury, in 1704, ordained the establishment of the 'Courts of Judicature,' in an instrument which forms the foundation of the entire judicial system of the present State of New Jersey. It defined the powers and duties of the courts, and laid down certain rules of procedure.

"In Lord Cornbury's ordinance it was provided that the judges could make rules for practicing in the courts in the same way and to the same extent as was done by the judges of the Courts of Queen's Bench, Common Pleas and Exchequer, in England. From that day to this the licensing of lawyers has been regulated, not by statute, but by the rules of the Supreme

Court, with the sole exception of the 'Five Counselor's act' which was repealed this year (1894).

"The first systematic resistance to the oppressive acts of George III was made by the members of the New Jersey Bar. At the September term of the Supreme Court held at Amboy in 1765, the lawyers met and resolved unanimously that they would not use the stamps under any circumstances whatever. When the stamps arrived the lawyers would not buy them and all over New Jersey the courts were closed, and remained closed until the Stamp act was repealed.

"The strength that this

LEONARD RUMMEN.

ABNER KAITSCH, COUNSELOR-AT-LAW.

Huguenot descent, and with the Van Campens, his family were the earliest settlers of the Minisink Flats. These two families emigrated about the same time from Esopus, now Kingston, in the county of Ulster, New York, and settled on the Pennsylvania and New Jersey sides of the Delaware River, above the Water Gap. The Van Campens (originally spelled Van Der Kempen) were emigrants from Holland.

Benjamin Depue, the great-grandfather of David A. Depue, was born February 22, 1729. He married Catharine, daughter of Colonel Abraham Van Campen, Judge of the Court of Common Pleas of Sussex County, N. J., in 1761, reappointed in 1776 and again in 1796. At the age of 20, Colonel Van Campen served as a colonel in the Colonial Army, raised

EX-ASSEMBLYMAN JAMES MARFALL.

to protect the country against the Indians in the War of 1755. Soon after his marriage, Benjamin Depue settled in Northampton County, Pa., in Lower Mount Bethel, on the Delaware. Here his son Abraham Depue was born September 28, 1765. Abraham married Susan, daughter of Michael Hoffman, and their son Benjamin Depue was born September 1, 1796. On May 10, 1821, Benjamin married Elizabeth, daughter of Moses Ayres, and subsequently removed to Upper Mount Bethel, in the same county, where David A. Depue was born, October 27, 1826. At a suitable age David A. Depue was placed in the school of the Rev. Dr. John Vanderveer, in Easton, Pa., where he received his preliminary education. He entered Princeton College in 1843, and was graduated in 1846.

Immediately after graduation, he began the study of law in the office of John M. Sherrad, Esq., of Belvidere, N. J., whither his family had moved in 1840. Here he began the practice of his profession, and continued in it until 1866. At this time he

had attained so high a rank in his profession that the attention of Governor Marcus L. Ward was attracted to him, when it became necessary to appoint an Associate Justice of the Supreme Court in the place of Judge Daniel Haines, whose term of office expired in that year. The result was the appointment of Mr. Depue on November 15, 1866, the circuit assigned to him being the counties of Essex and Union. His removal to Newark soon followed.

On the expiration of his term in 1873, he was reappointed by Governor Joel Parker, was again reappointed in 1880 by Governor George B. McClellan, again in 1887 by Governor Robert S. Green, and still again by Governor George T. Werts. His present term expires November 15, 1901.

The circuit held by Judge Depue is the most important and laborious in the State, embracing the city of Newark and the county of Essex. His opinions in the Supreme Court and Court of Errors and Appeals, of which, by the judicial system

of New Jersey, he is a member, are characterized by learning and laborious research, as well as by the clear and concise statement of legal principles. Of these qualities and of his opinions, as published in the reports, the frequent citations of them in the Federal Courts and the courts of sister States, and in treatises on the law, afford ample evidence.

In 1874 he was appointed, with Chief Justice Beasley and Cortlandt Parker, to revise the laws of New Jersey, a work which was completed to the great satisfaction of the bench and bar throughout the State.

In 1874 Judge Depue received the degree of LL. D. from Rutgers College, New Brunswick, and in 1880, the same degree was conferred upon him by Princeton College, New Jersey.

HENRY T. MILLER, PATENT ATTORNEY.

EX-ASSEMBLYMAN JOSEPH P. CLARK.

COMMITTEE

Robert W. Van Wastarcken represents the Westarcken district in the county, and has been a part of the committee for a number of years, and is well known in the county. He has been a member of the Board of Freeholders for many years, and has been engaged in various public and private enterprises. He is a member of the Essex County Board of Freeholders, and has been a member of the Essex County Board of Assessors for many years. He is also a member of the Essex County Board of Public Works, and has been a member of the Essex County Board of Health.

JOHN H. VAN DUSEN

For many years he has been a member of the Essex County Board of Freeholders, and has been a member of the Essex County Board of Assessors for many years. He is also a member of the Essex County Board of Public Works, and has been a member of the Essex County Board of Health.

Between 1878 and 1875, seven great roads were constructed: Springfield,

B. Bray, J. Wesley Van Gerson, T. Madison Condit, Wallace Oughltree and Filmore Condit. Mr. Bray served with credit in the Union army during the war, subsequently residing in Orange, where he has been engaged in business. Mr. Van Gerson has been a life-long resident of Montclair, where he has been highly esteemed and influential in public affairs. T. Madison Condit represents the Roseville district in the Board of Freeholders, and is connected with the D. L. & W. R. R. Mr. Oughltree, previous to 1870, was engaged in business in Newark, but subsequently became a resident of East Orange.

Besides the responsibility for maintaining the original avenues in proper condition, the collection and settlement of a large amount of outstanding assessments, the improvement of other roads under the provisions of the State Road Act, and of dealing with important questions relating to electric street railway construction upon the county roads, fell upon this committee. That these important trusts, under the leadership of Chairman

Bray, have been executed with intelligent fidelity to the public interests, justifying the judgment of Director McGowan in his selection of the committee, and reflecting credit upon the Board of Freeholders, is generally believed.

Filmore Condit represents the Filmore district in the Board of Freeholders, and he is one of the most active members on the Committee on Road and Assessments. He is well known to the people of Essex County, and has been a member of the Essex County Board of Freeholders for many years. He is also a member of the Essex County Board of Assessors, and has been a member of the Essex County Board of Public Works. He is a member of the Essex County Board of Health, and has been a member of the Essex County Board of Education.

ESSEX COUNTY, N. J. COMMITTEE

FREEHOLDER JOSEPH B. BRAY.

PROSECUTOR'S OFFICE.

AT the end of the hall, acting (if such a word may be applied to the two small but cozy little offices) as guardians to the larger and more imposing room set apart for the uses and purposes of the grand jury, which holds within three stated sessions during the year, is where the Prosecutor of the Pleas transacts his office business. For the past ten years, Elvin W. Crane, Esq., a lawyer of fine attainments, has occupied the position. To say that the criminal class have a wholesome dread of his power before judge and jury, to arraign and convict, is only to record the truth as they often rehearse it, and keep as clear of their nefarious business of law-breaking as it is possible in the deep depravity of their natures to do. Not a small part of that decrease in the number of cases with which the criminal courts have to deal, it is safe to say, is largely due from the fear of conviction and punishment, which is almost certain to follow when the offenders get into the hands of Prosecutor Crane or his learned assistant Louis Hood, who has proved an apt scholar in the convicting ways of Elvin W. Crane. Although Mr. Crane and his assistant, often find pitted against them, in the trial of important cases, some of the most noted talent of the bar of the State of New Jersey and the County of Essex, they seldom fail to score a success, the criminal receiving his just deserts.

Elvin W. Crane was born in Brooklyn, on October 20, 1853. He received a public school education, and when 16 years old entered the office of Bradley & Abeel as a student-at-law. He was admitted as attorney in February, 1875, and as a counselor in February, 1882. When Colonel Abeel received his second appointment as Prosecutor, in 1877, Mr. Crane became his assistant, and acted in that capacity throughout the terms of

VIEW ON JERSEY STREET.

Colonel Abeel and his successor, Oscar Keene. On the expiration of the term of the latter, in 1888, Governor Green appointed Mr. Crane Prosecutor of the Pleas of Essex County, and Governor Werts re-appointed him in 1893. Mr. Crane makes an able Prosecutor, and has won the admiration of the entire State by his skilful manner of conducting difficult cases.

For many years Mr. Crane has been a member of the Jeffersonian Club, and taken an active part in the management of this Democratic institution filling nearly all the more important offices, with credit to himself and with honor to the club, and is at this time (1897) its president. Mr. Crane was for several years a member of the Board of Trustees of the Newark City Home, at Verona.

LOUIS HOOD.

LOUIS HOOD is the Assistant Prosecuting Attorney of Essex County. He was born at Radwonke, in Posen, a province of the German Empire, on February 13, 1857. At the

age of 9 years, he arrived in America, and three years later he came to Newark, where he began his school-life under the tutelage of ex-Mayor Haynes. After passing through the High School he became a student at Yale and Columbia Colleges, and taking a course of law in those two institutions, he was admitted to the bar in 1880. He received the Civil Law degree in 1882, and continued his studies in the office of Smith & Martin, New York, and with John R. Emery, of Newark, and was admitted an attorney in 1882.

When the Democratic party came into power in 1884, Mr. Hood was made a Police Justice, and held that position while the Democratic party remained in control. During this period, and after his retirement, he was associated with Judge

FILMORE CONDIT, FREEHOLDER.

...with a view to practice as an attorney on the ... He remained an associate of Mr. Adams until 1893, but has been connected with the Prosecutor's Office for the last six years, acting as clerk to the Grand Jury, to the Prosecutor, being appointed by the Court. Mr. Sears was elected to the Board of Education from the Eleventh Ward and was a school commissioner for four years, from 1883 to 1888. He was a charter member of the Jeffersonian Club, and has been a member of the Democratic Executive Committee of this ward for thirteen years.

DANIEL M. DILL, M. D.

THE student of his school can remember that twenty years ago he was engaged in the successful practice of his profession in that part of the city known as the Eleventh Ward, and many have since then found himself worthy of a tribute of a page or two in this column. By persons who have had some personal acquaintance with him, and who are anxious to extend an offering.

Dr. Dill has been a member of the Board of Education from the Eleventh Ward, and was a school commissioner for four years, from 1883 to 1888. He was a charter member of the Jeffersonian Club, and has been a member of the Democratic Executive Committee of this ward for thirteen years.

D. M. DILL, M. D.

the county legislature, commonly termed the Board of Chosen Freeholders, where he has demonstrated a watchful care over all the county's interests in general, and his immediate constituency in particular.

#### GEORGE WILHELM.

WHEN the wide open arms of this land of liberty and freedom received and welcomed to her embrace the person of Ex-Freeholder George Wilhelm, she made no mistake. This son of the dear old German Lutheland, long after he heard the calls of freedom coming down the lines of time, and when he could no longer feel but resistance was vain, he bade adieu to the scenes of his young life, came to America, and cast in his lot with those who had come before. That the hopes of Ex-Freeholder Wilhelm have been realized none will deny. His business life has been one of success, and that he has proved a valued citizen, we have abundant evidence of the same, in the respect in which he is held by his promotion to a seat in the county legislature.

responsible position in the great industrial establishment of the Ballantines, he has on several occasions been called to the enactment of the roll of good citizenship, by being elected to the aldermanship of his ward and as the representative of his district in the State legislature. He has always taken a lively interest in all public affairs, and ready to lend his aid in promoting the people's welfare.

#### R. R. COURSEN.

AMONG the freeholders of the past, few indeed of the number have been more thoroughly devoted to the duties of the office in general, and have shown a clearer right to be the watchman on the tower, than Mr. R. R. Coursen, whose photo appears on page 130. A thorough mechanic himself, a mason and builder by occupation, he went into the board fully armed for the protection, not only of the interests of his constituents, but fully prepared by his ability and experience, to promote, protect and defend the general good. Space forbids us to say more than that in his business as mason and builder

GROUP OF WELL-KNOWN CITIZENS OF ESSEX COUNTY.

#### HON. W. W. HAWKINS.

Hawkins, who has his dwelling in the same house (then the ferry) in which the great Washington stood while his defeated army was crossing the river by way of the ferry, during their retreat from the battle of Long Island, into and across New Jersey. The house having been removed from its old place, now stands at 487 Ferry Street, and near it stands a tree which was severed in twain by a cannon shot fired by the pursuing, victorious British army. Mr. Hawkins has occupied the premises for many years, and takes not a little pride in rehearsing the historical facts surrounding, and of which his pleasant home is the centre. Although Mr. Hawkins has held a prominent and

he was a success. Among the many exhibits of his skill scattered over the county, we will only call the readers attention to the new building of the East Orange National Bank, a model structure, the beautiful architecture and artistic finish of which, ought to satisfy all that our tribute has not been misplaced.

#### JOHN J. HANLEY.

MEN are differently endowed, one having a faculty where devotion will bring forth out of a purity of gifts, rich results, which are not alone pleasing to his neighbors, but gratifying to himself; then comes another, who with equal or even superior endowments and rarer opportunities, fails in the application; again, there are those to whom nature has been chary of her gifts. These latter we often see go forth ready to

S

GEORGE D. HAYNE.

A. C. ... GEORGE D. HAYNE.

gigantic strides the city was making toward the grand positions she holds to-day among the cities of the western world, has she been blessed with a more competent, painstaking, thoroughly safe and always affable postmaster, than he who handles the helm to-day, Hon. Joseph E. Haynes. Postmaster Haynes came into the office as successor to William D. Rutan, who was called to the office of the Internal Revenue Collectorship but a few months after he had taken the oath of office. So far, Postmaster Haynes has left the roster of the office just as he found it, with the single exception of his first assistant, having been satisfied to let well enough alone where everything was running smoothly, waiting till his argus eye should cover a recreant to a confided trust before making a change. His commission for the term commencing June, 1896, signed by Grover Cleveland, Newark being, as a matter of course, a presidential office.

The new postmaster was not unknown to the people before he was called to the responsible place of postmaster, since he had occupied the chair of the Mayorality of Newark for five successive terms. Indeed, so well known and so well beloved was Joseph E. Haynes, and such a thoroughly upright Chief Executive Officer, and so smoothly did city affairs run under his administration, that he was asked to retain the office for the unprecedented term of a decade of years.

Postmaster Haynes began life as a teacher, and for many years was principal of the Thirteenth Ward Grammar School, and thousands of men and women in nearly all the walks of

VIEW ON THE PASSAIC RIVER.

life, who have enjoyed the privilege of his tutelage, now seek opportunity to give expression to the love and affection which they bear their old teacher. Although the postmaster has passed the meridian of life, he is still hale and hearty, and exercises in his new office the same watchful care over the nearly three hundred subordinates connected with the post office, and is just as ready to pounce upon a negligent or misdoer now as he was upon the truant or laggard in the old Thirteenth Ward Grammar School, twenty years ago.

GEORGE D. HAYNES.

IT is little wonder that in selecting his First Assistant, Postmaster Haynes should let his choice fall upon his own son, since he was well conversant with his high character and his eminent fitness for the place. The conduct of Geo. D. Haynes

has been such in the management of the affairs of his responsible position, as to please and satisfy the most exacting. Always polite and being the possessor of one of those buoyant natures, it becomes a pleasure with anybody who in the course of business finds it necessary to come in contact with him, and few, if any, ever quit his presence without the feeling that Geo. D. Haynes is the right man in the right place.

JAMES F. CONNELLY

IN far-away Osada and Hoga, Japan, Hon. James F. Connelly, one of our well-known, highly respected and popular young men, is acting the part of a good citizen by conducting the business of the two consulates named above, through the appointment of the President of the United States. To the consulate business, previous to this high and responsible position which he is filling to the entire satisfaction of Mr. Cleveland and the people with whom he comes

R. WAYNE PARKER, REPRESENTATIVE TO CONGRESS

JAMES SMITH, JR., UNITED STATES SENATOR

BETWEEN WELLS AND THE MILLS.

THE HAULING

EVERYBODY knows that the hauling of iron ore from the mines to the mills is a very important part of the business. In the early days of the industry, the ore was hauled by mules or horses, but as the industry grew, the use of railroads became necessary. The first railroad for hauling iron ore was built in 1842, and since that time the industry has grown rapidly. The hauling of iron ore is now done almost entirely by railroads, and the cost of hauling has become a very important factor in the cost of the iron. The hauling of iron ore is a very important part of the business, and it is one of the most important factors in the cost of the iron.

THE WELLS OF TRALE

THE WELLS OF TRALE are the most important wells in the county, and they are the source of the water supply for the town.

language of their own. "The object of the association is the promotion of trade, the giving of proper direction and impetus to all commercial movements, the encouragement of intercourse between business men, the improvement of facilities for transportation, the correction of abuses, the diffusion of information concerning the trades, manufactures and other interests of the city of Newark, the co-operation of this with similar societies in other cities and the development and promotion of the commercial and other interests." The association has been called upon to mourn the loss of several of its presiding officers, all of whom have been men of large business faculties and engagements, and have been called away at times when they could not well be spared. At the time we write, the emblems of sorrow over the loss of President Ure are draped on the chair he occupied, and the tears of sorrow over the loss of President Samuel Awater are scarce yet dry; a man beloved by all. The officers of the Board of Trade are as follows, viz.: President, vacant; Vice-Presidents, James A. Coe, Cyrus Peck and James A. Higbie; Treasurer, James E. Fleming; Secretary, P. T. Quinn.

R. WAYNE PARKER

CONGRESSMAN R. Wayne Parker, representing the Newark District in the Congress of the United States, is a man whom the people delight to honor and one whom they have called from his briefs, being by profession a lawyer, and in the footsteps of his illustrious father, Cortland Parker, Esq., who stands at the head of the bar, not only of the courts of Essex County but of the State as well; a man who has grown great in the walks of professional and private life. R. Wayne Parker has steadily grown in popularity and in the respect of the citizens of Essex. From time to time he laid aside his professional work to represent his assembly district in the State Legislature, until he was selected for the high honor of being the successor of the author of Ben Bolt, in Congress of the United States. Mr. Parker is an Essex County man to the core and is now representing in Congress the city in which he was born and reared, and if more were required in proof of the esteem in which he is held, we have only to refer to the the majority he received at his late re-election.

ALLEN L. BASSETT, (DECEASED)

ALLEN L. BASSETT

WHEN Colonel Allen L. Bassett died, New Jersey lost one of her most gallant children and a son of whom every one that knew him twas but to love him, and few men indeed have died of late years whose loss has been more sincerely mourned than his. For several years Col. Bassett presided over the deliberations of the Board of Trade, and no institution ever had

SETH BOYDEN MONUMENT IN WASHINGTON PARK.

COL. JAMES E. FLEMING

WHETHER you take Col. James E. Fleming and think of him as the Treasurer of the Board of Trade, or as the head of the immense coal business which has grown up under his personal care, or as the organizer and commander of the Essex Troop of dashing cavalry, is seen the man and official to whom, when a trust of any character was imposed, was never known to lack one in its fulfillment to the letter. For several years Col. Fleming has handled the funds of the Board of Trade as its Treasurer, and from the time of his first election to the responsible position his re-election has been found a work of entire unanimity. Col. RESIDENCE OF WILLIAM A. URE.

WILLIAM A. URE

William A. Ure was born in Essex County, N. J., on the 10th of February, 1837. He was educated in the common schools of his native county, and in the Newark Normal School. He spent his early years on his father's farm, and then worked as a printer in Newark. He was a member of the Newark Board of Trade, and was elected its president in 1881. He died on the 10th of February, 1891.

He was a successful career, a worthy exemplar of the great fact which will pass along down the line of his life-work, so plainly defined as to have its impress everywhere he moved; in the language of the poet who truthfully wrote:

His onward fame he gained not by surprise,  
He that would win must labor for the prize.

William A. Ure began life as a reporter, and if it can be said of any other class than the poets that they were born to this or that, it may as well be said that he was a born newspaper man, and that he carefully petted and abundantly nurtured his ideal, so that only to survey the marvelous result in the culmination of his first and last great work, the Newark *Sunday Call*, which will ever stand a monument to his life-work and be a continually speaking memorial of how he wrought to fill the weakling paper which he first came into his hands, with that vitality which he felt assured would give it renewed life, and each Sunday

MEMBER, BOARD OF TRADE.

# NEWARK CITY GOVERNMENT.

WHILE the greater part of Essex County is, indeed city—but few acres of her soil being yet given over to the plough and the harrow, the shovel and the hoe—yet it is well to mark the division

and touch the history in brief of the great industrial city of the western world which has been built upon a large section of her territory, under the name, style and title of Newark, New Jersey. Not unlike many of our great western cities, Newark has had a truly phenomenal growth and a prosperity of her own quite unexampled.

No city in this country, with perhaps the exception of New York, Chicago and San Francisco, with one or two other of the mighty number of beautiful and thriving cities among those which have multiplied with startling rapidity; and all within the four short centuries of time since Columbus planted the flags of Ferdinand and Isabella, the then king and queen of Spain, on that little isle of the Bahama group, made famous by the horde of *felines* which the great navigator found in peaceful and undisturbed possession when he landed his jaded and half mutinous crew—when considering all its reactions, has had such a marvellous growth and career as this Newark, city of teeming industries and the capital

NEWARK CITY HALL.

city of Essex, of whose beauties we love to bear record, and of the grandeur of which we delight to write.

But little more than two hundred years have cycled by since the little band gathered round the leaders' charming daughter and bestowed upon her the honor of christening the new town on the Passaic, Newark.

From Connecticut, the little company came armed with a heroic de-

votion to the religion they loved, and a sacrificial fervor which would brook no restraint when the worship of their Heavenly Father, and the adoration of his Son was the true religious work being done. As all new cities, boroughs and towns must needs have a government, the new city of Newark must on no account be, or become an exception; nor was it.

If ever church and state came together and at white heat, the government of Newark was a bright particular example of such a coalescing. The men and women who came were made of the right kind of stuff, and as the town grew the government stood ready harnessed to take up the pace, and for quite forty years it was an open, easy race with the church in the lead and the State close up. Some of the early writers of Newark history set the government down as "essentially religious," and left it at that; others said it was a combination of the "Theocracy of the Jews" and a "Democratic town meeting" of New England. One fact is ever at the front in all the governmental affairs, and that was, that everybody turned out and took a hand in the primary work of government forming. But there was still another, and that the all-potent, viz.: None but the saints were permitted to take part, hold office or vote. The written law read, "none shall be admitted freemen but such planters as are members of some or other of the Congregational churches," "nor shall any but such be chosen to the magistracy;" "nor

boots, "manhood," and started forth as a city proper. As in nearly all young communities, the great men soon out-grew the places for their political enthrallment, and as Newark did not prove an exception, however devoutly it might have been wished for, there were continual calls for supplements to the charter, and the legislature was kept busy fulminating supplements until they became confusing and burthensome. Finally, in 1854, the Common Council appointed a Board of Commissioners to unravel the tangled skein of supplements and touch with index finger the tender spots in the *derme* of the growing crop of seekers and holders of offices under their provisions.

The commissioners entered heroically upon the task, and finally succeeded to their own satisfaction, in preparing a code from which had been, as they thought and had abundant and satisfactory reasons for believing, eliminated all the questionable features, but, when the Council had received their report, and as a whole had gone over their work with great care, places were found in which officials were entrenched, who would not surrender. Late in 1855, a committee of citizens joined in the work and finally succeeded in presenting a charter quite satisfactory to the majority, and on March 20, 1857, it having received the sanction of the law-making body of the State, was signed by the Governor.

Newark, at this important period of its history, was divided into eleven wards, each of which, under its provisions, were entitled to two Aldermen. These, with his Honor, the Mayor, constituted the city government. Provision was also made in the charter for the formation of a Board of Education, to which was deputed the work of taking care of the public schools, minus the appropriations, which was reserved to the Common Council. While much wisdom had been displayed in the formation of the government, a practical application soon proved that simplicity had been too much simplified, and that many absolute requirements, in a rapidly growing community, had not been met, and the supplement mill must needs be started

and the old business of grinding out supplements begin again.

One of the first to pass through the hopper was the supplement establishing a Receiver of Taxes, and the providing of a sinking fund to meet the city's bonded debt when its payment was demanded.

Next in order came the Board of As-

essment and Revision of Taxes, an institution of which the city was sadly in need of. This institution, which has proved such a boon to the tax-paying public, came into existence in 1866. At this time, 1897, the Board continues with the same number of Commissioners as when it was first organized, but all are now appointed by the Mayor.

In 1873 the demand made by the growth of the city, and the extent and importance of its financial business, was met by the formation of a Board of Finance, with an officer called the Comptroller standing at its head. So smoothly, economically and wisely has the affairs of this department been conducted, but few changes, and these of a minor character, have been deemed necessary.

The mighty growth of the city and its expanse hill-ward, seemed to demand some radical changes in the license methods of the city. To meet this a supplement was obtained and the Board of Commissioners were appointed under its provisions. These have continued with about the same duties and powers as when they first began.

Now we approach an all important part of her history—that, which is connected with The Water Board. In 1860, a supplement came through the

WILLIAM A. McALPIN

prosperity and thrift of the inhabitants, who as a rule are well and comfortably housed, while many of the larger dwellings, as illustrations of the handsome homes of the city given in this work will show, are models of comfort, convenience and beauty. The population at the present time, 1897, exceeds two hundred and twenty-five thousand souls.

The future growth and prosperity of the city is assured, and will be continuous, steady and promises to be vast. New manufacturing industries are constantly being attracted to the city by its magnificent facilities for production and transportation, the reasonable prices and rents asked for lands and factories, the low tax rate and the perfect police and fire protection, which the city affords. And with this constant accession of new industries and enterprises, comes a vast and steady flowing stream of workmen and their families, certain of employment, present comfort and future competence. In addition to all these, there is a large overflow every year from the city of New York, of those who look for cheaper and quieter homes than the great metropolis can furnish. Moreover, the industries of the city are so diversified that no depression in any one industry can materially interfere with the general growth and prosperity of the town. Altogether, it seems safe to predict that the city of Newark will at no very distant day be the largest and most flourishing manufacturing city in the United States, if not in the world.

The question now being mooted of a "greater Newark," which shall take in the larger portion of Essex and those divisions of our sister county of Hudson, known as Harrison and Kearny, the latter named in honor of the heroic Phil Kearny, who lost his life at Chantilly, and a bronze statue of whom adorns the beautiful Military Park, will ere long be answered in the city of Newark with a teeming population of 500,000 souls. The city is both well and cheaply governed. The tax rate for the year 1896 was only \$1.96 upon each \$100 of assessed valuation, and this included the county as well as the city rate. The assessed valuation of property within the city for taxable purposes was, in 1896, after deducting debts, \$133,483,311. The

HOME OF THE FRIENDLESS, SOUTH ORANGE AVENUE.

taxable property was, the year preceding, \$130,085,787, which was an increase over the assessed valuations for 1895 of \$3,397,537. The credit of the city can hardly be surpassed. The management of its finances is honest, conservative and wise; and although public improvements

are being constantly carried on, and there is never any pause in the efforts of municipal authorities to improve, beautify and adorn the city, yet all these public works are carried on and managed in so wise and skillful a manner, that the burden of paying for them is scarcely felt by the taxpayers. So excellent is the credit of the city, that it has no difficulty in placing such bonds as it finds necessary to issue, at 4 and 4½ per cent.

The inhabitants of the city are in the main enterprising, industrious, thrifty and prosperous. Considering the size of the city, such poverty as exists within its borders is almost insignificant. There is employment for all who are able and willing to work, and at fair wages, so that none, except those stricken by disaster or disease need know the name of want. And for these unfortunate and distressed, charity is liberal and abundant.

The city was first incorporated by the name of "The Mayor and Common Council of the City of Newark," and this name has never been changed in all the subsequent legislation relating to the city and its government, although many changes have been made in the powers, duties and responsibilities of these officers.

The present Mayor of the city is James M. Seymour, who succeeded Julius A. Lebkuecher in May, 1896. The Mayor is allowed a private secretary and one additional clerk, and in addition, a police officer is detailed to

Council has now, but little to do besides making the annual appropriations demanded by the various commissions.  
The Common Council, as the Board of Alderman is styled, is composed at present of thirty members, two aldermen being elected from each of the fifteen wards into which the city is at present divided. The Aldermen composing the present board are: First Ward, Edmund S. Joy, David D. Biagraw; Second, Louis M. Finger, Theodore B. Guerin; Third, John Buhl, Charles Jacob; Fourth, Abraham Manners, William S. Richter; Fifth, James A. Mc Carthy, Charles Weigend; Sixth, William O. Kuebler, Edward M. Waldron; Seventh, Frank B. Knott, William J. Joyce, Eighth, Winton C. Garrison, Sidney N. Ogden; Ninth, George Vintne, Sylvanis Shepperd; Tenth, William J. Morrow, Minard A. Knapp; Eleventh, Edward W. Benjamin, Abram C. Denman; Twelfth, William Harrigan, Herman Stahten; Thirteenth, Jacob Schreihofel, Ferdinand Hosp; Fourteenth, Valentine Erhold, John Bear; Fifteenth, William Mungle, Joseph S. Sutphen.  
The Police Commissioners are appointed by the Mayor and

form a non-partisan body, two of each number being chosen from each of the great political parties.  
The present Police Commissioners are, Edwin F. ... Louis S. R. ... and H. Ubert, and Mayor ... The Secretary of the Board is Joseph M. Cox, ... of the Police Department, ... after ... of ...

THE MAYOR, CLERK GLO. HERMANN.

officered by a chief, four captains, and the necessary subordinate officers. For police purposes the city is divided into four precincts, the first being under the command of Capt. William P. Daly; the second under the command of Capt. Michael Corbitt; the third under the command of Capt. Andrew J. McManus; and the fourth under the command of Capt. John H. Ubhaus.

The Board of Fire Commissioners is also appointed by the Mayor, and is likewise a non-partisan body. The present Fire Commissioners are; Henry R. Baker, President; Henry C. Rommell, Hugo Menzel. The Chief of the Fire Department is Robert Kiersted. The department possesses steam fire engines, hook and ladder companies and chemical engine. It has an elaborate and complete fire-alarm telegraph system, and fire-alarm signal boxes, so that a fire in any part of the city may be reached by the fire engines at once. In addition to the engines maintained by the fire department of the city, the Board of Fire Underwriters maintain a Salvage Corps, whose duties are sufficiently indicated by its name. The city is thus amply and efficiently protected from fire.

The Board of Assessment and Revision of Taxes is also appointed by the Mayor. Its duties are to make all assessments of all property within the city for taxable purposes, to keep proper records thereof, to revise the same whenever necessary, and to hear and determine all appeals from citizens in matters of taxation. The present members of this board are: Philip Lowy, John Otto, Marcus S. Richards, Frederick W. Paul, R. Heber Breintnall. The Secretary of the Board is Noah Guter.

The Commissioners of the Sinking Fund are Robert F. Ballantine, Frederick Frelinghuysen, Andrew J. Kirkpatrick, and the Mayor and Comptroller, *ex-officio*. The Sinking Fund is intended to meet the various issues of city bonds as they respectively fall due, and these Commissioners have charge of the investment of the funds intrusted to their charge, until such times as they are needed for the purpose of meeting and retiring bonds.

The Board of Excise Commissioners have charge of the granting of licenses for the sale of spirituous and malt liquors and

ST. BARNABAS HOSPITAL, HIGH AND MONTGOMERY STREETS.

wines within the city limits. They are at present: Franklin Marx, President; Eugene Carroll, Carl Schwartz and James Johnston.

The Health Department is possessed, under recent legislation, of very ample powers for the care and protection of the public health of the city. The present members of the Board of Health are: Dr. H. C. H. Herold, M. Straus, A. H. Johnson, J. A. Furman, W. B. Guild, C. E. Mackey, Dr. C. M. Zeh, Dr. D. L. Wallace, Dr. F. W. Becker, Dr. W. S. Disbrow. The Health Officer is David D. Chandler. The City Hospital and the City Dispensary are under the management of the Board of Health. They control and direct the hospital maintained by the city for its suffering poor, and also maintain at the hospital a training school for nurses.

The Trustees of the City Home are: the Mayor, *ex-officio*, J. Ward Woodruff, John Breunig, Henry Merz, John B. Richmond James A. McCarthy, Frank B. Knott. The City Home is a reformatory institution for wayward and truant children,

and its discipline is intended to lead them back and accustom them to walk in ways of usefulness and sobriety.

The Free Public Library, of the city is managed by a board of trustees which is at present composed of Edward H. Duryee, James E. Howell, Richard C. Jenkinson, William Johnson, James Taaffe, besides the Mayor and the Superintendent of Public Schools, *ex-officio*.

The Free Library is splendidly housed and elegantly equipped. It contains a library of almost 30,000 books, besides a finely furnished reading-room.

MAYORS OF NEWARK

“SPEAK of men as you find them” is a good old adage, and gives opportunity when writing of such as have been brought before the public, as having been the occupant of some public position, and so it is with those who have been called to the mayoralty of the industrial city of Newark, now, at this writing (1897) number just a full score and one more. In carrying out the old adage in speaking of these men, whose photos appear on the opposite page of this work, as we have found them, we will be pardoned for giving expression to the regret which haunts our mind and has an almost paralysing influence over the pen, for that the lack of space to give ever so brief a mention of each one of the men whose executive ability as exercised through the mayorship of the capital city, of Essex County, has had so much to do toward its weal or woe.

As we glance over the page from which these men speak to us, as if they were all living and in our presence, our regrets grow apace that full justice cannot be done nor free rein given

The third on the list was Genl O. Miller, a man honored and respected by all. The fourth in the mayoralty succession was Oliver H. Hulstead, a scholarly gentleman who was afterward honored with an appointment as Chancellor of the State of New Jersey. It was in the stirring political times of 1840. He served one term.

The fifth was William Wright, who became Mayor of Newark in 1841. He served three years. He was afterward made Governor, and then honored with an elevation to the Senate of the United States. The sixth Mayor of Newark was Stephen Dodd who was elected in 1844, and served one year. His birth place was Mendham, Morris County, March 7, 1770. Mayor Dodd lived to the ripe old age of 85, and passed away March 25, 1855. Next came Col. Isaac Baldwin as the seventh mayor. He was elected in 1845, and served a single term. He died in 1853. Beach Vanderpool came next, the eighth in the line of Newark's mayors. He was born in Newark, in 1808, and was made Mayor of his native city in 1846, and died in

OFFICERS OF THE THIRD PRECINCT.

to our desires, to let the pen run so that this beautiful souvenir may in all things be just as we would like it. It is now nearly three quarters of a century since Newark became an incorporated city and elected her first mayor in the person of Hon. William Halsey, who so far as we have been able to gather data relating to him, made an acceptable mayor. Mr. Halsey belonged to the Short Hills and Springfield branch of the family, all of whom had made honorable records and stood by Pastor Caldwell's side when he gave the British "Watts."

The Second mayor was Theodore Frelinghuysen, a name honored and revered everywhere, and in "speaking of him as we find him," we have only to say everybody loved and respected him. This great and good man will be best remembered as the Whig candidate for Vice-President of the United States on the ticket with Henry Clay, "Gallant Harry of the west."

1884, sincerely mourned by all who knew him. Such was the character of his genius on all those surrounding him, and whatever he came in contact with felt his influence.

The name of Quinby is synonymous with the carriage manufacturing industry in the city of Newark. This arises from the fact that Isaac M. Quinby, who was the ninth in the Mayoralty succession, was a representative of this industry, which, for many years, took the lead in Newark's manufacturing interests. Mr. Quinby was a native of Orange, served three terms as Mayor of the city of Newark, and crossed the dark river in 1874, mourned by all who knew him.

Among the Mayors of Newark, it will take but the glance of the reader to select the tenth in number from among the men whose photos grace the page, as one who went out and in among the people, Horace J. Poinier, beloved and honored by all. In 1857 Mr. Poinier was elected Mayor and served three terms.

SECOND CITY BUILDING,  
 CORNER SUMNER AND SEVEN TH AVENUES.

The building was erected by  
 the city of New York  
 and is now the  
 headquarters of  
 the city government.  
 It was designed  
 by the architect  
 James H. McMillan  
 and completed in  
 1890. The building  
 is a fine example  
 of the architecture  
 of the late 19th  
 century.

August. He is during his life dealt so liberally with the  
 Bazaar of St. Augustine that it was called in his honor the  
 Bazaar of St. Augustine.  
 The money was yet going out and in among us, laden with  
 cars of oranges and yet bearing fruit, was elected Mayor in  
 1868 and as Gov. Chase up Washington and Lincoln each for  
 the special purpose, so too was Frederick W. Ricord raised up  
 for the same purpose, it a true, even then, the rashness and want  
 of foresight of others inspired his scrutinizing gaze, his master  
 eye, and his eye saw the cause from after financial ruin by wielding  
 his power to yet to great Broa street wood-paying ordinance.  
 So too indeed that Mayor Ricord been raised up, that New-  
 York's Mayor of the first toasting ceremony, so he took up the man and  
 Mayor Ricord of the courage and manliness to do the right thing at  
 Long Island. The courage of heart of Frederick W. Ricord was con-  
 siderable support and then in the prime of life, while the argus eye of the  
 city government's eye got to rest, and thus it was they called him  
 the Argus of the City.

ALFRED W. RICHMOND, COMMISSIONER.

OFFICERS FIRST PRECINCT HEADQUARTERS.

he proved of great service. Mr. Perry served but one term as Mayor.

The sixteenth Mayor of Newark was Henry J. Yates, a member of the hatting firm of Yates & Wharton, and a gentleman who was deeply interested in the welfare of the manufacturing interests and of the people engaged in hatting and, indeed, in all the lines of her manufacturing industries. He served two full terms as Mayor.

William H. F. Fiedler was made Mayor in 1879 and served one term, the seventeenth in the line of succession. He had represented Essex County in the Congress of the United States and his district in the Legislature of New Jersey. Mayor Fiedler was president of the United States Credit System Company, and was Postmaster of Newark for the term of four years. Mr. Fiedler is now engaged in the merchant tailoring business. "Billy" Fiedler, as his friends (and he has hosts of them) seem

privileged to call him, is of German descent, and in his political career none were truer to his standard than they of the Fatherland, and among of these he found his heaviest rocks of defense, and Judge Gottfried Krueger always led the van.

The only representative of the great leather manufacturing interests Newark ever had in the Mayoralty came in the person of Henry Lang, the eighteenth of the line of Mayors. Public life was ever distasteful to Henry Lang, and his Scotch home tastes and ideals proved more to his liking than the excitement of political affairs, and at the close of his term he refused a renomination by his party. Mayor Lang had served as Alderman for several years most acceptably, and the writer has reason to know that right for him was always on the lead.

That the educational class had been given the go-by in the selection of Mayoralty candidates never became so evidently manifest as in 1883, when the political needle stopped in front

of the Thirteenth Ward Public School-house, and refused to move on until the magnet which so influenced it came forth, the nineteenth in the line of succession of Mayors, in the person of Joseph E. Haynes, the principal, and for ten long years this representative schoolmaster continued to perform the duties of Mayor. When this faithful school representative and popular official had ceased to be Mayor, the President of the United States made him Postmaster.

While Newark had long held the lead as a jewelry manufacturing centre, not a single representative of this industry had found his way to the Mayor's chair, until the time when the twentieth in the line of succession was found in the person of Julius Lebkencher, of the jewelry firm of Kremenz & Co., and he

HENRY W. HOPPER, CHIEF OF POLICE

EDWARD H. UTZERI, POLICE COMMISSIONER

the "old lads" brought "old lads" with the descend-  
 ing of the "new lads" and the "old lads" on breaking or  
 the "old lads" and the "new lads" commission was established  
 the "old lads" and the "new lads" reach that splendid state of  
 the "old lads" and the "new lads" day. While the men are no  
 the "old lads" and the "new lads" so good as the old "lads,"  
 the "old lads" and the "new lads" rough and ready boys,  
 the "old lads" and the "new lads" with firm land and were off as if on  
 the "old lads" and the "new lads" the signal "tap" of some comrade  
 the "old lads" and the "new lads" being relief from threatened danger and  
 the "old lads" and the "new lads" out of peril, perhaps to break the death  
 the "old lads" and the "new lads" with some midnight marauder on villain-  
 the "old lads" and the "new lads" were ever true and steady. To realize the  
 the "old lads" and the "new lads" force of the city of Newark is as near the  
 the "old lads" and the "new lads" possible to be brought, the interested and  
 the "old lads" and the "new lads" to run their eye over the records and  
 the "old lads" and the "new lads" word to word truth tells, recorded on the pages where pho-

THE POLICE OFFICERS OF THE CITY OF NEWARK, STANDING IN FRONT OF THE POLICE HEADQUARTERS, 100 N. 3RD ST.

the "old lads" and the "new lads" duty steps as he circles  
 the "old lads" and the "new lads" in pursuance thereof. Show us the citizen who, when  
 the "old lads" and the "new lads" goes down to his rest and peaceful slumbers, and who does  
 the "old lads" and the "new lads" not guard the "old lads" and the "new lads" at the argus eye of the faithful policeman does not guard  
 the "old lads" and the "new lads" well, or fulfils his duty, we will show you one who is not  
 the "old lads" and the "new lads" worthy of the sacrifice that is made by the devoted police-  
 the "old lads" and the "new lads" man for his sake. The Board of Police Commissioners is a non-  
 the "old lads" and the "new lads" political body, and therefore it is that the political dark that  
 the "old lads" and the "new lads" has been hanging between the rails of the old fence has been  
 the "old lads" and the "new lads" broken down, and a man's a man for 'a thut' has taken the  
 the "old lads" and the "new lads" place of the old fence. The Commissioners are five in number and  
 the "old lads" and the "new lads" hold office for the term of five years. At this writing the body  
 the "old lads" and the "new lads" consists of Thomas T. Kane, president; Moses Bigelow,  
 the "old lads" and the "new lads" Vice-President; Edward J. Clark, Police Headquarters are at  
 the "old lads" and the "new lads" 100 N. 3rd St. (near City Hall). Joseph M. Cox is  
 the "old lads" and the "new lads" Chief of Police; Dr. J. Henry Clark; Chief of Police,  
 the "old lads" and the "new lads" Dr. J. Henry Clark; Chief of Police, Dr. J. Henry Clark; Chief of Police,  
 the "old lads" and the "new lads" Dr. J. Henry Clark; Chief of Police, Dr. J. Henry Clark; Chief of Police,

CAPT. WM. E. DALY, THIRD PRECINCT.

Precinct Court, 11 William street. Judge Mott also presides in Part II., Summer and Seventh avenues. Fourth Criminal Court, Part II., 134 Van Buren street, Judge Augustus F. Eggers. Judge Eggers also looks after the interests of Part I. of the same Fourth Precinct Court, corner of Springfield avenue and Fifteenth street. Elmer Freeland is Clerk of the First Precinct Court and of the Second Part, and Thomas Pearson, Esq., is Clerk of the Second Precinct Court, also of its Second Part. There are on the regular force eight Detectives, Benjamin R. Stainsby, William Carroll, John E. Cosgrove,

CAPT. ANDREW J. MCMANUS, FIRST PRECINCT.

Peter J. Christie, Richard Lewis, Julius Jaegers, August Jackes, Joseph Wrightson; Truant Officer, Albert J. Haynes. There are four Captains, one of each Precinct and Sub-Precinct or Second Part, viz., Captain William Daly, 124 Congress street; Captain Michael Corbett, 84 Park street; Captain Andrew J. McManus, 85 Clifton avenue; Captain John H. Ubhaus, 89 Springfield avenue. There are also twelve Lieutenants of Police, three for each Precinct and its sub. At the First Precinct, Ernest A. Astley, Peter Walker, Thomas Tracey; Second Precinct, Freeman A. Edwards, Henry Lewis, John H. Adams; Third Precinct, John W. Froot, Michael Barrett, Alfred C. Dowling; Fourth Precinct, Charles Klein, Henry Vahle, Jacob Wambold. To the First Precinct there are three Roundsmen detailed, and one Roundsmen only for each of the remaining three Precincts. The entire force consists of 265 patrolmen, to each of whom is allotted a certain route, made up of streets, alleys, etc., which, in the parlance usual to the force, are called "beats," but for what particular reason they are possessed of

that peculiar cognomen, or the wherefore of their being so named, we are unable to tell. But now, since the question has been raised, and we are entirely satisfied that it will be no breach of confidence to divulge the fact which tells the reason why they are not so named, viz., because no one ever had the least reason for telling it, and because they had never known a policeman to beat the city out of a single moment of time or an inch of his prescribed route. The name could not by any stretch of thought or peculiarity of language be taken from the old saying, viz., "beating about the bush." Whatsoever, wheresoever or howsoever it may have, the name is here, and, from present appearances, "has come to stay," that is, we should say so, if it is here indeed worth saying anything about. Space permitting, we should have more to say, but the very best thing to say is to say it and have done with it, and before you have paralyzed the language. But ere such a catastrophe should befall us, it is our desire to say in as few words as possible that, taking all in all, and placing every man and all things

of or about the Police Department in its proper category, the police force of the city of Newark has few equals and no superiors. Bring on data, and if comparisons don't prove a trifle odious to the opposition, we have made a mistake of which we shall ever feel proud.

A person has only to run over the police records with even a moderate degree of care to see with what faithfulness every man has performed his duties, as all over its pages stand recorded acts of personal courage, heroic effort and unselfish devotion which have won for the actors encomiums in the successful drama of a successful capture, of which any man can feel proud. The burglar and the prowling villain have learned to dread the night "squad."

DR. H. C. H. HEROLD, PRESIDENT BOARD OF HEALTH.

ernmental policy of the capital city of the county, whose history has so environed them that they have become of undying interest to the writer, and as the facts arise like inspirations as we approach them, it becomes a pleasure indeed to write them, instead of a labor. In another chapter the character of the earlier history of the great industrial city having found record, this chapter will only deal with its government, as connected with growth and prosperity in the earlier part, of its marvelous work in the present, and its bright promises as they lend a halo of grandeur for its future. Every Jerseyman takes an honest pride in the chief city of the Laurel-wreathed little State of the grand confederacy of States which make up the Union, "One and inseparable." To

JAMES A. LERMAN, MEMBER OF HEALTH BOARD.

Newark, which has earned the title of the Birmingham of America, every eye may turn with pride, and the reflection of her greatness will be an all-sufficient proof that her government and governmental policy had very much to do in caressing the forces which had elevated her to the proud position she occupies to-day, and have given birth to the promise of a great and prosperous future.

Strange as it may seem, when the city of Newark was first laid out it was without the most distant hope or thought even that she would ever become the mighty industrial entre that she has grown to be, the great manufacturing city of the Amer-

ican realm. Farming in the rich soils which the down-reaching spade brought up or charmed the fancy of the ploughman as it quit the side plough, handled by stalwarts and glistened in the beautifully turned furrow, was the ideal occupation of the first settlers inspirations.

To speak well of those who deserve well is ever a delight to the well-wisher of mankind, and thus as we speak of the people of Newark, the masses of whom rank with the skilled labor classes, as an easily governed community, it requires no stretch of imagination when we say that the city is "well and cheaply governed." Thus it is that her credit is A No. 1, in the money

markets of our own country as well as those away over the ocean. No speckled beauty of the mountain stream ever dashes from his rocky court with more eager spring for the dainty morsel which comes sipping near on the water swirl all intent for the morning's meal, than does the creditor classes who watch for her outgoing bonds, grappling one with another in wordy strifes, as to which shall capture the all alluring prize, yielding only when, perhaps by agreement to equally divide, they may clip the coupons and feast upon the gain of the very best securities of the market. We hazard little or nothing in making the assertion that the people of Newark, taken as a whole are as law abiding and thrifty as can be found quartered in any other city on the face of the globe, and we know that none can be found anywhere under the canopy of Heaven who pay their taxes and improvement assessments with more equal readiness, a significant proof of the latter is seen in their haste to deposit the amount of their taxes when the season of pay-

He is a man of high character and ability, and has been elected to the office of Mayor of this city for the term ending in the year 1890. He is a man of high character and ability, and has been elected to the office of Mayor of this city for the term ending in the year 1890.

MR. SEYMOUR, OF THE ORANGE POLICE

He is a native of this county, and was educated in the common schools of this county. He is a member of the Orange Police, and has been elected to the office of Mayor of this city for the term ending in the year 1890. He is a man of high character and ability, and has been elected to the office of Mayor of this city for the term ending in the year 1890.

part of the year, having a number of children who had been honored with an appointment as President, sportsman and had been a faithful representative of the city on the Water Board, was elected to the Mayoralty at the city election of the spring of 1896. The deep interest which Mr. Seymour had taken in educational affairs had led to his appointment by Governor Werts to a seat in the State Board of Education, and by Governor Abbott as a Trustee of the State institution for the care and education of the deaf and dumb.

The fact that James M. Seymour had always taken a deep interest in the cause of labor and was a firm promoter of the rights of laboring men, gained him the lasting friendship of those who work to live. He long had and still retains a warm place in the affections of those who rise by the "sweat of their brow," and it was this warm affection of labor which no doubt, to a large extent, procured the liberal public favor and helped to make him an eminent citizen, who he is acquitting himself with honor to himself and credit to the city, and little doubt exists of his triumphant reelection in the spring. As the Mayor is allowed by private secretary, His Honor has called to his side young Matthew Ely, a young man who is doing the royal good service and manfully helping to hold up

Mr. Ely's hands. In the performance of his duties he has given abundant proof of his ability, and his post office receipts, and his success in securing for themselves a comfortable and successful future. He is a man of high character and ability, and has been elected to the office of Mayor of this city for the term ending in the year 1890.

AN ROBERT A. JOHNSON CLARK

PEQUANNOCK WATER.

UP from the granite beds of iron bound Sussex rush the pure waters from the fast flowing rivers established in earth's throbbing bosom, to join hands with the streams from rock ribbed channels of Warren, and by the outlets of ten thousand living springs scattered all over their broad acres and along their mountain and hill sides to join in holy wedlock their sweet waters wherever they ran, in their errands of mercy to man and among the songs in such bewitching strains as to entrance, while they passed under the title of Pequannock or Passaic.

For ages unnamed and ages untold these waters rolled on to old ocean the gormant never yet filled, used it only to delight the sportive fishes, playing "hide and seek" in its crystal depths. This all went on in the

FRANKLIN MARX, PRESIDENT EXCISE BOARD.

JAMES JOHNSTON, EXCISE COMMISSIONER.

To waste its power and thought  
In rolling and rollicking  
Where the sea foam each day,  
Was spending it's time in boisterous play,

gloom of the primeval forest where the wild animals and little less wild Indians roamed, feeding the fish in the cool depths of the lake of the mountain, while in the pools of their gathering the wild animals and the Indian together might bathe. But as the ages went on and the soul of God's best creation, went on in its developings, the husbanding of the fount of the Almighty's grand resources found stored away in earth's recesses all divined for man's purposes, and to satisfy his needs, began to occupy humanity's attention. Now began the husbanding of God's treasures and the founts of the depth, in the fastness, where was garnered pure water and was no longer permitted to caper and play the hours away and seek rest and retirement where the porpoise sluggishly rolls and the wonderful Leviathan, unmolested, plays. Little thought had the millions of the needs of their future, when, as a warning, as it were, came the scarcity "now and then" of that abundance of water provided by the Almighty for man's necessities, but which had been permitted to slip unmolested away.

and giving proof, for man's use, of how dangerous it is for the pure and good had company to keep.

When the cry of necessity was first heard, going up from the thousands for a larger and better supply of pure water, whose business or taste, had induced to gather in the dry little nooks, close by where once ran so sprightly, the brook or the rivulet, from whose bosom the wee little trout with specks on his skin so beautiful and bright, leaped through the sunlight in pursuit of his unway little fly or the barbed steel hook, on his way to the basket hanging by the side of an Isaac Walton scholar and thence to the frying pan.

Scarce two years has run the gauntlet of time since the water supply of Essex County was drawn from the well polluted springs of Branch Brook, alone, where young America in easily

constructed pools was wont to learn to dive and swim and yet Newark had a population then, close up to, if not beyond, the fifty thousand line. The conduits used to guide the water throughout the city the major part of it was not over pure as it had been husbanded from the good old State thoroughfare known as the Morris canal, and had previously done duty in floating the boats heavily laden with coal.

As the years flew by and the Branch Brook "now and agin" went so very near, that the good old wells, faithful assistants, out of pure sympathy, went dry, the people began to think, and as the fisherman with his well stocked basket of mountain trout stepped from the Morris and Essex Railroad cars, each year as the fishing season went by, talked much of the Pequannock's purity and other streams hard by. But the heavy weights and home stayers not wont to travel so far, and seeing little entertainment in

CARL SCHWARZ, EXCISE COMMISSIONER.

DR. THOMAS DUNN ENGLISH.

ENGINE COMPANY NO. 5, ON ESSEX STREET.

...the city of Newark, N. J., is supplied with water from the Newark Water Company, which has a capital of \$1,000,000. The water is drawn from the Passaic River, and is filtered and pumped into the city. The water is of excellent quality, and is supplied to the city at a cost of about 1 cent per gallon.

...During all the time that Newark was a hotbed of political parties and multiplying foolishly operations, some wise men, who had fished every brook, whipped every stream, and tried every hole where the turkey tribe do congregate, put their heads and purses together, and organized what is known as the East Jersey Water Company, and it is from this company that the Newark people are being supplied, for all purposes, with a full supply of as good and pure water as is to be gotten by any people or company, or dispensed by any water company or individual in the world.

For the securing of this spring water from this company, Newark, owing to its distance, is compelled to pay handsomely for the same, but its contract with the company is of such a character that the plant in the simple comes into the hands of the people and the wonderful product of the Passaic water works will be theirs for ever. Had that good judgment possessed by many men, who foresaw the sort of foolery now permitted to have full swing and impavement in the nineties even millions, we may say, it had been saved to the treasury.

Better late than never is an adage to good purpose, and truthfully applied. Now, if we may judge of what is to be done in the future, as what may be in store for the future, there is positively no sensible danger of Newark ever having to face the horrors of a water supply drawn from any manner or form of polluted source for people shall drink. With entire confidence we can predict that these vast underground rivers and the thousands of springs bubbling from the bosoms of Merri, Warren, and Essex counties, and the many streams in the hands of the fathers of the city, will be the source of the future, which will be built on the soil of Newark, and will be doing with this ruby of price in a city which has no other mighty resource, not alone of this city, but of the State, of remarkable abundance.

THE FIRE DEPARTMENT

ADAM BOSCH, SUPT. FIRE ALARM TELEGRAPH.

THAT those among the citizens of Newark, who had as it is termed, tied up to the old volunteer fire department, felt the sun of her glory had gone down permanently and her effulgent rays would be seen no more and forever when the change was made from the volunteer to the pay system, is true, few who are well acquainted with the circumstances will not attempt to deny. It having been generously acknowledged that the Newark fire laddies beat the world, there was no shadow of doubt. The leading young men of the city, who in all things else during their progressive years were tenderly nurtured and cared for, went rough while getting into their garments when

JAMES HODGKINSON, FIRE MARSHALL OF ORANGE.

the old fire bell struck in the night and their very own machine went rattling over the stones slow until their own sweet voice salled round the sweetest words that ever fell on a fireman's ears: "Hit er-up b-o-y-s! Tt-er-up!" And then, oh how quick the boys would make the old beauty leap, as the sympathizers with that veritable machine, lent a hand at the rope until the mad rush began and the mighty race was on between two crack engines in order to see which should reach the fire first and get the best of the resultant fight. Many a volunteer, after they figured up, have thought it best to go with the machine into the shop for repairs. Although the machine had its regular number of members to its company it had often double the number of attachees who made the house, or home of the machine, their place of resort, and among these old attachees memory holds in place ready for rehearsal call, lots of larks and innocent fun, whether quiet or rollicking in its nature, there's little odds in the matter. Whatever it might be, the machine was the meat wherever the nut was cracked. Arguments strong and full of logic on great questions of the day oft times became

heated and must needs be referred to some one supposed to be more gifted, to settle upon. About the engine house there was generally an oracle to whom all difficult or abstruse problems and questions were referred for settlement or decisive solutions, on all occasions, when not engaged in the mightier concerns and graver affairs of manifestations of his power he was engaged usually in the delectable business of tobacco chewing, smoking the weed and in practicing the art of ejaculating small volumes of saliva at some particular mark or spot, whether his practice was designed for some particular meet to see whose oracle could do his part the more complete or whether his ejaculations were for his own and the younger attachees delectations, the writer of this was never able to find out, but one thing he did learn was that his decisions on questions referred were irrevocable and as unchangeable as the laws of the Medes and Persians are said to be. Just one in demonstration. Once upon a time when a race was on a few bricks had fallen athwart the machine, with as a resultant, the disturbance of hose and abrasion of a bit of paint. After the repairs then

EX-CHIEF WILLIAM H. BROWN.

came the painting of the same. The argument grew warm and it was thought would prove lasting, for one member of the repairs committee thought she ought to be painted blue and another yellow, another a brown would be a heap more lasting, so not agreeing by a vote of two to one, the opinion of the oracle should fix it and be lasting. His reply came somewhat on this wise: "Well, gentlemen, I don't care a d— what color you paint her if it is only R-e-d," and red she was painted. The introduction of the steam fire engine was a revolution in the methods and manners of fighting the fire fiend and it was not without some tears of regret did the hand engine get from the chief the order to take up and go

CAPTAIN LOUIS M. PRICE.

SCENE IN NEW YORK, 1887, ON NUMBER AVENUE.

The Board held its regular meetings on the first and Third Fridays of each month. Henry R. Baker is the present president and Horace H. Brown, secretary.

**ROBERT KIERSTAD.**

The present chief engineer, an excellent photo of whom appears among the illustrations is an able and efficient officer, having been connected with the department since 1871, and occupying the position of chief engineer during the past twelve years, a credit to him, and honor to the department over which he presides. He is a survivor of the war for the Union and his service has continuity in Company B, 20th Regiment, N. J. Volunteers of Infantry, and also in F. Company, 3d N. J. Cavalry.

**WILLIAM C. ASTLEY.**

Assistant Chief Astley joined the department in 1867, and was appointed to his present position in July, 1887. He is a practical fireman, with a thorough knowledge of the department, and has served with marked ability as superintendent of the department for a term of three years. A life-like photo of the veteran fireman appears among the illustrations.

**HORACE H. BROWN.**

The present assistant chief and only clerk of the Board of Fire Commissioners, whose life-like photo will be seen among the illustrations, is perhaps one of the oldest living fire laddies in the city, having joined the department in 1853, left the same in 1854, but returned in 1855, resigned in 1860, and again joined in 1872. He has since that time, 1897, to 1892, since which time he has been faithful in the discharge of his present duties.

**WILLIAM GODLER.**

Every one who Godler's friends will readily recognize him as a fireman, and he is known to the members of the department. The gentleman has been connected with the fire department of this country, and has had many exciting experiences in his career. He was retired on half pay in 1862, and was again employed by the Fire Commissioners. The captain's duty was to be his darkest hour, by putting down his resignation in 1863, and joining the 1st N. J. Regiment, N. J. Volunteers of Infantry, 1863, 1864, as an officer during the Mexican War, and in the battles of the Army of the

NEW YORK, 1887.

ADAM BOSCH.

The ever faithful and reliable superintendent of the Newark fire alarm telegraph code, is an expert and practical mechanic in the position which he so ably fills. He is a graduate of the scientific department of the Cooper Institute, New York, and has occupied his present position in the department since January, 1876. His familiar features will be readily recognized among the illustrations by his many friends.

LEWIS M. PRICE.

Captain Lewis M. Price, a photo of whom is presented in the illustrations, was born and educated in this city and has from boyhood always taken a great interest in fire matters. His first experience was in running with Nos. 5 and 11 hand engines. During the civil war he served his country in Company F, 35th N. J. Volunteer Infantry, and while yet in his teens became one of "Sherman's Bum-

CAPTAIN JAMES V. HAMLIN.

mers," participating in all the important struggles of that army, and took part in the famous march from "Atlanta to the Sea." At the close of the war he returned to his home and again became a runner in No. 1 Steamer until elected a member of the company, after a few years he was elected assistant foreman, serving for three years when he was elected foreman, the duties of which he transacted for over seven years. In 1885 he was elected by the Common Council as an assistant engineer and in 1889 the Commissioners appointed him district chief, the duties of which he faithfully discharged until the office was abolished. In 1893 he was attached to Hook and Ladder Company No. 3, and in July 1893, the Commissioners appointed him captain and assigned him to duty with engine company No. 7. Captain Price served as president of the Veteran Association of the 35th N. J. Volunteers, and is a past commander of Phil Kearney Post, No. 1, the oldest Grand Army organization in this State. Captain Price is one of the old time fire laddies, and his career with the department is a credit to himself and city.

CAPTAIN Wm. GODBER (RETIRED.)

H. L. VOIGHT.

This active and experienced fire laddie has been identified with the Newark fire department for more than twenty years, having joined Engine Company No. 2, and was assistant foreman in the old department. In 1881 he was made permanent driver of the company and in 1884 he was transferred to the same position on Hook and Ladder Company No. 2. In July, 1892, he was appointed captain, and placed in command of Hook and Ladder Company No. 3. In 1895 he was transferred to Hook and Ladder Company No. 1, and in 1897 he was transferred back to his present command. The speaking photo of Captain Voight shows the manner of man he is, and his career and record in the department is a clean and honorable one.

JOHN B. THORN.

The name of this faithful and fearless fire laddie is worthy of mention in connection with the Newark Fire Department, for more than a century he labored zealously for the promotion

of its honor, and when chosen to fill a political position declared that: "I would rather be a fireman than Governor of the State." And a noble fireman he was, such a man needs no sermon, no monuments, no lengthy obituary, his name and the memory of his heroic deeds will live for ever in every true fireman's heart.

WILLIAM E. GREATHEAD.

One of the familiar figures seen on the streets of Newark is now secretary of the important executive branch of the Newark city government known as the Board of Works. William E. Greathead is in the prime of life, tall, portly, finely developed, straight as an arrow and lithe as a bow. His broad open countenance is wreathed in the smile of friendship when he meets an acquaintance or friend, and of the latter he commands hosts. He was educated

CAPTAIN JOSEPH E. SLOAN.

CAPTAIN HERMAN VOIGHT

FIRE COMMISSIONERS.

HENRY R. BAKER, PRESIDENT FIRE COMMISSIONERS.

**H**ENRY R. BAKER, the president of the Fire Commission, is so thoroughly well known that little can be said in Essex Co., N. J., Illustrated, that will be new. Mr. Baker was a merchant and conducted business on a large scale, for many years, at the southwest corner of Nesbit and Newark streets. It was there he gathered that experience which did much to make him the firm and wide awake business man that he is, and in all the years of his active business life since, it has left its impression on his life work. During the busy hours he spent at his desk and behind the counter, he always found time to make those he came in contact with feel that there was a genius within him that forced a recognition. So, thoroughly well was Henry R. Baker appreciated,

HUGO MENZEL, FIRE COMMISSIONER.

his friends and neighbors sent him to council and for some time he represented his ward in that responsible body. When any work of more than ordinary importance came up in council, during his occupancy of the aldermanic chair, the name of Alderman Baker was one of the first to be called, and it can be said that in the daily routine of duty he did yeoman service, and whenever it fell to his lot to perform extra duty, he was always at his post. Several times the name of Henry R. Baker has been used in connection with the mayoralty nomination. Mr. Baker is now and has been for several years past, superintendent of the New York and New Jersey Telephone Company. The term of President Baker, as a fire commissioner, will terminate in 1898.

No other name among the Fire Commissioners deserves a better meed of praise and marks a higher place on the pillar upon which the deeds where well done are emblazoned, than John Illingworth. To few other men is a deeper debt of

gratitude due from his fellow citizens for utilitarian deeds consummated and maintained, than Fire Commissioner Illingworth. For many long years Mr. Illingworth has been engaged in the work of manufacturing steel, that beautiful metal which has been so closely allied to the mighty skein of industries which the great army of citizens, have been winding and unwinding, changing and interchanging for so many years with marvelous and satisfying results. To John Illingworth is due the honor of a moulding form, in use by moulders, to largely multiply the values put upon it by preventing through the interposition of this result of his genius, the unhappy results which might otherwise accrue. Perhaps to no other single mechanic in Newark is pointed the finger of hope with more significance, with the single exception possibly, of inventor, Seth Boyden.

To insure the very best results from the combined action of the four men selected by his honor, the Mayor, with the aid and consent of the Board of Aldermen, extraordinary good care is

taken in their selection and election, whether men to fill the places in the commission are taken from the insurance part of the field direct, or from that part where the fire fighters do the finest part of their waltzing, where the fire rages the fiercest, men thoroughly up in either department must be found. But when those two distinguished citizens, Mr. Henry C. Rommell, representing the interests of the Citizen's Insurance Company, of New York, and Mr. Hugo Menzel, representing the interests of the German Fire Insurance Company, also of New York, but both gentlemen having their offices, as seen, in the city of Newark, and both proving exceptionally good men for the places. As we have just said what we feel, that the fire department of the city has few equals and no superiors, the amount of

JOHN ILLINGWORTH, FIRE COMMISSIONER.

HENRY C. ROMMELL, FIRE COMMISSIONER.

HOWARD H. CROWN, SECRETARY FIRE COM.

THE SALVAGE CORPS

AMONG the improved methods not only in firefighting, but also in saving, loss and damage by fire, first and foremost are the mechanical engines, tarpaulin

and the use of the hose. Captain Meeker, of the Fire Company, has been successful in many ways in saving property from destruction. He has saved over \$100,000 worth of property from destruction. He has saved the property of the following firms: J. Meeker, H. W. Meeker, Messrs. A. C. Cummings, Messrs. J. G. Thomas, A. J. Healy, George W. Schatz, W. R. Healy, Wm. H. Fredericks, and many others. He has saved many lives and property by his quick action and ready use of the hose. He has saved many lives and property by his quick action and ready use of the hose. He has saved many lives and property by his quick action and ready use of the hose.

as conducted and by your kindly favor," to the bright little steam fire engine, putting and snorting close by and pouring forth through the long, strong rubber hose, the boys meanwhile its ball-nozzle guiding, seldom heeding, and less often heeding, the coarse fire trumpet orders, "Turn Off!" At their commodious house, 227 Washington street, stand ready prepared and waiting the call to duty, their arms, consisting of two huge trucks, each full laden with great blankets and still greater tarpaulins, to spread over counters and store goods and perishable property anywhere where a conflagration is raging or promises any where near. Since the organization of the Salvage Corps, over which Captain Meeker presides, several million of dollars which has been imperilled and much of which in all probability, would have been destroyed, and a large percentage of which could not have been saved except in an injured state, was saved and turned over to their owners in good condition. Cases well known to the writer could be cited where a conflagration had been under way in stores filled with goods for many minutes and became filled with smoke, when the timely appearance of the captain

of the Fire Company, with his hose and engine, placed more than fifty per cent. of the goods saved. He has saved many lives and property by his quick action and ready use of the hose. He has saved many lives and property by his quick action and ready use of the hose.

ROBERT CURSTADT, CHIEF ENGINEER, N. F. D.

of the Fire Company, with his hose and engine, placed more than fifty per cent. of the goods saved. He has saved many lives and property by his quick action and ready use of the hose. He has saved many lives and property by his quick action and ready use of the hose.

# THE PRESS OF ESSEX COUNTY.

THE Newark *Daily Advertiser* had its birth on Thursday, March 1, 1832, and was the first daily newspaper published in New Jersey. The publishers were George Bush & Co., and the editor was Amzi Armstrong, a young lawyer, who was assisted by John P. Jackson. The *Advertiser* was Whig in its politics. The population of Newark in 1832 was only about 15,000.

Business methods were primitive, and newspaper advertising almost unknown. A single firm in Newark, now pays more in a year for advertising in the *Daily Advertiser*, than was obtained for a similar period by the paper in the first years of its history, for all its advertising.

Changes and improvements came in time. Mr. Armstrong retired from the editorship, and was succeeded by William B. Kinney as editor and proprietor. James B. Pinneo entered into partnership with him, and was business manager. Mr. Pinneo subsequently withdrew, and M. S. Harrison took his place on the *Advertiser*. Upon the death of Mr. Harrison, Mr. Kinney became sole proprietor. The *Daily Advertiser* began to grow in value and influence. In 1851, Mr. Kinney was sent to Sardinia as American Minister. He died in 1880, having previously transferred the paper to his son, Thomas T. Kinney. When the Whig party died, the *Daily Advertiser* became Republican. Its editor for many years after the war was Dr. Sanford B. Hunt, who was succeeded, upon his death, by Dr. Noah Brooks. In 1892, Thomas T. Kinney transferred the

paper to a company consisting of himself, Franklin Murphy, John F. Dryden and Dr. Leslie D. Ward.

Messrs. Murphy and Kinney withdrew, and in March, 1895, the paper was purchased by a syndicate represented by Dr. D. Hunter McAlpin, Alfred L. Dennis

and Frederick Evans, Jr. The location of the *Daily Advertiser* was at this time changed from the southeast corner of Broad and Market, to the commodious building 794 Broad Street. The last important change in the management, was effected in May, 1896, in the purchase and editorial control of the paper by Sheffield Phelps, son of the late William Walter Phelps. Under the vigorous management of Mr. Phelps, who is also one of the proprietors of the Jersey City *Journal*, the *Daily Advertiser* very soon began to regain its old-time prestige and influence, and as the only Republican paper in Newark, its prosperity was assured. Under its new management, and in the well-equipped plant, presented here, it will continue to win its way.

The *Sentinel of Freedom*, the weekly edition of the *Daily Advertiser*, had its centennial anniversary October 5, 1896. The first number was issued on the fifth of October, 1796, by Daniel Dodge, printer, and Aaron Pennington, editor. Three years afterwards the paper was acquired by Jabez Parkhurst and Samuel Pennington. A year afterwards Stephen Gould acquired Parkhurst's interest, and in 1803 the paper was bought by William Tuttle & Co., who afterwards sold it to the *Daily Advertiser*. The *Sentinel* was the second weekly paper to be published in Newark, and was among the first to be published in the State. There are hundreds of old New Jersey families with whom the *Sentinel* has been a regular visitor for generations.

and fold them together. In a year or two

this press was in turn replaced by another of double its capacity, and using stereotype plates. This soon proved unequal to its duties, and was followed by still another, the capacity again being doubled. That press, the last used in the Broad Street building, was capable of only half the work which can be done by the quadruple, or one-third that which can be done by the sextuple press.

Long before its removal to Market Street, the *News* had outgrown its old quarters. Additions had been made to the building, No. 844, and the upper floors of the one adjoining, No. 840, had been leased and used. In the *Evening News* building all the departments of the paper had ample accommodations.

Closely connected with the press-room is a complete stereotyping department. The presses are run and power for other work is furnished by a good little horse power engine. The building is lighted throughout by electricity, the entire plant being owned and operated by the *News*.

The number of men employed in the composing room of the *News* is far in excess of that working on any other New Jersey newspaper. Even in departments the same fact holds good. It does more work and employs more men to do it than any of its State contemporaries.

From the beginning, the *Evening News* has been under the same management. Wallace M. Scudder is the publisher and Henry Wright Steel is the editor. William Hooper Howells is the manager of the advertising department. Russell P. Jacoby was first city editor.

NEW JERSEY FREIE ZEITUNG

THIS, the leading German newspaper in New Jersey, was established in the year 1858, by Benedict Prieth. The paper had existed for some years previous to this time, under the name *New Jersey Zeitung*, and was owned and edited by Major Annecke, who died in the early 80's. When Benedict Prieth purchased the property of the *New Jersey Zeitung*, the entire plant consisted of a few fonts of type, and an old-fashioned hand press, capable of printing a few hundred sheets per hour. The circulation of the *New Jersey Zeitung* in those days was about 400, and there was not as much reading matter in its columns as there is on one of the eight pages of the *New Jersey Freie Zeitung* of to-day. Mr. Prieth at first had only one assistant in the literary department of the paper, and this gentleman was often compelled to take a hand at running the press. The first large increase in circulation was experienced during the Civil War, when the loyal German citizens of Newark were anxious to hear the latest news from the scene of war. From that time on the paper has steadily grown, owing to the large emigration from Germany to this country. Mr. Prieth died in 1879, and the management of the paper has changed hands several times since then. At the present day, 1897, the *New Jersey Freie Zeitung*, with its own handsome building at 75 Market Street, and its splendidly equipped plant, produces a paper, which from a literary and typographical point of view cannot be excelled by any German paper in America. The Daily and Sunday *Freie Zeitung* circulates chiefly in Newark and Essex County, while the remainder of the German population of New Jersey is reached by the weekly edition. That the *Freie Zeitung* has the confidence of the business world of Newark, is amply demonstrated by the fact that the advertisements of the most successful business men, regardless of nationality, are to be found in its columns.

In politics the paper has always been independent, with a leaning towards Republican ideas and principles, and its great influence among the Germans of Newark is demonstrated by the fact that the Republican candidates in the city, county or state, have invariably been defeated whenever the *Freie Zeitung* has found it necessary to oppose either the candidates themselves, or the platform on which they stood. Its fairness and straightforwardness in dealing with all the leading questions of the day, have won it the esteem and confidence of the Germans of Newark.

On the first floor of the *New Jersey Freie Zeitung's* large building, the business department and the managers' private offices are located. The Hoe perfecting presses and the stereotyping department are in the cellar. In the front of the second floor the edi-

torial staff, and in the rear the reportorial staff have their quarters.

The composing room is on the top floor, and here are to be found five of the wonderful type-setting devices called Mergenthaler Linotype Machines.

The heads of the various departments are as follows: Benedict Prieth, son of the late Benedict Prieth, Manager; Frederick Kuhn, Editor; Emil Wenzel, Assistant Editor; William Katzler, City Editor; Frederick Fieg, Telegraphic Editor; Augustus Georger, Night Foreman of compositors; Gustave Wolber, Day Foreman of compositors; Richard Taylor, Foreman of press-room.

The *New Jersey Freie Zeitung*, in its various departments, employs a force of over fifty men. Its publications are as follows: *New Jersey Freie Zeitung*, (Daily edition), *Der Erzähler*, (Sunday edition), and *Weekly Freie Zeitung*.

Special edition for Hudson County, with office at 80 Washington Street, Hoboken, N. J., William Denstorff, Manager. This latter paper, although only two years old, has been wonderfully successful, and is now the leading German paper in Hudson Co. The large German population of such flourishing cities as Jersey City, Hoboken, Bayonne, etc., is proud of this newly established paper, knowing that it is devoted to the interests of the class of people which forms the bulk of its subscribers. The paper is ably managed by Mr. William Denstorff.

It is the proud boast of the proprietors of the *New Jersey Freie Zeitung* that the four papers which they publish, viz.: the *New Jersey Freie Zeitung*, (daily), *Der Erzähler*, (Sunday), the weekly and special edition for Hudson County, absolutely cover the German population of New Jersey, and that this belief is shared by the advertising public, is demonstrated by the fact that many of the largest business houses in the State advertise in the *New Jersey Freie Zeitung's* publications alone, to the exclusion of all the other German papers in the State, knowing that thereby they reach the entire German speaking population of New Jersey.

The illustrations shown on this page, represents the *Freie Zeitung* building, which has been lately improved with a new brown stone front, making one of the neatest newspaper plants in the city of Newark, and a life-like photo of its Founder.

104 Market

It is convenient and its presses, composing room and news methods are modern and efficient. It publishes from twenty to twenty-four pages each Sunday, and to each issue scores of writers contribute. The weekly cost of production is equal to that of many daily newspapers. Among its occasional contributors are eminent clergymen, lawyers, physicians and business men of the city and vicinity, besides a number of bright women writers. Its advertising columns are filled by mercantile houses, and its "cent a word" page is a market of industrial activity. The *Sunday Call* is read each Sunday by at least 100,000 persons, and it is no man's favorite with one member of the family as another.

While giving general news, but particularly the news of Newark and neighboring towns, the paper has special departments devoted to lodges and social societies, public schools, building and loan associations, women's clubs, whist and checkers, local politics, churches, and the building interests of the city. It endeavors to promote every worthy cause in which the people of New Jersey, and particularly those of Newark, are concerned.

The *Sunday Call* is printed from linotype machines upon a three-tiered press large in capacity, and has adopted every approved measure for increasing the efficiency of its plant. Its influence has been recognized throughout this section potent for good, and its appeal is successfully made to the thinking and practical people of the State. It is identified with every interest of the community in which it is published.

NEW JERSEY DEUTSCHE ZEITUNG.

THE *New Jersey Deutsche Zeitung* was founded on April 12, 1880, by Dr. E. H. Makk, Editor-in-Chief, and Joseph Knorr, Manager of the *New Jersey Freie Zeitung*. The scheme of the new German daily was matured in the residence of the late J. J. Hockenjos, a sturdy and brave battler for opinion's sake, whose figure and actions are fresh memories with all who used to attend the Board of Trade meetings. With Mr. Hockenjos were associated as first promoters, Mrs. Kimmerle, a woman of superior brain power and character, who has long successfully conducted her own dual business, that of milliner and florist.

At this time a great many old German Republicans had become sour and sore on the *Freie Zeitung*, and the new German daily was warmly welcomed by them. It was Republican on general politics, but straight-out Democratic in local affairs. In the early fall of 1880, Dr. Makk withdrew altogether and went to Rochester, where he still edits the Rochester *Volksblatt*. Mr. Knorr now took entire management of the paper. Charles Voelcker, an experienced German Democratic journalist, who had served on the old-time *Volksmann* with Major Franz Umbscheiden, took the editorial helm, with Mr. Louis Dannenberg as his associate and chief of the city department. In the general election that year the paper supported General Hancock for President and George C. Ludlow for Governor. Mr. Knorr gave his life to his work of building up the paper. He was at it day and night, Sundays as well as week days. He was a first-class business man and secured for the paper a full and liberal line of advertising. His devotion to his work, and his decided business talents inspired confidence, not only among business men, but among men like Gottfried Krueger and others, who aided him financially in the start.

His labors told in the success that crowned them. He took a lease of the paper, from the stockholders, for fifteen years, and before long was able to wipe out all indebtedness and established the paper on a handsome paying basis.

First among those who are entitled to special credit for their services in helping Mr. Knorr to make the *Deutsche Zeitung* the great success it is, are Mr. Louis Dannenberg, the accomplished and experienced, yet withal modest and retiring, German journalist, and Mr. Emil Kraeutler, who got his business training first under the eye of his uncle, Mr. Hockenjos, and next under that of Mr. Knorr.

Messrs. Dannenberg and Kraeutler are the managers of the paper. They have followed in the lines laid down by Mr. Knorr, and are pushing the paper along more prosperously than ever.

In its new quarters the *Deutsche Zeitung* has the fullest facilities to get out a first class local paper, one that is a great credit alike to its managers and all connected with it, and to the German reading people of Newark; a good, clean, live, bright and welcome visitor to the house; likewise a strong and sterling battler for true Democracy, the Democracy of Jefferson and the founders of the Republic.

Others besides Messrs. Dannenberg and Kraeutler, who have done good work on the paper, helping to make it all it is, are the late Oscar von Joeden, a fine writer and a good orator, in the threads of whose life are woven a romance of the heart, which may not be spoken of here, and who, like the immortal Swift, rotted out at the top; the late Charles Voelcker, already spoken of, as kind a soul as ever lived. The present editor is Mr. Carl Meyer.

As an advertising medium, the *Deutsche Zeitung* is of great value. It reaches the homes of the German population of Newark and Essex County. On January 1, 1897, the lease with the late Mr. Joseph Knorr expired, and from that date the paper was put under the control of the Board of Directors. Among them are, Mr. G. Krueger, Mr. Elias Berla, Mr. Ed-Schickhaus, Mr. F. L. Feind, Mr. Chas. L. Watter, Mr. Louis Dannenberg and Mr. Emil Kraeutler. The paper will in the future, as in the past, strictly adhere to true Democratic principles in national and state affairs, while in the county and local affairs, it will support the best candidates, irrespective of party.

Karl G. Meyer, editor of the *Deutsche Zeitung*, is well known and highly esteemed by the people of this city. He ranks among the brightest of the German-American journalists of Essex County, and as a graceful writer and critic, has few superiors. By hard work and perseverance he has succeeded in placing the paper on a solid basis, as its improved literary character, and the fine press as well as all the other necessary adjuncts that go to make an efficient newspaper plant show.

RAVINE ADVICE BUSINESS MANAGER

THE ORANGE VOLKSBOTE

THE first number of this paper was printed on a Washington hand-press, and issued on October 5, 1872. Its publisher, August Erdmann, a printer by trade, soon recognized the fact that he had to take an able writer as editor of his paper, as he alone could not attend to all the work, and therefore associated himself with Mr. Louis Darnstaedt. Week by week, not only the number of readers and subscribers increased, but one column after the other had to be filled with advertisements. Politically, the *Orange Volksbote* advocated democratic principles, and its influence upon the German population has been felt more than once. During the official term of Mr. Henry Egner, as Mayor of Orange, the *Volksbote* was designated as one of the corporation papers which published the city's advertisements, ordinances, etc.

After the death of its founder, August Erdmann, the *Orange Volksbote* changed hands. On November 1, 1891, it was bought by its present owner, Ernest Temme. The paper had been neglected by its late proprietor on account of sickness, and when it was sold, the once prosperous paper was in a most pitiable condition, to say nothing about press, type and the other material necessary to make up a paper. The new owner at once replaced the hand-press with a Campbell country press, bought new body type, and then started on hard up-hill work. By the aid of his son, Fred. G. Temme, who has since become manager of the *Volksbote*, the paper has not only regained its old stand-point but is now one of the most-read weekly papers in Essex County. Its circulation is steadily increasing, and the best business houses in Newark have their advertisements in its columns. The *Orange Volksbote* is to-day a seven-column twelve-page paper and a well-liked friend in the homes of German families in the Oranges and miles around.

As the *Volksbote* does not go to press before Saturday morning, its columns contain all the news of the week up to that time. This enables the *Volksbote*, unlike the other Orange paper, to bring happenings of late Friday night and early Saturday morning, and make it really a Saturday noon paper, which is appreciated by all its readers for some of whom the *Volksbote* is its only Sunday associate. On October 5, 1897, the *Volksbote* will issue an anniversary number, it being twenty-five years that the *Volksbote* has been issued, with more or less difficulty. This anniversary number will contain a complete history of the paper, together with illustrations of interest in and about Orange, and consist of at least twenty-four pages.

In the job printing department the latest faces of types have been added, which enables the *Volksbote* to turn out most any job, especially society work, which forms its main feature. Its place of publication is located at No. 26 Day Street, near Main.

The illustrations presented on this page are life-like photos of Mr. E. Temme and son, Editor and Manager of the *Orange Volksbote*. The former is a well-known citizen of Orange, and has been identified with the press of Essex County for more than a quarter of a century. Mr. Temme is happily situated in having so able a son to assist him in sharing the burden of his enterprising profession in the closing years of his active business career.

Mr. Fred. G. Temme, who is now the business manager, is a practical printer by trade, with a thorough knowledge of the profession, and devotes his time to furthering the interests of the paper and perfecting the job printing department.

ERNEST TEMME, EDITOR.

FRED. G. TEMME, BUSINESS MANAGER.

deeply active worker in the Democratic ranks for years, he is connected with the Joel Parker Association of Newark, a member of the German-English School Society of Orange, and a member of the U. G. S. B. Sharpshooters of New Jersey, of which he has been repeatedly elected President. He also belongs to Orange Lodge, No. 135, Benevolent and Protective Order of Elks, and several other charitable organizations, Singing Societies, and to the German Press Club of New York.

He was for a number of years an active and energetic member of the Executive Board of the Liquor Dealers' League, having served two years as their State Secretary, and at their convention in Paterson, 1894, and in Newark, 1896, he was unanimously re-elected with great enthusiasm. Mr. Koehler was elected as one of the Vice-Presidents of the National Retail Liquor Dealers' Association of the United States, at the convention held in Washington, D. C. He was chiefly instrumental in organizing the State thoroughly for the Liquor Dealers' State League of New Jersey, and his efforts were so highly appreciated, that at the convention held in Paterson, on the 6th, on behalf of the Hoboken Inn Keepers' Association, he was elected Inn with a very handsome jewel holding a copy of the design of which is a masterpiece of art.

# TOWN TALK

WHEN, in July 1895, Messrs. Burke and Beyer, the young men whose portraits appear on this page, assumed the ownership and management of *Town Talk*, the paper was rounding out the sixth year of its existence. At that time the publication was issued from No. 251 Market street and was printed by William A. Baker, at considerable cost per week, to its new proprietors. Less than eighteen months after securing control of *Town Talk*, the present owners made a new home for the bright and sparkling weekly at No. 249 Market street, from which address it is now issued. The plant is thoroughly equipped for job printing. A large and carefully selected stock of type, without doubt the finest assortment of any house in the State, which was essential to meet the artistic and diversified requirements of the advertising pages and other departments of the paper, and such other paraphernalia and fixtures indispensable to the office of a publication, conducted on the modern and strictly up-to-date ideas that characterize *Town Talk*, were in shape when the publishers installed the paper in its present abode. Few establishments now excel it. Being next door to the "old stand," yet entirely severed from ties that formerly bound it, *Town Talk* entered upon a career that, from the first indications, was destined to prove the most successful in its history.

It was the pioneer newspaper of its class, surviving hundreds of imitators and pursuing the even tenor of its way, without copying others' ideas or depending upon paste and scissors to furnish it with material. Indeed, only those papers that copied after *Town Talk*—that is, in the same class—achieved success and are living to tell it. As a home newspaper reaching the best class of people, *Town Talk* really merits the wonderful advertising patronage it commands, and in its new quarters, where only the most efficient workmen are employed, the opportunities for acquiring, and preserving, greater prestige in the big territory it fills, are more readily grasped and utilized. Messrs. Burke and Beyer certainly show, by their enterprise, that they mean

to spare neither time nor expense in the good work of extending their circulation and enhancing the value of their publication as an advertising medium. It is by far the handsomest illustrated paper published for five cents, so their task is not such a hard one after all.

Its bright sayings, its original stories of local happenings and incidents, its happy and effective style of treating public men and public measures, and its pungent criticisms of hypocrisy and cant have won for *Town Talk* many complimentary notices from the State and metropolitan press. *Town Talk* has its own methods in dressing down politicians for their shortcomings, and its independence is demonstrated, by the fact that it spares neither Democrat nor Republican when adverse criticism is thought to be deserved.

An inviolable rule of *Town Talk* is that nothing unclean, suggestive or in any way objectionable, from the standpoint of decency, shall appear in its columns. In all truth it is a paper of the home and for the home.

In connection with the success *Town Talk* has met with under Burke and Beyer, a plain, unvarnished statement should be made: It would have been a surprise, especially to the newspaper fraternity, had the venture proved a failure. The art of managing and editing a newspaper was no mystery to the new owners. The doubt, uncertainty and trepidations that would beset the path of novices in such an undertaking, did not loom up to appall them. They were "old" as newspaper men, though young in years. They were possessed of experience, ability, energy, indefatigability, and some means. Mr. Burke was the city editor of the Newark *Evening News* and Mr. Beyer held the managing editorship of the *Sunday Times-Standard*, at the time they purchased *Town Talk*. Mr. Burke had been connected with the *News* for twelve years, and had the advantages of the schooling in newspaper work, which only that enterprising paper can give and Mr. Beyer had also been connected with the *News*. Mr. Burke was born in South Orange, and Mr. Beyer, in Newark.

L. F. BURKE.

HERMAN E. L. BEYER.

of intense interest to the people of the Emerald Isle, among whom it has a large following. It is the only paper of its kind in the city, and its name for a time the caption of the *Newark Ledger* was the last to name James M. O'Connell, who was the first to name James M. O'Connell in 1866, and it was the chief means of spreading the name of August, 1866, Messrs. O'Connell, who had organized a stock company, who thought it would be well to name the *Newark Ledger*, as it would under this name be able to avoid the popularities that might be cast upon it by the orthodox appear in its columns. The company was organized for \$25,000 and its shares at \$50 each, and the first issue was sold below par value. The president of the company was James M. O'Connell, the secretary, John Regan,

in 1866, *The Ledger* went with its support of the Presidential campaign of 1866, and the result was a rapid increase in circulation. It has since been found true in its support of the people, and pure, in politics, and that the people are ever ready to take up the cudgels in support of the persecuted for their faith and courage. It attempts to encroach upon popular rights, and it present subscribers in every part of New Jersey, and, indeed, in nearly every part of the country. It has been complimented by some of its readers as the best paper they have found it the best paper to read what they have to sell.

ALBERT M. HOLBROOK.

ALBERT M. HOLBROOK (DECEASED.)

FOR more than a quarter of a century Albert M. Holbrook took an important part in the work of up-building the city of Newark. Standing at the head of one of its vastly important institutions of a public character and one in which every citizen had an interest, this man of genius, and I might almost well say, man of destiny and ever persevering, worked on, with few returns and less thanks, till his o'er wrought system gave way, and he that went out and in among us, so cheerful and uncomplaining was then carried to the tomb. Few men were better known than Albert M. Holbrook. His life work lay in the way of producing a map of the city of Newark and making a directory of the same. The memory of Albert M. Holbrook will be cherished by those who knew him and the work he did while he was a sojourner here will be canvassed in honor, and

M. J. O'CONNOR, MANAGER NEWARK LEDGER

should none other tablets be erected to his memory, readers of Essex County N. J., Illustrated, as they turn its pages, will find a constant reminder of the debt of gratitude the people owe him, in the beautiful memoriam illustration on which the artist has so beautifully traced his name and the lines of a copy of his Newark City Directory, among the gems of art which our artists have so gracefully transferred to the pages of this souvenir. For genuine open heartedness Albert M. Holbrook was noted, and for perseverance in the accomplishment of purposes and the ends he sought, few was possessed of in a greater degree. He was far-seeing and nobody was ever fonder of brushing away the mists which shadow much, if they do not shut out from undiscerning eyes great events breaking through the clouds of the future and rushing toward the vista of grandeur on which we stand and fail to see them, even though rushing toward us with locomotive speed. For an example of his far seeing and his power to read the future, attention can be called to his declaration made in the Board of Trade, which grand institution he

was almost the father of and loved as the apple of his eye, and from which he was seldom absent when a conclave was being held. Another, he saw in the industrial features of Newark. History had long opened up to the people of Newark that she was the Birmingham of America, but it was left for Albert M. Holbrook to be the herald of the fact that it was such indeed. Again it was the wisdom and far-sightedness of this same man that made others see as he was seeing that Newark, as the great imporium of industry of the western continent, needed only a public demonstration to show it to the world.

WALTER C. JACOBS.

WALTER C. JACOBS, a photo of whom is shown in the illustrations on this page, is perhaps one of the youngest and most enterprising printers in Essex County. He was born in this city in 1873, and was educated in the old time-honored Morton Street Public School. In May, 1895, he opened a printing office at No. 7 Alling, near Market street, and in a small way commenced his present business with every prospect of success. Being a practical printer by trade and having one of the finest arranged plants in the city, he is enabled to execute all orders in the job printing line with neatness and dispatch. Mr. Jacobs is identified with many of the leading societies of the city, and is a popular man with the young element of Newark. He is an enterprising business man and devotes his personal attention to the work entrusted to him, and is a worthy representative of the job printing trade.

DAVID B. NATHAN.

SCHOOL Commissioner David B. Nathan, who is now serving his second year on the Board, was born in Copenhagen, Denmark, January 24 1856, and was educated in the public schools there. For the past twenty-three years he has been connected with the firm of Chas. Cooper & Co. He has been a lifelong Republican and has always taken an active part in the politics of the Tenth Ward, from which he was elected as a member of the Board of Education by a handsome majority. Throughout his term on the Board he has shown a keen interest in the cause of education and has done much to advance the school work in this city.

FORNI'S

CHARLES WOLBER & CO., PRINTERS

THE illustration on this page represents a view on the southwest corner of Market and Washington streets, one of the old historical localities in this city, commonly designated as the swamp or "watering place" in the annals of the town. It has been known for years as the "Printer's Corner," and has been the headquarters of the German newspapers in this city. The building is now covering the plant of Charles Wolber & Co., who are well known Newarkers engaged in the German and English printing trade and the manufacture of badges in all the various styles. Although the firm is located at that corner but a short time they have been known in the printing trade during the past thirty years. Mr. Wolber, the senior member of the firm, was born and educated in this city, having learned the printer's trade on the spot where he is now successfully conducting a business for himself. He is ably assisted by his partner, Mr. August Putscher, an experienced and conscientious printer, who entered the firm in June, 1895, and who has been connected with some of the largest printing houses in this city. These enterprising citizens devote their time and talents to book, job, mercantile and society work of every description, in either the German or English languages, and make a specialty of German printing and translations. The firm also manufacture every description of badges, buttons and all the numerous designs in this particular line, which has become so numerous to society folks. Through their prompt and courteous treatment of customers they are rapidly coming to the front rank in their line of trade. The jobbing department of Charles Wolber & Co., is one of the most complete of its size and kind in the city, and it is an undeniable fact that the members of the firm are alive to the procuring of all the newest styles and latest designs in the profession; being practical mechanics themselves, they employ the most skillful workmen and thus secure the good will of their many patrons. Their facilities are such as to meet any demand that may be made upon them for the rapid and handsome completion of all work intrusted to them and their rapid advance

COR. MARKET AND WASHINGTON STS., PRINTING PLANT C. WOLBER & CO.

from that slow and imperfect printing machinery to the presses which enable them to turn off the finest of the process half-tone work, fitly characterizes the progress made by these wide-awake mechanics in their jobbing department. The members of the firm are prominently identified with many of the leading German and English associations which are a credit to the city of Newark.

The firm of Wolber & Co. was established at No. 62 Springfield avenue, about four years ago, at the beginning of the present business depression, in the basement, a small room of which was used covering a space of about one hundred and fifty square feet, and although the firm has had much sharp competition to contend with, the business has steadily increased to such an extent that the enterprising firm was compelled to enlarge their plant. New quarters were found on the first floor in the same building, having one-half of the floor space, and

six months later it was necessary to occupy all, having about five hundred square feet of room. Thus it grew until March 1, 1897, when the plant was removed to No. 82 Market street, corner Washington, where it has ample room to meet all requirements for some time to come. The manufacture of badges has become an important industry in connection with the printer's calling of late years, and Messrs. Wolber & Co. are alive and wide-awake in this branch of the trade, having added a model and well equipped badge department to their business by which they are enabled to turn out promptly anything in the line and on the most reasonable terms. The firm make a specialty of translations in German or English, and in this particular is one of the few printing houses located in this city.

DRAKE & COMPANY, PATENT ATTORNEYS AND EXPERTS, 231 BROAD STREET, NEW YORK. DR. J. C. DRAKE, ATTORNEY AT LAW, 231 BROAD STREET, NEW YORK. DR. J. C. DRAKE, ATTORNEY AT LAW, 231 BROAD STREET, NEW YORK. DR. J. C. DRAKE, ATTORNEY AT LAW, 231 BROAD STREET, NEW YORK.

COR. BROAD AND MARKET STS.—DRAKE & CO.'S PATENT OFFICE.

THE

DR. J. C. DRAKE, ATTORNEY AT LAW, 231 BROAD STREET, NEW YORK. DR. J. C. DRAKE, ATTORNEY AT LAW, 231 BROAD STREET, NEW YORK. DR. J. C. DRAKE, ATTORNEY AT LAW, 231 BROAD STREET, NEW YORK.

relates to the preparation of specifications and drawings, to the making of preliminary examinations as to the patentability of an invention, and to the preparation and filing of applications for patents, designs, trademarks, and labels, and to every item of service necessary to the successful prosecution of the invention from application down to the time the patent is granted and issued by the office. The inventors are of all parts of the United States, and many of the leading inventors of New York employ them as attorneys. Mr. Drake was born in New York, and is popular with all and well known in the general community. He is a member of the Patent Office, and has been in the practice of his profession since 1850. Mr. Drake and Mr. H. B. Peile are the only patent attorneys in New York.

inventions in this country is evidenced by the fact that during the existence of this firm the number of patents issued by the U. S. Patent Office has increased from about 41,000 in 1864, to 570,000 at the present time, Feb. 23, 1897, and New Jersey stands near the head of the list in respect to the number of inventors and patentees. The firm are recognized as able, scientific and successful attorneys and experts, and possess every possible facility for conducting every branch of patent law under the most favorable auspices and upon the most satisfactory terms. Their practice

HARRIS B. PEILE

## EDWARD WESTON.

THE introduction of the dynamo electrical machine for electroplating, electro-typing and similar classes of work revolutionized the art of depositing metals and effected an immense annual saving in time and material, concomitant with the work on these machines for electroplating and electrotyping. Mr. Weston carried on his investigation on machines and apparatus for the electrical transmission of power and for electric lighting, and pursued the work with an ardor and earnestness which seems almost incredible, and under circumstances which would discourage most men. Not one of the men associated with him had any confidence in the future of the great art which has since sprung up from his and the few other earnest workers engaged in the same line. The business men considered most of his schemes chimerical, but he stuck to his work with a determination and persistence which was remarkable, and his confidence has been abundantly justified by the results.

One of the most serious difficulties met with in the early stages of the work on dynamo machines was the great loss of energy in the machine, and the great amount of heat caused by the loss. Mr. Weston carefully studied all the sources of loss in machines, and by introducing entirely new features, was able to reduce the loss to an infinitesimal amount, and thus produce machines which gave back nearly all the energy expended in driving them in electrical energy for useful work. The types of machines known before his time gave from twenty-five to fifty per cent. of the energy in the useful work, the rest of the energy being wasted in the production of injurious heating of the machine. Mr. Weston, in 1873, changed all this and succeeded in building machines which gave eighty per cent. of the energy expended in driving them, and by further investigations later on succeeded in raising the efficiency until it reached ninety-seven per cent. But this saving of energy was not the only result secured by his work. The saving of energy meant the absence of serious heating of the machines and consequently decreased liability of injury to the insulation, and also meant that vastly more mechanical energy could be transformed into electrical energy by a machine of a given size. In this way the cost of a machine for a given power of conversion was greatly reduced. Without these advances it is safe to say that the application of electricity to electric lighting, power transmissions and the numerous uses could not have been accomplished. With the perfection of the dynamo machine its field of usefulness became immense, and Mr. Weston's time was spent largely in opening it up. He attacked the problem of arc lighting from various standpoints and invented and perfected numerous devices for the production of arc lights, and for the measurement of the current and the distribution of the same. He was the first

PRIVATE LABORATORY OF EDWARD WESTON, HIGH STREET.

EDWARD WESTON.

to make and use the copper coated carbon so extensively employed in arc lighting, and was the first to master the difficulties of making carbons, and it was in Newark that the first successful carbon factory was established. To make satisfactory carbons for arc lights was at first no easy matter, and a vast amount of experimental work and thoughtful study was needed before the difficulties were overcome. Special machinery had to be designed to grind and mix and mold the material and a great deal of work had to be done to find the most suitable material with which to bind the particles of carbon together, and produce suitable sticks for use in the lamps. These difficulties were all overcome and a vast industry has been established in this line alone. The methods and machinery now employed by the various large establishments in this country engaged in the work of manufacturing carbons were first worked out by Edward Weston.

In the transmission of power by electricity Mr. Weston was very early engaged, and in the old Synagogue, machines for the purpose could be seen delivering several horse powers as early as 1877, with a degree of efficiency which has never been surpassed.

In the line of incandescent lighting Mr. Weston shares with Edison and Swan the honors of much useful work. He attacked the problem long before Edison, and by his process of treating carbons by electricity in the presence of hydro-carbon fluids, gases or vapor, overcome one of the most serious obstacles to the perfection and introduction of the incandescent lamp, and by numerous other inventions contributed in no small degree to the development of these branches of electric lighting. The record of his work in these and numerous other fields is found at Washington where nearly 400 patents have been issued.

INTERIOR VIEW STATE BANKING CO.

part of  
has to  
The  
to its  
works.  
If the

reader is not a patron of the bank it would be well worth his while to step in and take a look at their model room. Just at the right of the entrance will be found the comfortable offices of Julius Stapff, cashier, and William Scheerer, assistant cashier, who will be glad to show the caller such attentions as might be sought for. Edward Shickhaus, the president, and Judge Gottfried Kreuger, vice-president, will always be glad to see and welcome friends or strangers who call for profit or pleasure, both of which can be reached in meeting either in their snug parlors, and the former by opening an account with this abundantly safe bank over which they preside.

The robust and hearty good-natured Judge of the State Court of Errors and Appeals, one of Newark's multi-millionaires, is one of these generous, great-hearted Germans, among our fortunate German fellow-citizens, with whom to meet is a lasting treat.

The State Banking Company is peculiarly a State institution and was organized in 1871, under the State Banking Laws and is now the only one outside the national household. The heavier part of the capital is held by our German fellow-citizens and the greater number of her patrons have a warm place in their affections for the Fatherland. As almost one-fifth of the people of Newark are of German descent it will not readily be seen what smooth sailing a bank like this will have. Starting off with a capital of \$100,000, it didn't take long to build up and to the elegant business it was and is sure to command. No one ever can write about this or any other bank doing business in the State of Essex can be amiss, providing it is well meant for an honest and its business methods or in declaration of its strength and

In conclusion, if one thing more than another has added to the strength, to be readily found in its well-to-do body of directors, is that which has his foundations in unencumbered real estate and a good cash. That genial good-heartedness which pervades the relations of customers, managers and conductors, throws a halo of respectability over all over and around it and gives to all an abundance of that which is its firmness and solidity.

## INDUSTRIES OF ESSEX COUNTY.

It has already been stated that the settlers of Newark were not mechanics or manufacturers, but farmers. Naturally, therefore, their first concern was the soil and the support and maintenance which it might be made to yield. It may very readily be comprehended that theirs was

not a very fierce struggle, with the rich virgin soil, which to yield its abundant increase, needed but the asking. But what with the labor of making their clearings, building their dwellings, and doing the thousand and one things incident to the pursuit of agriculture in a new country, the settlers had no time to think of other labors, much less to bestow upon them. Accordingly, only such industries were thought of as actually pressed themselves upon the attention of the busy planters. Naturally, the first of these to reveal its necessity in an isolated farming community, was, when the grain had been garnered in, a grist mill.

Accordingly, we find that at a Town Meeting held March 9, 1668-69, this resolution was adopted:

"Item. The Town saw Cause for the incouragement of any amongst them that would Build and Maintain a Good Mill, for the supply of the Town with Good Grindling, To offer and

THE OLD FACTORY WHERE SETH BOYDEN INVENTED AND FIRST PRODUCED MALLEABLE IRON.

Tender freely the Timber Prepared for that use, Twenty Pounds Current Pay, and the Accommodations Formerly Granted Belonging to the mill, viz.: 18 Acres of upland and 6 of meadow, with the only Liberty and privilege of Building a Mill on yt Brook; which motion was left to the Consideration of the Town Be twixt this and the 12th of this Mo. Current at Even, and the Meeting is adjourned to that Time: And in Case any desire sooner, or in the mean Time to have any further Treaty or Discourse about his or their Undertaking of the Mill, they may repair to Mr. Treat, Deacon Ward and Lieutenant Swain, to prepare any Agreement between the Town and them."

Notwithstanding this offer of the Town, which would seem to have been very liberal for that time, no one appeared to be willing to undertake the work on these terms, and we find this record of the proceedings of the town meeting on the 12th of March, 1668-69: "None appearing to accept of the Town's Motion and Encouragement to build and maintain the mill, they agreed to set upon it in a general way, and moving to Lieut. Swain about the matter, he made some propositions to the Town, and at Length the Town agreed with him for 20s. by the week or 6 working days, and three Pounds over for his skill, unless he shall see Cause to abate it, which if he shall see cause to do, the Town will take it thankfully: for the which he engaged to improve his Time and skill for the best advantage and carrying on to an End the whole Work, with all that shall be implied by him so far

as belongeth to his Art and Trade of a Millwright; as also to give his best advice about the Dam, or leveling the Ground, as the Town shall need him, and this to be done as soon as conveniently he can; and the Town promiseth to help him with Work in part of his pay as he needs it, so many Day's Work

OLD SYNAGOGUE ON WASHINGTON STREET WHERE FIRST DYNAMO WAS MADE.

the first year of its existence. This was established, upon the 1st of January, 1800, and it existed bore the name of the Little Britain Manufactory, the terming industry of the little town of Little Britain, which was a scene of multitudinous manufacturing, and was the principal source of the little agricultural town of Little Britain.

The first year of its existence, however, rested upon the foundation of the first settlement, Deputy-Rector, in London: "At a place, New York, from here, is made great quantities of good Cyder, from New England or from the Islands." The following year another year, "The abundance of good Cyder,

HOWE, ON MILLERY, DEPEND AND PARK STREETS.

of Newark, which is esteemed at New York, other parts, that it is sold beyond any that of England."

The first year of its existence, however, rested upon the foundation of the first settlement, Deputy-Rector, in London: "At a place, New York, from here, is made great quantities of good Cyder, from New England or from the Islands." The following year another year, "The abundance of good Cyder,

so in 1698, this subject coming, as did all others, before the town meeting, and being passed upon by the votes of all the citizens. It is recorded, under date of April 10, 1698, that "It is voted that Thomas Hayse, Joseph Harrison, Jasper Crane and Matthew Canfield shall view whether Azariah Crane may have Land for a Tan-Yard, at the Front of John Plum's home Lott, out of the Common; and in case the Men above-mentioned agree that Azariah Crane shall have the Land, he, the said Azariah Crane, shall enjoy it so long as he doth follow the trade of Tanning."

Azariah got his land and his tannery was established at once, and the trade in leather and shoes was thus early established on a firm foundation. Its growth was necessarily slow, but it was

Never, perhaps, were pioneers better equipped to establish a permanent and prosperous settlement than these pious founders of Newark. Not with mechanic appliances to make labor easy or dispense with it all together, or with wealth to purchase the labor of others, but with those strong manly qualities which insure, because they conquer, success. Health, energy, courage, industry, patience, perseverance, with these qualities failure is impossible, success a certainty. It adds to the glory of these men, that although their religious feelings were deep and strong, and their religious prejudice no doubt intense, yet they either knew not or had overcome the passion for persecution. While they required every one desiring to join their colony to subscribe to their "fundamental agreements," yet they sought to punish

JEWELRY WORKS OF KREMENTZ & CO., COR. MULBERRY AND CHESNUT STREETS.

steady and sure, and ere long it became the staple industry of the town.

There were not wanting other craftsmen in the town sufficient to supply the immediate necessities of an agricultural community. Thomas Pierson and Benjamin Baldwin were weavers, John Ward was a "Turner," which no doubt included cabinet-making and joining; many, indeed, of the original settlers joining some handicraft to their agricultural pursuits. All the casks and barrels, for the cider made in the town, seem to have been made by the planters themselves, and so great was the demand for them, that as early as 1669, it was necessary to prohibit their sale except "for the use of the Town." This, by the way, was doubtless the earliest embargo laid in any of the colonies.

no one for refusing. And they provided in advance that where the conduct or outspoken opinions of any settler should offend the community, there should be no persecution, pains or penalties, but simply that the offender should be paid a fair price for his lands and remove from the community, with whom he was not and never could be in sympathy or accord. This was not, of course, absolute freedom of opinion or of religion, but for those times and circumstances, it was a great liberality, as unusual as it was enlightened. Material prosperity could scarcely fail to wait upon men possessed of the strong qualities, the conservative principles, the moderate tempers which distinguished and enabled the pioneers of this plantation. And there is every evidence that from the beginning the settlement was prosperous.

the boot and shoe industry of Newark, which in twenty years, easily chief in the State, has secured a diffusion of the map of Newark, published in 1850, which shows the city of a shoemaker in one of its streets. According to his statement, "one-third of the population are constantly employed in the manufacture of shoes."

THE ESSEX MANUFACTURING COMPANY, 75 81 NORTH THIRTIETH STREET.

The best opportunity for observing the industrial growth of the town, is found in the town census taken in 1826, by Isaac Naylor, assessor. He reports the number of industries and the industrial population as follows:

Three Iron and Brass Foundries, twelve workmen; one Cotton Factory, six workmen; three Tin and Sheet Iron Factories, nine workmen; one Coach Spring Factory, ten workmen; one Cocoa and Mustard Factory, eight workmen; one Paper Factory, thirteen workmen; one Looking-glass Factory, four workmen; one Soap and Candle Factory, four workmen; one Eastern Pottery, three workmen; one Rope Factory, one workman.

There were also one Distillery, two Breweries and two Grist Mills. The number of Lands employed not given.

Various other trades and other branches are enumerated as follows:

Blacksmiths, 95; Carriage-makers, 64; Carriage-trimmers, 4; Wheelwrights, 21; Carriage-smiths, 77; Carpenters, 89; Saddlers, 79; Hatters, 70; Curriers, 61; Saddlers, 57;

FREDERICK HELLER, (DECEASED.)

Masons, 46; Coach-Lace Weavers, 30; Cabinet-makers, 35; Tailors, 35; Jewelers, 22; Blacksmiths, 19; Plane-makers, 17; Tanners, 17; Silver-Platers, 15; Bakers, 15; Carters, 12; Saddle-Tree-makers, 12; House-Painters and Glaziers, 10; Wagon-workers, 8; Trunk-makers, 7; Coopers, 7; Stone-cutters, 6; Last-makers, 6; Butchers, 5; Plough-makers, 4; Pump-makers, 4; Morocco Dressers, 3; Brush-makers, 3; Gunsmiths, 2; Watch and Clock Makers, 2; Fallow-Chandlers, 1; Lock-makers, 1; Printers, 7.

Mr. Nichols enumerated the population of the town as 8,017, and it will be seen from this table that about 1,700, or more than twenty per cent of the whole number were actively engaged in manual labor, speaking well for the industry and thrift of the community.

In 1836, the year of the incorporation of the town as a city, a census was taken by the direction of the

ELIAS FERRER, (DECEASED.)

Common Council. The rapid growth of the town in the preceding ten years, was shown by the enumeration of the population at this census, at 19,732, an increase of almost 150 per cent. In connection with this census, Dr. Jabez G. Goble prepared the following exhibit of the industries of the city, number employed, and value of product, which he says, "it is believed to be essentially correct," and "will exhibit a general view of the business of the city, the greater portion of which consists of its own manufactured articles."

Boot and Shoe Manufacturers, 734, \$1,523,000. This branch of trade has always been very extensive; Hat Manufacturers, 610, \$1,055,000; Carriages of every description—omnibuses, railroad cars, &c., 897, \$1,002,000. Some of these establishments are very large; Saddles, harness, whips, &c., 590, \$885,500; Clothing business—manufactured for southern markets, 1,591, \$840,000; Tanning and Currying, 150, \$899,200.

The principal portion of this business is done in the swamps in Market Street; Coach-axes, springs, door-locks, brass mountings, &c., 220, \$250,000; Coach-lace, tassels, fringe, &c., 112, \$80,000; Oil-silk, patent leather, malleable iron, every variety of casting used by coach-makers, machinists, &c., 125, \$225,000. The collection consists of more than 1,000 plain and ornamental patterns now in use; Cabinet-makers, 145, \$180,000; Jewelry-makers, 100, \$225,000; Trunk and Chair-makers, 106, \$90,000; Silver-plating, 100, \$100,000; Sash and Blind-makers, 107, \$70,000; Coal trade, \$200,000. This business has been extensive the past year. All other manufacturers, comprising many different branches, may be fairly estimated at \$500,000, making a total value of \$8,124,700.

In 1861, the value of the manufactured products of the city had swelled to the sum of over \$23,000,000. The Civil War scarcely interrupted the industrial activity and prosperity of the

city, which was kept busy during the entire period of its continuance, in manufacturing for the Union armies, small arms, accoutrements, saddlery, harness, clothing, &c., &c. But the close of the war witnessed a wonderful increase of prosperity, and the growth of the city's manufactures was marvelous, both in volume and variety.

So vast and varied became the products of the city, that the idea occurred to A. M. Holbrook and a few other enterprising and farsighted citizens, of still further advancing the city's business and manufacturing interests, by giving an exhibition of all its varied manufactured products. After an agitation lasting some time,

JOHN TOLER, (DECEASED.)

M. MEALY, (DECEASED.)

1880, \$26,757,170. The value of materials used in the manufacture of the 1,750 shipments located in Newark, \$46,020,536. The value of the whole of all variety of manufactured goods produced in the city in factories and workshops is \$93,476,652.

The manufacture of leather trunks, at all times, ranked as one of the leading industries of the city, and still holds a leading position among our important manufacturing interests.

In 1884 the output of leather of all kinds, patent, common, trunks, and carried, entitled the city to rank first among the cities of the Nation, in the value of finished products. The fact of our being first in this great industry, will be seen in the following table, generated from the census returns of 1890. In this important branch of industry, there are forty-nine establishments, with a capital of \$4,815,625, producing goods

THE ABOVE BUILDING IS AN AVENUE BETWEEN NEWARK AND NESBITT STREETS.

valued at the sum of \$8,601,638, employing 2,413 hands, and paying \$1,899,577 in wages yearly.

Of the 2,413 interests employ a capital of \$5,499,473, giving 2,027 hands, and paying in wages \$955,395, and turning out goods of a value of \$6,021,207.

The manufacture of jewelry is carried on extensively in the city. There are twenty jewelry and four watch-case establishments, with a total capital of \$4,591,372, employ 2,280 hands, and pay in wages amount to \$1,598,288, and by their combined efforts goods valued at \$5,636,084 are produced. The reputation for the workmanship of the jewelry manufactured in Newark has given our city a reputation for this branch of our industry to the best.

For more than half a century, the hatshops of our city have

DAVID RIPLEY, (DECEASED)

turned out yearly, goods valued at more than \$2,000,000. The report for 1890 enumerates a total of fifty establishments in this branch of industry, employing a capital of \$1,808,444, furnishing employment to 3,979 hands, paying in wages \$1,542,082, and turning out a total product valued at \$3,719,264.

No branch of industry is of more importance to the growth and progress of manufacturing in a city, than its machine shops and foundries. It is of vast importance to be able to have within call men skilled in mechanism, and to this advantage can be attributed one

GEO. A. HALSEY, (DECEASED)

of the primary reasons that has induced manufacturers to locate in Newark. It is hardly saying too much when we claim that in the seventy-four machine shops and foundries operating in our city, are to be found among the 2,276 artisans and mechanics, men whose craft and skill can produce any piece of machinery, no matter how intricate, that may be required. The capital invested in this, the fifth largest manufacturing interest in the city, is \$3,724,393. Total amount of wages paid yearly, \$1,418,646, and the value of the finished product for the same period, for the year 1890, was \$2,360,248.

The manufacture of boots and shoes began with the founding of the town, and has grown in proportion with its growth. Our early records show that, in this line of trade, we had achieved considerable renown.

We have not lost any prestige, but with steady strides, our manufacturers have extended their trade and reputation.

The names of Banister, Johnston & Murphy, P. Hogan, Boyden, Miller & Ober, and others of our manufacturers, are

capital amounts to \$2,955,450, turning out a yearly product of \$2,154,085, paying in wages to 1,579 hands, the sum of \$835,272.

Newark has fourteen plants for the manufacture of trunks and valises, employing a capital amounting to \$1,339,950, paying in wages \$666,739, to 1263 operatives; the total yearly products amounting to \$1,774,113.

The manufacture of varnish has, from a comparatively small interest, whose yearly product in 1860 was \$347,000, assumed a very important rank in the list of leading industries to be found in Newark. In the year given, the capital invested amounted to \$155,000, employing twenty-four men. The returns for the year 1890, show eighteen firms, with a working capital of \$2,209,733, employing 196 workmen, paying \$226,557 in wages, consuming materials to the value of \$848,841, in the productions of finished products valued at \$1,887,161.

Fine coach and carriage harness has been one of the leading features among the varied

sufficient guarantee for the workmanship and finish of their goods among the trade in every section.

In all branches there are 120 establishments whose combined capital amounts to \$1,466,481, giving work to 2,959 hands, paying annually in wages \$1,042,177, and producing yearly, \$2,472,618 in finished product.

A leading industry in all centres of population is the clothing interest. With Newark it is a specially important one—manufacturing, as we do, all variety of women's and men's wear for home consumption and trade. A steady increase in the volume of business done yearly during the past decade, indicates its development. There are 275 firms and individuals engaged in the several lines, having a total capital invested, amounting to \$2,354,296, employing 3,347 male and female operatives, whose wages aggregate \$1,338,503, the finished products having a value of \$3,847,659.

In the hardware industry, including saddlery hardware and other branches, there are fifty-three establishments, whose

PATRICK HOGAN, (DECEASED)

NOAH F. BLANCHARD, (DECEASED)

volume of its manufacture—800,000—natural home of the chemical industry, and in this respect Newark can claim her fair share of the business. We have ten plants, whose combined capital amounts to \$1,446,137, furnishing labor to 411 men, and paying wages to the value of \$271,741. The product of these establishments swells the total value of the manufactures of the city by the sum of \$2,236,117, an item in the business annals of the city that counts for a great deal.

Another large industry will be found in the corset establishments located in this city. There are eleven workshops manufacturing corsets, employing 1,689 hands, whose pay-roll foots the bill for \$521,033. The capital invested is \$600,536, and the total amount amounts to \$1,201,432 annually.

The slaughtering and meat packing branch of commerce is a large and growing one, with fourteen establishments carrying on the business done. Their combined capital amounts to

JOHN FOLER, SONS & CO., ADAMS AND JACKSON STREETS.

\$301,500, and the annual product is valued at \$3,666,696. The business, up to a few years since, was confined principally in furnishing the supply necessary for home consumption. Within the last few years the ham and bacon of Newark make, bearing the brand of "Bailey," "Joy," and others have become famous abroad, and a steady demand has been created.

Iron and steel manufacturing plants produce, yearly, a total product valued at \$1,245,426. The direct capital invested in this industry is \$1,394,363. Employment is given to 8,000 operatives, both skilled and unskilled, and \$316,137 is paid out in wages.

The extensive plants located upon the west bank of the Passaic river are an evidence of the steady increase of business in the manufacturing trade of the city. The volume of business done, notwithstanding the serious depression of the past three years, has shown the importance of this branch of the city's commerce. There are 1,661 car loads arrived by rail monthly, a total for

WORKS OF THE NEW JERSEY ZINC & IRON WORKS CO., ON THE PASSAIC RIVER.

the year of 2,650 cars, as follows: Via the Pennsylvania, 1,232 cars; the New Jersey Central, 452; the Delaware Lackawanna and Western, 420; Erie, 252; Lehigh Valley, 200. The receipts by water shipment, of which no record has been made, is greatly in excess of what arrives by rail. In all, there are twenty yards, employing a total capital of \$684,181, paying in wages to 483 employees, \$339,897, and handling annually products valued at \$1,123,087.

Among other large industries that give to Newark its reputation as a centre for manufacturers, might be named a few whose magnificent plants, would, if located in some less favored city, give to it a prominence in itself. Such establishments as

the Balbach Smelting and Refining Company, of whose works are turned out yearly, bullion and ores to the value of from twelve to fifteen million dollars; the Clark Thread Company, employing a capital of more than \$5,000,000, furnishing work to upwards of 1,800 employees; the New Jersey Zinc & Iron Company; the Lister Agricultural Works, with a capital of \$1,000,000, producing fertilizers, etc., to the value yearly of \$2,000,000.

In all there are 201 distinct classes of manufacturers located here, with a total of 2,400 establishments, divided into groups comprising the various trades, as shown in the table compiled by the Census Bureau at Washington, from the returns received for the year 1890. The subject of a "Greater Newark," is engaging the attention of many able and far-seeing men who believe that the consolidation of our city with adjacent cities and towns under one municipal government would increase the prosperity of all the inhabitants. The change, when made, should embrace all the territory including Jersey City on the east, the Oranges on the west, Paterson on the north and Elizabeth on the south.

Such a district carefully filled up with a variety of industries would become distinguished as the most advanced and prosperous, for manufacturing products, in the nation. The localities are so numerous and well chosen, and easily adapted to sanitary conduct of large and profitable production, and the close contiguity to the largest markets of the world over its highways of tide-water and sea, that at a glance the most casual observer cannot fail to see Newark's great advantage.

ALFRED LISTER, (DECEASED.)

JOSEPH BALDWIN, (DECEASED.)

## THE NEWARK WATCH CASE MATERIAL CO.

THE plant which forms the illustration presented on this page, stands prominently among the industries which have contributed to make Newark famous the world over. In calling attention to some of the numerous industrial pursuits which are successfully conducted in the city, there are few that have achieved greater success than the Newark Watch Case Material Co. This result, in a large degree, is due to the push and enterprise of Alexander Milne, the founder of the stem-winding attachment now in general use on American made watches.

The stem winding apparatus which takes the place of the old obsolete key in every American made watch, is turned out of Newark factories. It is not surprising that Newark should hold the industry of watch case material manufacturing,

are not averse to purchasing the supplies from Newark watch case material manufacturers, which carries with it in the trademark it bears, the very highest qualities of perfection.

Prior to 1874, when this company had commenced to manufacture these articles, they were all imported direct from the Swiss manufacturers, as all stem-winding watches were made in that country. The president, Alexander Milne, of this company, being a jeweler, and wide awake and alert, saw the opportunity to start the business here. His first move was to associate himself with a Swiss who had some practical experience in the watch case line. The necessary tools and costly machinery, which were indispensable adjuncts, were soon collected, and it was not very long before the case makers were purchasing their stem-winding crowns and other necessary material right here at home.

WORKS OF THE NEWARK WATCH CASE MATERIAL CO., N. E. COR. MECHANIC AND WARD STREETS.

when she has in the thousands of her happy homes, the skilled artisans domiciled so necessary to run the machinery, and whose skilled hands handle the tools. It is passing strange too, that the writer should have the opportunity of recording the fact, that almost the entire product of the watch case material is used up on this side of the ocean, and that the factories engaged in this work are concentrated within the corporation limits of the city of Newark, and it naturally follows, and as a matter of course becomes very much of an item, in the grand integral part of the whole of her manufacturing greatness.

While the output of this great industrial establishment is consumed very largely right here at home, each one of the many necessary little articles having some absolute qualification for meeting certain ends in the successful conduct of the sister industry of watch case making, yet other centres of industry

There was no more going abroad, for the progressive spirit of a thorough-going Newark mechanic had made it unnecessary, through his genius applied. Although the beginnings were small, less than a half dozen men being employed, yet the growth of the industry has been phenomenal, and the company now have in their employ nearly one hundred skilled mechanics.

In the person of W. S. Richardson, the treasurer of the company, President Milne has a helpmeet indeed. His keen eye takes in at a glance every move of man or machine, and his excellent judgment gives warrant of successful management and the best results. It is plainly due to the efforts of this company, and especially to President Milne and Treasurer Richardson, that Newark has become the centre of the watch case manufacturing industry of America. For years they have persistently championed the cause.

WORKS OF N. J. DEMAREST & CO., CORNER LAFAYETTE STREET AND N. J. R. AVENUE.

N. J. DEMAREST & CO.

**H**ARNESS and saddlery manufacture in Newark, although of magnificent proportions and volume, is not at the present day, in this respect, equal to the days previous to, during, and a few years after the war. In those palmy days New York city was the great head centre for merchants from all parts of the land, and Newark its great workshop. The Southern markets were the acme of all Northern merchants, the West a good fill-in, but a side issue. Cotton was King. To-day, how changed; while the productions in bulk, in the above lines, fail seriously to reach former days, still the quality and variety

have materially improved, keeping pace with all advanced ideas, that the money value of its productions no doubt exceed those of old-fashioned times, and Newark still maintains its lead and reputation as the great head centre for fine harness and saddlery.

Among those of its manufacturers whose productions rank in the very highest order of excellence, may be mentioned the firm of N. J. Demarest & Co. The portraits of Mr. N. J. Demarest and son Daniel Demarest, and their factory on New Jersey Railroad Avenue, Lafayette and Bruen Streets are given herewith. It is with pardonable pride that we are permitted to speak in words of commendation of our many industries, and of

none with more pleasure than the manufacture of harness and saddlery and its highly respected representatives, Messrs. Demarest & Co., who are now among the patriarchs of the business yet full of that young fire, energy and ambition that never dies in the good business man. During the Franco-Prussian war, among other important contracts for the same purpose, this firm made and delivered artillery harness complete for four thousand horses, in eleven working days. This is a fair sample of the "push" that exists in this city of workshops, which has become noted as the Birmingham of America.

N. J. DEMAREST, (DECEASED)

DANIEL DEMAREST.

E

of the subject of the firm, Peter J. was compelled to retire from the firm in 1867, thus leaving entire charge of the business to the shareholders of F. H. Co., who sought assistance by taking in two new partners, George F. and John J., and his brother-in-law, Ernest A. Goutrou, in the firm, all of whom had been in the business for many years previous, thus having a thorough knowledge of all the varied details of the business, and since 1867 he has had the assistance of his two oldest sons, Paul E. and Arthur G.

In 1884, owing to their great success with horse rasps, they added to the manufacture of a high grade of Farriers' tools, and today they offer the most complete line on the market. The Heller & Brothers brand of goods are considered the standard and are now sold in every city in the United States, as well as exported to Canada, Mexico, England, Russia, Germany, Australia and other foreign countries.

The most useful tool in the world is acknowledged to be the file, and the purposes to which it is adaptable, embrace not only the requirements of the skilled mechanic, but the wants of

FACTORY BUILDING, ON THE N. Y. AND E. P. R. R., MI. PROSPECT AND VERONA AVENUES.

most every individual inhabitant. In early days crude files were constructed from the dried skin of a peculiar fish; next they were made from copper and used in working the soft metals; iron was next substituted, and this was finally replaced by steel, which metal is unsurpassed for the purpose. At the present time, fully ninety per cent of all the files consumed are of this sort, but entirely manufactured by machinery. The file of the present day, made by machinery, surpasses in every respect those made by the old and less progressive method.

Heller & Brothers manufacture every description of files and open turning in size from two to thirty inches, and in grade of cut from twelve teeth to the inch, up to the number so large that the teeth become so fine that they are undetected by the eye, and yet will withstand the most severe test.

The fine eye view of the works illustrating this page, was obtained by our fellow-townsmen, C. Durand Chapman, the artist, and they speak volumes for the determination and enterprise of Heller & Brothers.

WORKS OF ENGELBERGER & BARKHORN, CORNER HOWARD AND MERCER STREETS.

ENGELBERGER & BARKHORN.

GETTING right down to solid facts, it will be found that among those industries which tend most to the maintenance of the high character which Newark is celebrated for, in its buildings wherein is domiciled the capitalist and workman alike, is that of door, sash and blind, frame, bracket and that of general light wood-working as also that of the factory buildings which rear their lofty heads far above their less pretentious neighbors. This branch of the wood working industries carried on in this city, must needs take the lead of all others, so far at least as its output is designed for home consumption, unless we make an exception of the saw mill and carpentry, than to the former must be rightfully awarded the first place or real initiative, unless we are permitted to follow the woodman into the depths of the forest, to see him bury the

bit of glittering steel into the giant oak, cloud-sweeping pine or deep-sighing hemlock.

While there are nearly, or quite a hundred of great establishments where the buzz-saw and planers by the score are kept running like the flash of lightning, and where hundreds of men and boys are kept busy, yet there never seems to be an over supply. All the product from these great establishments which is not caught up and consumed by the home builders, finds a ready sale in the markets of the world, and indeed, quite a large percentage of the output goes direct from mills to shipboard for exportation.

Among the great concerns engaged in the manufacture of doors, door frames, window sash and frames, brackets, moldings, etc., is that of Engellberger & Barkhorn, who have their plant housed in the great buildings erected for the purpose on the

corner of Howard and Mercer Streets, with warerooms at 305, 307 and 309 Springfield Avenue. The beautiful illustration here seen, gives but an introduction to what the concern in reality is. This industrial business was begun in the early fifties by the Augster Bros., they being succeeded by Engelberger & Barkhorn, as now constituted. It was in 1881, a little more than a decade of years ago, when the young firm with a capital all told, of less than three thousand dollars, flung their business banner to the breeze, and at this writing they stand at the head of this industry.

The partners are Newarkers and men of standing. Mr. Engelberger not only handles the plank himself, but sees to it that his workmen do their share, while Mr. Barkhorn keeps his eye on the ledger and bank account.

FRED ENGELBERGER.

WM. C. BARKHORN.

## THE E. E. HOGAN SHOE MANUFACTURING CO.

THIS concern whose factory we illustrate, is one of the oldest members of the shoe trade in New Jersey. It was established in November, 1866, by the late Patrick Hogan, and its career has been invariably characterized by the energy and sterling integrity of its management. Beginning with very limited capital, the venture was a success from its inception, and rapidly assumed a position as one of the foremost shoe manufacturing firms of the State. After successfully weathering the financial panic of 1873, Patrick Hogan was forced to the wall by heavy and successive losses in 1881. The creditors, realizing that the failure was due entirely to misfortune and that

expanded until now and more ample quarters became necessary, and accordingly the present building, 150 x 40, four stories and a basement, was erected, and the firm took possession January 2, 1890.

Mindful of his promise made in 1881, Patrick Hogan during all this time was endeavoring to raise a sum that was to redeem that pledge, but overtaxed by his noble ambition, and after a short but painful illness, he died on March 3, 1889, with the dying injunction to his children to redeem his promise.

The story of that incident is still fresh in the public mind, hardly a child in Newark but knows how Miss Hogan paid

THE E. E. HOGAN SHOE MANUFACTURING CO.'S PLANT ON CENTRAL AVENUE.

no taint of dishonesty attached to the house, very readily accepted a settlement of their claims on the basis of twenty per cent., and Patrick Hogan, with shattered health, but indomitable energy, set out to retrieve the past, and, as he had promised, to repay his creditors in full. In this effort he was most ably assisted by his daughter, Miss Elizabeth E. Hogan, and by his adopted son, George Higginson, the former in charge of the fitting room, the latter as general superintendent.

The new firm was conducted under the name of E. E. Hogan, and continued at the old stand, 337 Plane Street. Success followed the new firm from the start; the business rapidly

forty thousand dollars to her dead father's creditors, in full settlement of all their claims, and how this act was hailed as a most extraordinary proof of the sterling integrity and rugged honesty of the Hogan family. The desired end having been accomplished, Mr. George Higginson, to whom in a great measure was due the success of the firm, and Mr. Matthew W. Hogan became partners in the concern, under the name of the E. E. Hogan Shoe Manufacturing Company, which began business on July 15, 1889, with a paid-up capital of \$200,000. Starting under such auspicious circumstances, it is hardly necessary to say that the firm has been successful. They

WORKS OF THE H. P. WITZEL COMPANY, WEST SIDE, AVENUE A, AND MILLER STREET.

H. P. WITZEL COMPANY.

THE foundation of Newark's greatness as a manufacturing city was laid in the tanning of hides and the making of leather. From the beginning, this industry has seemed to draw the most active and business-like men, as well as the thoroughly skilled mechanics and artisans around its, in many respects, uninviting exterior. The reason for this lies in the fact that the great incentive which draw men on—the rich results—were ever present. Whether the purity of the water and high quality of the materials used has done its part, results alone can tell. The facts are before us that no set of men can make a better showing on the tax books of the assessor than can those engaged in the manufacture of the great staple—leather.

Among the nearly one hundred firms engaged in this branch among the thousands of Newark's teeming industries, is that of the H. P. Witzel Company, who carry it on extensively in the capacious factory buildings, photographs of which grace this page.

This factory was established in 1879, and has now been run-

ning most successfully for nearly a decade and a half of years. Mr. H. P. Witzel, who honors the concern with his name, and is President of the company, is a thorough tanner, and takes pride in his art, never ceasing to labor for its exaltation by turning out the very finest leather that human ingenuity can produce. Close application to business, deep study and painstaking care has produced such results, which, when studied with care by others, redound to his credit and make him an authority.

In 1889 Messrs. August Loehberg and Daniel Kauthner were admitted as partners in the concern, and thus bringing to conduct the industry, genius, talent and business acumen which soon confirmed the promises which Mr. Witzel saw in the proposed combination and enlargement. But many a brilliant promise has been nipped in the bud, and so it proved to this firm when the apparent certainty of an early future of success in business was checked by fire, when on Dec. 25, 1890, the entire plant was destroyed. Nothing daunted by this catastrophe however, the go-ahead firm, which knew no such word as fail, set to work immediately to clear away the charred remains of the debris out of the energy of years of labor, and began the construction of larger, better and more modern and convenient buildings in which to rebuild the stricken industry, and in a marvelously short period of time the wonderfully capacious and convenient buildings now occupied by the firm, and which the photographer's artist has transferred so truthfully to these pages, were ready to receive all the very latest and best improved labor and time-saving furniture and machinery necessary for carrying on the manufacture of leather. The fire took place on December 25, 1890, and the new factories, to take the place of the old, were ready August 1, 1891. The present officers of the company are: H. P. Witzel, President; Frank Schwarzmaelder, Vice-President; Daniel Kaufherr, Treasurer. Located convenient to railroad facilities, where an easy and cheap transportation of the raw material and finished productions are enjoyed, this prosperous firm carry on their growing business, making all kinds of patent and enameled leathers for domestic and export trades. The tanneries of this firm also make a fine grade of fancy morocco finish leather for upholsterers' use, which finds a ready sale wherever there is a demand for this line of leather productions. Into the vats of this firm, 250 hides find their way each week, which are put through and finished by the nearly fifty workmen.

H. P. WITZEL.

JOHN REILLY.

THE future of Newark as a manufacturing point is not a matter of guess-work. It would have been made a certainty by its leather interests alone. The magnitude of this industry can scarcely be related without exciting a doubt as to the credibility of the narrator and the credulity of the reader, but in commercial circles the immensity of the business is well known.

In the front rank of the patent and enameled leather manufacturers, stands Mr. Reilly, who, in 1871, established the factory on Avenue C, Murray and Astor Streets, near Emmet Street Station, of the Pennsylvania Railroad, now one of the most prominent plants of its kind in the country. Every process through which the leather passes from its crude state to its finished state is under his personal supervision, and its market is the world. A thoroughness of manufacture and an enterprising policy of doing business, coupled with the known integrity of the man in commercial circles, compass the reasons of his exceptional success. Time was when Newark's leather industry was confined to a few tanners of hides, and those who put them in shape for carriage use—or for that matter any use to which enameled leather may be put—were few and far between.

Their product was the poorest, and would have driven the trade away from Newark but for the work of such men as Mr. John Reilly. He is one of those who brought to bear upon the industry a wealth of energy and brain which would have ensured success to any enterprise. It was attention to detail, a keen knowledge of the requirements of business, and a determination to win, characteristic of the man, which won the way. The half tone engravings, from photographs, represented on this page, convey to the reader an idea of the works which Mr. John Reilly founded, and has presided over for nearly a quarter of a century.

The golden value of a practical and thorough business

JOHN REILLY.

PATENT AND ENAMELED LEATHER WORKS OF JOHN REILLY,  
AVENUE C, MURRAY AND ASTOR STREETS.

education for men who embark in the manufacturing pursuits has seldom found a more forcible illustration than in the case of Mr. John Reilly. Here is a man whose steady success has frequently led citizens to inquire the cause, which was principally his entering the patent and enameled leather industry with a keen understanding of its many intricate demands. He has labored strenuously to produce the very best of leather,

T

THE WAGON HEAD SAW, CLAY AND LUMBER SHED.

very common and have steadily progressed with the increase of business in the city. The manufactory building is a three-story brick structure, 50 x 80 feet, with 1,000 feet of floor in each story of 4,000 square feet. Along with this they have considerable yard room for storing timber and lumber, and yet the demand for lumber is still more room than can be demanded from plots Nos. 20 and 22 Belmont Street. The great variety of forms, patterns and shapes of their articles which come forth from the doors of their factory would create something of an admiration in the mind of anyone unacquainted with the wood-working industry. The firm makes a specialty of carpenters' sawing and turning, and among the multitudinous products may be mentioned, columns, balusters, line and latching posts, circular moldings and scores of articles in a great variety of patterns are reckoned among the output. Strangers have been known to stand for hours in the presence of one of their turning lathes while the expert turner dexterously fashions the article of beauty or utility, close watching him as he guides the sharp tool over its swift-flying form of seasoned wood of oak, mahogany,

chestnut, pine, hemlock, or whatever kind of wood the heart of the operator may be to the time inclined to use for the purpose intended or to fill an order. The old-fashioned upright and scroll saws, the planers and moulders as handled by this firm have done their part in the revolution in sawing and turning in the last fifty years. It is surprising, indeed, to see so many of these machines automatically work through the timber boards and planks placed before them, and it does seem as though by and by they would begin to talk. Yes, in their own peculiar way they do even now speak a language that is easily interpreted by the manufacturer and his workmen, and we opine, as the years go by and the wealth of

the country increases, that they will be able to do so more and more clearly, to the benefit of the general public. The progress of the lumber industry in Wisconsin has been a steady one, and the firm of Clay and Schmidt has been a prominent factor in its development. The firm has been in business for many years, and has built up a reputation for the quality of its work. The factory is one of the largest and most modern in the city, and is well equipped with the latest machinery. The firm has a large stock of lumber on hand, and is able to fill orders promptly. The firm is also engaged in the manufacture of various wood-working articles, and has a reputation for the quality of its work. The firm is a member of the Wisconsin Lumber Association, and is active in its efforts to promote the interests of the industry. The firm is a well-known and respected member of the community, and its success is a credit to the lumber industry of Wisconsin.

HENRY A. SCHMIDT

HALEY & SLAUGHT

THE city of Newark, N. J., has become noted throughout the civilized world, principally on account of the finely finished and durable qualities of its manufactured products. In this connection it will not be out of place to call some attention to the manufacture of cigars, which has now become a prominent factor among the numerous industries for which the city has become famous. Among the many enterprising firms engaged in the cigar trade there is, perhaps, none better or more widely known than the firm of Haley & Slaughter, proprietors of the "Lincoln Cigar Factory," which form the illustrations on this page.

The business was originally founded a quarter of a century ago by the senior member of the present firm of Haley & Slaughter, whose life-like photos are herewith presented. Both gentlemen are well-known Newarkers from away back, Mr. Haley being a practical cigar maker by trade, while Mr. Slaughter is a salesman of considerable experience. The factory is thoroughly equipped with every known improvement to the trade, the choicest brands of leaf tobacco are selected for stock, and practical cigar makers only are employed on the numerous brands of cigars which are manufactured by the firm. The following popular brands are well and favorably known in the city and suburbs: "Haley's Original Lincoln," "Little Phil Sheridan," "Sweet Marie," "Governor Guggs," "Henry Clay," "New Style Perfecto," etc., etc. The "Lincoln" brand has become famous to lovers of a good, quiet smoke, and are, without doubt, the best ten cent cigar produced in the United States.

Mr. Haley is a veteran of the war for the Union, a member of Lincoln Post, and is connected with many other organizations which reflect credit on our city and its wonderful progress in the mechanical trades. The members of the firm devote their personal attention to every detail of the cigar business, and by their diligence and honorable dealings with customers have built up a fair trade in genuine

HALEY & SLAUGHTER'S CIGAR FACTORY, MARKET STREET.

GEORGE W. HALEY.

hand-made cigars. Of late years adulteration and deception have been carried on to a considerable extent in this country in the manufacture of cigars, so that the difficulty of obtaining a first-class smoking article has become a by-word among lovers of the weed. There are, however, some firms that steadfastly adhere to honorable methods, who manufacture and handle only genuine goods, and among such doing business in this city we mention with pleasure the "Lincoln Cigar Factory," whose founder, Mr. George Haley, is a recognized authority on the grade and quality of leaf tobacco.

The brands made by this house are maintained at the highest standard of excellence, and for quality, finish and flavor are unrivalled by any similar product in the country.

J., between N. J. R. R. Avenue and Pacific Street. The business was established in May, 1875, and during the past twenty-two years, through hard work, energy and integrity, Mr. John Schick has built up a trade of which he may be proud. He has been before the public in general nearly twenty-five years, and during all that time he has demonstrated his reputation of conducting the business on strictly honest basis. The liberal patronage which the public have accorded this gentleman demonstrates that Mr. Schick has always dealt in the best quality of coal; and he always gives full weight, twenty hundred pounds to the ton. The facilities which Mr. Schick possesses are in every respect a No. 1, and he is prepared to furnish the very best coal in any desired quantity at the lowest possible price.

ALBERT SCHICK.

FREUDENTHAL & ADLER.

THE industries of Newark are so numerous and varied, that it would be difficult to name any known branch of trade which is not represented among them. Few cities, if any, can be found of similar size and population where so many diversified industrial plants have been organized and established. The handwork of Newark artificers have been in steady and ever-increasing demand in all the countries of the world, and in this connection, we desire to call the attention of the readers of *ESSEX COUNTY, N. J., ILLUSTRATED*, to the merits of Freudenthal & Adler, proprietors of the Post Office cigar factory.

The demand for cigars and tobacco has grown to such large proportions that the trade necessarily involves considerations of great importance. But even this rule applies to the trade at large. It will be observed, readily enough, that some firms possess advantages over others in the same line of business, the result, in some cases, of long experience, while in other instances, the fact comes about through a natural aptitude for the particular trade in which these firms are engaged. In the making of a fine cigar, for instance Messrs. Freudenthal & Adler, of No. 276 Market Street, have obtained an enviable reputation for the famous brand of "Post Office" cigars manufactured by this firm. The illustrations here displayed show life-like photos of the firm, also their factory and salesroom. Both gentlemen are Newarkers, and practical cigar-makers of considerable experience, having a reputation for the various brands of cigars which are manufactured by their house. The firm have made a success with their superior "Post Office" brand, which is claimed to be one of the best ten cent cigars that can be had; reliable and always the same.

Their other brands are known as, "Gold Prize," "True American," "Our Captain," "Captain C.," "E. & A. Specials," "E. & A. Ponies," "Flor De Leopold," "Newark's," and numerous others. The firm give steady employment to over

POST OFFICE CIGAR FACTORY, ON MARKET STREET.

twenty-five men and boys. A choice stock of chewing and smoking tobacco, snuff, fancy pipes and smokers' articles, are always carried in stock, which are offered to customers at reasonable prices. All orders are carefully filled at the lowest market rates. The firm is well and favorable known in the trade, with good business qualifications combined with pluck and energy, having for their motto, the only rule whose guidance means success—the rule of commercial truth.

The consumption of cigars by the people of the United States, has increased to immense proportions during the past quarter of a century, while the trade of manufacturing them has steadily increased, and has now become one of the noted industries of

WILLIAM ADLER.

the country. Millions of capital is invested, and thousands of people find employment in the production of this luxury, which has become so popular among lovers of the weed. Messrs. Freudenthal and Adler, proprietors of the "Post Office" cigar plant, have, by their thrift, skill and attention to business, raised themselves up from the position of journeymen, to their present standing in the trade. The products of their factory, consist of the choicest brands of "Union made cigars," which are shipped to the leading cities of the country, and their home trade is of considerable importance in this city and its suburbs.

The firm enjoys a well earned reputation in trade circles, and the good-will and esteem of all with whom they have business relations.

LEOPOLD FREUDENTHAL.

of the company is now applied to this purpose. The company is now (1897) operating in New York City through twelve companies. These companies have 1,000,000 shareholders. They cover the entire State of New York, the average policy being for only a few hundred dollars. The company has paid out in claims about \$10,000,000. The company has provided employment to an immense number of persons. Besides, the establishment of the company has completely abolished the Potter's Field, is the cause of the annual payment of \$1,000,000 to the American tax-payers, and the company is making better men, better

NEW YORK LIFE BUILDING, BROAD AND BANK STREETS.

citizens. Since the company has been established, the directors and officers of the company are: John F. Thayer, President; C. Lewis D. Ward, Vice-President; Edgar B. Thayer, Secretary and Counsel; Forest F. Dyden, Treasurer; A. C. Linger, Manager; J. B. Linger, Broker and Actuary; Edward H. Hamill, Director; Wilbur S. Johnson, Cashier. Directors: C. Lewis D. Ward, Horace Almg, Edgar B. Thayer, Theo. C. F. Blanchard, Charles G. Wood, Seth A. Kenney, Fred. C. Blanchard, Forest F. Dyden, Jerome Taylor and

EISELE & KING.

WITH thoughtful men, and women too, life insurance is a part of their business life. Prosperity as well as adversity, demonstrate its importance in the affairs of men. It is an effective means in securing the rewards of prosperity, and frequently fills the gap made by adversity. Among the many noted life insurance companies transacting business here, we take pleasure in mentioning the Equitable Life Insurance Society of the United States, which is so ably represented in New Jersey by our well known fellow-townsmen, Messrs. Eisele and King, life-like photos of whom are presented in the illustrations on this page.

The senior member of the firm, John C. Eisele, was born in this city August 1, 1865, and was educated in the Morton Street Public School. Starting in life as an errand boy in the employ of Benjamin F. Mayo, continuing with him until 1885, when he embarked in the life insurance business, as a soliciting agent for the Prudential of this city, and later with the Equitable Life Insurance Society of the United States. By his untiring industry, attention to business and perseverance, in four years he had risen to the management of the Society's affairs in the State of New Jersey, increasing the business from a few hundred thousand a year, to the proud position it occupies to-day as the largest producing agency under one management, in the United States.

He has been connected with the building and loan associations of this city, and is an active member, being President of the Norfolk, and Treasurer of the Lincoln Building and Loan Associations. His career in real estate transactions has also been unusually successful, being to-day a large owner in Newark real estate, and deeply interested in all projects for the advancement and welfare of the city of Newark. In 1893 he was elected to represent the people of the 13th Ward in the State Legislature and was re-elected in 1894, by the county, having received the the largest majority ever given to any candidate for Assembly in Essex County. Mr. Eisele is connected with many well-known charitable, benevolent, social and

RESIDENCE OF JOHN C. EISELE, ON AVON AVENUE.

political organizations, being a member of Kane Lodge, No. 55, F. & A. M., Union Chapter, No. 7, Lucerne Lodge, No. 181, I. O. O. F., Corinthian Council, Royal Arcanum, Avon Singing Society, North End and Garfield Clubs. He also an active member in a large number of Republican associations.

Inability to personally attend to all the details of the ever increasing business in which he is engaged, necessitated a division of labor. He, in 1894, associated with himself in the business, Mr. Nathaniel King, who is the junior member of the firm. Nathaniel King was born in Washington, D. C., October 29, 1866, and came to the city at an early age. Graduating from the time-honored Newark Academy, he commenced to study the profession of law with our present City Counsel, Col. E. L. Price, but gave that up to enter upon his present business of life insurance, in which he has made an unprecedented success, being recognized as one of the largest personal writers of insurance in this section of the country. In 1894 he entered

JOHN C. EISELE.

into partnership with Mr. Eisele, and has been a potent factor in placing the New Jersey agency of the Equitable Life Insurance Society of the United States in the position it occupies to-day.

The offices of the firm, located in the Firemen's Insurance Building, north-east corner of Broad and Market Streets, is one of the most central places in the city. The entire second floor is taken up with the business of the company, which continues to grow steadily in favor with the best citizens of this city and the State of New Jersey.

The honorable and successful career of the New Jersey agency in the past, is a happy argury that the same policy will continue in the future, which has heretofore directed the business affairs of the Equitable Life Insurance Society of the United States.

NATHANIEL KING

HOME OF LOUIS A. HIBEL ON LILLIFON AVE.

CHARLES J. BROWN.

Among the various industries for which the city has become noted, one will find some difficulty in selecting a branch that affords greater opportunities for profit or a better investment than the market of real estate. It is one of the surest and most reliable methods of investment, and at the same time a transaction that never loses the power of securing a profit, although values may fall, it can be but temporary.

Charles J. Brown has at all times attracted the attention of a large number of investors, among whom we find at the

CHARLES J. BROWN.

THOMAS H. CONNELLY.

A photo of whom is given in the illustrations. is a resident of the borough of Vailsburgh and a young business man well known in the tea, coffee and spice trade among many families of Essex County. Mr. Connelly makes a specialty of and devotes himself exclusively to selecting, buying and selling the finest grades of Oolong, Japan, Gunpowder, Young Hyson and many other noted brands of teas; Mocha, Java and Rio coffees, and spices of all kinds. Regular weekly deliveries are made by wagon to families, restaurants and hotels throughout the county, and on the most liberal terms. In that special trade he is enabled to offer the public a superior grade of goods which for freshness and flavor are unsurpassed, and wherever his goods have been given a fair trial, additional orders have resulted therefrom. Mr. Connelly is a Newarker by birth, education and enterprises, and is identified with many charitable benevolent and social organizations.

RESIDENCE OF RICHARD F. COGAN, ON CLINTON AVENUE.

WILLIAM F. HAMILTON

A PHOTO of whom is presented among the Freeholders on page 126, is a well-known and highly respected citizen of Orange, in which city he was born, educated and conducts a general flour and feed business. He is connected with many social, benevolent and political organizations and has ably represented his fellow-citizens in the Assessor's office for three terms —1888-89-90—in the council chamber, in 1891, and in the Board of Freeholders in 1893. His executive ability was recognized when he entered the board, by his appointment on important committees, and finally by his election as director. In 1896 he was again re-elected to represent the people of his ward in

the council. His record in all the various positions in which he has served is noted for his ability, fairness and honesty of purpose in the discharge of public duty.

JOSEPH SMITH SUTPHEN

A LIFE-LIKE photo of whom is given in the illustrations representing the aldermen of Newark, N. J., on page 141, first saw the light of day at Bedminster, Somerset County, N. J., in April, 1839. He was educated in the public school of his native village and graduated at Chester Institute, N. J. In 1861 he commenced the study of medicine with his brother, Dr. P. J. Sutphen, at Peapack, N. J. After four years of preparation, including six months of practical service rendered in the Ward United States General Hospital, at that time located in Newark, N. J., he graduated from the University of the City of New York, in 1865. After six years' practice of medicine in his native county he removed to this city and located in the Fifteenth Ward, continuing in his profession in connection with a drug store. In 1878 he was elected to represent his Ward in the Board of Chosen Freeholders and served during the years 1878-79-80. In 1891 he represented his Ward in the Board of Education, and in 1896 was chosen by the people of his Ward to represent them in the Common Council.

THOMAS H. CONNELLY.

BOROUGH HALL, VAILSBURGH.

have his own home, every large manufacturing interest its suitable site not available elsewhere, and this become a model region, miniature of what the true patriot and statesman could wish the nation to be— an industrial republic.

About midsummer of the year 1892, a few well-known young men, perceiving the unusual advantages for the development of that beautiful rolling piece of land then known as the Howell Farm, located on South Orange Avenue, just above the Newark Shooting Park, in that pleasant suburban town of South Orange, now the thriving Borough of Vailsburgh, combined their wealth and knowledge, and on July 29, 1892, they organized the corporation now known as the West End Land Improvement Company, the subject of this sketch. The first officers of the company were: Mr. Henry J. Bloemecke, Superintendent of the Metropolitan Life Insurance Company at Brooklyn, President; Mr. Camil P. Nagel, of the firm of Nagel & Kautzman, coal dealers, Vice-President; Mr. C. W. Heilman, undertaker and liveryman, and at present a Freeholder of Essex County, Treasurer; and Mr. Ernest Nagel, Secretary. To these gentlemen, in a large measure, is due the company's phenomenal success. They still serve the company in the same capacity, with one exception, Mr. Ernest Nagel having in 1893 been appointed as the company's Manager, at which time Mr. Charles H. Burgesslet was elected Secretary.

The company purchased the Howell Farm, which has a frontage of 1,200 feet on South Orange Avenue and consisting of over 700 building lots, and the property was opened to the public on Saturday afternoon, August 20, 1892, by President Henry J. Bloemecke, who, after outlining the company's policy, introduced as the orator of the day, the oldest resident of the borough, the then County Superintendent of the Public Schools, editor of the *Newark Item*, Dr. M. H. C. Vail, who, after delivering an eloquent address, unfurled and flung to the breeze the American stars and stripes and formally christened the plot "Columbian Heights," to the tune of "Hail Columbia," struck up by Voss' full First Regiment band, who were in attendance during the remainder of the afternoon, and discoursed popular and national music.

The property is all restricted for residential purposes only, no building to cost less than \$2,000, and all to stand back ten feet from line of street, a very wise precaution as the present appearance of the streets will show. The company has ful-

to the interests of his clients, has given complete satisfaction. He is at the service of all intending investors and home seekers.

The West End Land Improvement Company is certainly supplying a long-felt want, by assisting persons of moderate means to own their homes, without extortion, on a perfect and sound basis, dealing fairly and honestly with its customers. May success always crown its efforts and serve as an example for others to follow.

The company has a pleasant and conveniently located business office on the first floor of the Niagara Fire Insurance Company building, 766 Broad Street, near Market, where its popular and congenial manager can be consulted every morning. At all other times he can be found at the company's office on "Columbian Heights." In the illustrations are represented life-like photos of the officers.

filled all of the promises then made. They have laid throughout all the streets as handsome an artificial sidewalk as adorns any property and which, if laid in a continuous line would be over four miles long. The streets are all graded and curbed and adorned by fine maple shade trees.

A pure water supply has been brought to the property from the Pequannock water sheds by way of Newark and a perfect drainage system established. The first home on the property was begun during the winter of 1892, and was occupied by Mr. Emil Schwieg, its owner, January 1, 1893, just four months after the formal opening of the property. Other dwellings followed in rapid succession until at the present time of writing, no less than forty-two residences of as pleasing an architecture and structural stability as will be found in any municipality in the State adorn this beautiful property. The company's terms are very reasonable and of a special character and of unusual advantage to purchasers. It assists home builders not only financially but also in an advisory manner which, owing to the vast experience of its individual members in that line, it is fully qualified to do. It has engaged the services of a competent and experienced architect who, owing to the originality of his designs and completeness of interior arrangements and details, and close attention

OFFICE OF A. E. GLESS, CORNER SPRINGFIELD AND BELMONT AVENUES.

...for the accommodation of his numerous clients, and with his experience and thorough knowledge of the real estate market, he is able to transact the business of his clients with promptness and dispatch. A glance at the life-like photograph on this page, tells the manner of man he is, and speaks for itself to the reader of this page, than anything the writer could

Mr. Gless is rated as one of the foremost real estate insurance agents of Essex County, and is a worthy representative of the profession. Among the many able and enterprising men who have attained this standing, in order to gather the necessities of life, to provide for their families, or to build up a fortune, all do not succeed. Many yield to its bright allurements, and witnessing the success of others, copy the pattern of A. J. Gless, and, in a brief time, retire.

“Do not be misled by the way from those on whom fame is bestowed, to those who have heard the same old honest saying, ‘‘To conquer with a determination to win,’’ read the motto of the successful industry we thrive;’’ study the self-reliance and every liniment of his countenance, and you will know how to win in the real estate business.

The real estate market of wide-awake business men is now in a prosperous condition, Newark being the locality, where the most valuable real estate is to be found, and where the most profitable opportunities are to be had, for those who are continually seeking for the most profitable investments. That part of the city is now open to the public, and its development, in the near future, will be rapid and become permanent, especially where the city is now, and admitted as a part of the city, forming a ‘‘Greater Newark.’’ The extension of the city from the centre of the city, Springfield Avenue, being now one of the centres. It is the policy of Mr. A. E. Gless to establish his office in Newark, N. J.

His office hours are usually from 9 to 12 o’clock in the morning, and from 2 to 5 o’clock in the afternoon, during which time he may be consulted with the interests of his customers, and he will be glad to attend to their business, and to give them the most complete details, continuous study, which has been the result of his long experience in the business. A view of his office is given on the following page.

FRANK WISIJOHN.

AMONG the many real estate men who are rapidly gaining prominence, few are making more steady progress than our fellow-townsmen, Frank Wisijohn, one of the youngest representatives in the business, who began his real estate career under Mr. Thomas J. Gray, in 1882. Mr. Wisijohn occupies very pleasant office rooms, corner Broad and Bank Streets, over the National Newark Banking Co., where he devotes his personal attention to the general real estate and insurance business, in selling, buying, renting and exchanging city and country property, procures loans on mortgages, invests money without expense to the lender, and writes lines on insurance. Mr. Wisijohn, whose photo is herewith presented, makes a specialty of collecting rents and caring for estates, on the most reasonable terms. He is a Newarker by birth and education, and a worthy representative of the real estate fraternity.

RESIDENCE OF A. J. GLISS, ON HUNTERDON STREET.

THOMAS J. GRAY

IN calling the attention of our fellow-citizens to the numerous engravings presented on the pages of ESSEX COUNTY, N. J. ILLUSTRATED, we are justly proud of the life-like photo of our fellow-townsmen Thomas J. Gray, who has done much in advancing the growth and prosperity of Newark. Mr. Gray is a worthy representative of the real estate profession, and for more than a quarter of a century has handled large estates. Watching the interests of his clients, and being just and true to all, is what has gained for him the confidence of the public. His appraisements for executors, by order of courts, have never been questioned. Since 1870, he has been so closely identified with values, that we do not wonder that prudent investors, who desire to buy, sell or exchange real estate, or loan money on mortgage, wherein, like a savings bank, security is first to be thought of, frequently remark, "What is Mr. Gray's opinion." That settles it. A good name is like precious ointment.

Mr. Gray's present office in the Clinton Building, is almost within a stone's throw of where he commenced business, in a

modest way, twenty-seven years ago. If knowledge of values of property located anywhere in our city, county or State, are requisites as appraisements of value, coupled with excellent judgement and prudent counsel, the subject of this sketch fully merits all we have said. The business looks to be on the eve of recovery from long depression. Real estate has suffered but is fast coming to the front. Mr. Gray is a gentleman in every sense, and is a worthy representative of the profession.

JAMES MARLATT

A PHOTO of whom is presented on page 127 of this illustrated work, was born at Beatystown, Warren County, this State, January 6, 1840. Coming to this city in 1865, he started in the grocery business with John Robertson, his brother-in-law. In 1872, he purchased the store and property of J. H. Richardson, and continued in the grocery trade until February 1, 1884, when he commenced a wholesale trade in

the prepared flour, feed, grain and hay business, acting as agent in this city for E. H. Larrabee & Co., Chas. H. Paul & Co. and Hetfield & Ducker's crackers and biscuit. Mr. Marlatt represented the citizens of the Tenth Ward in the Board of Education and the Common Council, and for two terms he represented the people of the Ninth Assembly district in the State Legislature.

Few men indeed have represented the people with a more painstaking care than Mr. Marlatt. None but words of praise fall from the lips of his constituents. The potent results of his well applied legislative and business acumen, will long remain as an example to future generations. Few men are better known in the business community, and his character will remain an heirloom to his family.

FRANK WISIJOHN

THOMAS J. GRAY.

T

FIGURE OF L. BAMBERGER & CO., ON MARKET STREET.

...so noted. The educational industries, in a measure, take care of themselves, but it is the class of enterprises that depends wholly on the industrial perseverance of the wide-awake merchant, that after all tend most widely to the building up of the city's commercial reputation. Prominent among these industries, is the dry and fancy goods trade that is well represented by L. Bamberger & Co., the always busy and successful firm, one of the most noted houses in this line of goods in New York. The firm is located on Market Street, in the central part of the city, on the block bounded by Broad and Hudson streets. The plant is one of the finest structures on the street, and the stock is the largest and best selected in the city. The employees are polite and efficient, and every means to please the purchasing public.

Office

General Work Room

JOHN C. SCHELLER.

THE art of bookbinding is one of the ancient industries and is a useful and valuable invention to mankind. Among those engaged in this particular trade, we mention with pleasure the name of our fellow-townsmen, John C. Scheller, interior views of whose shop is presented on this page, with a life-like photo of the gentleman under consideration. During the past eighteen years he has been connected with the bookbinding trade of this city, and through enterprise, artistic skill and mechanical ability, has succeeded in establishing one of the best equipped plants to be found in Essex County. The bindery is located in the Central Railroad building, 834 830 Broad Street. Mr. Scheller being a thorough, practical mechanic in the business, and devoting his personal attention to every detail with careful supervision and good taste, he is enabled to execute the higher grades of work, such as Levant (crushed and inlaid), genuine Russia, Sealskin, Alligator, Turkey Morocco, polished and Tree Calf, etc., in style and finish equal to any binder in the world. Special attention is devoted to public and private libraries, colleges, etc. Single books of every description are printed, ruled and bound to any pattern required; and perforating,

JOHN C. SCHELLER.

numbering, punching, stamping, embossing, round corner cutting, wire stitching, eyeletting and edge gilding is promptly executed with neatness and dispatch for the trade. The highest premiums, silver medals and diplomas have been awarded to Mr. Scheller for the superiority of his workmanship in the bookbinding line. He is also the inventor of several useful styles of self-binders which have fulfilled a long-felt want among literary people. Promptness, neatness and dispatch is the motto of Mr. Scheller's establishment.

The following is what a Berlin (Germany) professor has to say:

"I take great pleasure in extending my sincere thanks for the beauty of binding of the volume of our family genealogy, just secured.

Prof. D. MICKLEY."

From Ambassador Runyon, Berlin, Germany:

"DEAR MR. SCHELLER.—I thank you, my dear friend, for the beautifully bound copy of "Newark, N. J., Illustrated."

A souvenir from Kane Lodge, of the late Ambassador Runyon, in full Turkey Morocco, flexible, is a rare sample of his handiwork, as well as one of the same of John M. Randall, by the State Bank; also an elegant volume in full Morocco, a souvenir to Hon. James L. Hays, of the Board of Education,

Caldery Dyp and Stock Room

Finishing and Forwarding Dept.

ANDREW A. BURKHARDT,

WHOSE photo appears in the illustrations on this page, is one of Newark's highly respected citizens and a well-known business man in the eastern section of the city, where he has been connected with the grocery trade for more than half a century. He is prominently connected with numerous German-American associations and is the President of the Twelfth Ward German-English School, on Niagara Street, in which he takes great interest. He is a man of sterling integrity whose word is his bond, and is held in high esteem by his neighbors and all who have dealings with him on business or public affairs.

JOHN O. HUNT.

A LIFE-LIKE photo of whom appears in the illustrations herewith presented, is a well-known and popular business man of the Tenth Ward, having conducted a meat and vegetable trade for over a quarter of a century, on the north-west corner of Walnut and Jefferson Streets. A well-selected stock of beef, mutton, lamb, veal and pork, salt and smoked meats, fish, oysters and clams, sausages, lard and other food supplies, including vegetables in season, are kept on hand. The store has excellent refrigerating facilities, enabling the proprietor to furnish his customers with the freshest of meats during all seasons of the year and upon the most reasonable terms. Mr. Hunt has represented the people of the Tenth Ward in the Board of Education in a very creditable manner, and is identified with many benevolent, social and political organizations.

JAMES J. MULLIN,

WHOSE photo forms one of the illustrations in the school department of *ESSEX COUNTY, N. J., ILLUSTRATED*, first saw the light of day in Newark, N. J., on October 20, 1863. He received his early education in St. James' Parochial School and at the evening sessions of the South Market Street Public School, graduating from Prof. Mulvey's Newark Business

INTERIOR VIEW OF R. WALSH & CO'S CONFECTIONERY, MARKET STREET.

College with credit and satisfaction to himself. In 1890 he was elected from the Twelfth Ward to represent his fellow-citizens in the Board of Education, and served his constituents faithfully as School Commissioner from January, 1891, to May, 1895. By trade he is a steel worker and is now and has been for a number of years employed in the New Jersey Steel Works.

WILLIAM HARRIGAN.

THE subject of this sketch, a striking photo of whom is presented in the illustrations displayed on page 140 of this souvenir, first beheld the light of day in the beautiful land of the shamrock, October 31, 1838. Few men are better or more widely known in this city, where, for a number of years, he has successfully conducted the manufacture of mineral waters. He served with ability on the Essex County Public Road Board for three consecutive terms, and was a delegate to the National

Democratic Conventions at Chicago in 1884 and St. Louis in 1888. He has represented the people of the Iron Bound District of this city in the State Legislature for seven terms, during which he advocated in the House of Assembly with success, the passage of several important bills, notably the one providing for the stamping of all goods manufactured in the State Prison with the name of that institution, and the bill providing for the police and fire commissioners of Newark, which has been highly approved by the people. He was the pioneer to introduce

JOHN O. HUNT.

A. A. BURKHARDT

THE BUILDING OF TOMPSON'S GROCER, FIRM AND PROSPECT STREETS.

F. W. TOMPSON

THE RE are, perhaps, but few commercial enterprises that contribute more directly to the growth and prosperity, or are more appropiately to the importance of a community, than a well-conducted grocery business. Among the numerous well equipped family grocery stores doing business in this city, we take pleasure in mentioning the name of one of our young and enterprising citizens, who is well and favorably known in the grocery trade, Mr. F. W. Tompson, a photo of whose place of business is presented in the illustrations shown on this page.

SPIELMANN, STRACK & CO.

There are, perhaps, but few cities in the United States better or more favorably known in the trade centres of the industrial world than the city of Newark, N. J. This result has been achieved principally through the finely finished and durable quality of its manufactured products.

Among the numerous industries which have contributed to make the city famous, that of making clothing to cover and protect the human body, is one of the oldest and most important. Many able and enterprising citizens have been, and are now, engaged in this time-honored branch of trade. Among these stand the well-known firm of Spielmann, Strack & Co., the one-price clothiers and gent's furnishers, whose place of business, located on the northeast corner of Market and Washington Streets, forms an illustration on this page.

The firm, photos of whom appear in the combination presented here, consists of E. W. Spielmann, F. P. Strack and A. Eschenfelder, all well-known Newarkers and practical business men, each of whom devotes his personal attention to the various processes of manufacture. Thus they are enabled to fully guarantee the quality of all goods leaving their establishment. Each department is admirably equipped with every modern appliance known for the successful prosecution of the business, and the greatest attention and care is given to the selection of the entire stock, and especially to their Woolens and Suitings, which are unexcelled; and as they employ only the very best talent in their custom departments, the trade and the general public have confidence in this trustworthy and enterprising firm.

The garments of this house are unrivalled for quality of materials, fit, style, durability and workmanship. In their ready made clothing and furnishing departments the range of sizes are designed to fit all proportions of the human form, while the grades of style and quality are sufficient to meet the wants of the most critical and exacting.

Newark has ever been noted as a great centre for the manufacture of clothing, and many of her prominent citizens have been identified with this useful and important industry. The United States census of 1890, states that in that year, there were ninety-three establishments engaged in manufacturing clothing, with a combined capital of one million two hundred and fifty-one thousand, two hundred and eighty-seven dollars, invested in the business. Since that time there has been a considerable increase in this trade, notwithstanding the depres-

SPIELMANN, STRACK & CO.'S CLOTHING HOUSE, CORNER MARKET AND WASHINGTON STREETS.

sion that has existed in all industries during the past four years. However, there is every prospect of brighter times ahead, and no doubt the clothing trade will be one of the first to regain its former prestige among the industries of this city.

The wide awake firm of Spielmann, Strack & Company, are noted as one of the most energetic, courteous and reliable houses engaged in the clothing trade of Newark. Their store is most eligibly located on a prominent corner, presenting a

handsome expanse of elegantly dressed plate show-windows, facing on Market and Washington Streets. This house never varies from the one uniform standard, and that is always the best. In addition, they carry a most complete and tempting stock of fine furnishing goods for gentlemen dress and outing shirts in all materials, stylish hats and fashionable neck-wear, etc. A large staff of courteous and alert assistants attend carefully to the wants of customers, who can rely upon the quality of all goods purchased here. The proprietors are business men who acknowledge no superiors in their line, and are confident that the public will recognize the superior merits of their establishment by comparison of goods and prices of other houses.

MEMBERS OF THE FIRM OF SPIELMANN, STRACK & CO.

T

CLARKE BUILDING, CORNER OF MULBERRY AND COMMERCE STS.

WALTER P. DUNN

There is a trade that requires a more thorough knowledge of the human system which relates to the health of the people residing in large cities, and the sanitary condition of houses, schools and public institutions, in which we are engaged. Plumbing, as of recent years, became practically a science, and its proper application and study, much will depend on the solution of numerous questions regarding drainage, ventilation and sanitary conditions. Much sickness and disease has been traced to the effects of poor plumbing in the homes of many people who, when in ignorance, are doing this terrible evil existing in their household.

It has been clearly demonstrated by the most eminent and successful engineers that defective sewers and drains present a dire and all its attendant evils. Hence, it becomes the duty of every one who cares for health, to make a thorough knowledge from time to time, of the plumbing work in their homes and workshops, as the very best work in this line gets a reputation for a remarkable case. In connection with these matters, it is of great importance, in calling the attention of the public to Newark, to the best known sanitary plumbers in the city, Mr. Walter P. Dunn, a photo of whose business establishment is here presented in the illustration on this page. During the past few years, this enterprising and industrious citizen has branched out into various branches, the plumbing work being the first to go on to his numerous customers. In the illustration, this is an important branch of industry, the establishment is at No. 95 Market Street, and is one of the best equipped sanitary plumbing and heating establishments in Newark, N. J. Newark is noted since the great water works occurred in August, 1895, the business of the house has been ably conducted under the management of Walter P. Dunn, and the public can be assured that some time or other will continue in the future to be a success in the past.

The water works and numerous heating plants throughout Newark, and public and private buildings. The system of water works has been a specialty by them.

WALTER P. DUNN'S PLUMBING ESTABLISHMENT, 95 MARKET STREET, NEWARK, N. J.

## J. J. HENRY MULLER

THE foundation of Newark's greatness rests upon her manufacturing interests. These have at all times been regarded as her crowning glory, and through the genius of her enterprising mechanics and inventors she has achieved a world-wide reputation, not alone because of their great volume and general excellence, but also on account of their wonderful variety. Over two hundred different branches of industry are successfully carried on within her corporate limits, and these are continually attracting others to locate here. There are but few cities to be found in the United States whose people are occupied in employments at once so important and yet so distinct. For this vast diversity of pursuits, her citizens have reason to feel grateful, and for the accruing benefits which have so frequently been enjoyed. In the often recurring panics and financial distresses, the affairs of the people of Newark have never been as desperate as have been those of other sections of the country where the prosperity of the inhabitants has mainly depended upon the condition of a single industry, no matter how important it may have been. In the darkest hours, when the workshops of Newark have seemed to languish in despair, work has never ceased in many of the factories. Great credit is due to the foresight of her business men, as well as to the genius and skill of her merchandises and inventors.

In this connection we take pleasure in placing before the readers of *ESSEX COUNTY, N. J., ILLUSTRATED*, the name of a worthy and enterprising citizen, whose place of business is represented in the illustration on this page, Mr. J. J. Henry Muller, who conducts one of the largest and most complete furniture houses in the western section of the city. The furniture trade of Newark, like every other staple branch of commerce, comprises every class of dealer, with corresponding ratios of value and excellence. As in everything else, so in furniture, it always pays to get the best. An establishment which stands in the front rank of the choicest furniture trade of this city is that of Mr. J. J. Henry Muller, whose offices and warehouses are situated at Nos. 113, 115 and 117 Springfield Avenue. This extensive business was founded in 1885 by Messrs. Muller & Schmidt, who, on April 1, 1890, moved into the premises now occupied by Mr. Muller. In January, 1894, Mr. Muller succeeded to the sole control of the business and occupies a spacious four-story and basement building, 75 x 100 feet in area, fitted up with all modern appliances, elevators, handsome plate-glass front, etc.

The first floor is devoted to offices and general lines of furniture; the second, to carpets, oil-cloths, etc.; the third floor, to dining-room furniture; and the fourth floor to chamber suits, etc. This is the finest establishment of the kind in Newark, and the stock also includes hall, library and kitchen furniture, stoves, ranges, refrigerators, upholstered goods, sofas, lounges, fancy chairs, rockers, sideboards, baby carriages, etc., which are offered to customers at prices that defy competition. Only the best grades of furniture are handled, and the terms are either spot cash or on the installment plan by easy weekly or monthly payments, thus presenting to all an opportunity of obtaining what they want for house-keeping. Mr. Muller deals with all classes of citizens, and makes a specialty of completely

FURNITURE HOUSE OF J. J. HENRY MULLER, ON SPRINGFIELD AVENUE.

furnishing all sizes of houses and flats. He was born in Germany, but has resided in the United States for the greater part of his life. He is highly esteemed in social and business circles for his strict integrity, and his establishment is a prominent feature of Newark's activity and enterprise. The stock is valued at over \$50,000, and fifteen clerks, assistants, etc., are employed.

The large and well-selected stock contained in this house is the just reward of industry, thrift and business morality, and from the start the characteristics of Mr. Muller have been shrewdness, prudence and integrity, combined with honorable dealings with the public.

Just here we may be permitted the interpolation of a fact which has contributed greatly towards Mr. Muller's success as a business man, and that is, he possesses the faculty of being a good buyer. When he goes into the marts of trade to make his purchases, he sees at a glance the goods which will meet the wants of his customers for whom he caters, and the materials which will work up to the best advantage under the skillful manipulation of the artists who handle the tools in his large and commodious factory.

and modest homes, in New York, Orange and East Orange, grew up and turned into money at his command. Many a barren acre he made to bloom in the growth of peoples' homes, and many a man is now the owner of his own domicile through the easy terms on which he could buy from Peter Hassinger. His first real estate move was the purchase of the property on which the immense harness manufacturing establishment of the late Nicholas Demarest & Son now stands.

It is well to remark in passing, that the business arrangements with Mr. Romer were always pleasant, and with the sale to the Louisville man, the friendly old business word, "ours," which had been the pass between the two, was never forgotten, and their social relations have ever continued close indeed; very like brothers have they been. Many of the specimens of Mr. Hassinger's ideal structures may be seen on Broad and Market Streets and many others of Newark's business thoroughfares, as well as in the residential portions of our city, notably Clinton and Belmont Avenues, Alpine and other streets, stand monuments of his skill and business foresight.

The old taste for gardening and floriculture had not been allowed to cramp, but on the contrary, had been cultivated, and the same growth and progress is now seen to manifest itself wherever the impress of his genius and master hand is felt. His home at 368 Clinton Avenue, situated in one of the choicest home parts of Newark, can be said, and verily, too, to be within a garden of sweet incensed flowers and plants, and a veritable bower of roses. The great green-houses are filled with delicate plants, ferns and rare exotics, abounding in amazing variety. There, on the home-plot, the master has erected buildings for every variety of purposes to keep every thing about the two or three acres given up to the fruits, plants and flowers, par-excellence, and in marvellous abundance. Ere we close, it must not be forgotten that his home is a bower not unlike Hawthorne's, of Seven Gables, in many of which are hung and stored beautiful works of art which this connoisseur has collected, and which, were it not on the border of sacrilege to say it, he almost worships and truly adores. On the walls of his gallery, constructed for the purpose, and on the walls of his parlors and halls, hang gems, many of which are from the pencils of the greatest of ancient and modern painters; in fact, it can be said that from every nook and corner of his home come whispers of his love for art, and samples are seen which

speak praises of his devotion to art and its studies. Every lover of art should see Peter Hassinger's collection of rare paintings, both old and new, and no one can spend a few hours more delightfully than among his selections. Among Mr. Hassinger's collection is seen Rombout's celebrated scriptural and historical painting, "The Slaughter of the innocents." This great picture, completed in 1629, by Theodore Rombout, a rival of the skilled painter, Rubens, was at its sad once in the collection of the Duke of Orleans, who sold it for 10,000 guineas. This picture earned for its owner, before it came into the hands of Mr. Hassinger, by being exhibited in many cities, the munificent sum of \$120,000. Another notable picture is the "Decision of Solomon." This great painting, Mr. Hassinger thinks he is thoroughly justified in believing, from the evidence he has at hand, is a genuine Rubens. Among the other beautiful and striking paintings in Mr. Hassinger's collection which the writer had the pleasure of examining, is one by Gilbert Stewart, of the revolutionary patriot, General Knox. It will be remembered that Stewart painted the very best portraits extant of George Washington. A "Cleopatra," by the celebrated Guido Reni. The figure is of life-size, and is said to be one of his grandest works. A "Nell Gynne," by Peter Lecky, is a work highly prized by its owner. "Two Cows," by Paul Potter, painted in 1530, is very much admired. Thus we might move on among the rare old works which this lover of true art has gathered. It is to be regretted the real lovers of art among our wealthy people are so few, for had we more like Peter Hassinger, who not alone possesses the love for art, but also possesses the wherewith to cultivate that love, artists need not go begging. That Peter Hassinger is eminently a self-made man, goes without the saying, and that he deserves all the good things which his own-earned competency can bring, none who know him will deny.

ADAM KAAS.

THE manufacture of gold and silver ornaments for the harness and saddlery trade, has, for generations, been a noted industry, largely carried on in this city of workshops. Among the many able and well-known firms, we take pleasure in mentioning the name of Mr. Adam Kaas, who has been identified with the trade for more than half a century, an

excellent photo of whom will be noticed on this page, and speaks louder than anything we could say. The plant is located in the Wilson Building, cor. Mechanic and Lawrence streets, and is one of the oldest and best equipped for the manufacturing of fine harness ornaments, letters, monograms, etc. Mr. Kaas is an ornament maker by trade, and is principally noted in the harness market for the fine grade of goods that he is enabled to produce, which are widely known all over the States of the Union, Canada and South American ports, and used on the finest grades of harness, etc., with great satisfaction.

HENRY C. KLEMM.

ADAM KAAS.

M

THE WEDDING BONNET.

CHAPMAN, JOHN, the artist, was born in the City of New York, in 1835. On his return he established a studio in Garden Street, Newark, where he painted "The Wedding Bonnet," of which the illustration is here given. In 1860 he married Caroline A. F. Haines, daughter of the late A. M. Holbrook, Esq., and resides at Emerald Irvington, N. J., the old homestead and country seat of the Haines family for nearly three generations. Mr. Chapman has occupied a studio in the Prudential Building since its completion. His talents are versatile, equally strong in black and white, designing and illustrating, water color, pastel and oil, and a most successful instructor.

His paintings are seen at all the principal art exhibitions and are owned by many prominent art patrons. He delights in quaint interiors with figures, which he fills with a satisfying atmosphere of charming sympathy and truth. "The Reverses of a Bachelor," "In Disgrace," "Close of the Day," "Old Chums," and "Soul Comfort," are some of his important works. He is a member of the Newark Sketch Club, American Art Society and Salmagundi Club, of New York.

Mr. Chapman believes in giving his own allegiance to his native State and home. All the honor that Newark has had its birth here, and its influence gladly flows to the advancement of art in this city. Interest in art has increased largely in the last ten years in Newark. Art societies are everywhere appreciative. Many exhibitions, art collections, and sculpture have enriched the city and added to the pleasure of the people. To see a fine art gallery established in Newark, and to have exhibitions of the best examples of art, which would be of incalculable good to all classes of the people of the city's institutions.

CHARLES B DUNCAN

THERE are but few, if any, names better or more widely known to the people residing in what is commonly designated as the "Ironbound District," situated east of the Pennsylvania Railroad, than that of our fellow-townsmen, now under consideration. This public-spirited and enterprising citizen has been identified with everything that has aimed to advance or promote the welfare of the district or its inhabitants during the past half a century. The illustration shown on this page represents his place of business, which is one of the oldest in the neighborhood, and a first-class photo of Mr. Duncan is presented in the illustrations on page 126 of this work. Mr. Duncan is one of the oldest and most reliable real estate and insurance brokers in the city and devotes his personal attention to the buying, selling and exchanging of property, renting of houses, caring for estates, procuring loans on bond and mortgage, placing lines of insurance in the most reliable companies and on the most favorable terms. He makes a specialty of drawing up and writing deeds, wills and agreements in all their various forms. In connection with this he conducts one of the largest and best equipped news and stationery depots in that section of the city, where everything in the stationery line will be found; and in addition to this, a large and well-equipped library is maintained for the use of the general public. Mr. Duncan, while being a very busy man, has always found time to act the part of a good citizen, having represented the people of his district in the State Legislature for three successive terms, serving with ability on

OFFICE OF CHARLES B. DUNCAN, CORNER PACIFIC AND ELM STREETS.

several important committees. He is prominently identified with the building and loan associations of the city, and is connected with numerous patriotic, political, religious, benevolent and social organizations.

C. H. SLAIGHT.

A GREAT and useful work has been commenced by the Park Commissioners toward the embellishment of the city and its suburbs by the conversion of city squares into parks and by the planting of shade trees and shrubbery to beautify them. Of the great benefit that will accrue to the people and of the immensely improved aspect of the whole County of Essex

there can be little doubt.

There is another question which requires consideration—how far will these improvements tend toward advancing real estate? There is no doubt but that all property fronting upon or adjoining these parks will continually increase, and investors will constantly be on the lookout for wide-awake agents to handle their bargains.

We here take pleasure in mentioning the name of Mr. C. H. Slaight, whose office is located at No. 122 Roseville Avenue, opposite the Roseville station of D. L. & W. R. R. This enterprising citizen conducts a general real estate and insurance business.

WILLIAM A. BIRD.

C. H. SLAIGHT.

H. BUCHLEIN

On the morning of April, 1871, Mr. H. Buchlein associated with himself Mr. Sissonson and purchased the premises which he owns to-day, from Dodd Brothers, No. 11 & 12, Mr. Sissonson withdrew from the partnership, and Mr. Buchlein sole owner and manager. This he was the young man who began work as a designer for the Dodd Brothers in 1868, in the short space of five years becoming sole proprietor, another example of success wrought by the old adage, "Where there's a will there's a way." Mr. Buchlein was not as early in life, to conduct a manufacturing business, as he is now, and over again, was no wild venture but was born of a successful business fact, and he had the push behind to make a success of it, and a branch of manufacturing business carried on in the city of New York, as the designing and making of seals, stamps, medals, and the making for jewelers and ornamental brass work, also for engraving upon metal, and which probably contains a greater number of different industries under a single head than any other known industry.

His business and its varieties is now conducted by Mr. H. Buchlein at 787 Broadway corner Market Street, third floor. For such an extensive business Mr. Buchlein occupies, in all probability he occupies, comparatively speaking, a small amount of space. Mr. Buchlein has now been engaged in business more than a quarter of a century, and elegant specimens of the handwork which he turns out are seen in all parts of the country and, in fact, wherever stamps are used and wherever paper or leather is manufactured or used the marvellous skill of Mr. Buchlein in the manufacture of dies is exhibited, and whatever comes from his hands is of a high order, but has for a part of its clerks' paraphernalia and its Secretary's and other office requirements, and one other kind of stamps are deemed necessary, are made in his shop. His business is not confined to the city, and, in fact, his line has no boundaries. His out-spreading genius has attracted material to satisfy its demands, and he has been called upon, individually or upon his time, that for many years he has been known as "O. K. Buchlein." From all sections of our own country, and from across the ocean, orders are wanted or is called for, the name of citizen Buchlein is the first on the list, and as soon as the order is given, the work is very soon complete and ready for use. It is his high standing, and the high standing which he holds in the business community, and his high standing, here talent and energy win with so little apparent effort, that he has attracted to him, from patterns of his own designing. Some of them are gems, and are being made in his mind, where it requires but the touch of a button to set the current flowing, and they are all who look upon and handle. The stencils and brands which he produces are the best satisfaction to buyer, seller, and user. The production of rubber office

THE FACTORY OF H. BUCHLEIN

WILLIAM LOGEL

IT would be difficult to select out of the whole miscellany of Newark's domestic industries, one which has had a more important bearing upon the commercial affairs of the city than the trade in general family groceries. This important and necessary business stands foremost in line with the many commercial enterprises that have contributed to the steady growth and prosperity of the city. In reviewing the many able and honorable names identified with this particular industry, we take pleasure in mentioning that of Mr. William Logel, a faithful picture of whom appears in the illustrations shown on this page. The business is located on Springfield Avenue, corner Fifteenth Street, and is one of the neatest and best equipped grocery plants in that section of the city.

Stocked with a large and well-selected line of general family groceries and provisions, including new crop teas, coffees, spices, dried foreign and domestic fruits, hermetically sealed goods of every description in fact, everything in the line of food supplies known to the trade, all of which are received from first hands, from the best and largest markets in the country, enabling the enterprising proprietor to supply the customers at the lowest, rock-bottom prices. In connection with the grocery business, a well-regulated meat market is a prominent feature of the house, which is very convenient for the people residing in the neighborhood. Polite assistants are in attendance, and free deliveries are made to customers in all parts of the city and its suburbs. Mr. Logel was born in Newark and was educated in the schools of the city, and has been identified with the industries of Newark for nearly half a century.

WILLIAM K. SCHOENIG.

A VISIT through the western section of Newark will convince the visitor how rapidly that part of the city is being built up with elegant, useful and substantial business places and residences. In this connection we mention with pleasure the many able architects of this city who are an honor to their profession, among whom stands Mr. William K. Schoenig, a first-class photo of whom is presented on this page. The skilled and talented efforts of this gentleman include many of

WILLIAM LOGEL'S NEW GROCERY AND PROVISION STORE, COR. SPRINGFIELD AVENUE AND FIFTEENTH STREET.

the more noted architectural features that have been perfected within the past twenty years, and the results of his handiwork are apparent in many neat residences, useful dwellings, handsome flats and numerous other buildings in the western section of the city. The plans of Mr. Schoenig are conspicuous for original ideas and display a masterly genius for architectural effect. His drawings or designs also show a deep study and a thorough knowledge of his profession. Mr. Schoenig's office and drawing rooms are located on the corner of Springfield and Littleton Avenues. He takes great pleasure in his business and his services are in constant demand.

WILLIAM A. BIRD.

ONE of the oldest and best known representatives of the real estate and insurance business in this city is Mr. William A. Bird, whose photo appears on the preceding page. Mr. Bird

transacted his first deal in this profession in June, 1862, and during the thirty-five years which he has devoted to this calling, few men, if any, will be found with a clearer record. He is rightly characterized as one of the many gentlemen who have chosen the real estate profession, a fact which is demonstrated by his success. Mr. Bird's office is located in the Bolles Building, 729 Broad Street, adjoining the Post Office. He is engaged in a general city and county business, covering the buying, selling and exchanging of real estate, securing loans on mortgages and effecting insurance in the most reliable companies. Mr. Bird is thoroughly posted in all of the details of the trade and as a reliable appraiser of real estate in every section of the city and its suburbs, he stands without a peer.

He has been a resident of the city for many years and is well known for his contributions to the city.

RESIDENCE OF ELIAS G. HELLER, ON ELWOOD AVENUE, FOREST HILL.

## FOREST HILL ASSOCIATION

THE Forest Hill Association was incorporated in 1890, with Elias G. Heller as President. The Association purchased several large tracts of land located in the northern part of Newark on the New York and Greenwood Lake Railroad, and named the place and station Forest Hill. Through the foresight, energy and push of its President, the tracts of woodland was transformed into the most delightful suburban place in Newark. Forest Hill is the highest, coolest, healthiest and most beautiful suburban place within the city limits and only twenty minutes' ride from Market and Broad Streets on the Forest Hill electric car, and thirty minutes' ride from Chambers Street or Twenty-third Street, New York, on the N. Y. & G. E. R. R. In fact, Forest Hill has all the city privileges, such as flagged, curbed, sewered and macadamized streets, gas and electric lights, pure water, private and public schools, church and club, mail delivery, telegraph and telephone service, police and fire protection, etc., with the advantage of a healthy country surrounding of an elevation one hundred and sixty-five feet above the tide water. The entire tract of about a mile square is restricted against all nuisances, and lots or plots are only sold for residential purposes, which is a guarantee every person has who locates his or her home at Forest Hill.

The Association, through its present (1897) officers—Elias G. Heller, President; J. Edwin Keene, Treasurer, and Paul E. Heller, Secretary, life-like photos of whom are presented in the illustrations, offers the most liberal terms to those desirous of owning a home, which enables all to procure one who can afford to pay rent, and thus have a warranted deed to show for their savings as against an abundance of rent receipts.

The environs of Newark have been endowed by the lavish hand of nature with a charming diversity of gifts. Look where you will, some delightful view of hill, or wood, or water arrests the eye. These picturesque topographical features have been turned to good account in the making of homes, which are the fitting architectural jewels for so beautiful and homelike a setting. Any description of the city, therefore, would be incomplete if we were to omit to direct attention to the attractions of the suburbs, which are occupied not only by the citizens of Newark, but also by thousands of families whose heads do business in New York, and find it in all respects more advantageous to live outside the crowded city. But of all the pleasant suburbs of Newark, the flower is the Forest Hill section, in the northwestern part of the city. Here are combined in equal proportions the advantages of urban and suburban life, making this locality a perfect place of residence.

In salubrity of situation and in charm

ELIAS G. HELLER, PRESIDENT

of New York than are the citizens of Harlem or the remoter parts of Brooklyn, while the comforts of the transit to and fro is incomparably superior for the New Jersey suburban resident. This is a fact beyond dispute. It is, therefore, not to be wondered at, taking into consideration the high rents, impure air and generally unwholesome surroundings of city life, that so many New York business men have shaken the dust of the metropolis from their feet and established themselves in homes at Forest Hill, where their houses are larger and more comfortably arranged than are any that could be secured, even by a far greater expenditure of money, within the limits of the city.

But the advantages which give this suburb its distinguishing character and make it a place of happy and contented homes are not yet exhausted. Situated within the corporate limits, it is subjected only to the low tax rate for which Newark

from every point of view. Therefore, the Forest Hill Association was organized and at once set to work upon well-considered and practical plans for developing the undertaking. Not a foot of ground has been sold, nor will be sold, except under the reasonable restrictions and guarantees which were originally established. When a purchaser presents himself he is informed that, while the largest liberty is allowed in the exercise of personal taste, certain stipulations must be inexorably regarded. The deed which conveys to him his property binds him, his heirs and assigns, neither to occupy nor to sell his premises for the purpose of carrying on the manufacture of spirituous or malt liquors, fertilizers or other undesirable occupations, which are duly specified. Moreover, there are covenants which preclude building within a certain distance of the street line, erecting houses of an undesirable grade, or putting up barns, stables or outhouses within prohibited limits.

MONTCLAIR AVENUE, EAST FROM DE GRAY AVENUE.

deserves credit and under which she makes many and satisfactory civic improvements. The public schools of Forest Hill are also part of the excellent educational system of Newark, than which there is none better. The same may be said of mail, express, telegraph and police service, which are, respectively, parts of the municipal organization. The streets are curbed, flagged, macadamized and to some extent sewered, while they are lighted either by gas or electricity. The water supply comes from the Pequannock, and is of a purity almost unequaled and of a quantity inexhaustible.

And yet Forest Hill, as it stands to-day, with its pleasant and commodious homes, its well-kept lawns, its wide and graded streets, its churches, schools and fine shade trees, appeared only seven years ago as the mental vision of its founder and principal promoter, Mr. Elias G. Heller, a successful manufacturer residing in the district. To him belongs the credit of bringing this model enterprise into being. He resolved upon building up a suburb which would be entirely unobjectionable

The result of this extreme care has been to secure the very best kind of residents, to double the value of all the property within five years, and to obtain a class of houses which range in cost from \$3,000 to \$25,000. The pictures herewith given of a few residences and parts of streets sufficiently indicate the character of the suburban homes which have sprung up in this beautiful section of Newark. And to cap the climax of good things which have already fallen to the residents of Forest Hill, the founder, Mr. Elias G. Heller, has generously donated eighteen acres of land to the Essex County Park Commissioners, who have secured about three hundred acres adjoining Forest Hill, which will be transformed into a public park at an early day.

An elaborate park system for Essex County is now under way, controlled by a Board of five well-known citizens who were appointed by Justice David A. Depeue, under an act of the legislature, in whom full and ample powers are invested to provide a park system at an expense of two and one-half millions of dollars.

J. B. FAITOUTE

ESSEX County, New Jersey, is famous throughout civilization as the home of numerous co-operative associations, including religious, patriotic, educational, industrial, fraternal, social, benevolent, charitable and various others too numerous to mention. All of these exist in a flourishing condition, and meet with the approval and indorsement of the people, for whose good they exist. There are, perhaps, but few of our fellow-citizens who really consider the amount of good that is continually being done, through the offices of these time honored organizations. Among them we mention with pleasure, and exhibit a striking photo of, Mr. J. B. Faitoute, who so creditably discharges the duties of Supreme Secretary of the Golden Star Fraternity.

Besides being connected with the Supreme Council of one of the most thriving fraternal insurance organizations, Mr. Faitoute has been carrying on a large and most extensive insurance business, representing nearly all of the well-known and largest insurance companies in this country. For a number of years he has also been Secretary of both the Fireside and Hearthstone Building and Loan Associations. Both associations are well-known in business circles. His office is situated in the Clinton Building.

The organization is a social, fraternal and benevolent association, and was incorporated under the laws of the State of New Jersey, January 21, 1882. The incorporators were residents of the city of Newark and well-known among the business community, hence it is absolutely a home institution. Its objects are to promote industry, morality and charity among its members, and to provide and establish a beneficiary fund from which, on satisfactory evidence of the death of a member, a sum not exceeding \$2,000, shall be paid to the beneficiaries.

J. B. FAITOUTE.

HEBREW ORPHAN ASYLUM, ON MULBERRY STREET.

twenty-five years. The photo presented on page 214 is a good likeness of the gentleman under consideration, who is engaged in the grocery and dairy business located on the northwest corner of Pacific Street and New York Avenue. Mr. Rittenhouse devotes his attention to the success of his calling, and while a strict business man, has found time to discharge the duties of citizenship, he having represented faithfully the people of the Tenth Ward in the Board of Education for four years and served with ability on some of the most important committees of the board.

Mr. Rittenhouse, in connection with the grocery trade, conducts a dairy and produce business, supplying everything in these lines in their season.

OTTO K. SCHILL

IT is a "true saying, that 'Music hath charms to soothe the savage breast.'" This may or may not be true, it all depends upon one's definition of music, and this again relies upon one's education. Then the savageness of the beast must be inversely proportionate to the savageness of the music. What might bring tears to the eyes of the savage, might bring tears to our eyes, too, but from a vastly different reason. Unearth strains that might have a soothing effect upon a Chinese widow, might soothe us also, on the same principle that a policeman's club has a soothing effect if judiciously applied. A glance at the striking photo which the artist has so successfully transferred to this page, will satisfy anyone who has the least smattering of phrenological

science, that the artist whom it represents is musically inclined, and that music is a natural characteristic.

The elegant studio of this musical genius is located in the Clinton Building, No. 22 Clinton Street, between Broad and Beaver Streets. Here he devotes his personal attention in giving lessons to those desiring to learn the art of playing the soul-entrancing violin. Newark is justly proud of her many excellent artists, but few, if any, possess the qualifications to impart their knowledge of this particular instrument to others better than our well-known fellow-townsmen, Mr. Otto K. Schill, who is noted as one of the most painstaking, untiring and devoted instructors, whose ambition is to graduate musical artists who will be a credit to themselves and an honor to him.

STACY B. RITTENHOUSE.

AMONG the business men of the Tenth Ward, the name of Stacy B. Rittenhouse is well and favorably known, he having been identified in the industrial pursuits for the past

OTTO K. SCHILL

RESIDENCE OF W. H. BARKHORN, ON EDGEMOOR STREET.

the State, and at an early age commenced the study of his profession under Messrs. Thomas Cressey and William Halsey Wood, both gentlemen being now distinguished architects of Newark.

In 1889, Mr. Virtue entered upon the practice of his profession on his own account, and at once secured a liberal and general patronage. He is an able and talented architect who attends faithfully to details, and whose plans are well digested and studied. Among the buildings planned and constructed by Mr. Virtue may be mentioned, the Baker Building on Market Street, the Hotel Bayonne in Jersey City, the Elizabeth Avenue Public School, which is represented in the educational department of this work, etc.

Mr. Virtue is also the proprietor of the Newark School of Architecture, where he gives instruction in the various branches of the profession, and also in the use of the pen and pencil. He is a member of the Newark Architectural Association, and also of the Newark Board of Education. He is a native of Newark, N. J., and was born on the 15th of May, 1861. He is a single man, and has no children. He is a very successful architect, and has been the designer of many of the most important buildings in Newark and the surrounding suburbs. He is also a very successful draughtsman, and has been employed by many of the leading architects of the city. He is a very popular and successful architect, and his work is highly respected by the public. He is a very successful architect, and his work is highly respected by the public. He is a very successful architect, and his work is highly respected by the public.

JOHN NIEDER.

THE history of the world is filled with the amazing deeds of heroic men, and women, too, who have won honors on bloody fields, but the pages of this illustrated souvenir has been devoted to recording the names, and presenting photos of men whose genius has contributed to make Essex County great and famous in the industrial world. The numerous interests that have contributed towards this grand result, are to be congratulated for the parts played in accomplishing it, and prominent among them the tanning and manufacturing of leather has played an important part. Newark at the present writing being the centre of this trade in the United States. Attention is directed to the enterprise of our well-known fellow-townsmen, Mr. John Nieder, manufacturer of every description of book-binders' and pocket-book brands of leather, which are creditable to the push, enterprise and ability of this young and wide-awake mechanic.

The plant is located on Emmett Street and Avenue C, near the Emmett Street Station of the Pennsylvania Railroad, and is one of the best equipped factories of its size and kind in the city. Mr. Nieder, a photo of whom is seen on this page, is a practical mechanic with a thorough knowledge of the leather business, especially those brands that he represents, and these are noted principally for their quality and finish. He is a self-made man, having raised himself up from the bench to his present standing in the leather trade, and has on various occasions acted the part of a good citizen, having ably represented the people of the Tenth Ward in the Board of Education, and his district in the State Legislature.

JACOB GAHR.

THE accompanying illustration represents a typical self-made man, the story of whose life clearly demonstrates what can be accomplished by energy, integrity, sobriety and reliability. The subject of this sketch was born in Germany, December 31, 1856, in humble circumstances. At the age of sixteen his parents emigrated with him and the remainder of the family to this country. Shortly after his arrival he secured

THE GERMAN HOSPITAL, ON BANK STREET.

a situation in a cigar factory, and by strict attention to his business soon gained the reputation of an expert cigar maker.

By hard work and economy he succeeded in laying aside sufficient to launch out as a cigar manufacturer on his own account, which he did February 2, 1883. Commencing in a very small way, his business soon began growing and steadily continued step by step, until to-day he occupies a well-equipped factory in the rear of 153-155 Hamburg Place, in which he now employs several experienced workmen. This is a remarkable growth considering the competition he had to contend with. It must be noted that the chief source of his success was the never failing reliability in the goods he manufactured. A customer once secured, he rarely lost. In June, 1896, he also embarked in the dry and fancy goods business in his store at 155 Hamburg Place, and it is safe to say that he will employ the same traits, energy and reliability, to make his new business as great a success as the cigar business. On the front of 153-155 Hamburg Place he has erected a handsome three-story frame and a two and one-half story brick structure.

Mr. Gahr is possessed of a genial disposition which has won him a host of friends, and the popularity he enjoys is attested

by the various organizations with which he is connected, mainly the Orpheus, Liederkrantz, Bethoven Maennerchor, St. Leonard Council No. 448, Catholic Benevolent Legion, of which he is vice-president; St. Benedict's Benevolent Society, of which he is the president, having been connected with St. Benedict's Church since his arrival in this country. Mr. Gahr takes a deep interest in educational matters, and is an active member of the St. Benedict's Parochial School and the Twelfth Ward German and English School Societies.

The story of Mr. Gahr's career in his trade reads somewhat like a fairy tale, and at the same time demonstrates what can be accomplished by attention to business, and the secret he claims to be, honesty, pluck and determination to win.

JACOB GAHR.

JOHN NIEDER.

HOME OF A. E. WOODS, ON MR. PLEASANT AVENUE.

H. GALLOWAY TENEYCK

**T**O POSSESS a practical and thorough knowledge of one's profession is one of the most commendable features of a man's business life. The man who carefully classifies his work is sure to attract the attention of the leading men of business and finance, and bring to his support, commissions from the biggest works of life. A notable citizen in this connection, we are pleased to mention the name of Mr. H. Galloway Teneyck, architect, located in the Firemen's Insurance Building, corner Broad and Market streets, whose life-like photo is herewith presented. The elegant and well-equipped office and draughting rooms of this worthy representative of the architectural profession, disclose at a glance the prominent features of his honored calling, and the numerous residences, stores and other structures erected in this city and its suburbs attest his skill and ability in the trade he so ably represents. He is a

Galloway Teneyck, a native of Wisconsin, and a graduate of the University of Wisconsin, is a well-known architect and draughtsman. He has been in the profession for many years, and has been successful in many of his undertakings. He is a member of the Wisconsin State Architectural Association, and has been elected to the office of president of the same. He is also a member of the American Institute of Architects, and has been elected to the office of vice-president of the same. He is a man of high character and ability, and is well known and respected in his profession.

MR. TENEYCK, ARCHITECT.

DIXON & RIPPEL.

THERE is, perhaps, no one interest in Newark to-day which has shown such a healthy and continued growth as the brush business. The manufacture of high grade brushes constitutes a very important industry. The establishment of Dixon & Rippel is not only the most prominent, but is also the oldest established in this city. In the year 1857 this house was founded by Mr. Edward Dixon, the senior partner of the present firm. In 1866 he admitted Mr. W. Dixon to partnership, and the firm became known as E. & W. Dixon. In 1891 the above firm dissolved and Mr. Edward Dixon continued the business under the name of Newark City Brush Manufactory. A few months later Mr. Albert A. Rippel was admitted to partnership, and the firm became known as Dixon & Rippel.

Mr. Edward Dixon, the founder of the firm, is an old citizen of Newark. He is a practical brush maker and has been actively identified with the brush business in this city since 1852. The old sign (Newark Brush Factory) can still be seen on top of the factory building, at Nos. 50 and 52 Market Street.

Mr. Albert A. Rippel, the junior partner, is a native of Newark, and has been actively identified with the brush industry since 1880, having grown up in the business from boyhood. He represents what is called young blood in business, and since his connection the firm has experienced a continued increase in business. He is one of the few men who are to-day called successful salesmen. The high grade brushes manufactured by this firm are fast becoming celebrated for their superior construction, durability and practical working qualities. Always

DIXON & RIPPEL'S BRUSH WORKS, CORNER MARKET AND PLANE STREET.

using the best materials, and combining the highest mechanical skill with thorough experience, they feel confident in claiming to produce the best brushes in the market. This firm enjoys the distinction of carrying on a general brush manufacturing business. They are not confined to any one particular branch, but manufacture everything in the line.

EDWARD DIXON.

ALBERT A. RIPPEL.

It is very certain to be found at this establishment, and that is the reason for its popularity. An apparatus made for a rig in which to seat the driver for one of his swift steppers or high lookers, or for the patient, sure and steady plodding dobbins for the heavy or heavy variety, and turnouts of elegance or comfort, or for the reliable horse to take a gallop on, is always at hand for business work, and the work supplied as though every-thing was a formality. Efficiency, care, cleanliness and dispatch are the leading words in Mr. Munn's business dictionary. That Newark is not in the class of men who are engaged in the livery business is a fact that goes without the saying, and F. W. Munn, who is the sole proprietor of the business, is only a representative of this large class of business men engaged in getting horses and carriages in the city of Newark. From very modest beginnings the business of this concern has grown to its present immense proportions under the fostering of this man

F. W. MUNN'S BOARDING AND LIVERY STABLES, N. CHESTNUT STREET.

of his own and you, and he can trace his success to the original motto, "satisfied to please," which has been carried out to the letter, not only by himself, but by all his employees. A visit to the stables is well worth the making by the lovers of the horse and the admirers of the stylish in harness, saddles, carriages or sleighs, stylish and elegant representatives of either being found in the stables and repositories for vehicles, trunks, trunks and closets for the harness, robes, blankets, fly sheets and the fly nettings, a variety of which are always on hand, for use when necessity or emergency or efficiency demands. Mr. Munn always delights to show his establishment, in which he takes a personal interest and pride, who are in pursuit of pleasure or information as to where is the proper place to procure, at a moderate price, just such a turnout as they would like when they wish to go out, through the city or its suburbs.

Every year the establishment sends out a neat circular, notifying the people as far as possible of the greatly increased facilities he has made, in order to please and gratify his old customers and point to others whom he is ready and willing to please. Mr. Munn is one of those men who believe in having a good thing—the very best the markets afford, and put into exercise the full measure of his push and vim to furnish everybody with “a good horse and carriage for a very little money.”

There is little doubt of this being one of the most thoroughly equipped livery stables in the city of Newark. Besides the paraphernalia proper, he has his own blacksmith, wheelwright and harness makers' shops with skilled mechanics to operate them, all of which a wide-awake, thinking public appreciate. He makes a specialty of furnishing horses and wagons separate or together by the day, week or month. Also two and four horse stages for pleasure parties and immense vans for moving merchandise or furniture. Mr. Munn is a well-known business man with a thorough knowledge of the livery industry which he so ably represents. He is a veteran of the war for the Union and a member of Lincoln Post, No. 11, G. A. R., of this city. A first-class photo of him is herewith given in the illustrations, with that of his elegant new residence, and they speak for him louder than anything we could say.

#### WILLIAM J. KEARNS.

**C**OUNSELLOR William J. Kearns, whose photo is presented on page 125 of this work, was a member of the legislature during the year 1893. In the legislative manual of that year the following facts are given concerning him: “Mr. Kearns was born in Newark, N. J., August 12, 1864, and is a lawyer by profession. He was educated in St. Patrick's Parochial school and St. Benedict's College, Newark, and also in the University of the City of New York, where he received the degree of L. L. B., on May 26, 1892. He was admitted as an attorney-at-law at the June term of the Supreme Court, in 1887, and as a counsellor-at-law at the February term, in 1892. He was made Master in Chancery, February 14, 1888.”

Counsellor Kearns, whose offices are located in the Globe Building, corner Broad and Mechanic Streets, commenced his professional career by opening an office as a law stenographer in Newark, his native place, in January, 1883, at the age of nineteen. At that time he had already acquired the reputation of being one of the most expert court reporters in this State. He practiced his profession for several years, at the same time continuing the legal studies he

F. W. MUNN

RESIDENCE OF F. W. MUNN, ON CHESTNUT STREET.

had already begun. During this period in his career he frequently filled the place of the official stenographer of Vice-Chancellor Bird's court, generally accompanying the Vice-Chancellor on his circuit into Warren, Morris, Sussex, Hunterdon and Somerset Counties. After his admission to the Bar in June, 1887, as stated above, he abandoned his stenographic practice and has since been devoting himself exclusively to the practice of the law, at which, for a young man, he has achieved a large measure of success. At the April term, 1890, of the Essex Court of Oyer and Terminer, he was assigned by Justice Depue to defend James Smith, who was indicted for the murder of Hastings. This murder trial attracted considerable public attention at the time, because of the novelty of the defense—an insane delusion of persecutions—which Mr. Kearns ingeniously prepared, and which, together with the able assistance of Mr. Samuel Kalisch, whom he asked to have assigned as his associate counsel, succeeded in saving Smith from the gallows.

Latterly, Counsellor Kearns has been giving more especial attention to the civil branch of his profession. In the legislature of 1893 he served as chairman of the House Committee on State Industrial School for Girls; he was also a member of the Committee on Federal Relations, and one of the committee on the Judiciary. On the Judiciary Committee he earned the reputation of being one of its most useful and hard-working members. He was also the Secretary of the Essex Democratic Assembly Caucus, for in politics he is a staunch Democrat. It was this caucus which determined to make the Hon. James Smith, Jr., a candidate for United States Senator, and it was Mr. Kearns who, as Secretary of the caucus, made public announcement of the action of the Essex lawmakers at their memorable meeting on the night of December 5, 1892.

In the November elections, 1892, in the Seventh Assembly District, Mr. Kearns defeated the popular Ex-Freholder Huegel, who was then considered invincible, by a majority of 239 votes, but was defeated in 1893 by Dr. Edwards by 24 votes.

W & J MULLIN.

THERE are few men engaged in the funeral furnishing or undertaking profession that are possessed of the various business qualities enjoyed by Messrs. William and Joseph Mullin, managers of the estate of Peter Mullin. The house was established in 1870, and since the tragic death of the founder, which occurred in 1891, the business has been ably conducted by his sons, both of whom are graduates of the New York College and the Cincinnati School of Embalming. The ware-rooms and morgue, which is illustrated on this page, are located at 91 Lafayette Street, and are thoroughly supplied with everything in the line of funeral furnishing goods.

Messrs. W. and J. Mullin, the managers, devote their personal attention to the business of their honored father, and are noted for their courteous and obliging treatment towards the bereaved families of those who intrust them with the last sad rites of decently interring their sacred dead. The house is one of the most honorable and trustworthy to be found in the business. Calls are promptly attended to at all hours of the day and night, and on the most reasonable terms.

AUGUST BERNAUER

IN reviewing the various industries that are represented in this city, it is difficult to select a calling that attracts a more able set of men than the profession of an undertaker or funeral director. Newark has many honorable citizens who have chosen this business, and among them we take pleasure in mentioning the name of Mr. August Bernauer, undertaker, whose ware-rooms and morgue are located at 55 Barbara, corner Niagara Streets. Mr. Bernauer first beheld the light of day in this city in September, 1854, and was educated in the schools of Newark. He has been connected with the undertaking business for fourteen years, during which time he has officiated at the funerals of many well-known citizens, and always represented the dignified profession of the honorable funeral director.

He is prepared to assume entire charge of obsequies, secure burial plots in any cemetery, and supply hearses and coaches in any required number, and his services can be obtained at all hours of the day and night on the most reasonable terms. Mr. Bernauer, a photo of whom is displayed on this page, has demonstrated his ability in the profession of

the undertaking line, under the name of James P. Dowling & Son. The office and ware-rooms are located at 40 Bowery Street. The house was founded in 1881, by the honored father of the present proprietor, who died in 1893. Since then he successfully continued it. Mr. Dowling seems to be endowed with those qualifications necessary to carry on his profession. He is a Newarker by birth and education and under his father's care learned his profession. Mr. Dowling is prepared to take entire charge of funerals, and furnish everything required. He makes a specialty of embalming on the most scientific methods. He is well-known in the eastern section of the city, and is esteemed by everyone.

AUGUST BERNAUER.

MULLIN'S UNDERTAKING ESTABLISHMENT,  
ON LAFAYETTE STREET.

undertaker, and is respected by those who know him for his courtesy and sterling integrity. He is associated with many fraternal, benevolent and charitable societies and has been treasurer of St. Leonard's Council, C. B. I., since its organization.

J. P. DOWLING & SON.

A YOUNG, enterprising and honorable representative among the funeral directors of this city worthy of mention on these pages is Mr. James P. Dowling, who conducts business in

JAMES P. DOWLING.

JOSHUA BRIERLEY

THERE is an old saying that "a new broom sweeps clean." The assertion does not always hold good unless it penetrates into the glades of life far enough to ascertain of what kind of stuff the broom is made up with, and only after frequent trials can we find out whether or not its qualities are durable. It is with feelings of this kind that we take under consideration the gentleman who is the subject of this sketch, Mr. Joshua Brierley, one of the most reliable and courteous funeral directors of Essex County. Mr. Brierley was born in England, coming to this country in 1882, and has successfully conducted the undertaking business in this city and its suburbs for the past fifteen years, during which time he has won great favor from the public by his courteous and sterling business qualities, and established one of the finest and most complete undertaking establishments of be found in the City of Newark or State of New Jersey.

He thoroughly understands his profession, having graduated from Clark's School of Embalming, and is a practical expert in this particular branch of the business. He makes a specialty of embalming in accordance with the latest and most approved scientific methods, and his services are in constant demand on account of his skill and ability in satisfactorily performing these operations. Mr. Brierley's office and warerooms are located at No. 374 Broad street, and are admirably fitted up and equipped with everything appertaining to a first-class funeral furnishing undertaking establishment. He is prepared to take full charge of remains, procure burial plots or graves in any cemetery, furnish hearse and coaches, flowers, etc., at all hours of the day or night, and on the most liberal terms. All details receive his personal attention and everything intrusted to him is attended to with promptness. His dignified and sympathetic bearing in bereaved homes have modified and alleviated the sorrowful situation attendant upon the burial of their dead.

In connection with his undertaking business, Mr. Brierley conducts a large and commodious livery and boarding stable,

JOSHUA BRIERLEY, FUNERAL DIRECTOR.

JOSHUA BRIERLEY'S STABLES, COR. HIGH AND CLAY STREETS.

located at the corner of High and Clay streets. A large number of fine horses, and a great variety of coaches, carriages, light wagons, sleighs, etc., are constantly on hand for the use of the public, on the most reasonable terms. Safe and courteous drivers are furnished whenever desired. Some of the finest turnouts to be seen on the streets and ave-

nues of this city and its suburbs come from this neatly-arranged and orderly establishment. The illustrations on this page represent the well-equipped and commodious livery plant, and a life-like photo of Mr. Brierley, who is looked upon as one of the most successful undertakers and liverymen of the city, and is noted as one of the most scientific embalmers in Essex County. His reputation has steadily grown upon the rules of professional integrity laid down when commencing his business career in 1882, when he first began to carve his way through business rivalry, and his reward lies in a bright past record and hopeful future.

Mr. Brierley is highly esteemed by all with whom he comes in contact in business or social relations, and is connected with several of Newark's well-known societies, being an active member of the Golden Star Fraternity, the K. of P., and the I. O. O. F. He is one of those large-hearted men who associate with their fellows more on account of the benefits which they can confer, rather than those, like too many, whose selfishness and greed send them flying to the lodge-room in order to secure the full modicum of benefits which are supposed to accrue, and which all, too often, find the way into unworthy pockets. Here, in passing, we might indite the fact that the number of good samaritans, even when bound by the mystic tie, are all too few when the clarion call of relief for the sick, the wounded and distressed of their fellows is sounded. We feel entirely safe in the assertion that at least two pass by on the other side while one stops to pour oil into the wounds which gap and fester before the greedy. Much of the neglect of duty may grow out of a lack of thoughtfulness, but herein lies a bane just as much in need of cure as the great primary wrong of utter selfishness.

There is no better place to give exercise to the virtues learned in the lodge-room than where death has entered the family and broken the ties which bind the household. 'Tis here that such men as Joshua Brierley have found the field where temperance, fortitude, prudence and justice can have full play—the virtues, when combined, bring solace to the afflicted and hope to the bereaved, and help to dispel the shadows which conceal for a time the bright sides of life. The life, character, prosperity and business standing of Mr. Brierley is highly commended by all.

We specially call the attention of the public to our celebrated Mineral Beer. The purity of this beer, they guarantee, its age at six months, and that as a table drink it is of the highest possible concentration, and at the same time the lowest possible degree of alcohol. It is a so-called malt extract which will help convalescents and weakened persons to renewed vigor. Taken as a table drink, it will sharpen the appetite and quicken digestion, and as a beverage for the festive circle, it is of a delightfully exhilarating effect. The best Bohemian hops and purest prepared malt is used, making it pure and healthful.

It is a pleasure, indeed, to place it on record, the fact that men who are good judges of beer, and understand the rich quality of the Old Fashioned Lager Beer, as produced by these thoroughly competent brewers, have often gone miles out of their way on a hot summer evening, to reach the place where draught of the

Old Fashioned Lager. So many of our people become weak and nervous, and are unable to do their duty, that we are compelled to give them a tonic. This tonic is the Old Fashioned Lager Beer. It is a tonic in the true sense of the word, and is as good as any tonic that can be given. It is a tonic in the true sense of the word, and is as good as any tonic that can be given.

## JOSEPH HARBURGER

THE subject of this sketch is a gentleman well and favorably known to the citizens of every section of the city. Mr. Joseph Harburger, the courteous and able manager of Harburger's Hall, an illustration of which is presented on this page, was born in the city of Mainz, German, in 1854. He was educated in the schools of his native land and was, in early life, trained in the culture of grapes and the production of wine, which was one of the principal industrial occupations of the people of his native country. Coming to America in 1871, he entered the employ of D. Dreyfus & Co., wine merchants, of New York City, and continued with the firm for a period of seven years when he entered into business on his own account, opening what is known as the Jersey House, on Cortlandt Street, New York City, which he successfully carried on for ten years.

During the past seven years Mr. Harburger has conducted the well-known place of amusement located at Nos. 80 and 82 Hamburg Place, and deserves credit for the able and courteous treatment rendered to the patrons of this popular resort, upon all occasions. Harburger's Hall is one of the most popular amusement places situated in the Iron Bound District, and is largely patronized by the numerous religious, patriotic, educational, industrial, fraternal, musical, social, benevolent and political associations that flourish in the eastern part of the city. Attached to the hall is a large and well-kept garden capable of accommodating over five hundred people. The grounds are neatly laid out with shade trees, shrubbery, flowers, etc., planted in profusion. The hall is heated throughout by steam and lighted well, and has every convenience tending to accommodate the public. The genial proprietor is courtesy itself. He embodies in one man, traits that are rarely found together; common sense and sterling business tact, and united with these, the highest order of personal accomplishments. He is one of the finest caterers in the city, and is widely noted in this line.

HARBURGER'S HALL, ON HAMBURG PLACE.

## ADOLPH POORTMAN

IN the illustrations presented on this page will be found a view which takes in the southeast corner of Ferry and Prospect Streets, showing Poortman's Hall, which is much used by many well-known organizations for a meeting place. The building is of brick, and is a substantial structure, lately erected, in a style of architecture very attractive for that section of the city. The proprietor of the hall, Mr. Adolph Poortman, was born in Zevenaar, Holland, November, 1845, receiving his early education in the schools of his native village, and by trade is an engraver, having followed the occupation for many years. Coming to this country in 1880, he found employment at his trade, and after a few years he started in business for himself on Elm Street, in the Tenth Ward, where he kept a hall known as Democratic Headquarters, and removed from there to his present elegant location. In catering to the refined and delicate palates of the section of the city where he is located, he has built up and established a flourishing business. Mr. Poortman is one of the representative men of this calling. He carries continuously a general line of high-class wines and liquors, some of the better qualities of his stock being fit articles with which to grace the table of a cultured epicure. He is an expert and seldom goes astray when called upon for a decision as to the qualities of wines. His numerous patrons are enthusiastic in support of this fact, and place implicit faith in his judgment in this respect.

Mr. Poortman, a photo of whom is shown on the following page, is experienced in catering, and is noted for the orderly manner in which he conducts the business which he represents. He is public spirited and generous, and has ever been identified with the progress of the district in which he resides. Mr. Poortman is a member of all nearly the associations that abound in the eastern section of the city. His establishment has a wide patronage which has been drawn there through the customers' respect for him.

POORTMAN'S HALL, FERRY AND PROSPECT STREETS.

DETECTIVE

THE CITY

**I**n the city of New York, there are many men who are known as detectives. Some of them are very successful in their work, and some are not. One of the most successful is a man named Adolph Bookman. He was born in 1845, and he has been in the business of detecting for many years. He was first employed by the New York Police Department, and he was later appointed as a night sergeant. He has since then been employed by the New York Street Commission, and he has been appointed as superintendent of the New York Globe and Telegraph Co. of New Brunswick, N. J. He was next employed as a night sergeant of the police force, and from there he was appointed as detective.

ADOLPH BOOKMAN.

He has since then been employed by the New York Street Commission, and he has been appointed as superintendent of the New York Globe and Telegraph Co. of New Brunswick, N. J. He was next employed as a night sergeant of the police force, and from there he was appointed as detective. He has since then been employed by the New York Street Commission, and he has been appointed as superintendent of the New York Globe and Telegraph Co. of New Brunswick, N. J. He was next employed as a night sergeant of the police force, and from there he was appointed as detective.

amongst its members some of the cleverest and sharpest detectives in the U. S. Mr. Gregory, a photo of whom appears on this page, has been a member of the association for several years. He was not long located in Newark when the great strike of the Clark's Thread Co. in 1891, took place, and which he brought to a peaceful issue. In the fall of 1893, the great strike on the Lehigh Valley Railroad took place, which was placed in his hands and which he handled and saved the company thousands of dollars, which was highly appreciated by the company. He also does work for the large fire insurance companies of N. Y. and N. J. At present he has a large force of skilled detectives, and is doing a large business in private work. Mr. Gregory owns his home at 78 Murray Street.

WM. F. VAN HOUTEN

**W**M. F. Van Houten, a photo of whom appears on this page, was born in the city of New York, 1839, coming to Newark with his parents in 1844, where he has since made his

WILLIAM F. VAN HOUTEN.

home. He attended the public schools until he was ten years old, and then went to sea as a cabin boy with his father on a sailing vessel, continuing his education while engaged at sea, and going to school for a winter in Antigua. When he was fifteen years old, his father died, and he then went to the city of New York. He entered the city of New York in 1855, in the first class of the city, and served three years in the U. S. Army. He was then employed by the East India Company, and he was later employed by the U. S. Army. He has since then been employed by the U. S. Army, and he has been appointed as a sergeant. He has since then been employed by the U. S. Army, and he has been appointed as a sergeant.

JOHN A. RODRIGO.

General Townsend Harris as the representative of America. He was also one of the suite of the Commodore's in Kou Kok, the capital of Siam, when the United States obtained one of their most important treaties with that government, and was also engaged in the battle of Barriers Forts, near Canton, in 1856.

On his arrival in New York he was discharged, and again entered the merchant service. On the breaking out of the Rebellion he entered the army in Kearny's Brigade, and was with it in all the battles on the Peninsular under McClellan, but was compelled by sunstroke and sickness, to go to the hospital after the army had

VAN LEE ELISES.

arrived at Harrison's Landing. From there he was sent home. When again able for duty he entered the navy, and was discharged in 1865, and was employed in the Brooklyn Navy Yard. He then became master of several coasting vessels until 1869, when he left the water and went on the Newark Police force until 1880, when he resigned and entered the service of the Pennsylvania Railroad, as detective, where he is still employed. Mr. Van Houten is a past commander of Phil. Kearny Post, No. 1. In October, 1895, he organized, in this city, the Admiral Boggs Association of naval veterans, and was elected its Captain and he is still its commanding officer. He connected himself with the New Jersey Detective Association in 1882, and has continued an active member ever since, having served two terms as its Captain.

JOHN A. RODRIGO.

A STRIKING and natural photo of a well-known citizen is presented on this page. Mr. John A. Rodrigo, who first beheld the light of day in this city, in August, 1838, and was educated in the public schools. By trade he is a carriage trimmer, having served his apprenticeship with the well-known firm of M. C. and J. H. Green & Co., who at that time were located on N. J. R. R. Avenue. In 1861 he enlisted in the Fifth Regiment, New Jersey Volunteer Infantry, and after serving two and one-half years, was promoted to the medical staff of the United States Army, serving until the termination of the war for the Union. Since that time his pursuits in life have been various. As a private citizen he was called to preside as police justice, under the Republican rule in 1888, and served with distinction until removed by the

change in administration in 1892. He is connected with the New Jersey Detective Agency, which has its headquarters in Jersey City, and is also the treasurer and manager of the Merchants' Protective Association of this city.

Mr. Rodrigo is closely identified with the Grand Army of the Republic, being a charter member of Phil. Kearny Post, No. 1, of this department, who celebrated their thirtieth anniversary on October 26, 1896, and he is connected with many other patriotic, fraternal, industrial, social and political associations.

A STEINES.

NEWARK is no doubt one of the greatest consumers of coal among the cities of the American Union, and a well-known dealer in the black diamond trade is the subject of this sketch, Mr. A. Steines, a photo of whom is presented on this page. He was born in Germany, October 29, 1831, and came to America in June, 1852. He was educated in the schools of Newark, and is by trade a moulder, having served an apprenticeship with a well-known firm in this city.

Mr. Steins commenced business on his own account in 1875, starting a brass foundry which he successfully conducted for fourteen years, and during the past eight years has been identified with the coal trade. His office and yards are located at 706 Market, at the junction of Ferry Street, and all coal delivered by this enterprising citizen is well screened and guaranteed, to consumers, to be in every respect the highest standard of excellence. Mr. Steines also deals in new and second-hand machinery of ever description, and has earned by his thrift and enterprise an enviable name in all his business transactions.

RESIDENCE OF W. L. KEARNS, ON EIGHTH ST.

THE AMERICAN BUILDING LOAN AND SAVINGS  
ASSOCIATION OF NEW JERSEY.

THOUGHTFUL men, and women too, frankly admit that the building loan and savings associations established throughout the United States are doing more to educate and encourage the people to become provident and thrifty than any institution in the country. Every one appreciates the fact that the monthly accumulation of small sums from many sources and the investment of the funds thus obtained in good real estate mortgages at fair rates of interest, with the risk improved each month, not only by the natural appreciation of values, but by the steady reduction of the principal of the loan by the monthly payments of the mortgage, together with the mutual division of the profits between the borrower and the lender, as their interests appear, is undoubtedly one of the surest as well as most profitable means of reaching an end desired by most men, viz., the ownership of a home and the providing for a competency in old age. The American Building Loan and

paid shares issued at \$100, withdrawable at any time, worth six per cent. per annum, interest payable semi-annually. These shares are intended for those who wish to make a short term investment and are without an equal when safety is considered. On payment of \$50 per share, a dividend of eight per cent. per annum will be paid semi-annually in lieu of other profits in of excess fixed dividends.

Another feature which commends itself, and not to be found in many other similar organizations, is its suspension clause which provides that if a member is unable to pay dues at any time through sickness, loss of work, or other unfavorable conditions, he can obtain a suspension certificate for a reasonable period, allowing him to resume payments after his circumstances improve, without sustaining loss of dividends, and no dues or fines are charged pending resumption of payments.

To sum up, the whole plan of the American is one of equity and justice, and we recommend its shares to those desiring a safe depository for their surplus earnings as an investment without an equal. The management is in good hands. Mr.

RESIDENCES ON HELLER PARKWAY, FOREST HILL.

Savings Association, of New Jersey, with home office at 673 and 675 Broad Street, Newark, is making rapid strides to the front, and not only in this city, but local branches have been and are being established throughout the State in all the principal towns. They are in a flourishing condition and report steady progress.

The American was organized as a national association in August, 1895, and commenced business in the latter part of September, since which time it has realized the promoter's fondest expectation. Of course, the primary object of the association is to enable every man who buys its shares to become his own landlord, and what grander purpose could any institution have than this? John Howard Payne immortalized himself by writing those beautiful lines, "Home Sweet Home," and yet he died an exile. But thanks to such institutions as this, no man inclined to be provident need ever be an exile, for its whole aim and plan is to preach economy to the improvident and help them to better things.

The American issues two kinds of investment shares—prepaid at \$50, to mature at \$100 in ninety-six months, and fully

E. J. Murphy, a real estate man of many years' experience, is the President; W. H. Rowe, Vice-President; S. W. Chapman, Secretary, and Arthur Hinde, Manager of Agencies, also the organizer of this association and other similar institutions in the Old Country. The Board of Directors is composed of Messrs. Harvey C. Pearce and John Rowe, of Arlington, Hon. C. H. Baake, of Atlantic City, and Hon. Fred. Schuehardt, of Egg Harbor City. Mr. Frank C. Wilcox, who was for a number of years connected with the government of this city as assistant attorney, is counsel for the company. The mission of the American Building Loan and Savings Association, of New Jersey, is a laudable one and well worthy of public patronage, and all its operations are open to the fullest investigation.

It has been a settled fact for years that the public institutions known as building and loan associations have come among us and to use an old and hackneyed expression, "have come to stay." No institution which was new and untried was ever received by the working and middle classes, who are ever watchful and chary, with more implicit faith in its innate goodness than the building and loan societies.

FREEBORN G. SMITH

WE have only to run back over the history of music and musical instruments, in Essex County, but little more than a quarter of a century of time, to find the record of how and when the now celebrated Bradbury piano began its marvellously successful career, an instrument which in all probability has achieved a greater popularity than any other which has been put on the market, during any period of time since music was made to spring from pearly lips through Eolian harp and sound-board combination in harmonic time. The Bradbury was named in honor of the late song writer and sweet singer, William B. Bradbury, of Montclair, who first manufactured the piano which now bears his name.

The health of Mr. Bradbury failing and his physician and friends advising him to discontinue the business, he sold out to Mr. Freeborn G. Smith, his superintendent, who has since conducted the business, his manufacturing establishment, depositories, stores and salesrooms keeping pace with the "Bradbury's" growth and popularity, and the increasing demand for this beautiful instrument among people of culture. At present

The following editorial notice, which appeared in the *Newark Item* about the time the Bradbury piano concern moved into the present Newark quarters, corner of Broad and West Park Streets, voices a tribute richly deserved.

"As we were passing up Broad Street a day or two since, our attention was called to the elegant new quarters wherein is housed part of the piano interests of F. G. Smith, where the music-loving public will find the sweet-toned instruments which continue to speak the name and musical fame of the lamented Bradbury in the same notes of gladsome harmony which leaped from the ivory keys under his skillful touch and from his almost inspired lips.

"Curiosity bade us call in the familiar old store building at the southwest corner of Broad and West Park Streets, Nos. 679 and 681 of the former, yet so elegantly altered and attired was it that nothing short of a formal introduction from the polite and business-like manager, Mr. F. R. Feehan, would satisfy us that it was the very same but metamorphosed place known to us of yore. Behind the great plate-glass windows, reposed on carpets of velvet, the very prettiest and costliest of pianos and the richest in tone of the Bradbury make, while all

along down the sides of the extensive exhibition and salesroom were ranged instruments which for style, price and richness of tone could not help satisfying the most fastidious buyer. As we drew forth the richness of tone by touching the keys as we passed, our wonder grew at the modest sum which we learned they could be bought for as we asked the price, and still the wonder grew, why so many households, otherwise artistically finished and furnished, are yet without a "Bradbury," and this, too, when everybody knows how elevating, refining and educating piano music is. Just here may as well be interpolated a fact worth knowing, viz.: That instruments can be bought direct from the manufacturer at the very lowest possible prices and on the easiest terms imaginable, the profit which ordinarily finds its way into the middleman's pocket remaining with the purchasers of these beautiful pianos.

"On ascending the easy flight of stairs leading to the second floor, we were amazed to find that the story had but half been told, for here was another extensive exhibit and sales room, carpeted with rich Axminster, moquet or Brussels, where the buyer can move from the rosewood or cherry, or from the exquisite upright (superior) grand concert, new upright or the familiar old square, and from either of which the tones will give out their sweetness for the satisfaction, delectation and with unalloyed pleasure, without disturbing sensitive or musical ears. And this reminds us that it might be well in this connection to say how easy an instrument the piano is to learn to play, it requiring but little study, while persistency in practice wins the day. Our readers may call as they pass that way, purchase an instrument and our voucher for it, if you try you will soon learn to play. Then, O, restate satisfaction, even though life's journey is far beyond the month of May. We know, having tried,

PIANO WAREROOMS OF FREEBORN G. SMITH, CORNER BROAD AND WEST PARK STREETS.

the stores where the "Bradbury" is sold direct from the factory, number twenty-seven. Among these are the stores in New York, Brooklyn, Philadelphia, Jersey City, Saratoga Springs, Washington, Chicago, Kansas City, Newark, etc., Brooklyn alone having five handsome warerooms and three large manufacturing factories. For the past few years Mr. Freeborn G. Smith, Jr., has been a member of the firm, he taking to the business as naturally as a duck to the water, his father reposing great confidence in his business ability.

Mr. Smith, being a capital judge of human nature, has been able to keep about him such praiseworthy assistants and salesmen, that his great business has been run with very little friction. The "Bradbury" is represented in Essex County by Mr. F. R. Feehan, a gentleman who thoroughly understands the piano trade, and has presided over the business with a dignity and care which made it a success from the beginning.

JOSEPH LOGEL.

IT would be difficult to select out of the whole miscellany of Newark's domestic industries, one which has had a more important bearing upon the commercial affairs of the city than the trade in general family groceries. This important and necessary business stands foremost in line with the many commercial enterprises that have contributed to the steady growth and prosperity of the city. In reviewing the many able and honorable names identified with this particular industry, we take pleasure in mentioning that of Mr. Joseph Logel, a faithful picture of whom appears in the illustrations shown on this page. The business is located on Springfield avenue, corner Fifteenth street, and is one of the neatest and best equipped grocery plants in that section of the city.

Stocked with a large and well-selected line of general family groceries and provisions, including new crop teas, coffees, spices, dried foreign and domestic fruits, hermetically sealed goods of every description—in fact, everything in the line of food supplies known to the trade, all of which are received from first hands, from the best and largest markets in the country, enabling the enterprising proprietor to supply the customers at the lowest, rock-bottom prices. In connection with the grocery business, a well-regulated meat market is a prominent feature of the house, which is very convenient for the people residing in the neighborhood. Polite assistants are in attendance, and free deliveries are made to customers in all parts of the city and its suburbs. Mr. Logel was born in Providence, R. I., and was educated in the schools of the city. He has been identified with the industries of Newark for nearly thirty years.

H. E. SCHWARZ.

THERE are many of our citizens who pursue the occupation of real estate and insurance brokers and who have earned a well-merited reputation for the conscientious and efficient manner in which they handle all interests intrusted in their hands. Prominent among the number is Mr. H. E. Schwarz, whose office is now at 836 Broad street, but was formerly located at 210 Market street. He established the business of real estate and insurance in 1873, at Elizabeth, N. J., and in 1875

STORE OF JOSEPH LOGEL, SPRINGFIELD AVE., COR. FIFTEENTH ST.

removed it to Newark. Mr. Schwarz has a wide range of practical experience and a large and influential acquaintance in business circles. As a real estate broker he has paid special attention to large tracts of lands for building purposes and farms, and upon his books are full descriptions of the most eligible bargains available in tracts of land to be laid out in building lots as well as farms, in every part of the State of New Jersey, Pennsylvania, New York, etc. Mr. Schwarz, an excellent photo of whom is presented on this page, is a veteran of the late war, having been an officer in one of the Pennsylvania regiments of infantry, and is a member of James A. Garfield Post, No. 4, G. A. R.

MILES F. QUINN.

THE striking photo of Miles F. Quinn, presented on page 88 of this illustrated souvenir, will be readily recognized by his many friends and admirers, and it is hardly necessary to go

into details concerning him or his business qualifications. He conducts a general real estate and insurance business at No. 16 Mulberry street, on the very location where he first beheld the light of day, and devotes his personal attention to the buying, selling and exchanging of property, writing lines of insurance in the most reliable companies, procuring loans on bonds and mortgages, collecting rents and caring for estates. Mr. Quinn is also a commissioner of deeds as well as a notary public for New Jersey and several other states, and possesses a masterly knowledge of these duties. His ability and courtesy have won for him the respect of his many clients.

JOSEPH LOGEL.

H. E. SCHWARZ.

HOISTING ENGINES IN WORK ON ROBERT STREET.

J. S. MUNDY

W

Joseph S. Mundy was born in New York City, N. Y., on the 15th of August, 1854. He attended the common schools of his native city, and in 1871 he began sketching the plans for his famous Friction Drum Hoisting Engine. Since 1870 he has been sole owner of the business.

which he manufactures the output of Joseph S. Mundy's genius, the Mundy Friction Drum Hoisting Engine, now in use all over the world. Joseph S. Mundy was brought up in the country, worked on the farm in the summer and went to school in the winter. In 1866 he came to Newark and apprenticed himself to an engineering firm. In 1871 he began sketching the plans for his famous Friction Drum Hoisting Engine. Since 1870 he has been sole owner of the business.

DE JONGE & STEIGER.

THE photographs of the gentlemen represented on this page are those of Messrs. De Jonge & Steiger, architects, doing business at No. 224 and 226 Market street. Mr. Maurice De

DE JONGE & STEIGER, ARCHITECTS.

HOOPER & CO.

ARCHITECTURE has flourished since away back in the ages when mankind first quit his nomadic life where the tent was his home, and began the building of dwelling places of wood and stone. Just how much of this science was displayed in the lines of the Tower of Babel, and the great temples scattered through the eastern world, we have little means of divining. But from the time Solomon reigned in Jerusalem it is clearly shown by bible history that this beautiful science of architecture flourished and has left its footprints on every page of history. It is hardly possible that from the genius alone of Hiram, from whose tracing board sprang the beautiful ideal of David, the Temple of Solomon, which shone in its richness like a galaxy of stars in the firmament at night, came with the inspiration of the moment, but rather from the result of his deep study of the thoughts and labors of other scientific men and the garnering by this brilliant student of what they had accomplished in the ages gone by and flashed on the world from the beautiful lines of the temple as they came in full combinations from his tracing board. So clear, so concise, and with such marvelous perfection they came from his pencil, that no sound of hammer, saw or any other metal tool was necessary to be heard in its erection, every huge stone and cedar stick being prepared in the quarries and on the hill sides from this great architect's working plans. Contemporaneous history gives examples in multitude of the growth of this beautiful science which has left its marks in the ruins of Balbec, the Pyramids, and ruins all along the great river Nile and where dash the cruel waves of the heartless Mediterranean. And so as time moves on to the hours when we reach this grand science in its perfection, as demonstrated in the work of the pencils of the famed Michael Angelo and Raphael and their contemporaries, when the beauty of poetry and the marvels of architecture rose and fell like the waves of the storm disturbed ocean.

Enough of the past. It is not of the men under whose genius the science of architecture grew and prospered with which we

Centennial fair, each startling the world with their grandeur, their beauty and strength, and all carried away in wonder at the mighty proportions of the one Manufacturers Building, covering 32 acres of ground and mounting heavenward nearly five hundred feet, not to say a single word for the Ferris wheel, the engineering feat of the ages. Among these men, architects of Newark city, it is our pleasure to speak in this souvenir work of Hooper & Co., Irvin G. and George B., who have their studios in the Credit System's Building, corner Washington and Market streets, where they are earning fame for themselves and adding to the mighty treasures of architectural art and adorning their profession, in modesty of assumption of the degree of their skill and advancement.

WHEATON'S BUILDING.

have to do in our ESSEX COUNTY, N. J., ILLUSTRATED, nor is it of the men who wrought to bring out the fine lines of London's St. Paul or New York's old landmark, Trinity, the men of our era who have been and are to-day engaged in the work of dotting the world over not alone with such mighty examples of their wonderful capabilities as are seen in the Washington and Grant monuments, the Capitol building, where the representatives of the nation, the defenders of liberty assemble each year, the great building, which leaped from their plans and flew over thousands of miles of our domain to where towered all along marvels of their exploits, to the banks of Lake Michigan and Jackson Park, to become the mightiest exhibits of the great

GEORGE B. HOOPER.

IRVIN G. HOOPER.

PHILIP J. BOWERS & CO., NO. 189-191 MARKET STREET.

tion. All this activity in no way interferes with these energetic and knowing young brokers from giving personal attention to all the details of their insurance department, which would be considered by itself a large and successful business for any firm recently established. In this department they are ably assisted by their well known fellow-townsmen, Mr. E. A. Johnson, who has been connected for many years with several well known and reliable insurance companies, having a thorough knowledge of all the details and methods of fire and accident risks. The firm represents only the leading and most reliable companies in these lines and the countersign of Philip J. Bowers & Co. on a policy is a guarantee that it is correctly drawn and that the terms of the contract will be carried out. The secret of their success in all the branches of this business is due to the energy, activity and precision in all particulars and the most thorough care given to all transactions committed to their care, whether the amount involved is a few dollars or runs into hundreds of thousands. From their present beginning it is easy to predict

the future success of this institution among the business establishments of New York, for which it is well adapted to the business.

Wm. J. Bowers & Co.

189-191 Market Street, New York.

PHILIP J. BOWERS.

Mrs. E. A. Johnson.

OWEN M' C A B E

THE subject of this sketch, whose excellent photo appears below, is a well known citizen, whose career in the struggles of life is worthy of record on the pages of this illustrated souvenir. He was born in Ireland in 1836, and came to this country in his early teens, receiving a limited education in the schools of this city, after which he was apprenticed to Mr. L. J. Lyons, with whom he learned the trade of steam boiler making. In 1864 he associated with Mr. Samuel Lyons, a son of his former employer, and together they purchased the plant and conducted the business under the firm name of Samuel W. Lyons & Co., until the death of Mr. Samuel W. Lyons, which occurred in 1866, when the present well known firm of L. J. Lyons & Co. was organized, and has been successfully continued ever since that time. The plant of this firm is located on Commerce street, and occupies all the ground running through to Passaic avenue, and is admirably equipped with all the necessary machinery, and appliances for conducting the trade. It is a fact that the firm have made a great deal of noise in the conduct of their business, but this has been done without bluster or show. A large corps of experienced mechanics and skilled workmen are constantly employed in manufacturing steam boilers of all grades and sizes, also in constructing revolving barrels, iron tanks, dryers, etc. The boilers of this firm are located in the churches, schools, institutions, factories and homes of the people all over the Union, and have a reputation for safety and durability as extensive as the land they live in. This is another demonstration of what pluck, determination and honesty can accomplish in the struggles of life, combined with attention to business. Mr. McCabe is, strictly speaking, a self-made man, having raised himself steadily to his present position by close attention to busi-

NEWARK ELECTROTYPE FOUNDRY.

ness. He is well known in the industrial circles of this city and is honored for his integrity to business principles. He is a director and treasurer of St. James' Hospital, located in the eastern section of Newark, N. J.

F. C. EDWARDS

IN the illustrations presented on this page will be found an excellent and life-like portrait of Mr. F. C. Edwards, the well known broker and negotiator of loans, located in rooms 6-7, at No. 191 Market street. He first saw the light of the world in May, 1853, and has always resided in Newark, having attended the public grammar and high schools, graduating from the old Bryant, Stratton and Whitney Business College. Mr.

Edwards was connected with the old firms of C. Walsh & Son and Weimer & Co., as bookkeeper. He made an early start in business on his own account, at the age of twenty-one, having founded the Phoenix Lock Works, which is still in existence on Halsey street. After ten years he severed his connection with the above concern and took up his present business. He is also the secretary and treasurer of the American Wall Paper and Paint Company, doing business at 255 Market street, which was incorporated in 1895. They are the general agents for the Corey-Heller Company for this section of the State. Mr. Edwards is well known in business circles as one of the most successful negotiators of stocks and bonds in this city. He is connected with several of Newark's industries and during his business career has aided many who were financially embarrassed.

OWEN M' C A B E

F. C. EDWARDS

DAVID RIPLEY & SONS.  
TIMBER & LUMBER

FOR more than half a century there has been conducted in this city an industry which, in extent and usefulness of its production, stands unrivalled. We refer to the steam saw and planing mills plant conducted under the firm name of David Ripley & Sons Timber & Lumber Co., a remarkable and telling photo of which appears in the beautiful illustration presented on this page. The business of this great concern has a convenience of situation surpassed by few, if any, similar industry in any city in the United States. More than half a century of years have passed away since David Ripley, the founder, then a poor and almost friendless boy, came to this city from Green's Farms, in Connecticut, where he was born in 1803. He brought with

him little or no cash, but possessed what was far better—an active brain, a healthy physique and a strong right arm, great and mighty factors in the upbuilding of a home and a fortune.

His business foundations were laid firm and deep in the great and lasting principles of the virtues of temperance, fortitude, prudence and justice, and he was never known, during all his long business career, extending over a period of more than fifty years, to deviate or part from them. Early in life he imbibed a strong hatred for the institution of slavery and was always a fearless champion of its abolition. In the latter part of the fifties he brought down on his head not a few maledictions on account of his sentiments in this regard, but his convictions of right were so strong and his inbred love of honor still stronger, that he was never happier or showed up to his neighbors in better form than when withstanding the taunts of the thoughtlessness of those who opposed him. He was the founder in

PLANT OF DAVID RIPLEY & SONS TIMBER AND LUMBER CO.

organizing the Clover Street Industrial School, and contributed generously towards the support of the poor children in that section of the city. A marked specialty of the business was the sawing of logs into timber, boards, planks, joists, sills, studding, etc., to order. The trees, being purchased on forest lands in Pennsylvania and New Jersey, were chopped down and rafted on the Delaware and Susquehanna rivers and brought into his own plant via Passaic River and Morris Canal, both of which run past his doors. Many of the logs which were felled in the forests of Georgia and Alabama were sawed into boards and planks in this time-honored mill.

Few industries have, perhaps, done more toward advancing the manufacturing interests of this city than the lumber industry carried on under the well-known name of David Ripley & Sons. Along with their extensive sawing and planing mill, the sons and grandsons who have succeeded the founder have added a

box plant on a very extensive scale.

Thousands of boxes go forth from their works to the great manufacturing establishments engaged in other lines of trade that requires them to ship their product to the marts of trade throughout the country. Besides filling successfully all the responsibilities attaching to such a large business, the present proprietors have kept untarnished the badge of good citizenship, Mr. William A. Ripley having served as one of the first police commissioners of this city, and represented his ward in the Board of Chosen Freeholders and his assembly district in the State Legislature with credit to himself and satisfaction to his constituency. Mr. John Wattles Ripley has also filled the responsible office of Alderman, representing the people of his ward with ability. After the death of John Wattles Ripley the new company was incorporated.

WILLIAM A. RIPLEY

CHARLES O. RIPLEY

THE CUMMINGS & BROS. MARSHALL STREET.

These illustrations are indeed truthful representations of the tanning business, and the way they conduct with such marvelous success. The other industries of the city of New York, which have grown to their present great proportions, were all started in a similar manner. The business of this firm began life in a modest way in 1879, by Bernard Cummings being the founder. He remained alone in the business until 1881, when his brothers John and Bernard joined him. From that time the firm of B Cummings & Bros. was organized. After the death of Bernard, which occurred July, 1895, the firm was reorganized in 1899. They are practical tanners, and have mastered the art in detail, thus becoming experts in the business. Their factories being fitted up with all the latest machinery and the art of tanning, and being fully equipped with the most improved necessary appliances, and having in

L

THEODORE PERRY.

THE consumption of coal and wood in a manufacturing city like Newark is so vast that the trade necessarily involves considerations of vast importance, and the increasing demand for these two staple articles has attained proportions of great magnitude. Large capital and men of energy are continually being attracted to the traffic, and in this connection we mention, with pleasure, the name of Theodore Perry, a life-like photo of whom will be found among the illustrations. This enterprising citizen is a native of Morris County, he having been raised and received his early education in Hunderton County, and by trade is a house painter. Coming to Newark in 1882 he commenced in a small way his present business on Campbell street, and has occupied his present extensive and centrally located quarters since 1887. The plant is situated at Nos. 405 and 407 Market street and runs through to Passaic avenue, with an entrance on both thoroughfares. The premises are well equipped with steam power and large sheds. Mr. Perry makes a specialty of delivering only the best grades of well screened coal of any required size to manufacturers and families. Wood is cut and split to suit the purchaser, and he is the general agent in this city for the Standard Wood Co.

PHOTOGRAPHED BY WM. I. CONL, 704 BROAD ST., NEWARK, N. J.

ROBERT BLAIR.

THERE is indeed every excuse for classing the profession of the plumber among the very high branches of the mechanical arts, and the beneficial results of sanitary plumbing can only be secured by the employment of practical and experienced mechanics. Among the many able representatives of this profession in the city of Newark, we take pleasure in mentioning the name of Mr. Robert Blair, whose well-equipped work shop is located at No. 419 Market, where he conducts a general business in the line of plumbing, gas fitting, tin, copper and galvanized iron working. A specialty is made of sewer and water connections; contract work and jobbing in these branches receive his personal attention and are executed in a workmanlike man-

ner. Estimates are furnished on all work relating to any branch of his trade, and satisfaction is guaranteed on every job executed. The excellence of his workmanship and the reasonable charges have secured him a reputation that is fully deserved. The excellent photo on page 260, speaks for the man better than anything we could say in his favor.

WILLIAM JACOBI.

THERE is no trade better or more ably represented in Essex County than that of the plumbing, steam and gas fitting industry. One of our best known plumbers is Mr. Wm. Jacobi, of No. 72 Commerce street. The business now conducted by him was established thirty-five years ago by Mr. B. Assmann, with whom Mr. Jacobi was connected during five years, and to whom he succeeded in 1883. He carries a heavy stock of plumbers', steam and gas fitters' supplies, as well as the best makes of stoves, ranges, furnaces, etc., also tinware and sheet metal specialties. Mr. Jacobi is prepared to furnish

estimates and to enter into contracts for plumbing, lighting, ventilating, heating, steam and gas fitting, executing all work promptly. He makes a specialty of copper work, including hatters' cones, copper kettles and coils, round and oval copper pans for jewelers. Another prominent specialty of this house is the manufacture of balconies, in which a very large trade is done throughout the United States as well as in foreign countries. The subject of our sketch was born in Germany, and has resided in Newark for the past twenty-five years. He is recognized as one of our leading tradesmen, and is a popular member of the Germania and Aurora Singing Societies, and is financial secretary of the Master Plumbers' Association. The life-like illustration, which is presented on page 214 of this beautiful souvenir, speaks louder of this enterprising citizen and mechanic, than any words we could say, and all who know him will vouch for our assertions.

WILLIAM MORRISON, PHOTOGRAPHER.

HUBERT BOOTH

When Newark is not considered as a city of various industries which are so generally in the foreground, the history of Newark's development as a commercial center is not so generally seen that a man whose name and business are so generally complete and prominent as seen of these days is not a man of business and industry. He is a man of business and industry.

As a man of business and industry, he is a man of business and industry. He is a man of business and industry. He is a man of business and industry.

He first shined the light of day in the city of Waltham, Orange County, N. Y., in 1860. His parents removed to Newark's Woods...

HENRY C. KLEMM ARCHITECT

AMONG the many able and well known citizens of Newark who have been, and are now connected with the architectural profession, few, if any, are better known than the subject of this sketch, Henry C. Klemm, a life-like photo of whom is

HENRY C. KLEMM.

CLAYTON-HOFF CO

SINCE the advent of the trolley, with its treasured lightning advantages, came to take the place of the plodding Dobbin, a revolution was wrought in the use of the horse, the first and more important of which was found in its attack on the livery stables, hundreds of which went, for lack of business, to Davy Jones' locker, hopelessly and forever lost. Stables filled with fair stock and sheds covering vehicles with which none would complain and long familiar to patrons and friends, were lost from sight. Yet there were some standing on foundations so positively strong that they could not be shaken, and among these few in Essex County, is the Halsey street establishment of the Clayton-Hoff Co., which has survived the lightning flash and trolley dash and is now doing a handsome business and paying fair dividends from realized profits. It is safe to say that this company has passed a crisis, in the special business lines in which they are engaged, that can show few, if any equals, in its ruinous effects and the herculean strength of its crushing work and the far reaching of its paralyzing influences. Not alone has this company had to meet the contending hosts of Edison, Weston and others, who make play with electricity and magnetism, make music and sing songs on the sol. fa. system and tin horn combination, which keep people's feet tapping and holding people's closest attention till the wee sma' hours of the morning. With all these powerful influences to work against, the Clayton & Hoff Company continues to do business. Horses and wagons are hired out yearly to merchants and business men for delivering and carting goods of every description; they also have a large storage warehouse and large vans for moving pianos and furni-

THE CLAYTON-HOFF CO., LIVERY STABLES, ON HALSEY STREET.

ture to and from any section of the State. A large "Fally-Ho" coach has been added to the stock, which is the only one of its kind in Essex County, and is much used by pleasure parties, clubs, associations, etc., for day or evening outings. The plant is well stocked with stages, runabouts, traps, buggies, wagons, etc., which may be hired at all hours. The question may be asked: "Why prosperity smiles on the Clayton-Hoff Co., when others have gone down under the avalanche of trolley cars and bicycles?" Our answer is, the Clayton-Hoff Co. warded off every threatened danger and barricaded, with huge rocks of good judgment, every vulnerable place, and the danger passed without even phazing the concern on the lines of either its financial or business standing. As we wrote of this concern in another place a few years since, we can repeat now, only with decidedly more emphasis, viz., elegance, care, cleanliness and dispatch, are the leading words in Clayton-Hoff Co.'s business directory.

Are you in pursuit of a gentle saddle horse, a light buggy or heavy rig, either stylish or plain, the place to get it is at this company's stables, located a few minutes' walk from Market Street, on Halsey street, in the city of Newark, and at Nos. 217, 219, 221, on the westerly side of the same. In looking over the establishment, any visitor is first struck with the marvelous degree of cleanliness observed throughout every department. That there is a place for everything and that everything is in its place, the observer will note at a glance. That there is a man of pluck and business vim at the head is known, and in this establishment Chas. W. Clayton is the head.

ELIAS S. WARD, DECEASED.

CAPTAIN W. C. HOOPER.

JAMES AHEARN

THE following is a brief sketch of the life of James Ahearn, who has been a resident of this city for many years. He was born in the town of ...

CHARLES J. SCHULTZ.

... place of the values of the various sections of the city and the prospects of a rise or decline in prices. This latter can be mastered only by becoming thoroughly conversant with the locality, making its past improvements, its future prospects of growth and the likelihood of prominence that is, whether the growth and development of the locality is liable to continue, indefinitely, or after a time lose its vim. In this connection we have the pleasure of mentioning the name of Mr. Charles J. Schultz, whose office is located at No. 836 Broad street, in the Central Railroad Building, where he conducts a general real estate business, buying, selling and exchanging property.

FRANK A WHITE.

AMONG the many young and able undertakers of this city, we take pleasure in mentioning the name of Mr. Frank A. White, an excellent photo of whom is presented on this page. He has succeeded to the business of his former employer, the late E. B. Woodruff, and from all indications the same courteous and efficient service will be continued in the future which have characterized this well known establishment of undertaking house in the past. Mr. White is a practical embalmer, having graduated from the United States College of Embalming, of New York City, New York, having been born and educated in the schools of his native land.

FRANK A. WHITE, JR.

OSCAR HIETZ.

O

OSCAR HIETZ, a resident of this city, is a well-known and successful business man. He has been engaged in the business of ...

THE E. ALSDORF CO.

NO business has had in the past ten years, and indeed is now having, such a successful run in this country, and throughout the world, as that in which the above mentioned firm are engaged, that of the manufacture, sale and exchange and repairing of bicycles. The wheel, as it is now termed, has a popularity never before enjoyed by any mechanical device. Great establishments, with immense capital, all over the world, are turning out wheels, not by the thousand, but the hundreds of thousands, and giving employment to hundreds of thousands of men and women. A visit to the establishment of the E. Alsdorf Co., would not be only instructive, but full of interest, whether the desire of the visitor lies in the direction of a purchase of a wheel, for their own delectation or amusement, or just to see them in their sparkling beauty when new, and before they have been taken to the road to answer the call of the rider, fast or slow. Here they will find the cycles harnessed for the show, standing in their neat little stalls, like petted racers; equines, tireless indeed, always ready, without oats, hay, straw or fodder of any kind, the owner touches the pedal, this carrier steed is off and away to wherever the gentlest touch may guide. So easy a lesson has the riding of the bicycle become that it requires, for a novice even, only a few hours study and practice to learn. We were wont to wonder but a few years since, where the little children got their wee little wheels, but that wonder has long ceased, since a visit to the E. Alsdorf Co.'s warerooms opened up the secret, where carefully stalled in their capacious exhibition and salesroom, bright as brand new buttons, were ranged in order and in all sizes, children's wheels, as well as wheels for people full grown, some of the former, that is to say, some of the little ones, were just as cunning and cute as cunning and cute could be, and we became satisfied, right soon, that they came from the E. Alsdorf Co., or some other like concern, who knew just how to cater for the young. Now you have the explanation, why silver hair and ruddy cheeks looked so pretty and smiled so sweet, as they returned a salute as their wheel rolled by.

It's the happy boy or girl who can persuade *pater familias* to yield his objections, financially, to buying the pretty wheel. Since the most of the youngsters go mounted, the major part must have succeeded in levelling all obstacles. We trust it will not be considered in the line of giving away a secret when we say that the E. Alsdorf Co. had

THE E. ALSDORF CO.'S STORE.

much to do in conferring that boon upon the ladies, of giving them a share in the pleasant recreation from which they had before been barred by a foolish prejudice. After the visitor has furnished himself, or himself and family, with the means of locomotion and pleasure seeking, he must not forget that the New Home Sewing Machine has its abiding place with the E. Alsdorf Co., thousands of which this company has transferred to the sewing rooms of the ladies, all of which have proven satisfactory, for the New Home, is indeed, the peerless among machines. Up from the workshop comes the cycle and sewing machine in excellent order and neatly repaired. But yet the most musical part of the business story remains untold. The story is simple and easily explained. Everybody in this world has a mission to fill; their's is to put into homes one of their sweet-toned pianos on such easy terms the payments will be hardly felt. Next to the New Home comes the piano for the household.

E. ALSDORF, TREASURER AND MANAGER

J. HOLMES, PRESIDENT
